COREENERGY
Infrastructure Trust, Inc.

**Annual
Report**

COMPANY PROFILE

CorEnergy, the first publicly listed energy infrastructure Real Estate Investment Trust (REIT), primarily owns U.S. real property assets used by upstream and downstream energy companies under long-term triple net participating leases. These utility-like assets include pipelines, storage tanks, transmission lines and gathering systems. CorEnergy's objective is to provide stockholders with a stable and growing cash dividend, supported by long-term contracted revenue from operators of our assets.

ENERGY AND POWER INDUSTRY FOCUSED PORTFOLIO

Midstream — assets used in the gathering, storing and transmission of energy resources and their byproducts in a form that is usable by wholesale power generation, utility, petrochemical, industrial and gasoline customers, including pipelines, liquefied natural gas facilities and other related energy infrastructure real property assets.

Downstream — assets used to distribute refined products, such as customer-ready natural gas, natural gas liquids, propane and gasoline, to end-user customers, and the transmission and distribution of electricity.

CHARACTERISTICS OF INFRASTRUCTURE ASSETS

- Long-lived infrastructure critical to customers' operations
- Recurring, utility-like revenues and stable cost structure
- Demand largely unaffected by energy price changes
- High barriers to entry due to strategically located real property assets

ASSET DIVERSIFICATION

	ASSET	CATEGORY	2014 REVENUE	LOCATION
 O&G	Pinedale LGS	Liquids gathering system for oil & gas production	\$20.3	WY
 Pipeline	MoGas Pipeline	Interstate natural gas pipeline supplying utilities	\$1.3*	MO-IL
 Storage	Portland Terminal	Storage & transportation facility for petroleum products	\$5.4*	OR
 Pipeline	Omega Pipeline	Natural gas utility supplying end users at Fort Leonard Wood	\$9.7	MO
 O&G	Black Bison Water	Salt water disposal wells to support oil & gas production	\$1.1*	WY
 Trans line	EIP	Electric power transmission	\$2.5	NM
	TOTAL		\$40.3	

*Partial-year revenue for assets acquired in 2014

DIVIDENDS PER SHARE¹

¹ Q4 exit dividend in each fiscal year, annualized

FY 2012 ended November 30, 2012; FY 2013 and FY 2014 ended December 31 of those years

DEAR FELLOW STOCKHOLDERS,

CorEnergy achieved substantial growth in 2014 – our second full year as a REIT – building on steady strides made since shareholders approved our REIT strategy in 2011. We demonstrated the viability of that strategy by investing \$190 million in acquisitions and capital expansion projects in 2014, increasing our annualized dividend by 4 percent, and significantly increasing our visibility in the capital markets. Each of these accomplishments contributes to the resiliency of our dividend. We primarily target mission-critical infrastructure, which supports energy production and distribution activities. Utility-like assets such as pipelines and storage are necessary for the distribution of energy commodities, and we believe that our revenue model creates long-term visible revenue supporting our dividend.

ACQUISITIONS AND CAPITAL EXPANSION PROJECTS

Strategic transactions in 2014 expanded and diversified CorEnergy's footprint in energy infrastructure.

Our largest acquisition of the year was CorEnergy's purchase of the MoGas Pipeline System for \$125 million in cash. The 263-mile interstate pipeline is a critical link for natural gas supplies in the St. Louis region and central Missouri. MoGas provides a steady revenue stream backed by contracts with credit-worthy utilities. We have highlighted a case study on MoGas in this report.

Early in 2014 we acquired the Portland Terminal Facility, a petroleum products terminal facility next to the Willamette River in Portland, Oregon, for \$40 million in cash. We have invested \$6 million since then in capital improvements. The terminal is capable of receiving, storing and delivering heavy and refined petroleum products. The Portland Terminal Facility is leased to a subsidiary of Arc Logistics Partners.

We also financed the acquisition of salt water disposal (SWD) properties and related capital improvements in Wyoming and North Dakota. These facilities help producers manage flowback and produced water from oil and gas-producing wells. The financing projects are secured by SWD properties, providing both base and contingent interest income for us.

DIVIDENDS AND DISTRIBUTION GROWTH

CorEnergy's objective is to provide stockholders with a stable and growing cash dividend, supported by long-term contracted revenue from operators of our assets. In 2014 we increased our annualized dividend by 4 percent to \$0.52 per share.

Dividends are adequately supported by our operating results: In 2014 CorEnergy delivered \$0.56 per share in Adjusted Funds from Operations (AFFO), an increase of 7.7 percent from \$0.52 in 2013.

We believe that revenue generated by our infrastructure will support sustainable dividends going forward, and we have announced our expectation that our annualized dividend will grow to \$0.54 cents per share, effective for the quarter ending March 31, 2015.

INCREASED VISIBILITY IN CAPITAL MARKETS

In 2014 institutional stock ownership of the CORR common stock increased to approximately 55 percent. In addition, CORR joined several market benchmark indexes that broadened CORR's exposure across the investment community and brought added liquidity to the Company's shareholders: the Russell 2000, Russell 3000, Russell Microcap and Russell Global equity indexes, as well as the FTSE NAREIT Composite, All Equity REITs and Infrastructure REITs indexes.

In January 2015 we conducted a successful public offering of perpetual Series A Cumulative Redeemable Preferred Stock, which raised over \$54 million in net proceeds, strengthening CorEnergy's balance sheet by repaying indebtedness under CorEnergy's revolving line of credit and further positioning the Company for growth. The preferred stock trades on the NYSE under the ticker "CORRPrA." Following the offering and repayment of the revolver, we had pro forma liquidity of approximately \$120 million available for future investment.

"CorEnergy's objective is to provide stockholders with a stable and growing cash dividend."

Our Preferred was not rated by an agency and it priced at an annual dividend of 7.375%. We welcome our new Preferred shareholders to our Company, with the assurance that our common equity goal of dividend stability and long-term dividend growth provides a significant margin of safety to the Series A Preferred.

2015 OUTLOOK

We are pleased with our balance sheet position at the beginning of 2015, and with the confirmation of our strategy with multiple operating businesses. We are mindful that asset growth by itself is not our goal, but that diversification reduces risk to our stockholders. We are disciplined and selective about pursuing assets with credible counterparties, which also will be accretive to CorEnergy's dividends per share.

In a changing energy environment, CorEnergy provides a vehicle for investors to participate in owning energy infrastructure with an experienced management team and the advantages of the REIT structure. For partners, CorEnergy provides opportunities to finance or monetize critical assets, with an attractive cost of capital, while retaining full operational control.

We appreciate your continued engagement with CorEnergy and our team.

RICHARD C. GREEN
Executive Chairman

DAVID J. SCHULTE
President and CEO

CASE STUDY: MOGAS

In November 2014, CorEnergy acquired the MoGas Pipeline System, an interstate pipeline that is a critical supplier of natural gas to customers in the St. Louis region and central Missouri.

CorEnergy paid \$125 million in cash for the MoGas Pipeline, which is now CorEnergy's second largest asset. The transaction was funded through net proceeds of \$96 million from a public offering of common stock and borrowings under the Company's credit facility. The accretive transaction enabled CorEnergy to announce its intention to raise the dividend by 4% beginning in the first quarter of 2015.

The 263-mile MoGas Pipeline System originates in northeast Missouri and extends into western Illinois and central Missouri. The pipeline system, which is regulated by the Federal Energy Regulatory Commission, delivers natural gas to investor-owned and municipal local distribution systems. The MoGas Pipeline receives natural gas from major supply lines at three receipt points and delivers that gas at 22 delivery points.

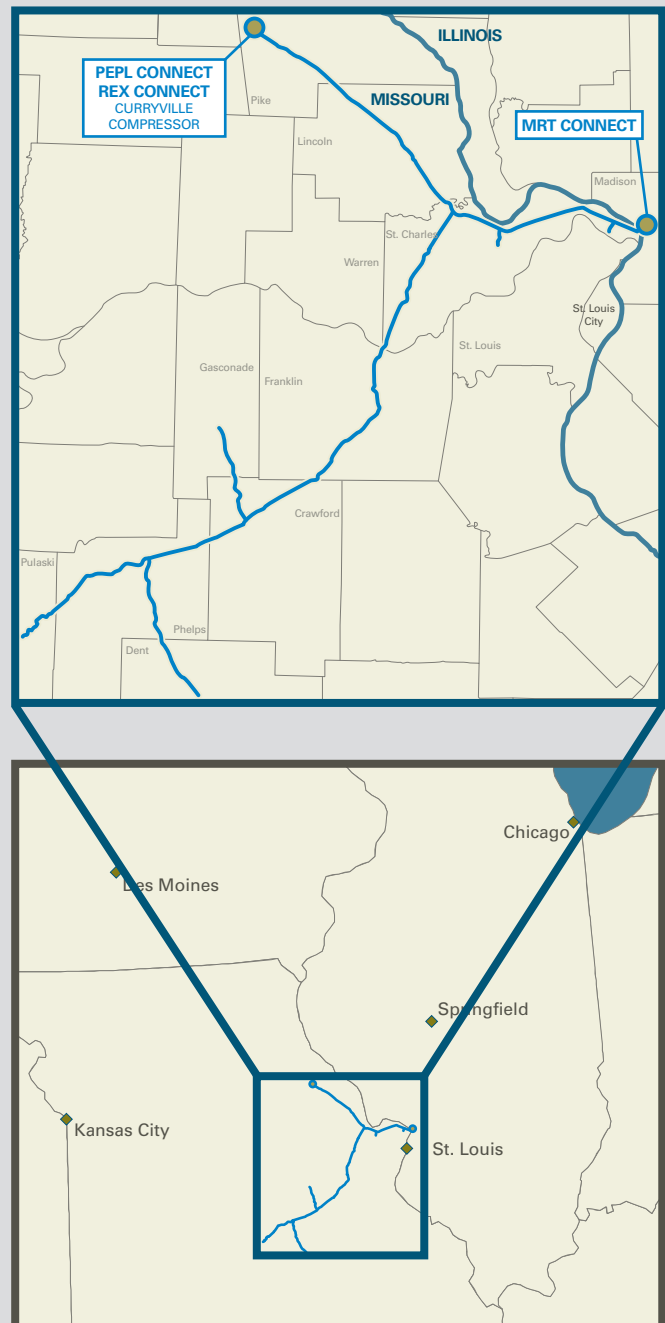

Primary customers include Laclede Gas Company and Ameren Missouri, both serving the St. Louis metropolitan area; municipal utilities in central Missouri; and Omega Pipeline, serving Fort Leonard Wood in central Missouri. The MoGas Pipeline has eight firm transportation customers.

Key characteristics of the MoGas Pipeline System include:

- Steady revenue stream with long-tenured, creditworthy customers

- Stable history of both firm and interruptible contracted volumes
- REIT-qualifying real property assets, as well as operations in a taxable REIT subsidiary

Acquiring the MoGas interstate pipeline further diversified CorEnergy's portfolio of energy infrastructure assets used by utilities, storage terminal operators, and oil and gas producers.

PART I

ITEM 1. BUSINESS

GENERAL

CorEnergy Infrastructure Trust, Inc. ("CorEnergy") was organized as a Maryland corporation and commenced operations on December 8, 2005. As used in this report, the terms "we", "us", "our" and the "Company" refer to CorEnergy and its subsidiaries. Please refer to the Glossary of Defined Terms presented at the end of this Item 1 for definitions of additional capitalized terms and abbreviations used in this report. Prior to 2011 we operated as a business development company under the name Tortoise Capital Resources Corporation and invested primarily in securities of privately held and micro-cap public companies operating in the U.S. energy sector. In April 2011, we withdrew our election to be treated as a business development company. We do not plan on making additional investments in securities (other than short-term, highly liquid investments to be held pending acquisition of real property assets) and intend to liquidate our legacy private securities investments in an orderly manner. We have elected REIT status for U.S. federal income tax purposes, commencing with calendar year 2013. Our REIT election, assuming continuing compliance with the then applicable qualification tests, will continue in effect for subsequent taxable years.

COMPANY OVERVIEW

CorEnergy, the first publicly listed energy infrastructure Real Estate Investment Trust (REIT), primarily owns assets in the midstream and downstream U.S. energy sectors that perform utility-like functions, such as pipelines, storage terminals, and transmission and distribution assets. Our objective is to provide stockholders with a stable and growing cash dividend, supported by long-term contracted revenue from operators of our assets, primarily under triple-net participating leases. We believe our leadership team's energy and utility expertise provides CorEnergy with a competitive advantage to own and acquire U.S. energy infrastructure assets in a tax-efficient, transparent, investor-friendly REIT.

We expect our leases to provide us with contracted base rent, plus participating rent based upon asset-specific criteria. The energy industry commonly employs contracts with participating features, and we provide exposure to both the risk and opportunity of utilization of our assets, which we believe is a hallmark of infrastructure assets of all types. Our participating triple-net leases, and our participating mortgages, require the operator to pay all expenses of the business including maintaining our assets in good working order.

Our assets are primarily mission-critical to our customers, in that utilization of our assets is necessary for the business they seek to conduct and their rental payments are an essential operating expense. For example, our gathering system assets are necessary to the exploration of upstream natural gas reserves, so the operators' lease of those assets is economically critical to their operations. Some of our assets are subject to rate regulation by FERC or state public service commissions. In most cases, we believe our assets are essential to the conduct of the business of our customers.

We intend to distribute substantially all of our cash available for distribution, less prudent reserves, on a quarterly basis. We believe that our base rent escalation provisions and participation features should generate 1-3 percent distribution growth, which, together with prudent acquisitions, should support 3-5 percent annual distribution growth over the long term. Since qualifying as a REIT in 2013, we have grown our annualized dividend from \$0.50 per share to an expected \$0.54 per share in 2015. Our management contract includes incentive provisions, aligning our leadership team with our stockholders' interests in raising the dividend only if we believe the rate is sustainable.

2014 Highlights

Highlighted below are key transactions completed during our fiscal year ended December 31, 2014 and transactions completed subsequent to our fiscal year end but prior to the filing of this report:

During the fiscal year ended December 31, 2014

- *Portland Terminal Facility Acquisition and Lease - \$40 million*
- *Black Bison Note Receivable - \$15.3 million*
- *Four Wood Note Receivable - \$5 million*
- *MoGas Pipeline System Acquisition - \$125 million*
- *VantaCore sale to Natural Resource Partners - \$13.6 million proceeds to the Company*
- *Common Equity Offerings in January and November - \$150 million combined gross proceeds*

- *New Revolving Line of Credit - \$90 million*

January 2015

- *Series A Preferred Offering - \$56 million, gross proceeds*

For additional details concerning each of these transactions, see "Recent Transactions" on page 7 below.

Assets and Private Equity Investments

Most of our REIT qualifying and other energy infrastructure assets have been acquired at various times since June, 2011, while our legacy private equity investments generally have been liquidated in accordance with the plans of those entities. Our business currently consists of the assets described below.

Pinedale Liquids Gathering System

The Pinedale LGS assets are triple-net leased to a subsidiary of, and guaranteed by, Ultra Petroleum Corp. pursuant to the Pinedale Lease Agreement. The Prudential Insurance Company of America owns an 18.95 percent economic interest in the Pinedale LGS as a co-investor with us.

During the initial fifteen-year term of the Pinedale Lease Agreement, we will receive a fixed minimum annual rent ("base rent") of \$20 million, adjusted annually for changes based on the CPI. The annual adjustment for changes in the CPI commenced January 1, 2014 (subject to a 2 percent annual cap) with an increase of 1.53 percent to base rent. We also are eligible for a variable rent component based on the increase in volumes, if any, of liquid hydrocarbons and water that flowed through the Pinedale LGS over a baseline established at inception of the lease, subject to a maximum annual rental payment during the initial fifteen year term of \$27.5 million.

The Pinedale LGS consists of more than 150 miles of pipelines with 107 receipt points, and four central storage facilities that are utilized by Ultra Petroleum as a method for the gathering of commingled hydrocarbon stream. This stream is separated into its components of water, condensate and natural gas, for the purpose of subsequently storing, selling or disposing of these separated components. Condensate is a valuable hydrocarbon commodity that is sold by Ultra Petroleum; water is transported to disposal wells or a treatment facility for re-use; and natural gas is sold by Ultra Petroleum or otherwise used by Ultra Petroleum for fueling on-site operational equipment. Ultra Petroleum's non-operating working interest partners in the Pinedale field where the Pinedale LGS is located pay Ultra Petroleum a fee for the use of Ultra Petroleum's LGS. To date, no major operational issues have been reported with respect to the Pinedale LGS. We believe that the Pinedale LGS is critically necessary to support the exploration of reserves for Ultra Petroleum, which reports the rental expense as part of its Lifting and Operating Expenses ("LOE") in the field.

Ultra Petroleum operates approximately 82 percent of its operated wells in the Pinedale field. The financial condition of Ultra Petroleum will have a major impact on our results of operation, ability to service our indebtedness and ability to make distributions. For additional information, see "Major Tenants" under Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-K.

Portland Terminal Facility

The Portland Terminal Facility is triple-net leased on a long-term basis to Arc Terminals pursuant to the Portland Lease Agreement, which is guaranteed by Arc Logistics. The Portland Lease Agreement grants Arc Terminals substantially all authority to operate the Portland Terminal Facility. During the initial term, Arc Terminals will make base rental payments and variable rent payments based on the volume of liquid hydrocarbons that flowed through the Portland Terminal Facility over a baseline established at inception of the lease. The base rent in the initial year of the Portland Lease Agreement increased to approximately \$418 thousand per month starting with August 2014 and each month thereafter. The base rent is also expected to increase based on a percentage of specified construction costs incurred by LCP Oregon, estimated at \$10 million. Assuming such improvements are completed, the base rent will increase by approximately \$95,800 per month. As of December 31, 2014, additional spending on terminal-related projects totaled approximately \$6.0 million. Base rent as of December 31, 2014 was approximately \$471 thousand. The base rent is not influenced by the flow of hydrocarbons. Variable rent is capped at 30 percent of total rent, which would be the equivalent of the Portland Terminal Facility's expected throughput capacity.

The Portland Terminal Facility is a rail and marine facility property adjacent to the Willamette River in Portland, Oregon. The 39-acre site has 84 tanks with a total storage capacity of approximately 1.5 million barrels. The Portland Terminal Facility is capable of receiving, storing and delivering crude oil and refined petroleum products. Products are received and delivered via railroad or marine (up to Panamax-size vessels). The marine facilities are accessed through a neighboring terminal facility via an owned pipeline. The Portland Terminal Facility offers heating systems, emulsions and an on-site product testing laboratory as ancillary services.

Arc Logistics is a publicly traded limited partnership principally engaged in the terminaling, storage, throughput and transloading of crude oil and petroleum products with energy logistics assets strategically located in the East Coast, Gulf Coast and Midwest regions of the U.S. Arc Terminals is a wholly-owned subsidiary of Arc Logistics.

MoGas Pipeline System

MoGas is the owner and operator of the MoGas Pipeline System, an approximately 263 mile FERC-regulated interstate natural gas pipeline in and around St. Louis and extending into central Missouri. MoGas receives natural gas at three separate receipt points from third party interstate gas pipelines and delivers that gas through 22 different delivery points to investor-owned natural gas distribution companies, municipally owned distribution systems and end users. MoGas has eight firm transportation customers. We provide REIT-qualifying intercompany mortgage financing secured by MoGas Pipeline System. We provide REIT qualifying intercompany mortgage financing secured by the real property assets of MoGas and UPS which allows for a maximum principal balance of \$90 million.

Eastern Interconnect Project

We own a 40 percent undivided interest in the Eastern Interconnect Project (EIP) transmission assets, which move electricity across New Mexico between Albuquerque and Clovis. The physical assets include 216 miles of 345 kilovolts transmission lines, towers, easement rights, converters and other grid support components. We entered into an agreement to sell our interest in the EIP upon lease termination on April 1, 2015 to the tenant, Public Service Company of New Mexico.

Omega Pipeline

Omega Pipeline Company, LLC is a natural gas service provider located primarily on the Fort Leonard Wood military post in south-central Missouri. Omega has a long-term contract with the Department of Defense, which is currently subject to renewal in 2015, to provide natural gas and gas distribution services to Fort Leonard Wood through Omega's approximately 70 mile pipeline distribution system on the post. In addition, Omega provides natural gas marketing services to several customers in the surrounding area. We provide REIT qualifying intercompany mortgage financing secured by Omega's real property assets which allows for a maximum principal balance of \$5.3 million.

Energy Infrastructure Financing Investments

We currently have provided financing commitments totaling \$26.3 million to two owners and operators of real property infrastructure assets, secured by such assets and related equipment, as well as by the outstanding equity of the borrowers. Both of these loans include participating features pursuant to which we may receive additional interest tied to increases in utilization of the underlying facilities, and one also includes an equity enhancement. See the section titled "Asset Portfolio and Related Developments" in Item 7 and Note 6 of the Notes to the Consolidated Financial Statement included in this report for additional information concerning these investments.

Lightfoot Capital Partners, LP and Lightfoot Capital Partners GP LLC

We hold a direct investment in Lightfoot Capital Partners, LP (6.6 percent) and Lightfoot Capital Partners GP LLC (1.5 percent). Lightfoot's assets include an ownership interest in Gulf LNG, a 1.5 billion cubic feet per day ("bcf/d") receiving, storage, and regasification terminal in Pascagoula, Mississippi, and common units and subordinated units representing an approximately 40 percent aggregate limited partner interest, and a noneconomic general partner interest, in Arc Logistics Partners LP (NYSE: ARCX). We hold observation rights on Lightfoot's Board of Directors.

Competitive Advantages

We believe that we are well-positioned to meet the capital needs of companies within the U.S. energy infrastructure sector for the following reasons:

- *Our assets generate stable cash flows without direct Commodity Exposure.* We generate revenue by leasing infrastructure assets, or offering loans secured by infrastructure assets, to energy companies. Our leases and loans are long-term and are structured to include a large fixed payment that is payable irrespective of the use of the asset and are not impacted by commodity price movements.
- *Attractive Partner for Energy Infrastructure Companies.* As a REIT, we are by nature a passive, long-term partner. Our willingness to customize our long-term leases and structured financings to meet the control and economic requirements of our lessees has been a key component of our success. When combined with our knowledge of the economic and regulatory environment faced by energy companies, we believe that we are the partner of choice for these companies.

- *Broad Energy Infrastructure Scope.* The universe of assets that may be owned by a REIT has expanded significantly. The Internal Revenue Service has, through a series of private letter rulings, as well as proposed regulations, described new types of assets in the energy sector which are eligible to be owned by a REIT, including electric transmission and distribution systems, pipeline systems, and storage and terminaling systems. While only the requesting party may rely on private letter rulings, they give insight into the potential for REIT qualifying assets. We also intend to acquire assets that do not generate qualifying income for MLPs, such as electric power transmission and distribution assets.
- *Disciplined Investment Philosophy.* Our investment approach emphasizes overall asset operational and financial performance with the potential for enhanced returns through incremental asset growth, capital appreciation, and minimization of downside risk. Our process for selecting investments involves an assessment of the overall attractiveness of the specific subsector of the energy sector in which a prospective tenant company is involved; such company's specific competitive position within that subsector; operational asset engineering due diligence; potential commodity price impact, supply and demand and regulatory concerns; the stability and potential growth of the prospective real property asset's cash flows; the prospective operating company's management track record; and our ability to structure an attractive investment.
- *Experienced Management Team.* We are externally managed by Corridor InfraTrust Management, LLC. The five principals of Corridor have an average of over 25 years of experience in energy operations of multi-national electric and gas utilities and other national energy marketing and trading businesses and in optimizing portfolios for real property energy asset investments. Based on their real property asset operational experience and strong industry relationships, we believe that the principals of Corridor provide the expertise and knowledge necessary to acquire real property assets with strong performance standards.

Market Opportunity

We believe the environment for acquiring energy infrastructure real property assets is attractive for the following reasons:

- *Energy infrastructure provides essential services, and the demand for energy resources is expected to grow in the future.* We believe energy infrastructure is the backbone of the U.S. economy. The energy infrastructure sector includes the pipes, wires and storage facilities that connect and deliver some of our most critical resources: oil, natural gas, and electricity.

Midstream pipeline companies own and operate essential, long-lived assets and generally have steady, recurring, fee-based cash flows. Due to the characteristics of the assets they own, midstream pipeline MLPs and companies are a good proxy for the Company's market opportunity. As of December 31, 2014, pipeline MLPs and pipeline companies had a market capitalization of \$821 billion. This is in comparison to a market capitalization of approximately \$30 billion in 2002 for the entire MLP sector. Due to the current need for new pipeline infrastructure in various regions of the U.S. that are relatively new to oil and gas activity, we expect growth and asset acquisition opportunities in this sector to continue via the construction of new pipelines and improvements to existing pipelines.

In addition, the Edison Electric Institute estimates that from 2015 to 2017, \$58 billion will be required to upgrade and construct new electric power transmission lines in the U.S. This creates incremental acquisition opportunities in a growing sector that is not directly correlated to crude oil market dynamics.

- *Investment is needed in U.S. energy infrastructure.* Despite low commodity prices, strong production is expected to continue in many regions of the US, such as the Bakken Shale in North Dakota, the Eagle Ford shale in South Texas and the Permian basin in West Texas. However, due to the location of this production; there is still a need for additional pipeline infrastructure. This presents a sizable market opportunity for the financing of energy infrastructure assets. The project backlog for this takeaway capacity continues to be robust, with an estimated \$135 billion in projects through 2017. The visible growth from projects underway provides clarity to cash flows and growth potential in 2015 and into 2016. Furthermore, these capital expenditures are supported largely by shipper commitments.
- *There are a number of attractive operating companies with capital needs.* We believe that the capital expansion plans of operating companies in the upstream and midstream segments of the U.S. energy infrastructure sector provide us with attractive acquisition opportunities. Due to the inelastic demand for energy infrastructure assets, these opportunities exist irrespective of the commodity price environment. In times of high commodity prices, companies eager to expand operations seek capital to finance infrastructure growth. When commodity prices are low, upstream companies seek to monetize midstream assets, as midstream asset valuations hold up well even as commodity prices fall. In addition, we can offer capital for assets that currently do not generate qualifying income for MLPs, such as electric power transmission and distribution systems.

Targeted Investment Characteristics

We pursue our business objective by investing principally in the energy infrastructure sector. The energy infrastructure sector broadly includes midstream, downstream and upstream assets. We intend to focus primarily on midstream and downstream assets as described below.

- *Midstream* - the gathering, processing, storing, terminaling and transporting of energy resources and their byproducts in a form that is usable by wholesale power generation, utility, petrochemical, industrial and refined products customers, including pipelines, natural gas processing plants, liquefied natural gas facilities and other energy infrastructure companies.
- *Downstream* - the refining of energy sources, and the marketing and distribution of products, such as natural gas, propane and gasoline, to end-user customers; and the transmission and distribution of electricity from coal, nuclear, natural gas, agricultural, thermal, solar, wind and biomass power generation facilities.

Our targeted real property assets have the following characteristics:

- *Long-Life Assets with Stable Cash Flows and Limited Commodity Price Sensitivity.* We own, and seek to acquire, real property assets having the potential to generate stable cash flows over long periods of time. We have historically invested in companies that own and operate assets with long useful lives and that generate cash flows by providing critical services primarily to the producers or end-users of energy. We have attempted to limit the direct exposure to energy commodity price risk in our portfolio.
- *Experienced Management Teams with Energy Focus.* We have targeted assets operated by management teams that have a track record of success and that have substantial knowledge in particular segments of the energy sector or with certain types of assets.
- *Fixed Asset-Intensive Investments.* Most of our investments have been made in companies with a relatively significant base of fixed assets. Fixed-asset investments characteristically display such attributes as long-term stability, low volatility, diversification via low correlation and relatively inelastic demand.
- *Limited Technological Risk.* We generally do not target acquisition opportunities involving the application of new technologies or significant geological, drilling or development risk.
- *Growth Opportunities.* We generally will seek to enter into leases that provide base rent and participating rent over the term of the lease. These increases are expected to be fixed or tied generally to increases in indices such as the Consumer Price Index (the "CPI"). We may also attempt to obtain equity enhancements in connection with transactions. These equity enhancements may involve warrants exercisable at a future time to purchase stock of the tenant or borrower or their parent.

Acquisition Strategies and Due Diligence

We generally rely on our own analysis to determine whether to make an acquisition. Our analysis may take into consideration, among other things, the terms and conditions of the particular lease transaction, the quality of the lessee's credit and the conditions of the credit markets at the time the lease transaction is negotiated. The value may be greater than the construction cost or the replacement cost of a property, and the actual sale price of a property if sold may be greater or less than the acquisition cost. In cases of special purpose real estate which we expect to acquire, a property is examined in light of the prospects for the tenant/borrower's enterprise and the financial strength and the role of that asset in the context of the tenant's overall viability. Operating results of properties and other collateral may be examined to determine whether or not projected income levels are likely to be met. In evaluating net lease transactions, we generally consider, among other things, the following aspects of each transaction:

- *Tenant/Borrower Evaluation* - We evaluate each potential tenant or borrower for its creditworthiness, typically considering factors such as management experience, industry position and fundamentals, operating history, and capital structure, as well as other factors that may be relevant to a particular acquisition. We seek opportunities in which we believe the tenant may have a stable or improving credit profile or credit potential that has not been recognized by the market. In evaluating a possible investment, the creditworthiness of a tenant or borrower often will be balanced with the value of the underlying real estate, particularly if the underlying property is specifically suited to the needs of the tenant. Whether a prospective tenant or borrower is creditworthy will be determined by our management team and reviewed by the investment committee, as described below. Creditworthy does not necessarily mean "investment grade."
- *Important to Tenant/Borrower Operations* - We generally will focus on properties that we believe are essential or important to the ongoing operations of the tenant. We believe that this type of property will provide a relatively low risk of loss in the case of a potential bankruptcy or abandonment scenario since a tenant/borrower is less likely to risk the loss of a

critically important lease or property. Additionally we focus on assets which are necessary for the economic production of hydrocarbon resources, and which would remain necessary to any owner of the assets.

- *Diversification* - We attempt to diversify our portfolio to avoid dependence on any one particular tenant, borrower, collateral type, and geographic location within the U.S. or tenant/borrower industry. By diversifying, we seek to reduce the adverse effect of a single under-performing investment or a downturn in any particular asset or geographic region within the U.S.
- *Lease Terms* - Generally, the net leased properties we will acquire will be leased on a full recourse basis to the tenants or their affiliates. In addition, we generally will seek to include a clause in each lease that provides for increases in rent over the term of the lease. These increases are fixed or tied generally to increases in indices such as the CPI. The lease will also generally seek to provide for participation in gross revenues of the tenant at the property, thereby providing exposure to the commercial activity of the tenant, and providing the tenant some flexibility in lease terms. Alternatively, a lease may provide for mandated rental increases on specific dates, and we may adopt other methods in the future.
- *Collateral Evaluation* - We review the physical condition of the property and assess the likelihood of replacing the rental payment stream if the tenant defaults. We also generally engage a third party to conduct, or require the seller to conduct a preliminary examination, or Phase 1 assessment, of the site to determine the potential for contamination or similar environmental site assessments in an attempt to identify potential environmental liabilities associated with a property prior to its acquisition. If potential environmental liabilities are identified, we generally require that identified environmental issues be resolved by the seller prior to property acquisition or, where such issues cannot be resolved prior to acquisition, require tenants contractually to assume responsibility for resolving identified environmental issues post-closing and provide indemnification protections against any potential claims, losses or expenses arising from such matters.
- *Transaction Provisions to Enhance and Protect Value* - We attempt to include provisions in the leases that we believe may help protect a real property asset from changes in the operating and financial characteristics of a tenant that may affect its ability to satisfy its obligations or reduce the value of the real property asset. Such provisions include requiring our consent to specified tenant activity, requiring the tenant to provide indemnification protections, and requiring the tenant to utilize good operating practices consistent with objective criteria. We seek to enhance the likelihood of a tenant's lease obligations being satisfied through a guaranty of obligations from the tenant's corporate parent or other entity or a letter of credit. This credit enhancement, if obtained, provides additional financial security. However, in markets where competition for net lease transactions is strong, some or all of these provisions may be replaced by other measures of credit quality such as tenant investment in leasehold improvements and commercial enterprise value of the tenant business conducted in the property.

In addition, in some circumstances, tenants may retain the right to repurchase the leased property. We expect, in those situations that the option purchase price will generally be the greater of the contract purchase price or the fair market value of the property at the time the option is exercised.

- *Equity Enhancements* - We may attempt to obtain equity enhancements in connection with transactions. These equity enhancements may involve warrants exercisable at a future time to purchase stock of the tenant or borrower or their parent. If warrants are obtained, and become exercisable, and if the value of the stock subsequently exceeds the exercise price of the warrant, equity enhancements can help achieve the goal of increasing investor returns.
- *Other Real Estate Related Assets* - As other opportunities arise, we may also seek to expand the portfolio to include other types of real estate-related investments, in all cases within the energy infrastructure sector, such as:
 - equity investments in real properties that are not long-term net leased to a single-tenant and may include partially leased properties, undeveloped properties and properties subject to short-term net leases, among others;
 - mortgage loans secured by real properties including loans to our taxable REIT subsidiaries;
 - subordinated interests in first mortgage real estate loans, or B-notes;
 - mezzanine loans related to real estate, which are senior to the borrower's equity position but subordinated to other third-party financing; and
 - equity and debt securities (including preferred equity, limited partnership interests, trusts and other higher-yielding structured debt and equity investments) issued by companies that are engaged in real-estate-related businesses as defined by regulations promulgated under the Code, including other REITs.

Use of Taxable REIT Subsidiaries

We operate as a REIT and therefore are generally not subject to U.S. federal income taxes on the income and gains that we distribute to our stockholders, including the income derived through leasing fees and financing revenue from our REIT qualifying investment in energy infrastructure assets. However, even as a REIT, we remain obligated to pay income taxes on earnings from our taxable REIT subsidiaries ("TRSs"). The use of TRSs enables us to own certain assets and engage in certain businesses while maintaining compliance with the REIT qualification requirements under the Code. We may, from time to time, change the election of previously designated TRSs to be treated as qualified REIT subsidiaries ("QRSs"), and may reorganize and transfer certain assets or operations from our TRSs to other subsidiaries, including QRSs.

Regulatory and Environmental Matters

Our energy infrastructure assets and operations, as well as those of our tenants, are subject to numerous federal, state and local laws and regulations concerning the protection of public health and safety, zoning and land use, and pricing and other matters related to certain of our business operations. For a discussion of the current effects and potential future impacts of such regulations on our business and properties, see the discussion presented in Item 1A of this report under the subheading "Risks Related to Our Investments in Real Estate and the U.S. Energy Infrastructure Sector." In particular, for a discussion of the current and potential future effects of compliance with federal, state and local environmental regulations, see the discussion titled *"Costs of complying with governmental laws and regulations, including those relating to environmental matters, may adversely affect our income and the cash available for distribution"* within such section.

Financing Strategies

Consistent with our asset acquisition policies, we use leverage when available on terms we believe are favorable. The amount of leverage that we may employ will depend on our assessment of market conditions and other factors at the time of any proposed borrowing. Although we currently do not anticipate doing so, the amount of total funded debt leverage we employ may exceed 50 percent of our total assets. Secured loans which we obtain, could be recourse or non-recourse to us. A lender on non-recourse mortgage debt generally has recourse only to the property collateralizing such debt and not to any of our other assets, while full recourse financing would give the lender recourse to all of our assets. The use of non-recourse debt, helps us to limit the exposure of all of our assets to any one debt obligation. Lenders may, however, have recourse to our other assets in limited circumstances not related to the repayment of the indebtedness, such as under an environmental indemnity. We may have an unsecured line of credit that can be used in connection with refinancing existing debt and making new acquisitions, as well as to meet other working capital needs. We intend to incur debt which bears interest at fixed rates, or is effectively converted to fixed rates through interest rate caps or swap agreements.

Competition

We compete with public and private funds, commercial and investment banks and commercial financing companies to make the types of investments that we plan to make in the U.S. energy infrastructure sector. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than us. For example, some competitors may have a lower cost of funds and access to funding sources than are available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, allowing them to consider a wider variety of investments and establish more relationships than us. These competitive conditions may adversely affect our ability to make investments in the energy infrastructure sector and could adversely affect our distributions to stockholders.

RECENT TRANSACTIONS

Acquisitions

Portland Terminal Facility Acquisition. On January 21, 2014, utilizing proceeds from the concurrent common stock offering described below, our subsidiary, LCP Oregon, acquired the Portland Terminal Facility. For a further description of the Portland Terminal Facility and related information, see "Assets and Private Equity Investments" above, as well as Item 2 - Properties, the section titled "Asset Portfolio and Related Developments" in Item 7, and Note 4 of the Notes to Consolidated Financial Statements, respectively, included in this report.

MoGas Pipeline System Acquisition. On November 24, 2014, we utilized the net proceeds from the November 2014 common stock offering described below together with borrowings under the Regions Revolver to fund the acquisition of two entities that own and operate the MoGas Pipeline System by our taxable REIT subsidiary Corridor MoGas, through REIT qualifying intercompany mortgage financing secured by the assets constituting the MoGas Pipeline System. For a further description of the MoGas Pipeline System and related information concerning these transactions, see "Assets and Private Equity Investments" above, as well as Item 2 - Properties, the section titled "Asset Portfolio and Related Developments" in Item 7, and Notes 5 and 14 of the Notes to Consolidated Financial Statements, respectively, included in this report.

Investment Transactions

Black Bison Financing Notes Receivable. On March 13, 2014, our subsidiary Corridor Bison entered into a Loan Agreement with Black Bison WS, pursuant to which Corridor Bison agreed to loan Black Bison WS up to \$11.5 million. Corridor Bison increased the Loan to \$12 million on July 24, 2014. Also, on July 24, 2014, our subsidiary, CorEnergy BBWS, Inc. entered into a TRS Loan Agreement, pursuant to which CorEnergy BBWS agreed to loan Black Bison WS up to \$3.3 million. The proceeds of these financings were used by Black Bison WS and its affiliates to finance the acquisition and development of real property that will provide water disposal services for the oil and natural gas industry. See the section titled "Asset Portfolio and Related Developments" in Item 7 and Note 6 of the Notes to the Consolidated Financial Statement included in this report for additional information concerning these transactions.

Four Wood Financing Notes Receivable. On December 31, 2014, we entered into two separate loan agreements, a REIT Loan Agreement through our newly-formed, wholly owned QRS Four Wood Corridor and a TRS Loan Agreement through our pre-existing wholly owned TRS, CorPrivate, with a total commitment to lend of \$11 million, to finance the acquisition of a salt-water disposal well by the borrower, SWD Enterprises LLC. See the section titled "Asset Portfolio and Related Developments" in Item 7 and Note 6 of the Notes to the Consolidated Financial Statement included in this report for additional information concerning these transactions.

Liquidation of Private Equity Investment in VantaCore. Effective as of October 1, 2014, Natural Resource Partners L.P. completed its acquisition of VantaCore Partners LP. The Company's portion of the sale proceeds was approximately \$13.6 million, of which \$2.9 million will be held in escrow pending certain post-closing obligations or the expiration of certain time periods. See the section titled "Asset Portfolio and Related Developments" in Item 7 and Note 12 of the Notes to the Consolidated Financial Statement included in this report for additional information concerning this transaction.

Financing Transactions

January 2014 Common Stock Offering. On January 21, 2014, we completed a registered public offering of 7,475,000 shares of common stock, raising approximately \$49 million in gross proceeds (net proceeds of approximately \$45.6 million after underwriters' discount), the proceeds of which were used to acquire the Portland Terminal Facility as described above.

New Revolving Line of Credit. On September 26, 2014 we entered into the Regions Revolver, a \$30.0 million revolving credit facility with Regions Bank, then on November 24, 2014, we increased the credit facility, to \$90.0 million in conjunction with the MoGas Pipeline System acquisition described above. For additional information, see the section titled "Liquidity and Capital Resources" in Item 7, and Note 14 of the Notes to Consolidated Financial Statements, respectively, included in this report.

November 2014 Common Stock Offering. On November 17, 2014, we completed a registered public offering of 14,950,000 shares of common stock, raising approximately \$102 million in gross proceeds (net proceeds of approximately \$96 million after underwriters' discount), the proceeds of which were used to acquire the MoGas Pipeline System as described above.

January 2015 Preferred Stock Offering. On January 27, 2015, we completed a registered public offering of 2,000,000 depositary shares, each representing 1/100th of a share of the Company's 7.375% Series A Cumulative Redeemable Preferred Stock and, on February 5, 2015, we sold an additional 250,000 depositary shares pursuant to the underwriters' exercise of their over-allotment option. We used the net proceeds from this offering (approximately \$54.5 million after underwriting discount) to repay outstanding indebtedness under the Regions Revolver and for general corporate purposes.

MANAGEMENT

Our Manager

We are externally managed by Corridor. Corridor is a real property asset manager with a focus on U.S. energy infrastructure real property assets. Corridor assists us in identifying infrastructure real property assets that can be leased to businesses that make goods, provide services or own assets other than securities, and is generally responsible for our day-to-day operations.

Corridor Team

Each of our officers is an employee of Corridor or one of its affiliates. Corridor is not obligated to dedicate certain of its employees exclusively to us, nor are it or its employees obligated to dedicate any specific portion of its or their time to our business. As described below, we pay a management fee and certain other fees to Corridor, which it uses in part to pay compensation to its officers and employees who, notwithstanding that some of them also are our officers, receive no cash compensation directly from us.

We pay Corridor a management fee based on total assets under management. In aligning our strategy to focus on distributions and distribution growth, Corridor is paid an incentive fee based on increases in distributions to our stockholders. A percentage of

the Corridor incentive fee is reinvested in CorEnergy. Pursuant to a Management Agreement and an Administrative Agreement, Corridor has agreed to use its reasonable best efforts to present us with suitable acquisition opportunities consistent with our investment objectives and policies and is generally responsible, subject to the supervision and review of our Board of Directors, for our day-to-day operations.

Real Property Asset Management

The Corridor team has experience across several segments of the energy sector and is primarily responsible for investigating, analyzing and selecting potential infrastructure asset acquisition opportunities. Acquisitions and transactions are submitted to our Board of Directors for final approval following a recommendation from the management team.

We believe that effective management of our assets is essential to maintain and enhance property values. Important aspects of asset management include restructuring transactions to meet the evolving needs of current tenants, re-leasing properties, refinancing debt, selling properties and knowledge of the bankruptcy process.

We monitor, on an ongoing basis, compliance by tenants with their lease obligations and other factors that could affect the financial performance of any of our properties. Monitoring involves receiving assurances that each tenant has paid real estate taxes, assessments and other expenses relating to the properties it occupies and confirming that appropriate insurance coverage is being maintained by the tenant. We review financial statements of tenants and undertake regular physical inspections of the condition and maintenance of properties. In addition, we periodically analyze each tenant's financial condition and the industry in which each tenant operates.

Private Investment Monitoring

We monitor our private investments to determine progress relative to meeting the Company's business plan and to assess the Company's strategic and tactical courses of action. This monitoring is accomplished by attendance at Board of Directors meetings, ad hoc communications with portfolio company management, the review of periodic operating and financial reports, an analysis of relevant reserve information and capital expenditure plans, and periodic consultations with engineers, geologists, and other experts. The performance of each private portfolio company is also periodically compared to performance of similarly sized companies with comparable assets and businesses to assess performance relative to peers. Corridor's monitoring activities are expected to provide us with information that will enable us to monitor compliance with existing covenants.

Management Agreement

Under our Management Agreement, Corridor (i) presents the Company with suitable acquisition opportunities consistent with the investment policies and objectives of the Company, (ii) is responsible for the day-to-day operations of the Company, and (iii) performs such services and activities relating to the assets and operations of the Company as may be appropriate. The Management Agreement does not have a specific term, and will remain in place unless terminated by the Company or the Manager in the manner permitted pursuant to the agreement.

The terms of the Management Agreement include a quarterly management fee equal to 0.25 percent (1.00 percent annualized) of the value of the Company's Managed Assets as of the end of each quarter. For purposes of the Management Agreement, "Managed Assets" means the total assets of the Company (including any securities receivables, other personal property or real property purchased with or attributable to any borrowed funds) minus (A) the initial invested value of all non-controlling interests, (B) the value of any hedged derivative assets, (C) any prepaid expenses, and (D) all of the accrued liabilities other than (1) deferred taxes and (2) debt entered into for the purpose of leverage. For purposes of the definition of Managed Assets, the Company's securities portfolio will be valued at then-current market value. For purposes of the definition of Managed Assets, other personal property and real property assets will include real and other personal property owned and the assets of the Company invested, directly or indirectly, in equity interests in or loans secured by real estate or personal property (including acquisition related costs and acquisition costs that may be allocated to intangibles or are unallocated), valued at the aggregate historical cost, before reserves for depreciation, amortization, impairment charges or bad debts or other similar noncash reserves.

The Management Agreement includes a quarterly incentive fee of 10 percent of the increase in distributions paid over a threshold distribution equal to \$0.125 per share per quarter. The Management Agreement also requires at least half of any incentive fees to be reinvested in the Company's common stock.

Administrative Agreement

Under our Administrative Agreement, Corridor, as our administrator, performs (or oversees or arranges for the performance of) the administrative services necessary for our operation, including without limitation providing us with equipment, clerical, bookkeeping and record keeping services. For these services we pay our administrator a fee equal to 0.04 percent of our aggregate average daily Managed Assets, with a minimum annual fee of \$30 thousand.

Pursuant to the Management and Administrative Agreements, Corridor furnishes us with office facilities and clerical and administrative services necessary for our operation (other than services provided by our custodian, accounting agent, administrator, dividend and interest paying agent and other service providers). Corridor is authorized to enter into agreements with third parties to provide such services. To the extent we request, Corridor will (i) oversee the performance and payment of the fees of our service providers and make such reports and recommendations to the Board of Directors concerning such matters as the parties deem desirable, (ii) respond to inquiries and otherwise assist such service providers in the preparation and filing of regulatory reports, proxy statements, and stockholder communications, and the preparation of materials and reports for the Board of Directors; (iii) establish and oversee the implementation of borrowing facilities or other forms of leverage authorized by the Board of Directors and (iv) supervise any other aspect of our administration as may be agreed upon by us and Corridor. We have agreed, pursuant to the Management Agreement, to reimburse Corridor for all out-of-pocket expenses incurred in providing the foregoing.

We bear all expenses not specifically assumed by Corridor and incurred in our operations. The compensation and allocable routine overhead expenses of all management professionals of Corridor and its staff, when and to the extent engaged in providing us management services, is provided and paid for by Corridor and not us.

Advisory Agreement

TCA is compensated by Corridor to provide investment services related to the monitoring and disposition of our legacy private securities investments. TCA is a registered investment adviser with approximately \$17.5 billion of assets under management in the U.S. energy infrastructure sector and 61 employees as of February 28, 2015.

Employees

As we are externally managed, we have no employees at the corporate level. Our subsidiary, Omega, has one part-time and five full-time employees. Our subsidiary MoGas has 15 full-time employees.

AVAILABLE INFORMATION

Our principal executive offices are located at 1100 Walnut Street, Suite 3350, Kansas City, MO 64106. Our telephone number is (816) 875-3705, or toll-free (877) 699-2677, and our Web site is <http://coreenergy.corridortrust.com>. We are required to file reports, proxy statements and other information with the SEC. We will make available free of charge our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports on or through our Web site at <http://coreenergy.corridortrust.com> as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. This information may also be obtained, without charge, upon request by calling us at (816) 875-3705 or toll-free at (877) 699-2677. This information will also be available at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information filed by us with the SEC which is available on the SEC's Internet site at www.sec.gov. Please note that any Internet addresses provided in this Form 10-K are for informational purposes only and are not intended to be hyperlinks. Accordingly, no information found and/or provided at such Internet address is intended or deemed to be included by reference herein.

GLOSSARY OF DEFINED TERMS

Certain of the defined terms used in this report are set forth below:

1934 Act: the Securities Exchange Act of 1934, as amended

Administrative Agreement: The Administrative Agreement dated December 1, 2011, as amended effective August 7, 2012, between the Company and Corridor.

Arc Logistics: Arc Logistics Partners LP (NYSE-ARCX)

Arc Terminals: Arc Terminals Holdings LLC, an indirect wholly-owned operating subsidiary of Arc Logistics

bcf/d: billion cubic feet per day

BLM: Bureau of Land Management

Code: the Internal Revenue Code of 1986, as amended

CorPrivate: Corridor Private, Inc.

Corridor: Corridor InfraTrust Management, LLC

Corridor MoGas: Corridor MoGas, Inc.

CPI: Consumer Price Index

EIP: the Eastern Interconnect Project

EPAct 2005: the Energy Policy Act of 2005

FERC: Federal Energy Regulatory Commission

Four Wood Corridor: Four Wood Corridor, LLC

GAAP: U.S. generally accepted accounting principles

LDCs: local distribution companies

Lightfoot: collectively, Lightfoot Capital Partners, LP and Lightfoot Capital Partners GP LLC

Management Agreement: the Management Agreement effective July 1, 2013, as amended effective January 1, 2014, between the Company and Corridor

MoGas: MoGas Pipeline LLC

MoGas Pipeline System: an approximately 263 mile interstate natural gas pipeline system in and around St. Louis and extending into central Missouri, owned and operated by MoGas

Mowood: Mowood, LLC, the holding company of Omega Pipeline Company, LLC

NGA: Natural Gas Act of 1938

NGPA: Natural Gas Policy Act of 1978

Omega: Omega Pipeline Company, LLC

Pinedale LGS: the Pinedale Liquids Gathering system, a system of pipelines and central gathering facilities located in the Pinedale Anticline in Wyoming

Pinedale Lease Agreement: the December 2012 agreement pursuant to which the Pinedale LGS assets are triple-net leased to a wholly owned subsidiary of Ultra Petroleum

Pinedale LP: Pinedale Corridor, LP

Pinedale GP: the general partner of Pinedale LP

Portland Lease Agreement: the January 2014 agreement pursuant to which the Portland Terminal Facility is triple-net leased to Arc Terminals, a wholly owned subsidiary of Ultra Petroleum

Portland Terminal Facility: a petroleum products terminal located in Portland, Oregon

PNM: Public Service Company of New Mexico

Prudential: The Prudential Insurance Company of America

QDI: qualified dividend income

QRS: qualified REIT subsidiary

Regions Revolver: the Company's \$90 million revolving line of credit facility with Regions Bank

REIT: real estate investment trust

SWDE: SWD Enterprises, LLC

Tcfe: Trillion cubic feet equivalent

TCA: Tortoise Capital Advisors, L.L.C.

TRS: taxable REIT subsidiary

Ultra Petroleum: Ultra Petroleum Corp. (NYSE-UPL)

Ultra Wyoming: Ultra Wyoming LGS LLC, an indirect wholly owned subsidiary of Ultra Petroleum

UPS: United Property Systems, LLC

VantaCore: VantaCore Partners LP

ITEM 1A. RISK FACTORS

There are many risks and uncertainties that can affect our future business, financial performance or share price. Many of these are beyond our control. A description follows of some of the important factors that could have a material negative impact on our future business, operating results, financial condition or share price. This discussion includes a number of forward-looking statements. You should refer to the description of the qualifications and limitations on forward-looking statements in the first paragraph under Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Form 10-K.

Risks Related to Our Investments in Real Estate and the U.S. Energy Infrastructure Sector

The majority of our infrastructure real property assets are leased to a single tenant.

The Pinedale LGS represented approximately 47 percent of our total assets as of December 31, 2014 and the lease payments under the Pinedale Lease Agreement with Ultra Wyoming represented approximately 50 percent of our total revenue for the year ended December 31, 2014. Ultra Wyoming or Ultra Petroleum, one of the guarantors of Ultra Wyoming's obligations under the Pinedale Lease Agreement and Ultra Wyoming's ultimate parent company, may experience a downturn in its business, which may weaken its financial condition and result in Ultra Wyoming's failure to make timely lease payments or give rise to default under the Pinedale Lease Agreement or Ultra Petroleum's failure to meet its related parent guaranty obligations. In the event of a default by Ultra Wyoming or Ultra Petroleum, we may experience delays in enforcing our rights as landlord and may incur substantial costs in protecting our investment. In addition, if Ultra Wyoming fails to renew the Pinedale Lease Agreement and we cannot find a new lessee at the same or better lease rates, the expiration of the Pinedale Lease Agreement in 2027 could have a material adverse impact on our business and financial condition.

The following is a brief summary of certain risk factors disclosed by Ultra Petroleum in its most recent Annual Report on Form 10-K, which should be carefully considered before you decide to invest in shares of our common stock. For a complete discussion of the risks that may be applicable to Ultra Petroleum, please review its complete Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

- Ultra Petroleum's reserve estimates may turn out to be incorrect if the assumptions upon which these estimates are based are inaccurate. Any material inaccuracies in these reserve estimates or underlying assumptions will materially affect the quantities and present value of Ultra Petroleum's reserves.
- Competitive industry conditions may negatively affect Ultra Petroleum's ability to conduct operations.
- Factors beyond Ultra Petroleum's control affect its ability to effectively market production and may ultimately affect its financial results.

- A decrease in oil and natural gas prices may adversely affect Ultra Petroleum's results of operations and financial condition.
- A substantial portion of Ultra Petroleum's reserves and production is natural gas. Prices for natural gas have been lower in recent years than at various times in the past and may remain lower in the future. Sustained low prices for natural gas may adversely affect Ultra Petroleum's operations and financial condition.
- Sustained low prices for oil may adversely affect Ultra Petroleum's operations and financial condition. Most of the production from its Uinta Basin properties is crude oil.
- Compliance with environmental and other governmental regulations could be costly and could negatively impact Ultra Petroleum's production.
- Climate change legislation or regulations restricting emissions of "greenhouse gases" could result in increased operating costs and reduced demand for the oil and gas that Ultra Petroleum produces.
- Potential physical effects of climate change could adversely affect Ultra Petroleum's operations and cause it to incur significant costs in preparing for or responding to those effects.
- Cyber-attacks targeting systems and infrastructure used by the oil and gas industry may adversely impact Ultra Petroleum's operations.
- Ultra Petroleum may not be able to replace its reserves or generate cash flows if it is unable to raise capital. Ultra Petroleum will be required to make substantial capital expenditures to develop its existing reserves and to discover new oil and natural gas reserves.
- Ultra Petroleum's operations may be interrupted by severe weather or drilling restrictions.
- Ultra Petroleum is exposed to operating hazards and uninsured risks that could adversely impact its results of operations and cash flows.
- If oil and gas prices decrease, Ultra Petroleum may be required to record additional write downs of the carrying value of its oil and natural gas properties.

We are subject to the risk of Ultra Wyoming transferring its obligations under the Pinedale Lease Agreement.

The terms of the Pinedale Lease Agreement provide that Ultra Wyoming may transfer its rights and obligations under the Pinedale Lease Agreement at any time, subject to certain conditions. We thus bear the risk that Ultra Wyoming will transfer its rights and obligations under the Pinedale Lease Agreement to a third party whose creditworthiness may not be on par with that of Ultra Wyoming, which could inhibit such transferee's ability to make timely lease payments under the Pinedale Lease Agreement or increase the likelihood that a downturn in the business of such transferee could give rise to a default under the Pinedale Lease Agreement. The occurrence of either of these events could have a material adverse impact on our business and financial condition.

The terms of the co-investment in Pinedale LP may limit our ability to take certain actions in the future.

Pinedale GP, our wholly-owned subsidiary, is the general partner of Pinedale LP. Under the Pinedale LP partnership agreement, Pinedale GP is given broad authority to manage the affairs of Pinedale LP and to ensure that Pinedale LP complies with the terms of various agreements to which it is a party, including the Pinedale Lease Agreement and the credit agreement with KeyBank. The Pinedale LP partnership agreement, however, requires the approval of the holder of a majority of a class of limited partner interests (all of which are currently held by Prudential) before certain actions can be taken by Pinedale LP, including granting any consent under the Pinedale Lease Agreement to: extend the term of the Pinedale Lease Agreement; change the methodology of determining the rent; improve the leased property; reduce the present value of rental payments; merge with, or acquire unrelated assets from, a third party; incur debt, or amend the terms of any existing Pinedale LP debt, that would increase that debt above a specified amount; or issue partnership interests with rights superior to those held initially by Prudential. The approval of one or more of the foregoing matters may not be obtained at a time when we believe that an action requiring approval should be taken.

The financial condition of Arc Terminals and Arc Logistics and the ability and willingness of each to satisfy its obligations under the Portland Lease Agreement and the related parent guaranty will have a material impact on our results of operation, ability to service our indebtedness and ability to make distributions.

Arc Terminals, or Arc Logistics, the guarantor of Arc Terminals' obligations under the Portland Lease Agreement, may experience a downturn in its business. If Arc Logistics identifies appropriate acquisition candidates, it may be unable to negotiate successfully

the terms of the acquisitions, finance them, or integrate the acquired business into its then existing business. Completing an acquisition and integrating an acquired business may require a significant diversion of Arc Terminals' management time and resources and involve significant costs. If Arc Terminals makes one or more significant acquisitions in which the consideration includes cash, Arc Terminals could be required to use a substantial portion of its available cash, or obtain financing, in order to consummate such acquisitions. Any of the above may weaken Arc Terminals' or Arc Logistics' financial condition and result in Arc Terminals' failure to make timely lease payments or give rise to another default under the Portland Lease Agreement or Arc Logistics' failure to meet its related parent guaranty obligations. Further, Arc Terminals or Arc Logistics could be subject to a bankruptcy proceeding pursuant to Title 11 of the bankruptcy laws of the United States.

In the event of any of the above by Arc Terminals or Arc Logistics, we may experience delays in enforcing our rights as landlord and may incur substantial costs in protecting our investment. The financial condition of Arc Terminals and Arc Logistics and the ability and willingness of each to satisfy its obligations under the Portland Lease Agreement and the related parent guaranty will have a material impact on our results of operation, ability to service our indebtedness and ability to make distributions. In addition, if Arc Terminals fails to renew the Portland Lease Agreement and we cannot find a new lessee at the same or better lease rates, the expiration of the Portland Lease Agreement in 2027 could have a material adverse impact on our business and financial condition.

We are subject to risks involved in single tenant leases.

We intend to focus our acquisition activities on real properties that are triple-net leased to single tenants. Therefore, the financial failure of, or other default by, a single tenant under its lease: (i) is likely to cause a significant reduction in the operating cash flow generated by the property leased to that tenant, (ii) might decrease the value of that property, and (iii) will expose us to 100 percent of all applicable operating costs.

Costs of complying with governmental laws and regulations, including those relating to environmental matters, may adversely affect our income and the cash available for distribution.

We have invested, and expect to continue to invest, in real property assets, which are subject to laws and regulations relating to the protection of the environment and human health and safety. These laws and regulations generally govern the gathering, storage, handling, and transportation of petroleum and other hazardous substances, the emission and discharge of materials into the environment, including wastewater discharges and air emissions, the operation and removal of underground and aboveground storage tanks, the generation, use, storage, treatment, transportation and disposal of solid and hazardous materials and wastes, and the remediation of any contamination associated with such disposals. Environmental laws and regulations may impose joint and several liability on tenants, owners or operators for the costs to investigate or remediate contaminated properties, regardless of fault or whether the acts causing the contamination were legal. This liability could be substantial. Moreover, if one or more of these hazards occur, there can be no assurance that a response will be adequate to limit or reduce any resulting damage. In addition, the presence of hazardous substances, or the failure to properly remediate these substances, may adversely affect our ability to sell, rent or pledge such property as collateral for future borrowings. We also may be required to comply with various local, state and federal fire, health, life-safety and similar regulations. Specific issues related to significant energy infrastructure assets that we currently own include the following:

- *Pinedale LGS.* Our ownership of the Pinedale LGS subjects us to all of the inherent hazards and risks normally incidental to the transmission, storage and distribution of natural gas and natural gas liquids, such as well site blowouts, cratering and explosions, pipe and other equipment and system failures, uncontrolled flows of natural gas or well fluids, fires, formations with abnormal pressures, pollution and environmental risks and natural disasters.
- *Portland Terminal Facility.* The operations at the Portland Terminal Facility involve the storage and throughput of crude oil, petroleum products and chemicals. Our ownership of the Portland Terminal Facility subjects us to the inherent hazards and risks normally incidental to these operations, such as fires, explosions, accidental spills, discharges or other releases of petroleum or hazardous substances into the environment and neighboring areas, disruptions in supply infrastructure or logistics and other equipment failures, pollution and environmental risks and disasters for which we may incur substantial liabilities, including those to investigate and remediate.
- *MoGas.* In addition to the pipeline safety regulations discussed below, MoGas' operations are subject to extensive federal, regional, state and local environmental laws and regulations including, for example, the Clean Air Act (CAA), the Clean Water Act, CERCLA, the Resource Conservation and Recovery Act, OPA, OSHA and analogous state laws. These laws and regulations may restrict or impact MoGas' business activities in many ways, including requiring the acquisition of permits or other approvals to conduct regulated activities, restricting the manner in which it disposes of wastes, requiring remedial action to remove or mitigate contamination, requiring capital expenditures to comply with pollution control requirements, and imposing substantial liabilities for pollution resulting from its operations. Failure to comply with these laws and regulations may trigger a variety of administrative, civil and criminal

enforcement measures, including the assessment of monetary penalties, the imposition of remedial requirements and the issuance of orders enjoining future operations. MoGas may be unable to recover some or all of the resulting costs through insurance or increased revenues, which could have a material adverse effect on its business, results of operations and financial condition.

State and federal laws in this area are constantly evolving, and some environmental laws and regulations have been amended so as to require compliance with new or more stringent standards as of future dates. Compliance with new or more stringent laws or regulations, or stricter interpretation of existing laws, may impose material environmental liability and/or require material expenditures by us to avoid such liability. Further, our tenant companies' operations, the existing condition of land when we buy it, operations in the vicinity of our properties, such as the presence of underground storage tanks, or activities of unrelated third parties may affect our properties. We intend to monitor these laws and take commercially reasonable steps to protect ourselves from the impact of these laws, including where deemed necessary, obtaining environmental assessments of properties that we acquire; however, we will not obtain an independent third-party environmental assessment for every property we acquire. In addition, any such assessment that we do obtain may not reveal all environmental liabilities or whether a prior owner of a property created a material environmental condition not known to us.

Failure to comply with applicable environmental, health, and safety laws and regulations may result in the assessment of sanctions, including administrative, civil or criminal fines or penalties, permit revocations, and injunctions limiting or prohibiting some or all of the operations at our facilities. Any material compliance expenditures, fines, or damages we must pay could materially and adversely affect our business, assets or results of operations and, consequently, would reduce our ability to make distributions.

A terrorist attack, act of cyber-terrorism or armed conflict could harm our business.

Terrorist activities, anti-terrorist efforts and other armed conflicts involving the U.S., whether or not targeted at our assets or those of our tenants, investees or customers, could adversely affect the U.S. and global economies and could prevent us from meeting our financial and other obligations. Both we and our tenants and investees could experience loss of business, delays or defaults in payments from customers or disruptions of supplies and markets if domestic and global utilities or other energy infrastructure companies are direct targets or indirect casualties of an act of terror or war. Additionally, both we and our tenants and other investees rely on financial and operational computer systems to process information critically important for conducting various elements of our respective businesses. Any act of cyber-terrorism or other cyber-attack resulting in a failure of our computer systems, or those of our tenants, customers, suppliers or others with whom we do business, could materially disrupt our ability to operate our respective businesses and could result in a financial loss to the Company and possibly do harm to our reputation. Accordingly, terrorist activities and the threat of potential terrorist activities (including cyber-terrorism) and any resulting economic downturn could adversely affect our business, financial condition and results of operations. Any such events also might result in increased volatility in national and international financial markets, which could limit our access to capital or increase our cost of obtaining capital.

Some losses related to our real property assets, including, among others, losses related to potential terrorist activities, may not be covered by insurance and would adversely impact distributions to stockholders.

Our leases will generally require the tenant companies to carry comprehensive liability and casualty insurance on our properties comparable in amounts and against risks customarily insured against by other companies engaged in similar businesses in the same geographic region as our tenant companies. We believe the required coverage will be of the type, and amount, customarily obtained by an owner of similar properties. However, there are some types of losses, such as catastrophic acts of nature, acts of war or riots, for which we or our tenants cannot obtain insurance at an acceptable cost. If there is an uninsured loss or a loss in excess of insurance limits, we could lose both the revenues generated by the affected property and the capital we have invested in the property if our tenant company fails to pay us the casualty value in excess of such insurance limit, if any, or to indemnify us for such loss. This would in turn reduce the amount of income available for distributions. We would, however, remain obligated to repay any secured indebtedness or other obligations related to the property. Since September 11, 2001, the cost of insurance protection against terrorist acts has risen dramatically. The cost of coverage for acts of terrorism is currently mitigated by the Terrorism Risk Insurance Program Reauthorization Act of 2015 ("TRIPRA"), which extended such program through December 31, 2020. Under TRIPRA, the amount of terrorism-related insurance losses triggering the federal insurance threshold will be raised gradually from its current level of \$100 million in 2014 to \$200 million in 2020. Additionally, the bill increases insurers' co-payments for losses exceeding their deductibles, in annual steps, from 15% in 2014 to 20% in 2020. Each of these changes may have the effect of increasing the cost to insure against acts of terrorism for property owners, such as the Company, notwithstanding the other provisions of TRIPRA. Further, if TRIPRA is not continued beyond 2020 or is significantly modified, we may incur higher insurance costs and experience greater difficulty in obtaining insurance that covers terrorist-related damages. Our tenants may also have similar difficulties. There can be no assurance our tenant companies will be able to obtain terrorism insurance coverage, or that any coverage they do obtain will adequately protect our properties against loss from terrorist attack.

MoGas' natural gas transmission operations are subject to regulation by the FERC.

MoGas' business operations are subject to regulation by the FERC, including the types and terms of services MoGas may offer to its customers, construction of new facilities, creation, modification or abandonment of services or facilities, recordkeeping and relationships with affiliated companies. Compliance with these requirements can be costly and burdensome and FERC action in any of these areas could adversely affect MoGas' ability to compete for business, construct new facilities, offer new services or recover the full cost of operating its pipelines. This regulatory oversight can result in longer lead times to develop and complete any future project than competitors that are not subject to the FERC's regulations. We cannot give any assurance regarding the likely future regulations under which MoGas will operate its natural gas transmission business or the effect such regulations could have on MoGas' business, financial condition and results of operations.

Rate regulation could limit MoGas' ability to recover the full cost of operating its pipelines, including a reasonable return.

The rates MoGas can charge for its natural gas transmission operations are regulated by the FERC pursuant to the Natural Gas Act of 1938 ("NGA"). Under the NGA, MoGas may only charge rates that have been determined to be just and reasonable by the FERC and is prohibited from unduly preferring or unreasonably discriminating against any person with respect to its rates or terms and conditions of service. The FERC establishes both the maximum and minimum rates MoGas can charge. The basic elements that the FERC considers are the costs of providing service, the volumes of gas being transported or stored, the rate design, the allocation of costs between services, the capital structure and the rate of return a natural gas company is permitted to earn.

MoGas may not be able to recover all of its costs through existing or future rates. Proposed rate increases may be challenged by protest and allowed to go into effect subject to refund. Even if a rate increase is permitted by the FERC to become effective, the rate increase may not be adequate. To the extent MoGas' costs increase in an amount greater than its revenues increase, or there is a lag between MoGas' cost increases and its ability to file for and obtain rate increases, MoGas' operating results would be negatively affected.

MoGas' existing rates may be challenged in a proceeding before FERC. In such a proceeding, the FERC may reduce MoGas' rates if the FERC finds the rates are not just and reasonable or are unduly discriminatory. Any successful challenge against MoGas' rates could have an adverse impact on its future revenues associated with providing transmission services. In addition, future changes to laws, regulations and policies may impair MoGas' ability to recover costs, which could adversely impact its financial condition and results of operations.

MoGas could be subject to penalties and fines if it fails to comply with FERC regulations.

Should the FERC find that MoGas has failed to comply with all applicable FERC-administered statutes, rules, regulations, and orders, or with the terms of MoGas' tariffs on file with the FERC, MoGas could be subject to substantial penalties and fines. Under the Energy Policy Act of 2005 ("EPA 2005"), the FERC has civil penalty authority under the NGA and Natural Gas Policy Act of 1978 ("NGPA") to impose penalties for violations of up to \$1.0 million per day for each violation, to revoke existing certificate authority and to order disgorgement of profits associated with any violation.

The revenues of MoGas' business are generated under contracts that are subject to cancellation on an annual basis.

Substantially all of the revenues of MoGas' business are generated under transportation contracts which have an initial term of at least one year and renew automatically on a month-to-month basis, but are subject to cancellation by the customer on 365 days' notice. If MoGas is unable to succeed in replacing any contracts cancelled by local distribution companies ("LDCs") or other customers that account for a significant portion of its revenues, or in renegotiating such contracts on terms substantially as favorable as the existing contracts, MoGas could suffer a material reduction in its revenues, financial results and cash flows. The maintenance or replacement of existing contracts with MoGas' customers at rates sufficient to maintain current or projected revenues and cash flows ultimately depends on a number of factors beyond its control, including competition from other pipelines, the proximity of supplies to the markets, and the price of, and demand for, natural gas. In addition, changes in state regulation of LDCs may cause them to exercise their cancellation rights in order to turn back their capacity when the contracts expire. Recently, two key customers have taken steps to negotiate terms other than those to which they first became subject on November 1, 2014 by providing notice of termination to MoGas in accordance with the terms of their contracts.

MoGas depends on certain key customers for a significant portion of its revenues. The loss of any of these key customers could result in a decline in MoGas' business.

MoGas relies on certain key customers for a significant portion of its revenues. Laclede Gas, Ameren Energy and Omega Pipeline Company (an affiliate of the Company) accounted for approximately 67 percent, 19 percent and 10 percent, respectively, of MoGas' contracted revenues for the year ended December 31, 2014. The loss of all or even a portion of the contracted volumes of these or other customers, as a result of competition, creditworthiness, inability to negotiate extensions or replacements of contracts or

otherwise, could have a material adverse effect on MoGas' business, financial condition and results of operations, unless it is able to contract for comparable volumes from other customers at favorable rates.

MoGas is exposed to the credit risk of its customers and its credit risk management may not be adequate to protect against such risk.

MoGas is subject to the risk of loss resulting from nonpayment and/or nonperformance by its customers. MoGas' credit procedures and policies may not be adequate to fully eliminate customer credit risk. If MoGas fails to adequately assess the creditworthiness of existing or future customers, unanticipated deterioration in their creditworthiness and any resulting increase in nonpayment and/or nonperformance by them and inability to re-market the resulting capacity could have a material adverse effect on MoGas' business, financial condition and results of operations. MoGas may not be able to effectively re-market such capacity during and after insolvency proceedings involving a customer.

MoGas' operations are subject to operational hazards and unforeseen interruptions. If a significant accident or event occurs that results in a business interruption or shutdown for which MoGas is not adequately insured, its operations and financial results could be materially adversely affected.

MoGas' operations are subject to many hazards inherent in the transmission of natural gas, including:

- aging infrastructure, mechanical or other performance problems;
- damage to pipelines, facilities and related equipment caused by tornadoes, floods, fires and other natural disasters, explosions and acts of terrorism;
- inadvertent damage from third parties, including from construction, farm and utility equipment;
- leaks of natural gas and other hydrocarbons or losses of natural gas as a result of the malfunction of equipment or facilities;
- operator error;
- environmental hazards, such as natural gas leaks, product and waste spills, pipeline and tank ruptures, and unauthorized discharges of products, wastes and other pollutants into the surface and subsurface environment, resulting in environmental pollution; and
- explosions.

These risks could result in substantial losses due to personal injury and/or loss of life, severe damage to and destruction of property and equipment and pollution or other environmental damage and may result in curtailment or suspension of MoGas' related operations or services. A natural disaster or other hazard affecting the areas in which MoGas operates could have a material adverse effect on MoGas' operations and the financial results of its business.

Pipeline safety integrity programs and repairs may impose significant costs and liabilities on MoGas.

The Federal Office of Pipeline Safety within the U.S. Department of Transportation requires pipeline operators to develop integrity management programs to comprehensively evaluate certain areas along their pipelines and to take additional measures to protect pipeline segments located in "high consequence areas" where a leak or rupture could potentially do the most harm. As an operator, MoGas is required to:

- perform ongoing assessments of pipeline integrity;
- identify and characterize applicable threats to pipeline segments that could impact a high consequence area;
- improve data collection, integration and analysis;
- repair and remediate the pipeline as necessary; and
- implement preventative and mitigating actions.

MoGas is required to maintain pipeline integrity testing programs that are intended to assess pipeline integrity. Any repair, remediation, preventative or mitigating actions could require significant capital and operating expenditures. Should MoGas fail to comply with the Federal Office of Pipeline Safety's rules and related regulations and orders, it could be subject to significant penalties and fines, which could have a material adverse effect on MoGas' business, results of operations and financial condition.

Certain of MoGas' services may be subject to fixed-price "negotiated rate" contracts that are not subject to adjustment, even if its cost to perform such services exceeds the revenues received from such contracts.

Under FERC policy, a regulated service provider and a customer may mutually agree to sign a contract for service at a "negotiated rate" which may be above or below the FERC regulated, cost-based recourse rate for that service. These "negotiated rate" contracts are not generally subject to adjustment for increased costs which could be produced by inflation or other factors relating to the specific facilities being used to perform the services. Any shortfall of revenue as result of these "negotiated rate" contracts could decrease MoGas' cash flow.

MoGas competes with other pipelines.

The principal elements of competition among pipelines are availability of capacity, rates, terms of service, access to supplies, flexibility and reliability of service. Additionally, FERC's policies promote competition in natural gas markets by increasing the number of natural gas transmission options available to MoGas' customer base. Any current or future pipeline system or other form of transmission that delivers natural gas into the areas that MoGas serves could offer transmission services that are more desirable to shippers than those MoGas provides because of price, location, facilities or other factors. Increased competition could reduce the volumes of product MoGas transports or, in instances where MoGas does not have long-term contracts with fixed rates, could cause MoGas to decrease the transmission rates it can charge its customers. Competition could intensify the negative impact of factors that adversely affect the demand for MoGas' services, such as adverse economic conditions, weather, higher fuel costs and taxes or other regulatory actions that increase the cost, or limit the use, of products MoGas transports.

The expansion of MoGas' existing assets and construction of new assets is subject to regulatory, environmental, political, legal and economic risks, which could adversely affect MoGas' results of operations and financial condition.

One of the ways MoGas may grow its business is through the expansion of its existing assets and construction of additional energy infrastructure assets. The construction of additions or modifications to MoGas' existing pipelines, and the construction of other new energy infrastructure assets, involve numerous regulatory, environmental, political and legal uncertainties beyond MoGas' control and will require the expenditure of significant capital that it would be required to raise. If MoGas undertakes these projects they may not be completed on schedule, at the budgeted cost or at all. Moreover, MoGas' revenues may not increase immediately upon the expenditure of funds on a particular project. For instance, if MoGas expands a new pipeline, the construction may occur over an extended period of time, and MoGas will not receive any material increases in revenues until the project is completed. Any new pipelines may not be able to attract enough throughput to achieve MoGas' expected investment return, which could adversely affect its results of operations and financial condition. The construction of new pipelines may also require MoGas to obtain new rights-of-way, and it may become more expensive for it to obtain these new rights-of-way or to renew existing rights-of-way. If the cost of renewing or obtaining new rights-of-way increases, MoGas' cash flows could be adversely affected, which also could have a material adverse effect on its results of operation and financial condition.

The operation of our energy infrastructure assets, including without limitation those of MoGas, could be adversely affected if third-party pipelines, railroads or other facilities interconnected to our facilities become partially or fully unavailable.

Our facilities, as well as those of our tenants, connect to other pipelines, railroads or facilities owned by third parties. In particular, MoGas depends upon third-party pipelines and other facilities that provide delivery options to and from its pipelines. For example, its pipelines interconnect, directly or indirectly, with virtually every major interstate pipeline in the eastern portion of the U.S. and a significant number of intrastate pipelines. Because we do not own these third party facilities, their continuing operation is not within our control. Accordingly, these pipelines and other facilities may become unavailable, or available only at a reduced capacity. If these pipeline connections were to become unavailable to MoGas for current or future volumes of natural gas due to repairs, damage, lack of capacity or any other reason, MoGas' ability to operate efficiently and continue shipping natural gas to end markets could be restricted, thereby reducing its revenues. Likewise, if any of these third-party pipelines or facilities becomes unable to transport any products distributed or transported through our other facilities, such as an interruption in rail or pipeline service to the Portland Terminal Facility, our business, results of operations, financial condition and ability to make cash distributions to our stockholders could be adversely affected.

MoGas does not own all of the land on which its pipelines are located, which could disrupt MoGas' operations.

MoGas does not own all of the land on which its pipelines are located, and MoGas is therefore subject to the possibility of more onerous terms and/or increased costs to retain necessary land use rights required to conduct its operations. MoGas obtains the rights to construct and operate its pipelines on land owned by third parties and governmental agencies for a specific period of time. In certain instances, MoGas' rights-of-way may be subordinate to that of government agencies, which could result in costs or interruptions to MoGas' service. Restrictions on MoGas' ability to use its rights-of-way, through MoGas' inability to renew right-of-way contracts or otherwise, could have a material adverse effect on its business, results of operations and financial condition.

The lack of availability of natural gas resources may cause customers to seek alternative energy resources, which could materially affect MoGas' revenues, earnings and cash flows.

MoGas' natural gas business is dependent on the continued availability of natural gas production and reserves. Prices for natural gas, regulatory limitations on the development of natural gas supplies or a shift in supply sources could adversely affect development of additional reserves and production that are accessible by MoGas' facilities. Lack of commercial quantities of natural gas available to these assets could cause customers to seek alternative energy resources, thereby reducing their reliance on MoGas' services, which in turn would materially affect its revenues, earnings and cash flows.

MoGas is exposed to costs associated with lost and unaccounted for volumes.

A certain amount of natural gas is naturally lost in connection with its transmission across a pipeline system, and under MoGas' contractual arrangements with its customers, MoGas is entitled to retain a specified volume of natural gas in order to compensate it for such lost and unaccounted for volumes as well as the natural gas used to run MoGas' compressor stations, which we refer to as fuel usage. The level of fuel usage and lost and unaccounted for volumes on MoGas' transmission system may exceed the natural gas volumes retained from its customers as compensation for fuel usage and lost and unaccounted for volumes pursuant to its contractual agreements. The FERC-approved tariffs of MoGas provide for annual filings to adjust the amount of gas retained from customers to eliminate any overages or shortfalls from the prior year. Future exposure to the volatility of natural gas prices as a result of gas imbalances on MoGas' systems could have a material adverse effect on its business, financial condition and results of operations.

Reductions in demand for natural gas and low market prices of commodities adversely affect MoGas' Pipeline's operations and cash flows.

MoGas' regulated business is generally economically stable and not significantly affected in the short term by changing commodity prices. However, its business can be negatively affected in the long term by sustained downturns in the economy or long-term conservation efforts, which could affect long-term demand and market prices for natural gas. These factors are beyond MoGas' control and could impair its ability to meet long-term goals.

Most of MoGas' revenues are based on regulated tariff rates, which include the recovery of certain fuel costs. However, lower overall economic output would reduce the volume of natural gas transported, resulting in lower earnings and cash flows. Transmission revenues could be affected by long-term economic declines, resulting in the non-renewal of long-term contracts at the time of expiration. Lower demand for natural gas and oil, along with lower prices for natural gas, could result from multiple factors that affect the markets where MoGas operates, including:

- weather conditions, such as abnormally mild winter or summer weather, resulting in lower energy usage for heating or cooling purposes, respectively;
- reduced supply of and demand for energy commodities, including any decrease in the production of natural gas, could negatively affect MoGas' transmission businesses due to lower throughput; and
- reduced capacity and transmission service into, or out of, MoGas' markets.

Our assets and operations, as well as those of our tenants and other investees and customers, can be affected by extreme weather patterns and other natural phenomena.

Our assets and operations, as well as those of our tenants and other investees and customers, can be adversely affected by floods, earthquakes, landslides, tornadoes and other natural phenomena and weather conditions, including extreme or unseasonable temperatures, making it more difficult for us to realize the historic rates of return associated with our assets and operations. These events also could result in significant volatility in the supply of energy and power, which might create fluctuations in commodity prices and earnings of companies in the energy infrastructure sector. A significant disruption in our operations or those of our tenants, investees or customers, or a significant liability for which we or any affected tenant or investee is not fully insured, could have a material adverse effect on our business, results of operations, and financial condition. Moreover, extreme weather events could adversely impact the valuation of our energy infrastructure assets.

We may be unable to identify and complete acquisitions of real property assets.

Our ability to identify and complete acquisitions of real property assets on favorable terms and conditions are subject to the following risks:

- we may be unable to acquire a desired asset because of competition from other investors with significant capital, including both publicly traded and non-traded REITs and institutional investment funds;

- competition from other investors may significantly increase the purchase price of a desired real property asset or result in less favorable terms;
- we may not complete the acquisition of a desired real property asset even if we have signed an agreement to acquire such real property asset because such agreements are subject to customary conditions to closing, including completion of due diligence investigations to our satisfaction;
- we may be unable to finance acquisitions of real property assets on favorable terms or at all.

Net leases may not result in fair market lease rates over time.

We expect a large portion of our future income to come from net leases. Net leases typically have longer lease terms and, thus, there is an increased risk that if market rental rates increase in future years, the rates under our net leases will be less than fair market rental rates during those years. As a result, our income and distributions could be lower than they would otherwise be if we did not engage in net leases. We generally will seek to include a clause in each lease that provides increases in rent over the term of the lease, but there can be no assurance we will be successful in obtaining such a clause.

If a sale-leaseback transaction is re-characterized in a lessee company's bankruptcy proceeding, our financial condition could be adversely affected.

We intend to enter into sale-leaseback transactions, whereby we purchase a property and then simultaneously lease the same property back to the seller. In the event of the bankruptcy of a lessee company, a transaction structured as a sale-leaseback may be re-characterized as either a financing or a joint venture, either of which outcomes could adversely affect our business.

If the sale-leaseback were re-characterized as a financing, we might not be considered the owner of the property, and as a result would have the status of a creditor in relation to the lessee company. In that event, we would no longer have the right to sell or encumber our ownership interest in the property. Instead, we would have a claim against the lessee company for the amounts owed under the lease, with the claim arguably secured by the property. The lessee company/debtor might have the ability to restructure the terms, interest rate and amortization schedule of its outstanding balance. If confirmed by the bankruptcy court, we could be bound by the new terms, and prevented from foreclosing our lien on the property. If the sale-leaseback were re-characterized as a joint venture, we and the lessee company could be treated as co-venturers with regard to the property. As a result, we could be held liable, under some circumstances, for debts incurred by the lessee company relating to the property. Either of these outcomes could adversely affect our cash flow and the amount available for distribution.

If we have to replace the tenant under any of our leases of energy infrastructure assets, we may have trouble identifying a new tenant that will agree to acceptable lease terms.

If we determine that a renewal of a lease with any present or future tenant of any of our energy infrastructure assets is not in the best interests of our stockholders, if a tenant determines it no longer wishes to be the tenant under a lease upon its expiration, if we desire to terminate a lease as a result of a breach of that lease by the tenant or if we lose any tenant as a result of such tenant's bankruptcy, then in each circumstance we would need to identify a new tenant for the lease. Any new tenant would need to be a qualified and reputable operator of such energy infrastructure assets with the wherewithal and capability of acting as our tenant. Furthermore, in many such circumstances any new tenant of a significant portion of our assets would need to be willing and able to make their financial statements public and agree to timely provide us with those financial statements in order for us comply with our obligation to include our tenant's financial statements in the periodic reports we file under the Securities Exchange Act of 1934, as amended (Exchange Act). There is no assurance that we would be able to identify a tenant that meets these criteria, or that if we are able to identify any such tenant, we would receive lease terms from a new tenant that are as favorable as the lease terms that were in place with the prior tenant.

The relative illiquidity of our real property and energy infrastructure asset investments may interfere with our ability to sell our assets when we desire and may discourage third parties from seeking to acquire control of the Company or our business.

Investments in real property and energy infrastructure assets are relatively illiquid compared to other investments. Accordingly, we may not be able to sell such assets when we desire or at prices acceptable to us in response to changes in economic or other conditions. This could substantially reduce the funds available for satisfying our obligations and for distribution to our stockholders. Further, the relative illiquidity of our assets may make us less desirable to third parties seeking to acquire our business, which may prevent a change in control of the Company that would be in the best interests of our stockholders.

Our focus on the energy infrastructure sector will subject us to more risks than if we were broadly diversified.

Because we specifically focus on the energy infrastructure sector, investments in our common stock may present more risks than if we were broadly diversified over numerous sectors of the economy. Therefore, a downturn in the U.S. energy infrastructure

sector would have a larger impact on us than on a company that does not concentrate in one sector of the economy. The energy infrastructure sector can be significantly affected by the supply of and demand for specific products and services; the supply and demand for crude oil, natural gas, and other energy commodities; the price of crude oil, natural gas, and other energy commodities; exploration, production and other capital expenditures; government regulation; world and regional events and economic conditions.

Energy infrastructure companies are subject to variations in the supply and demand of various energy commodities.

A decrease in the production of natural gas, natural gas liquids, crude oil, coal, refined petroleum products or other such commodities, or a decrease in the volume of such commodities available for transportation, mining, processing, storage or distribution, may adversely impact the financial performance of companies in the energy infrastructure sector. Production declines and volume decreases could be caused by various factors, including catastrophic events affecting production, depletion of resources, labor difficulties, political events, OPEC actions, environmental proceedings, increased regulations, equipment failures and unexpected maintenance problems, failure to obtain necessary permits, unscheduled outages, unanticipated expenses, inability to successfully carry out new construction or acquisitions, import supply disruption, or increased competition from alternative energy sources. Alternatively, a sustained decline in demand for such commodities could also adversely affect the financial performance of companies in the energy infrastructure sector. Factors that could lead to a decline in demand include economic recession or other adverse economic conditions, higher fuel taxes or governmental regulations, increases in fuel economy, consumer shifts to the use of alternative fuel sources, changes in commodity prices or weather. Factors that could lead to a decrease in market demand include a recession or other adverse economic conditions, an increase in the market price of the underlying commodity, higher taxes or other regulatory actions that increase costs, or a shift in consumer demand for such products. Demand may also be adversely impacted by consumer sentiment with respect to global warming or by any state or federal legislation intended to promote the use of alternative energy sources such as bio-fuels, solar and wind. Should energy infrastructure companies experience variations in supply and demand as described above, the resulting decline in operating or financial performance could impact the value or quality of our assets.

Energy infrastructure companies are and will be subject to the risk of fluctuations in commodity prices.

In addition to fluctuations in supply and demand as discussed above, the operations and financial performance of companies in the energy infrastructure sector may be directly affected by energy commodity prices, especially those companies in the energy infrastructure sector owning the underlying energy commodity. Commodity prices fluctuate for several reasons, including changes in market and economic conditions, the impact of weather on demand or supply, levels of domestic production and imported commodities, energy conservation, domestic and foreign governmental regulation and taxation and the availability of local, intrastate and interstate transportation systems. Volatility of commodity prices also make it more difficult for companies in the energy infrastructure sector to raise capital to the extent the market perceives that their performance may be tied directly or indirectly to commodity prices. Historically, energy commodity prices have been cyclical and exhibited significant volatility. Should energy infrastructure companies experience variations in supply and demand as described above, the resulting decline in operating or financial performance could impact the value or quality of our assets.

Many companies in the energy infrastructure sector are subject to the risk that they, or their customers, will be unable to replace depleted reserves of energy commodities.

Many companies in the energy infrastructure sector are either (i) engaged in the production of natural gas liquids, refined petroleum products, or aggregates such as crushed stone, sand and gravel, or (ii) are engaged in transporting, storing, distributing and processing these items on behalf of producers. To maintain or grow their revenues, many customers of these companies need to maintain or expand their reserves through exploration of new sources of supply, through the development of existing sources, through acquisitions, or through long-term contracts to acquire reserves. The financial performance of companies in the energy infrastructure sector, which we expect to comprise all of the tenants for the properties in which we plan to invest, may be adversely affected if the companies to which they provide service are unable to cost-effectively acquire additional reserves sufficient to replace the natural decline. These adverse impacts on our tenants also could adversely impact the value or quality of our assets.

Energy infrastructure companies are and will be subject to extensive regulation because of their participation in the energy infrastructure sector, which could adversely impact the business and financial performance of our tenants and the value of our assets.

Companies in the energy infrastructure sector are subject to significant federal, state and local government regulation in virtually every aspect of their operations, including how facilities are constructed, maintained and operated, environmental and safety controls, and the prices they may charge for the products and services they provide. Various governmental authorities have the power to enforce compliance with these regulations and the permits issued under them, and violators are subject to administrative, civil and criminal penalties, including civil fines, injunctions or both. Stricter laws, regulations or enforcement policies could be enacted in the future that likely would increase compliance costs, which could adversely affect the business and financial performance of our tenants in the energy infrastructure sector and the value or quality of our assets.

Risks Related to Our Financing Arrangements

Our indebtedness could have important consequences, including impairing our ability to obtain additional financing or pay future distributions, as well as subjecting us to the risk of foreclosure on any mortgaged properties in the event of non-payment of the related debt.

As of December 31, 2014, we had outstanding consolidated indebtedness of approximately \$99 million. Our leverage could have important consequences. For example, it could:

- result in the acceleration of a significant amount of debt for non-compliance with the terms of such debt or, if such debt contains cross-default or cross-acceleration provisions, other debt;
- materially impair our ability to borrow undrawn amounts under existing financing arrangements or to obtain additional financing or refinancing on favorable terms or at all;
- require us to dedicate a substantial portion of our cash flow to paying principal and interest on our indebtedness, thereby reducing the cash flow available to fund our business, to pay distributions, including those necessary to maintain REIT qualification, or to use for other purposes;
- increase our vulnerability to economic downturns;
- limit our ability to withstand competitive pressures; or
- reduce our flexibility to respond to changing business and economic conditions.

Further, we expect to mortgage many of our properties to secure payment of indebtedness. If we are unable to meet mortgage payments, such failure could result in the loss of assets due to foreclosure and transfer to the mortgagee or sale on unfavorable terms with a consequent loss of income and asset value. A foreclosure of one or more of our properties could create taxable income without accompanying cash proceeds, and could adversely affect our financial condition, results of operations, cash flow, and ability to service debt and make distributions and the market price of our stock.

We may not be able to refinance the indebtedness that we incurred to fund the acquisition of the Pinedale LGS.

Pinedale LP borrowed \$70 million under its credit facility to finance the acquisition of the Pinedale LGS and such indebtedness will mature in 2015 or 2016, if the option to extend the date of maturity is exercised. The outstanding balance on this indebtedness was \$67.1 million at December 31, 2014. Pinedale LP may not be able to refinance that indebtedness on its existing terms or at all. If funding is not available when needed, or is available only on unfavorable terms, we may not be able to meet our obligations as they come due. Moreover, without adequate funding, we may be unable to execute our growth strategies, complete future acquisitions, take advantage of other business opportunities or respond to competitive pressures, any of which could have a material adverse effect on our revenues and results of operations.

We face risks associated with our dependence on external sources of capital.

In order to qualify as a REIT, we are required each year to distribute to our stockholders at least 90 percent of our REIT taxable income, and we will be subject to tax on our income to the extent it is not distributed. Because of this distribution requirement, we may not be able to fund all future capital needs from cash retained from operations. As a result, to fund capital needs, we must rely on third-party sources of capital, which we may not be able to obtain on favorable terms, if at all. Our access to third-party sources of capital depends upon a number of factors, including (i) general market conditions; (ii) the market's perception of our growth potential; (iii) our current and potential future earnings and cash distributions; and (iv) the market price of our capital stock. Additional debt financing may substantially increase our debt-to-total capitalization ratio. Additional equity issuances may dilute the holdings of our current stockholders.

Covenants in our loan documents could limit our flexibility and adversely affect our financial condition.

The terms of our various credit agreements and other indebtedness require us to comply with a number of customary financial and other covenants, such as maintaining debt service coverage and leverage ratios and maintaining insurance coverage. These covenants may limit our flexibility in our operations, and breaches of these covenants could result in defaults under the instruments governing the applicable indebtedness even if we had satisfied our payment obligations. If we were to default under credit agreements or other debt instruments, our financial condition would be adversely affected.

We face risks related to “balloon payments” and refinancings.

Certain of our mortgages will have significant outstanding principal balances on their maturity dates, commonly known as “balloon payments.” There can be no assurance that we will be able to refinance the debt on favorable terms or at all. To the extent we

cannot refinance this debt on favorable terms or at all, we may be forced to dispose of properties on disadvantageous terms or pay higher interest rates, either of which would have an adverse impact on our financial performance and ability to service debt and make distributions.

Risks Related to REIT Qualification and Federal Income Tax Laws

We have elected to be taxed as a REIT for fiscal 2013 and subsequent years, but the IRS may challenge our qualification as a REIT.

We have elected to be a REIT for federal income tax purposes. In order to qualify as a REIT, a substantial percentage of our income must be derived from, and our assets consist of, real estate assets, and, in certain cases, other investment property. We have acquired and managed investments which satisfy the REIT tests. Whether a particular investment is considered a real estate asset for such purposes depends upon the facts and circumstances of the investment. Due to the factual nature of the determination, the IRS may challenge whether any particular investment will qualify as a real estate asset or realize income which satisfies the REIT income tests. In determining whether an investment is a real property asset, we will look at the Code and the IRS's interpretation of the Code in regulations, published rulings, private letter rulings and other guidance. In the case of a private letter ruling issued to another taxpayer, we would not be able to bind the IRS to the holding of such ruling. If the IRS successfully challenges our qualification as a REIT we may not be able to achieve our objectives and the value of our stock may decline. As a REIT, our distributions from earnings and profits will be treated as ordinary income and a return of capital, and generally will not qualify as qualified dividend income ("QDI"). To the extent that the REIT had accumulated C corporation earnings and profits from the periods prior to 2013, we have distributed such earnings and profits in 2013, which have been treated as QDI.

Fluctuations in the fair market value of the assets that we own and that are owned by our TRS may adversely affect our continued qualification as a REIT.

We have to satisfy the asset tests at the end of each quarter. Although fluctuations in the fair market value of our assets should not adversely affect our qualification as a REIT, we must satisfy the asset test immediately after effecting the REIT acquisition of any asset. Thus, we may be limited in our ability to purchase certain assets depending upon the potential fluctuations in the fair market value of our direct and indirect assets. As fair market value determinations are inherently factual, risks exist as to the fair market determination.

Although we believe that the Pinedale LGS and the Portland Terminal Facility constitute real estate assets for tax purposes, that belief is not binding on the Internal Revenue Service or any court and does not guarantee our qualification as a REIT.

In 2007, 2009 and 2010, the IRS issued three separate private letter rulings that confirmed certain energy infrastructure assets as real estate assets for tax purposes. The potential qualifying real estate assets in the energy infrastructure sector include electric transmission and distribution systems, pipeline systems, and storage and terminaling systems. Further, the IRS proposed regulations in 2014 clarifying that certain infrastructure assets constitute real estate assets for REIT purposes. We believe that substantially all of the Pinedale LGS and Portland Terminal Facility constitute real estate assets for tax purposes consistent with these private letter rulings and the proposed regulations. Although both private letter rulings and the proposed regulations provide insight into the current thinking of the IRS on tax issues, the private letter rulings may only be relied upon by the taxpayer to whom they were issued and are not binding on the IRS with respect to us, the Pinedale LGS or the Portland Terminal Facility, and the proposed regulations have not been finalized. We have not obtained any private letter rulings with respect to the Pinedale LGS or the Portland Terminal Facility. If the Pinedale LGS does not constitute a real estate asset for federal income tax purposes, we would likely fail to qualify as a REIT, would not achieve our objectives and the value of our stock could decline.

We are subject to a corporate level tax on certain built in gains if certain assets are sold during the 10 year period following our initial election to be taxed as a REIT.

Generally, a REIT is treated as a flow-through entity for federal income tax purposes, as a REIT's income is generally subject to a single level of federal taxation, which is accomplished by the REIT annually distributing at least ninety percent of its REIT taxable income.

However, through 2022, we will be subject to a REIT level federal income tax on any built-in gain recognized during such period. We do not anticipate incurring any significant built-in gain tax. If a REIT satisfies the minimum distribution requirement, it generally is entitled to a deduction for dividends paid. The REIT stockholders are then required to report the REIT dividend as ordinary income. A REIT stockholder's receipt of dividends generally will not qualify as qualified dividend income or for the dividends received deduction discussed above. Thus, as a REIT, we are more favorably treated for federal income tax purposes than under our prior taxation as a C corporation.

In order to remain qualified as a REIT, we are required to satisfy gross income and asset tests. Generally, such tests require that a substantial percentage of the REIT's income be derived from, and assets consist of, real estate assets, and, in certain cases, other

investment property. This is a factual determination that we generally will have to make annually with respect to the income tests and quarterly with respect to the asset tests.

There are uncertainties relating to the estimate of our special distribution.

To qualify for taxation as a REIT, we were required to distribute to our stockholders all of our pre-REIT accumulated earnings and profits, if any, as measured for federal income tax purposes, prior to the end of 2013. Any determination that we failed to appropriately make the special distribution could result in our disqualification for taxation as a REIT. The determination of the timing and amount to be distributed in the special distribution involved a complex factual and legal determination. It is possible that the IRS could interpret the applicable law differently than we did in making such determination. We believe that our distributions did satisfy the requirements relating to the distribution of our pre-REIT accumulated earnings and profits. There are, however, substantial uncertainties relating to the computation of our distribution, including the possibility that the IRS could, in auditing tax years prior to our REIT election, successfully assert that our taxable income should be increased, which could increase our pre-REIT accumulated earnings and profits. Thus, we may have failed to satisfy the requirement that we distribute all of our pre-REIT accumulated earnings and profits by the close of 2013. Moreover, although there are procedures available to cure a failure to distribute all of our pre-REIT accumulated earnings and profits, we cannot now determine whether we will be able to take advantage of them or the economic impact to us of doing so.

Failure to qualify as a REIT would have significant adverse consequences to us and the value of our common stock.

Beginning with our fiscal year ended December 31, 2013, we believe our income and investments have allowed us to meet the income and asset tests necessary for us to qualify for and we have elected to be taxed as a REIT for fiscal 2013 and 2014. Qualification as a REIT involves the application of highly technical and complex provisions of the Internal Revenue Code as to which there may only be limited judicial and administrative interpretations and involves the determination of facts and circumstances not entirely within our control. Future legislation, new regulations, administrative interpretations or court decisions may significantly change the tax laws or the application of the tax laws with respect to qualification as a REIT for federal income tax purposes or the federal income tax consequences of such qualification. Accordingly, we cannot assure you that we will be organized or will operate to qualify as a REIT for future fiscal years. If, with respect to any taxable year, we fail to qualify as a REIT, we would not be allowed to deduct distributions to stockholders in computing our taxable income. After our initial election and qualification as a REIT, if we later failed to so qualify and we were not entitled to relief under the relevant statutory provisions, we would also be disqualified from treatment as a REIT for four subsequent taxable years. If we fail to qualify as a REIT, corporate-level income tax, including any applicable alternative minimum tax, would apply to our taxable income at regular corporate rates. As a result, the amount available for distribution to holders of equity securities would be reduced for the year or years involved, and we would no longer be required to make distributions. In addition, our failure to qualify as a REIT could impair our ability to expand our business and raise capital, and it could adversely affect the value of our common stock.

The ability of stockholders to control our policies and effect a change of control of our company will be limited by certain provisions of our articles of incorporation and by Maryland law.

Our articles of incorporation authorize our board of directors to amend our charter to increase or decrease the aggregate number of authorized shares of stock, to authorize us to issue additional shares of our common stock or preferred stock and to classify or reclassify unissued shares of our common stock or preferred stock and thereafter to authorize us to issue such classified or reclassified shares of stock. We believe that these provisions in our articles of incorporation will provide us with increased flexibility in structuring possible future financings and acquisitions and in meeting other needs that might arise. The additional classes or series, as well as the additional authorized shares of common stock, will be available for issuance without further action by our stockholders, unless such action is required by applicable law or the rules of any stock exchange or automated quotation system on which our securities may be listed or traded. Although our board of directors does not currently intend to do so, it could authorize us to issue a class or series of stock that could, depending upon the terms of the particular class or series, delay, defer or prevent a transaction or a change of control of our company that might involve a premium price for holders of our common stock or that our common stockholders otherwise believe to be in their best interests.

To maintain our qualification as a REIT for U.S. federal income tax purposes, our articles of incorporation include provisions designed to ensure that not more than 50 percent in value of our outstanding stock may be owned, directly or indirectly, by or for five or fewer individuals (as defined in the Internal Revenue Code to include certain entities such as private foundations) at any time during the last half of any taxable year. Our articles generally prohibit any individual (as defined under the Internal Revenue Code to include certain entities) from actually owning or being deemed to own by virtue of the applicable constructive ownership provisions of the Internal Revenue Code, (i) more than 9.8 percent (in value or in number of shares, whichever is more restrictive) of the issued and outstanding shares of our common stock or (ii) more than 9.8 percent in value of the aggregate of the outstanding shares of all classes and series of our stock, in each case, excluding any shares of our stock not treated as outstanding for federal income tax purposes. Subject to the exceptions described below, our articles of incorporation further prohibit any person or entity from actually or constructively owning shares in excess of these limits. We refer to these restrictions as the “ownership limitation

provisions.” Our articles of incorporation also provide that any transfer of shares of our capital stock which would, if effective, result in our capital stock being beneficially owned by fewer than 100 persons (as determined pursuant to the Internal Revenue Code) shall be void ab initio and the intended transferee shall acquire no rights in such shares. These ownership limitation provisions may prevent or delay a change in control and, as a result, could adversely affect our stockholders’ ability to realize a premium for their shares of common stock. However, upon request, our board of directors may waive the ownership limitation provisions with respect to a particular stockholder and establish different ownership limitation provisions for such stockholder. In granting such waiver, our board of directors may also require the stockholder receiving such waiver to make certain representations, warranties and covenants related to our ability to qualify as a REIT.

Complying with the REIT requirements may cause us to forgo otherwise attractive opportunities or liquidate certain of our investments.

To remain a REIT for U.S. federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. We may be required to make distributions to our stockholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with the REIT requirements may hinder our ability to make certain otherwise attractive investments or undertake other activities that might otherwise be beneficial to our company and our stockholders, or may require us to borrow or liquidate investments in unfavorable market conditions. In addition, Corridor may be unable to find investments that comply with REIT requirements, thereby limiting our ability to grow or even maintain our asset base.

In connection with such REIT requirements, we must ensure that, at the end of each calendar quarter, at least 75 percent of the value of our assets consists of cash, cash items, government securities and qualified real property assets. The remainder of our investments in securities (other than cash, cash items, government securities, securities issued by a REIT taxable subsidiary or certain other qualified assets) generally cannot include more than 10 percent of the outstanding voting securities of any one issuer or more than 10 percent of the total value of the outstanding securities of any one issuer. In addition, in general, no more than 5 percent of the value of our total assets (other than cash, cash items, government securities, certain other securities and qualified real property assets) can consist of the securities of any one issuer, and no more than 25 percent of the value of our total securities can be represented by securities of one or more of a certain class of issuers. After meeting these requirements at the close of a calendar quarter, if we fail to comply with these requirements at the end of any subsequent calendar quarter, we must correct the failure within 30 days after the end of the calendar quarter or qualify for certain statutory relief provisions to avoid losing our REIT qualification. As a result, we may be required to liquidate from our portfolio otherwise attractive investments. These actions could have the effect of reducing our income and amounts available for distribution to our stockholders.

As a REIT, re-characterization of sale-leaseback transactions may cause us to lose our REIT status.

We intend to purchase certain properties and simultaneously lease the same property back to the seller of such properties. While we will use our best efforts to structure any such sale-leaseback transaction so that the lease will be characterized as a “true lease,” thereby allowing us to be treated as the owner of the property for U.S. federal income tax purposes, the IRS could challenge such characterization. In the event that any sale-leaseback transaction is recharacterized as a financing transaction or loan for U.S. federal income tax purposes, deductions for depreciation and cost recovery relating to such property would be disallowed. If a sale-leaseback transaction were so recharacterized, we might fail to satisfy the REIT qualification “asset tests” or the “income tests” and, consequently, lose our REIT status effective with the year of re-characterization. Alternatively, the amount of our REIT taxable income could be recalculated which might also cause us to fail to meet the distribution requirement for a taxable year.

As a REIT, we are required to make distributions, other than capital gain distributions, to our stockholders each year in the amount of at least 90 percent of our REIT taxable income in order to deduct distributions to our stockholders. As a result, we will continue to need additional capital to make new investments. If additional funds are unavailable or not available on favorable terms, our ability to make new investments will be impaired.

As a REIT, we are required to distribute at least 90 percent of our REIT taxable income in order to deduct distributions to our stockholders, and as such we may require additional capital to make new investments or carry existing investments. We may acquire additional capital from the issuance of securities senior to our common stock, including additional borrowings or other indebtedness or the issuance of additional securities. We may also acquire additional capital through the issuance of additional equity. However, we may not be able to raise additional capital in the future on favorable terms or at all. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. We may issue debt securities, other instruments of indebtedness or preferred stock, and we borrow money from banks or other financial institutions, which we refer to collectively as “senior securities.” As a result of issuing senior securities, we will also be exposed to typical risks associated with leverage, including increased risk of loss. If we issue preferred securities which will rank “senior” to our common stock in our capital structure, the holders of such preferred securities may have separate voting rights and other rights, preferences or privileges more favorable than those of our common stock, and the issuance of such preferred

securities could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for security holders or otherwise be in our best interest.

To the extent our ability to issue debt or other senior securities is constrained, we will depend on issuances of additional common stock to finance new investments. If we raise additional funds by issuing more of our common stock or senior securities convertible into, or exchangeable for, our common stock, the percentage ownership of our stockholders at that time would decrease, and you may experience dilution.

If we acquire C corporations in the future, we may inherit material tax liabilities and other tax attributes from such acquired corporations, and we may be required to distribute earnings and profits.

From time to time we may acquire C corporations or assets of C corporations in transactions in which the basis of the corporations' assets in our hands is determined by reference to the basis of the assets in the hands of the acquired corporations, or carry-over basis transactions.

In the case of assets we acquire from a C corporation in a carry-over basis transaction, if we dispose of any such asset in a taxable transaction (including by deed in lieu of foreclosure) during the ten-year period beginning on the date of the carry-over basis transaction, then we will be required to pay tax at the highest regular corporate tax rate on the gain recognized to the extent of the excess of (1) the fair market value of the asset over (2) our adjusted tax basis in the asset, in each case determined as of the date of the carry-over basis transaction. Any taxes we pay as a result of such gain would reduce the amount available for distribution to our stockholders. The imposition of such tax may require us to forgo an otherwise attractive disposition of any assets we acquire from a C corporation in a carry-over basis transaction, and as a result may reduce the liquidity of our portfolio of investments. In addition, in such a carry-over basis transaction, we will succeed to any tax liabilities and earnings and profits of the acquired C corporation. To qualify as a REIT, we must distribute any non-REIT earnings and profits by the close of the taxable year in which such transaction occurs. If the IRS were to determine that we acquired non-REIT earnings and profits from a corporation that we failed to distribute prior to the end of the taxable year in which the carry-over basis transaction occurred, we could avoid disqualification as a REIT by paying a "deficiency dividend." Under these procedures, we generally would be required to distribute any such non-REIT earnings and profits to our stockholders within 90 days of the determination and pay a statutory interest charge at a specified rate to the IRS. Such a distribution would be in addition to the distribution of REIT taxable income necessary to satisfy the REIT distribution requirement and may require that we borrow funds to make the distribution even if the then-prevailing market conditions are not favorable for borrowings. In addition, payment of the statutory interest charge could materially and adversely affect us.

Legislative or other actions affecting REITs could have a negative effect on us.

The rules dealing with federal, state and local income taxation are constantly under review by persons involved in the legislative process and by the IRS and the U.S. Department of the Treasury. Changes to the tax laws, with or without retroactive application, could materially and adversely affect our investors or us. We cannot predict how changes in the tax laws might affect our investors or us. New legislation, Treasury Regulations, administrative interpretations or court decisions could significantly and negatively affect our ability to qualify as a REIT or the income tax consequences of such qualification.

Risks Related to Our Corporate Structure and Governance

The ability of our board of directors to revoke our REIT qualification or alter our business policies without stockholder approval may cause adverse consequences to our stockholders.

Our Board of Directors determines our growth, investment, financing, capitalization, borrowing, REIT status, operations and distributions policies. Although our Board of Directors has no present intention to amend or reverse any of these policies, they may be amended or revised without notice to stockholders. We cannot assure you that any changes in our policies will serve fully the interests of all stockholders. In particular, our articles of incorporation provide that our board of directors may revoke or otherwise terminate our REIT election, without the approval of our stockholders, if it determines that it is no longer in our best interest to continue to qualify as a REIT. If we cease to be a REIT, we will not be allowed a deduction for dividends paid to stockholders in computing our taxable income and will be subject to U.S. federal income tax at regular corporate rates and state and local taxes, which may have adverse consequences on our total return to our stockholders.

Corridor may serve as a manager to other entities, which may create conflicts of interest not in the best interest of us or our stockholders.

Corridor's services under the Management Agreement are not exclusive, and, while it currently does not have any contractual arrangement to do so, it is free to furnish the same or similar services to other entities, including businesses that may directly or indirectly compete with us so long as its services to us are not impaired by the provision of such services to others. Corridor and its members may have obligations to other entities, the fulfillment of which might not be in the best interests of us or our stockholders.

We will be dependent upon key personnel of Corridor for our future success.

We have entered into a management agreement with Corridor to provide full management services to us for real property asset investments. We will be dependent on the diligence, expertise and business relationships of the management of Corridor to implement our strategy of acquiring real property assets. The departure of one or more investment professionals of Corridor could have a material adverse effect on our ability to implement this strategy and on the value of our common stock. There can be no assurance that we will be successful in implementing our strategy.

Provisions of the Maryland General Corporation Law and our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The following considerations related to provisions of Maryland General Corporation Law, and of our charter and bylaws, may have the effect of discouraging, delaying or making difficult a change in control of our Company or the removal of our incumbent directors:

- We are subject to the Business Combination Act of the Maryland General Corporation Law (MGCL). However, pursuant to the statute, our Board of Directors has adopted a resolution exempting us from the Maryland Business Combination Act for any business combination between us and any person to the extent that such business combination receives the prior approval of our board.
- Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of stock by any person. If we amend our bylaws to repeal the exemption from the Maryland Control Share Acquisition Act, the Maryland Control Share Acquisition Act also may make it more difficult to obtain control of our Company.
- As described above, our charter includes a share ownership limit designed to preserve our status as a REIT, which may have the effect of precluding an acquisition of control of us without the approval of our Board of Directors.
- Under our charter, our Board of Directors is divided into three classes serving staggered terms, which will make it more difficult for a hostile bidder to acquire control of us.
- Our charter also contains a provision whereby we have elected to be subject to the provisions of Title 3, Subtitle 8 of the MGCL relating to the filling of vacancies on our board of directors. Further, through provisions in our charter and bylaws unrelated to Subtitle 8, we (1) require a two-thirds vote for the removal of any director from the board, which removal must be for cause, (2) vest in the board the exclusive power to fix the number of directors, subject to limitations set forth in our charter and bylaws, and (3) require, unless called by the chairman of our Board of Directors, our chief executive officer, our president or our Board of Directors, the request of stockholders entitled to cast not less than a majority of all votes entitled to be cast on a matter at such meeting to call a special meeting to consider and vote on any matter that may properly be considered at a meeting of stockholders.
- In addition, our Board of Directors may, without stockholder action, authorize the issuance of shares of stock in one or more classes or series, including preferred stock. Our Board of Directors also may, without stockholder action, amend our charter to increase the number of shares of stock of any class or series that we have authority to issue.

The existence of these provisions, among others, may have a negative impact on the price of our common stock and may discourage third party bids for ownership of our Company. These provisions may prevent any premiums being offered to you for our common stock.

Our ability to pay dividends is limited by the requirements of Maryland law.

Our ability to pay dividends on our common stock and Series A Preferred Stock is limited by the laws of Maryland. Under Maryland General Corporation Law, a Maryland corporation may not make a distribution if, after giving effect to the distribution, the corporation would not be able to pay its debts as the debts become due in the usual course of business, or the corporation's total assets would be less than the sum of its total liabilities plus, unless the corporation's charter provides otherwise, the amount that would be needed, if the corporation were dissolved at the time of the distribution, to satisfy the preferential rights upon dissolution of stockholders whose preferential rights are superior to those receiving the distribution. Accordingly, we may not make a distribution on our common stock and the Series A Preferred Stock if, after giving effect to the distribution, we would not be able to pay our debts as they become due in the usual course of business or our total assets would be less than the sum of our total liabilities plus, unless the terms of such class or series provide otherwise, the amount that would be needed to satisfy the preferential rights upon dissolution of the holders of any shares of any class or series of preferred stock then outstanding, if any, with preferences senior to those of our common stock and the Series A Preferred Stock.

Risks Related to Our Non-Real Estate Investments

Our securities investments in privately-held companies present certain challenges, including availability of information about these companies and illiquidity that may impact our ability to liquidate these investments in a timely and/or advantageous manner.

We currently have securities investments in privately-held companies. Generally, little public information exists about these companies. If we are unable to obtain all material information about these companies, including with respect to operational, regulatory, environmental, litigation and managerial risks, we may not make a fully-informed investment decision, and we may lose some or all of the money invested in these companies. Substantially all of these securities are subject to legal and other restrictions on resale or are otherwise less liquid than publicly traded securities. The illiquidity of these investments may make it difficult for us to sell such investments at advantageous times and prices or in a timely manner. In addition, if we are required to liquidate all or a portion of our private securities investments quickly, we may realize significantly less than the value at which we previously have recorded our investments. We also may face other restrictions on our ability to liquidate an investment in the securities of a portfolio company to the extent that we or one of our affiliates have material non-public information regarding such portfolio company.

All of our securities investments are, and will continue to be, recorded at fair value. Because such valuations are inherently uncertain, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed.

We continue to hold investments that are in the form of securities or loans that are not publicly traded. The fair value of these investments may not be readily determinable. For securities investments that are reported at fair value, we will value these investments quarterly at fair value. We have retained independent valuation firms to provide third-party valuation consulting services. The Audit Committee of our Board of Directors reviews the independent valuation firms' supporting analyses and accepts the valuations. The types of factors that may be considered in fair value pricing of an investment include the nature and realizable value of any collateral, the issuing company's earnings and ability to make payments, the markets in which the issuing company does business, comparison to publicly traded companies, discounted cash flow and other relevant factors. Because such valuations are inherently uncertain, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. As a result, we may not be able to dispose of our holdings at a price equal to or greater than the determined fair value, which could have a negative impact on our net equity and earnings.

The lack of liquidity in our private securities investments may make it difficult to liquidate these securities at favorable prices, and as a result, we may suffer losses.

We have historically invested in the equity of companies whose securities are not publicly traded, and whose securities may be subject to legal and other restrictions on resale or otherwise be less liquid than publicly-traded securities. As of December 31, 2014, all of our securities investments were invested in illiquid securities. The illiquidity of these investments may make it difficult for us to sell these investments when desired. In addition, we may realize significantly less than the value at which we had previously recorded these investments when we liquidate any of these securities. The illiquidity of these securities investments may make it difficult for us to dispose of them at favorable prices, and, as a result, we may suffer losses.

If our acquisitions do not meet our performance expectations, you may not receive distributions.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. Also, restrictions and provisions in any credit facilities we enter into or debt securities we issue may limit our ability to make distributions. We cannot assure you that you will receive distributions at a particular level or at all.

If we were deemed an investment company under the Investment Company Act of 1940, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business and the price of our securities.

We do not believe that we are an investment company under the 1940 Act. If during the period in which we are liquidating our securities investments in privately-held companies we make an investment in securities, or one of our infrastructure real property asset acquisitions were characterized as an investment in securities, we could be deemed an investment company for purposes of the 1940 Act. If we were to be deemed an investment company, restrictions imposed by the 1940 Act, including limitations on our capital structure, could make it impractical for us to continue our business as contemplated and would have a material adverse effect on our operations and the price of our common stock.

Changes in laws or regulations or in the interpretations of laws or regulations could significantly affect our operations and cost of doing business.

We are subject to federal, state and local laws and regulations and are subject to judicial and administrative decisions that affect our operations, including loan originations, maximum interest rates, fees and other charges, disclosures to equity investees the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, we may have to incur significant expenses in order to comply, or we may have to restrict our operations. In addition, if we do not comply with applicable laws, regulations and decisions, or fail to obtain licenses that may become necessary for the conduct of our business, we may be subject to civil fines and criminal penalties, any of which could have a material adverse effect upon our business, results of operations or financial condition.

Additional Risks to Our Stockholders

Our use of leverage increases the risk of investing in our securities and will increase the costs borne by common stockholders.

Our use of leverage through the issuance of any preferred stock or debt securities, and any additional borrowings or other transactions involving indebtedness (other than for temporary or emergency purposes) are or would be considered “senior securities” and create risks. Leverage may adversely affect common stockholders. If the return on securities acquired with borrowed funds or other leverage proceeds does not exceed the cost of the leverage, the use of leverage could cause us to lose money.

Our issuance of senior securities involves offering expenses and other costs, including interest payments, which are borne indirectly by our common stockholders. Fluctuations in interest rates could increase interest or dividend payments on our senior securities, and could reduce cash available for distribution on common stock. Increased operating costs, including the financing cost associated with any leverage, may reduce our total return to common stockholders.

Rating agency guidelines applicable to any senior securities may impose asset coverage requirements, dividend limitations, voting right requirements (in the case of the senior equity securities), and restrictions on our portfolio composition and our use of certain investment techniques and strategies. The terms of any senior securities or other borrowings may impose additional requirements, restrictions and limitations that are more stringent than those required by a rating agency that rates outstanding senior securities. These requirements may have an adverse effect on us and may affect our ability to pay distributions on common stock and preferred stock. To the extent necessary, we may redeem our senior securities to maintain the required asset coverage. Doing so may require that we liquidate investments at a time when it would not otherwise be desirable to do so.

In addition, lenders from whom we may borrow money or holders of our debt securities may have fixed dollar claims on our assets that are superior to the claims of our stockholders, and we have granted, and may in the future grant, a security interest in our assets in connection with our debt. In the case of a liquidation event, those lenders or note holders would receive proceeds before our stockholders. If the value of our assets increases, then leveraging would cause the book value of our common stock to increase more than it otherwise would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause the book value of our common stock to decline more than it otherwise would have had we not leveraged. Similarly, any increase in our revenue in excess of interest expense on our borrowed funds would cause our net income to increase more than it would without the leverage. Any decrease in our revenue would cause our net income to decline more than it would have had we not borrowed funds and could negatively affect our ability to make distributions on our common stock. Our ability to service any debt that we incur will depend largely on our financial performance and the performance of our investments and will be subject to prevailing economic conditions and competitive pressures.

Sales of our common stock may put pressure on our stock price.

The sale of our common stock (or the perception that such sales may occur) may have an adverse effect on prices in the secondary market for our common stock. An increase in the number of shares of common stock available may put downward pressure on the market price for our common stock and make it more difficult for stockholders to sell their shares. These sales also might make it more difficult for us to sell additional equity securities in the future at a time and price we deem appropriate.

We cannot assure you that we will be able to pay dividends regularly.

Our ability to pay dividends in the future is dependent on our ability to operate profitably and to generate cash from our operations and the operations of our subsidiaries. We cannot guarantee that we will be able to pay dividends on a regular quarterly basis in the future. Furthermore, any new shares of common stock issued will substantially increase the cash required to continue to pay cash dividends at current levels. Any common stock or preferred stock that may in the future be issued to finance acquisitions, upon exercise of stock options or otherwise, would have a similar effect.

Additional Risks Related to Our Preferred Stock

The depositary shares are a new issue of securities and do not have an established trading market, which may negatively affect their market value and your ability to transfer or sell your depositary shares.

The depositary shares, each of which represents 1/100th of a share of our Series A Preferred Stock, are a new issue of securities with no established trading market. The depositary shares are listed on the NYSE; however, an active trading market on the NYSE for the depositary shares may not develop or, if one develops, it may not be maintained. As a result, the ability to transfer or sell the depositary shares and any trading price of the depositary shares could be adversely affected.

The market price of the depositary shares representing interests in our Series A Preferred Stock may be adversely affected by the future incurrence of debt or issuance of preferred stock by the Company.

In the future, we may increase our capital resources by making offerings of debt securities and preferred stock of the Company and other borrowings by the Company. The debt securities, preferred stock (if senior to our Series A Preferred Stock) and borrowings of the Company are senior in right of payment to our Series A Preferred Stock, and all payments (including dividends, principal and interest) and liquidating distributions on such securities and borrowings could limit our ability to pay dividends or make other distributions to the holders of depositary shares representing interests in our Series A Preferred Stock.

Because our decision to issue securities and make borrowings in the future will depend on market conditions and other factors, some of which may be beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings or borrowings. Thus, holders of the depositary shares representing interests in Series A Preferred Stock bear the risk of our future offerings or borrowings reducing the market price of the depositary shares representing interests in our Series A Preferred Stock.

A holder of depositary shares representing interests in the Series A Preferred Stock has extremely limited voting rights.

The voting rights of a holder of depositary shares are limited. Our common stock is the only class of our securities that carries full voting rights. Voting rights for holders of depositary shares exist primarily with respect to the ability to elect (together with the holders of other series of preferred stock on parity with the Series A Preferred Stock, if any) two additional directors to our board of directors in the event that six quarterly dividends (whether or not declared or consecutive) payable on the Series A Preferred Stock are in arrears, and with respect to voting on amendments to our Charter, including the articles supplementary creating our Series A Preferred Stock (in some cases voting together with the holders of Parity Preferred Stock as a single class) that materially and adversely affect the rights of the holders of depositary shares representing interests in the Series A Preferred Stock or create additional classes or series of our stock that are senior to the Series A Preferred Stock, provided that in any event adequate provision for redemption has not been made. Other than certain limited circumstances, holders of depositary shares do not have any voting rights.

The Change of Control conversion feature of Series A Preferred Stock may not adequately compensate the holders, and the Change of Control conversion and redemption features of the shares of Series A Preferred Stock underlying the depositary shares may make it more difficult for a party to take over the Company or discourage a party from taking over the Company.

Upon the occurrence of a Change of Control (as defined in the Articles Supplementary for Series A Preferred Stock), holders of the depositary shares representing interests in our Series A Preferred Stock will have the right (unless, prior to the Change of Control Conversion Date (as defined in the Articles Supplementary for Series A Preferred Stock), we have provided notice of our election to redeem the depositary shares either pursuant to our optional redemption right or our special optional redemption right) to convert some or all of their depositary shares into shares of our common stock (or equivalent value of Alternative Conversion Consideration). Upon such a conversion, the maximum number of shares of common stock that holders of depositary shares will receive for each depositary share converted will be limited to the Share Cap. If the Common Stock Price is less than \$3.25 (which is 50 percent of the per share closing sale price of our common stock on January 21, 2015), subject to adjustment, the holders will receive a maximum of 7.6923 shares of our common stock per depositary share, which may result in a holder receiving value that is less than the liquidation preference of the depositary shares. In addition, there is an aggregate cap of 17,307,675 shares of common stock issuable upon exercise of the Change of Control conversion right. These features of the Series A Preferred Stock may have the effect of inhibiting a third party from making an acquisition proposal for the Company or of delaying, deferring or preventing a Change of Control of the Company under circumstances that otherwise could provide the holders of our common stock and Series A Preferred Stock with the opportunity to realize a premium over the then-current market price or that stockholders may otherwise believe is in their best interests.

The market price of the depositary shares could be substantially affected by various factors.

The market price of the depositary shares will depend on many factors, which may change from time to time, including:

- Prevailing interest rates, increases in which may have an adverse effect on the market price of the depositary shares representing interests in our Series A Preferred Stock;
- The market for similar securities issued by other REITs;
- General economic and financial market conditions;
- The financial condition, performance and prospects of us, our tenants and our competitors;
- Any rating assigned by a rating agency to the depositary shares;
- Changes in financial estimates or recommendations by securities analysts with respect to us, our competitors or our industry; and
- Actual or anticipated variations in our quarterly operating results and those of our competitors.

In addition, over the last several years, prices of equity securities in the U.S. trading markets have been experiencing extreme price fluctuations. As a result of these and other factors, investors who purchase the depositary shares in this offering may experience a decrease, which could be substantial and rapid, in the market price of the depositary shares, including decreases unrelated to our financial condition, performance or prospects. Likewise, in the event that the depositary shares become convertible and are converted into shares of our common stock, holders of our common stock issued upon such conversion may experience a similar decrease, which also could be substantial and rapid, in the market price of our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Leased Energy Infrastructure Assets

We are primarily focused on acquiring and financing midstream and downstream real estate assets within the U.S. energy infrastructure sector and concurrently entering into long-term triple-net participating leases with energy companies. The following summarizes our investments in energy infrastructure assets that are leased on a triple-net basis to their respective operators as of December 31, 2014:

<u>Asset Name</u>	<u>Owner/Landlord</u>	<u>Tenant</u>	<u>Asset Location</u>	<u>Asset Description</u>	<u>Encumbrances (1)</u>
Pinedale Liquids Gathering System	Pinedale LP (2)	Ultra Wyoming LGS LLC (3)	The Pinedale Anticline in Wyoming	Approximately 150 miles of pipelines with 107 receipt points, and four central storage facilities	Security for Pinedale LP's \$70 million secured term credit facility with KeyBank
Portland Terminal Facility	LCP Oregon Holdings, LLC	Arc Terminals Holdings LLC (4)	Portland, OR	A 42-acre rail and marine facility property adjacent to the Willamette River with 84 tanks and total storage capacity of approximately 1,500,000 barrels	Security for the Company's \$90 million revolving credit facility with Regions Bank
Eastern Interconnect Project	CorEnergy Infrastructure Trust, Inc. (5)	Public Service Company of New Mexico	New Mexico	216 miles of 345 kilovolts transmission lines, towers, easement rights, converters and other grid support components	The Company's ownership interest is security for the Company's \$90 million revolving credit facility with Regions Bank

(1) For additional information, see Note 14, Credit Facilities, in the Notes to the Financial Statements included in this report.

- (2) Prudential funded a portion of the Pinedale LGS acquisition and, as a limited partner, holds 18.95 percent of the economic interest in Pinedale LP. The general partner, our wholly owned subsidiary Pinedale GP, holds the remaining 81.05 percent economic interest.
- (3) Ultra Wyoming's obligations under the Pinedale Lease Agreement are guaranteed by Ultra Petroleum and Ultra Petroleum's operating subsidiary, Ultra Resources. For additional information, see "Major Tenants" under Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-K.
- (4) Arc Terminals is an indirect wholly-owned subsidiary of Arc Logistics, which has guaranteed its obligations under the Portland Lease Agreement. For additional information, see "Major Tenants" under Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-K.
- (5) We own a 40 percent undivided interest in the EIP transmission assets, which move electricity across New Mexico between Albuquerque and Clovis.

Additional Information Concerning Pinedale LGS

Pinedale LP acquired the Pinedale LGS with associated real property rights in the Pinedale Anticline in Wyoming from an indirect wholly-owned subsidiary of Ultra Petroleum on December 20, 2012. The Pinedale LGS has a current capacity of approximately 45,000 barrels per day. The underground pipelines constituting the majority of the Pinedale LGS and certain other components, such as the separators, have useful lives that extend beyond the initial term of the Pinedale Lease Agreement. We believe that the Pinedale LGS is capable of being expanded at a relatively low incremental cost by, for example, adding additional separating equipment.

As of December 31, 2014, Ultra Petroleum had an estimated 5.4 Tcfe of proved reserves and in 2014, converted 364.2 Bcfe of proved undeveloped reserves to proved developed reserves.

Most of Ultra Petroleum's exploration and development in the Pinedale field takes place on land under the jurisdiction of the Bureau of Land Management ("BLM"). The BLM has the authority to approve or deny oil and gas leases or to impose environmental restrictions on leases where appropriate. The BLM issued the Pinedale Record of Decision ("ROD") in September 2008. Under the ROD, Ultra Petroleum gained year-round access to the Pinedale field for drilling and completion activities in development areas, provided Ultra Petroleum conducts an environmental mitigation effort, which includes the use of a liquids gathering system. This additional access resulted in increased drilling efficiencies and allowed for accelerated development of the field.

Additional Information Concerning the Portland Terminal Facility

The Portland Terminal Facility is capable of receiving, storing and delivering crude oil and refined petroleum products. Products are received and delivered via railroad or marine (up to Panamax size vessels). The marine facilities are accessed through a neighboring terminal facility via an owned pipeline. The Portland Terminal Facility offers heating systems, emulsions and an on-site product testing laboratory as ancillary services. Our ownership interest in the Portland Terminal Facility partially secures borrowings under the Company's \$90 million revolving credit facility with Regions Bank.

We anticipate funding an additional \$10 million of terminal-related improvement projects in support of Arc Terminals' commercial strategy to optimize the Portland Terminal Facility and generate stable cash flows, including: (i) upgrade a portion of the existing storage assets; (ii) enhance existing terminal infrastructure; and (iii) develop, design, engineer and construct throughput expansion opportunities.

Additional Information Concerning the Eastern Interconnect Project

These assets are leased on a triple-net basis through April 1, 2015 to PNM, an independent electric utility company serving approximately 500 thousand customers in New Mexico. PNM is a subsidiary of PNM Resources Inc. (NYSE: PNM). On November 1, 2012, we entered into a purchase agreement with PNM to sell our interest in the EIP upon lease termination on April 1, 2015 for \$7.7 million. PNM also accelerated its remaining lease payments to us. Both lease payments due in 2013 were paid upon execution of that purchase agreement on November 1, 2012. The three remaining lease payments which would have been due April 1, 2014, October 1, 2014 and April 1, 2015, were paid in full on January 2, 2014.

Accordingly, the EIP is classified as "leased assets held for sale" in our audited consolidated financial statements and accompanying notes for the year ended December 31, 2014. We changed our estimated residual value used to calculate depreciation of the EIP which resulted in higher depreciation expense beginning in November of 2012 through the expiration of the lease in April 2015. The incremental depreciation amounts to approximately \$393,000 per quarter. Our ownership interest in the EIP partially secures borrowings under the Company's \$90 million revolving credit facility with Regions Bank.

Energy Infrastructure Assets Held Through TRSs

MoGas Pipeline System

Our wholly-owned TRS, Corridor MoGas, Inc., owns all of the membership interests of two entities that own and operate the MoGas Pipeline System, which consists of approximately 263 mile interstate natural gas pipeline system in and around St. Louis and extending into central Missouri and certain related real and personal property. The MoGas Pipeline System, which is regulated by FERC, delivers natural gas to both investor-owned and municipal local distribution systems and has eight firm transportation customers. The MoGas Pipeline System receives natural gas at three receipt points and delivers that natural gas at 22 delivery points. Our ownership interest in the MoGas Pipeline System partially secures borrowings under the Company's \$90 million revolving credit facility with Regions Bank.

Omega Pipeline (Mowood, LLC)

We indirectly hold 100 percent of the equity interests in Omega through Mowood, a TRS of the Company. Mowood is the holding company of Omega, a natural gas service provider located primarily on the Fort Leonard Wood military post in south-central Missouri. Omega has a long-term contract with the Department of Defense, which is currently subject to renewal in 2015, to provide natural gas and gas distribution assets to Fort Leonard Wood through Omega's approximately 70 mile pipeline distribution system on the post. In addition, Omega provides natural gas marketing services to several customers in the surrounding area. We provide REIT qualifying intercompany mortgage financing secured by Omega's real property assets which allows for a maximum principal balance of \$5.3 million. At December 31, 2014 and December 31, 2013, the principal balance outstanding was \$5.3 million.

Principal Location

Our principal executive office is located at 1100 Walnut Street, Suite 3350, Kansas City, MO 64106.

ITEM 3. LEGAL PROCEEDINGS

The Company's wholly owned subsidiary, MoGas, is involved in an ongoing matter arising from its certification proceeding before the FERC. As part of that proceeding, the FERC determined initial rates to be used by MoGas. The Missouri Public Service Commission ("MPSC") alleged that MoGas improperly included a purported acquisition premium associated with purchasing certain assets for the purposes of determining those rates. The FERC held that the issue did not need to be determined until MoGas filed its next rate case. The MPSC appealed that decision to the United States Court of Appeals for the District of Columbia (the "D.C. Circuit"), which reversed the FERC's decision and remanded the matter to the FERC on the limited issue of whether the premium was properly included in the initial rates. In the interim, MoGas filed and settled the required rate case, which noted that the outcome of the settlement could impact certain rates in effect from June 1, 2008 to December 31, 2009 and after January 1, 2013. On March 31, 2013, the FERC issued an order confirming that the purchase price of the assets could be included in the rate base and initial rates were proper; it further reaffirmed this finding and denied MPSC's petition for rehearing on September 19, 2013. On November 13, 2013, the MPSC petitioned the D.C. Circuit for review of the FERC's March and September orders in *MPSC v. FERC*, Case No. 13-1278. MoGas is an intervenor in that proceeding. Briefings are concluded and oral arguments took place on December 12, 2014. The D.C. Circuit's decision is currently pending. Pursuant to the terms of the purchase agreement by which we acquired MoGas, in the event that MoGas is required to pay any damages as a result of the ruling, the seller has agreed to indemnify MoGas in full.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Price Range of Common Stock

Since December 3, 2012, the Company's common stock has been traded on the New York Stock Exchange ("NYSE"), under the symbol "CORR". Previously the common stock was traded on the NYSE under the symbol "TTO". The following table sets forth the range of high and low sales prices of our common shares and the distributions declared by us for each fiscal quarter for our two most recent fiscal years:

	Price Range		Cash Distribution per Share ⁽¹⁾
	High	Low	
<u>2013</u>			
First quarter	\$ 7.06	\$ 6.03	\$ 0.1250
Second quarter	\$ 7.90	\$ 6.84	\$ 0.1250
Third quarter	\$ 7.77	\$ 6.95	\$ 0.1250
Fourth quarter	\$ 7.12	\$ 6.56	\$ —
<u>2014</u>			
First quarter	\$ 7.11	\$ 6.44	\$ 0.1250
Second quarter	\$ 7.65	\$ 6.67	\$ 0.1290
Third quarter	\$ 8.41	\$ 7.46	\$ 0.1300
Fourth quarter	\$ 7.71	\$ 5.87	\$ 0.1300

(1) Represents the distribution declared in the specified period. The 2013 fourth quarter dividend was paid in the first quarter of 2014. On January 3, 2014, our Board declared a dividend of \$0.125 per share, payable January 23, 2014 to common stockholders of record as of January 13, 2014.

The last reported price for our common stock as of December 31, 2014 was \$6.48 per share. As of December 31, 2014, we had 31 stockholders of record.

Distributions

Our portfolio of real property assets, promissory notes, and investment securities generates cash flow to us from which we pay distributions to stockholders. The amount of any distribution is recorded by the Company on the ex-dividend date.

The character of distributions made during the year may differ from their ultimate characterization for federal income tax purposes. Although, there is no assurance that we will continue to make regular distributions, we continue to believe that our investments should support sustainable 2015 distributions on a quarterly basis, and an estimated total 2015 annualized distributions of not less than \$0.54 per share.

Federal and State Income Taxation

We have elected to be taxed as a REIT under sections 856 through 860 of the Code and applicable Treasury regulations, which set forth the requirements for qualifying as a REIT, commencing with our taxable year beginning January 1, 2013. We believe that we have been organized and operated in a manner so as to qualify for taxation as a REIT under the Code and we intend to continue to operate in such a manner.

For as long as we qualify for taxation as a REIT, we generally will not be subject to Federal corporate income taxes on net income that we currently distribute to stockholders. This treatment substantially eliminates the "double taxation" (at the corporate and security holder levels) that generally results from investment in a "C" corporation. A "C" corporation is a corporation that generally is required to pay tax at the corporate level. Double taxation means taxation once at the corporate level when income is earned and once again at the stockholder level when the income is distributed.

As long as we qualify as a REIT, distributions made to our taxable U.S. stockholders out of current or accumulated earnings and profits (and not designated as capital gain dividends or retained capital gains) will be taken into account by them as ordinary income, and corporate stockholders will not be eligible for the dividends received deduction as to such amounts. If we received

qualified dividend income and designate such portion of our distributions as qualified dividend income in a written notice mailed no later than 60 days after the close of its taxable year, an individual U.S. stockholder may qualify (provided holding period and certain other requirements are met) to treat such portion of the distribution as qualified dividend income, eligible to be taxed as the reduced maximum rate of 20 percent. Distributions in excess of current and accumulated earnings and profits will not be taxable to a stockholder to the extent that they do not exceed the adjusted basis of such stockholder's common stock, but rather will reduce the adjusted basis of such shares as a return of capital. To the extent that such distributions exceed the adjusted basis of a stockholder's common stock, they will be included in income as long-term capital gains (or short-term capital gain if the shares have been held for one year or less), assuming the shares are a capital asset in the hands of the stockholder. Distributions that we properly designate as capital gain dividends will be taxable to stockholders as gains (to the extent they do not exceed our actual net capital gain for the taxable year) from the sale or disposition of a capital asset held for greater than one year. If we designate any portion of a dividend as a capital gain dividend, a U.S. stockholder will receive an Internal Revenue Service Form 1099-Div indicating the amount that will be taxable to the stockholder as a capital gain. As a REIT, we will be subject to corporate level tax on certain built-in gains if such assets are sold during the 10 year period following conversion. Built-in gain assets are assets whose fair market value exceeds the REIT's adjusted tax basis at the time of conversion or the asset was acquired from a C corporation and our initial tax basis in the asset is less than the fair market value of the asset. In addition, a REIT may not have earnings and profits accumulated in a non-REIT year. Thus, upon conversion to a REIT, we paid sufficient dividends in 2013 to distribute all accumulated earnings and profits.

We may, from time to time, own and operate certain properties through C corporation subsidiaries and will treat those subsidiaries as either "qualified REIT subsidiaries," or "taxable REIT subsidiaries." If a REIT owns a corporate subsidiary that is a "qualified REIT subsidiary," the separate existence of that subsidiary generally will be disregarded for Federal income tax purposes. A "taxable REIT subsidiary" is an entity taxable as a corporation in which we own stock and that elected with us to be treated as a taxable REIT subsidiary under Section 856(1) of the Code. A taxable REIT subsidiary is subject to Federal income tax, and state and local income tax where applicable, as a regular "C" corporation.

Our tax expense or benefit attributable to the taxable REIT subsidiary is included in the Consolidated Statements of Income. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Recent Sales of Unregistered Securities

We did not sell any securities during the year ended December 31, 2014 that were not registered under the Securities Act of 1933.

Issuer Purchases of Equity Securities

We did not repurchase any of our common shares during the year ended December 31, 2014.

Performance Graph

As a result of the Company's withdrawal of its election to be regulated as a BDC and the liquidation of the securities portfolio, the performance comparable group was also revised to reflect a more appropriate set of benchmarks in 2013. As the Company has elected to be treated as a REIT, and has changed its primary focus to the acquisition of real property energy infrastructure assets that are leased back to operating companies such as utilities or other energy operators, it was determined that the FTSE NAREIT All Equity REIT Index ("FTSE NAREIT"), the Dow Jones Utilities Average Index ("DJ UTIL"), and the S&P Global Infrastructure Index ("SPGTIND"), are a more relevant set of indices. The graph assumes that, on December 31, 2009, a \$100 investment was made in each of our common stock, the FTSE NAREIT, the DJ UTIL, the SPGTIND, and assumes the reinvestment of all cash dividends. The comparisons in the graph below are based on historical data and are not intended to forecast future performance of our common stock.

ITEM 6. SELECTED FINANCIAL DATA

The selected financial data set forth below should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations," and the financial statements and related notes included in this Annual Report on Form 10-K. The Company's consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. See Note 2.B. in the Notes to Consolidated Financial Statements for further disclosure. Financial information presented below for the years ended December 31, 2014, December 31, 2013, November 30, 2012, November 30, 2011, November 30, 2010, and the one-month transition period ended December 31, 2012 has been derived from our financial statements audited by Ernst & Young LLP, our independent registered public accounting firm. The historical data is not necessarily indicative of results to be expected for any future period.

Results of operations for the years ended December 31, 2014 and 2013, November 30, 2012, 2011 and 2010, and the one-month transition period ended December 31, 2012, and the financial position at December 31, 2014, 2013 and 2012, and November 30, 2012, 2011 and 2010 reflect the consolidation of the Company's wholly-owned subsidiary, Mowood, effective, September 21, 2011.

	Year Ended December 31, 2014	Year Ended December 31, 2013	Year Ended November 30, 2012	Year Ended November 30, 2011	Year Ended November 30, 2010	One-Month Transition Period Ended December 31, 2012
Operating Data						
Total revenue	\$ 40,308,573	\$ 31,286,020	\$ 10,573,997	\$ 3,225,463	\$ —	\$ 1,726,901
Income (loss) from continuing operations attributable to CORR stockholders	7,013,856	4,502,339	12,348,721	2,922,143	14,666,874	(1,503,396)
Per Share Data						
Income (loss) from continuing operations attributable to CORR stockholders	\$ 0.21	\$ 0.19	\$ 1.34	\$ 0.32	\$ 1.61	\$ (0.10)
Cash dividends declared per common share ⁽³⁾	\$ 0.51	\$ 0.38	\$ 0.44	\$ 0.41	\$ 0.43	\$ —
Other Data						
AFFO ⁽¹⁾⁽²⁾	\$ 0.56	\$ 0.52	\$ 0.43	N/A	N/A	N/A

(1) We believe that net income, as defined by U.S. GAAP, is the most appropriate earnings measurement. However, we consider Adjusted Funds From Operations ("AFFO") to be an appropriate measure of operating performance of an equity REIT. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - FFO/AFFO" included in Item 7 of this Annual Report on Form 10-K for a reconciliation of AFFO to our GAAP earnings.

(2) AFFO was not calculated for the years ended November 30, 2011 and 2010 and the one-month transition period ended December 31, 2012.

(3) Dividends in 2013 were affected by the change in year end

	December 31, 2014	December 31, 2013	November 30, 2012	November 30, 2011	November 30, 2010	December 31, 2012
Balance sheet data

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain statements included or incorporated by reference in this Annual Report on Form 10-K may be deemed "forward-looking statements" within the meaning of the federal securities laws. In many cases, these forward-looking statements may be identified by the use of words such as "will," "may," "should," "could," "believes," "expects," "anticipates," "estimates," "intends," "projects," "goals," "objectives," "targets," "predicts," "plans," "seeks," or similar expressions. Any forward-looking statement speaks only as of the date on which it is made and is qualified in its entirety by reference to the factors discussed throughout this report.

Although we believe the expectations reflected in any forward-looking statements are based on reasonable assumptions, forward-looking statements are not guarantees of future performance or results and we can give no assurance that these expectations will be attained. Our actual results may differ materially from those indicated by these forward-looking statements due to a variety of known and unknown risks and uncertainties. In addition to the risk factors discussed in Part I, Item 1A of this report, such known risks and uncertainties include, without limitation:

- the ability of our tenants and borrowers to make payments under their respective leases and mortgage loans, our reliance on certain major tenants and our ability to re-lease properties that become vacant;*
- our ability to obtain suitable tenants for our properties;*
- changes in economic and business conditions, including the financial condition of our tenants and general economic conditions in the energy industry, and in the particular sectors of that industry served by each of our infrastructure assets;*
- the inherent risks associated with owning real estate, including local real estate market conditions, governing laws and regulations, including potential liabilities relating to environmental matters, and illiquidity of real estate investments;*
- the impact of laws and governmental regulations applicable to certain of our infrastructure assets, including additional costs imposed on our business or other adverse impacts as a result of any unfavorable changes in such laws or regulations;*
- our ability to sell properties at an attractive price;*
- our ability to repay debt financing obligations;*
- our ability to refinance amounts outstanding under our credit facilities at maturity on terms favorable to us;*
- the loss of any member of our management team;*
- our ability to comply with certain debt covenants;*
- our ability to integrate acquired properties and operations into existing operations;*
- our continued ability to access the debt or equity markets;*
- the availability of other debt and equity financing alternatives;*
- market conditions affecting our debt and equity securities;*
- changes in interest rates under our current credit facility and under any additional variable rate debt arrangements that we may enter into in the future;*
- our ability to successfully implement our selective acquisition strategy;*
- our ability to maintain internal controls and processes to ensure all transactions are accounted for properly, all relevant disclosures and filings are timely made in accordance with all rules and regulations, and any potential fraud or embezzlement is thwarted or detected;*
- changes in federal or state tax rules or regulations that could have adverse tax consequences;*
- declines in the market value of our investment securities; and*
- changes in federal income tax regulations (and applicable interpretations thereof), or in the composition or performance of our assets, that could impact our ability to continue to qualify as a real estate investment trust for federal income tax purposes.*

This list of risks and uncertainties is only a summary and is not intended to be exhaustive. We disclaim any obligation to update or revise any forward-looking statements to reflect actual results or changes in the factors affecting the forward-looking information.

BUSINESS OBJECTIVE

CorEnergy, the first publicly listed energy infrastructure Real Estate Investment Trust (REIT), primarily owns assets in the midstream and downstream U.S. energy sectors that perform utility-like functions, such as pipelines, storage terminals, and transmission and distribution assets. Our objective is to provide stockholders with a stable and growing cash dividend, supported by long-term contracted revenue from operators of our assets, primarily under triple-net participating leases. We believe our leadership team's energy and utility expertise provides CorEnergy with a competitive advantage to own and acquire U.S. energy infrastructure assets in a tax-efficient, transparent, investor-friendly REIT.

We also may provide other types of capital, including loans secured by energy infrastructure assets. The assets we own and seek to acquire include pipelines, storage tanks, transmission lines and gathering systems, among others. We acquire assets that will enhance the stability of our dividend through diversification, while offering the potential for long term distribution growth. These sale-leaseback or real property mortgage transactions provide the energy company with a source of capital that is an alternative to sources such as corporate borrowing, bond offerings, or equity offerings.

Basis of Presentation

The consolidated financial statements include CorEnergy Infrastructure Trust, Inc., as of December 31, 2014, and its direct and indirect wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Critical Accounting Policies

The financial statements included in this report are based on the selection and application of critical accounting policies, which require management to make significant estimates and assumptions. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and require management's most difficult, complex or subjective judgments. The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, recognition of distribution income and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Actual results could differ from those estimates. See Note 2 to the Consolidated Financial Statements, included in this report for further information related to our significant accounting policies.

Long-Lived Assets

Leased assets, property and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful life of each asset. Expenditures for repairs and maintenance are charged to operations as incurred, and improvements, which extend the useful lives of assets, are capitalized and depreciated over the remaining estimated useful life of the asset.

We initially record long-lived assets at their purchase price plus any direct acquisition costs, unless the transaction is accounted for as a business combination. If the transaction is accounted for as a business combination, we allocate the purchase price to the acquired tangible and intangible assets and liabilities based on their estimated fair values. Refer to Note 5 of the Consolidated Financial Statements for additional information. We determine the fair values of assets and liabilities based on discounted cash flow models using current market assumptions, appraisals, recent transactions involving similar assets or liabilities or other objective evidence, and depreciates the asset values over the estimated remaining useful lives.

Intangibles and Goodwill

We may acquire long-lived assets that are subject to an existing lease contract with the seller or other lessee party and we may assume outstanding debt of the seller as part of the consideration paid. If, at the time of acquisition, the existing lease or debt contract is not at current market terms, we will record an asset or liability at the time of acquisition representing the amount by which the fair value of the lease or debt contract differs from its contractual value. Such amount is then amortized over the remaining contract term as an adjustment to the related lease revenue or interest expense.

We periodically review our long-lived assets, primarily real estate and goodwill, for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Our review involves comparing current and future operating performance of the assets, the most significant of which is undiscounted operating cash flows, to the carrying value of the assets.

Investment Securities

Our investments in securities are classified as either trading or other equity securities:

- **Trading securities** – Our publicly traded equity securities are classified as trading securities and are reported at fair value because we intend to sell these securities in order to acquire real asset investments.
- **Other equity securities** – Represent interests in private companies for which we have elected to report these at fair value under the fair value option.

Securities transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis.

Our other equity investments are primarily in illiquid securities of privately-held companies that are generally subject to restrictions on resale, have no established trading market and are fair-valued on a quarterly basis. Because of the inherent uncertainty of valuation, the fair values of such securities, which are determined in accordance with procedures approved by our Board of Directors, may differ materially from the values that would have been used had a ready market existed for the investments.

Revenue Recognition

Specific policies for our revenue and other income items are as follows:

- **Lease revenue** – Rental payments on the leased property are typically received on a monthly basis. Revenue from base rent is recognized on a straight-line basis over the term of the lease when collectibility is reasonably assured. Contingent rent is recognized when it is earned.
- **Sales revenue** – Revenues related to natural gas distribution and performance of management services are recognized in accordance with GAAP upon delivery of natural gas and upon the substantial performance of management and supervision services related to the expansion of the natural gas distribution system. Omega, acting as a principal, provides for transportation services and natural gas supply for its customers. In addition, Omega is paid fees for the operation and maintenance of its natural gas distribution system, including any necessary expansion of the distribution system. Omega is responsible for the coordination, supervision and quality of the expansions while actual construction is generally performed by third party contractors. Revenues from expansion efforts are recognized in accordance with GAAP using either a completed contract or percentage of completion method based on the level and volume of estimates utilized, as well as the certainty or uncertainty of our ability to collect those revenues.
- **Transportation revenue** – MoGas generates revenue from natural gas transportation and recognizes that revenue on firm contracted capacity over the contract period regardless of the amount of natural gas that is transported. For interruptible or volumetric based transportation, revenue is recognized when physical deliveries of natural gas are made at the delivery point agreed upon by both parties.
- **Financing revenue** – Our financing notes receivable are considered a core product offering and therefore the related income is presented as a component of operating income in the revenue section. For increasing rate loans, base interest income is recorded ratably over the life of the loan, using the effective interest rate. The net amount of deferred loan origination fees and costs are amortized on a straight-line basis over the life of the loan and reported as an adjustment to yield in financing revenue. Participating financing revenues are recorded when specific performance criteria have been met.
- **Dividends and distributions from investments** – Dividends and distributions from investments are recorded on their ex-dates and are reflected as other income within the accompanying Consolidated Statements of Income. Distributions received from our investments generally are characterized as ordinary income, capital gains and distributions received from investment securities. The portion characterized as return of capital is paid by our investees from their cash flow from operations. We record investment income, capital gains and distributions received from investment securities based on estimates made at the time such distributions are received. Such estimates are based on information available from each company and other industry sources. These estimates may subsequently be revised based on information received from the portfolio entities after their tax reporting periods are concluded, as the actual character of these distributions is not known until after our fiscal year end.
- **Realized and unrealized gains (losses) on trading securities and other equity securities** – Changes in the fair values of the Company's securities during the period reported and the gains or losses realized upon sale of securities during the period are reflected as other income within the accompanying Consolidated Statements of Income.

Cost of Sales

Included in our cost of sales are the amounts paid for natural gas and propane, along with related transportation costs, as well as the cost of material and labor related to the expansion of the natural gas distribution system.

Transportation, maintenance and general and administrative

These expenses are incurred both internally and externally. Internally we incur expenses related to the system control, pipeline operations, maintenance, insurance and taxes. Other internal expenses include payroll costs for employees associated with gas control, field employees, the office manager and the vice presidents of operations and finance. The external costs consist of professional services such as audit and accounting, legal and regulatory, and engineering.

Federal and State Income Taxation

We made an election to be treated as a REIT for tax purposes for 2013 by filing a Form 1120-REIT on March 17, 2014. An investment in us will generally not result in Unrelated Business Taxable Income, except to the extent the tax-exempt investor leverages its investment. For further information, see "Federal and State Income Taxation" below in this Item 7 and "Federal and State Income Taxation" under Item 5 "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" of this report.

Change in Fiscal Year End

On February 5, 2013, the Board of Directors of the Company approved a change in the Company's fiscal year end from November 30 to December 31. This change to the calendar year reporting cycle began January 1, 2013. As a result of the change, the Company reported a December 2012 fiscal month transition period, which was reported in the Quarterly Report on Form 10-Q for the calendar quarter ended March 31, 2013 and is included in this Annual Report on Form 10-K for the calendar year ending December 31, 2014.

RESULTS OF OPERATIONS

We believe the Lease Revenue, Security Distributions, Financing Revenue and Operating Results overview presented below provides investors with information that will assist them in analyzing the operating performance of our leased assets, financing notes receivable, private equity securities and operating entities. As it pertains to Other Equity Securities, the Company believes that gross distributions received are indicative of the operating performance of the assets. Accordingly, we have excluded them from EBITDA, resulting in an Adjusted EBITDA metric.

As discussed in Note 4 to the Consolidated Financial Statements included in this report of Form 10-K, the Company entered into a definitive Purchase Agreement with PNM to sell the Company's interest in the EIP leased asset upon termination of the PNM Lease Agreement on April 1, 2015. The following Results of Operations analysis includes Lease Revenue and Depreciation Expense related to the PNM Lease Agreement and the EIP leased asset.

Following is a comparison of lease revenues, security distributions, financing revenue and operating results, and expenses, for the years ended December 31, 2014, December 31, 2013 and November 30, 2012 and pro forma for the year ended December 31, 2014:

	For the Years Ended			Pro Forma December 31, 2014 ⁽¹⁾
	December 31, 2014	December 31, 2013	November 30, 2012

⁽¹⁾Pro forma results of operations illustrating the effects of all 2014 transactions as if they occurred on January 1, 2014, see pro forma discussion presented herein.

Lease Revenue, Security Distributions, Financing Revenue and Operating Results

In 2014, our operating performance was derived primarily from leases of real property assets, distributions from our remaining portfolio of equity investments, financing revenue from our loan agreement with Black Bison WS and the operating results of MoGas and Omega. Total lease revenue, security distributions, financing revenue and operating results generated by our investments for the year ended December 31, 2014 was approximately \$33.7 million, compared to \$25.4 million and \$8.5 million for the years ended December 31, 2013 and November 30, 2012, respectively.

Lease revenues for the year ended December 31, 2014 increased \$5.7 million compared to the prior-year period due mainly to the addition of the Portland Terminal Facility lease, which was added in January 2014. Additionally, due to annual CPI escalations in the Pinedale Lease Agreement, required annual minimum rent for 2014 increasing by approximately 1.53 percent or \$76 thousand per quarter, account for the remaining increase over prior year. Lease revenues for the year ended December 31, 2013 increased by \$20.0 million compared to the prior- year period due to the acquisition of the Pinedale LGS. Included in lease revenue is \$2.6 million related to the PNM Lease Agreement for the years ended December 31, 2014 and 2013 and November 30, 2012. Please

refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

The \$1.3 million in transportation revenue and the \$459 thousand in transportation, maintenance and general and administrative expenses reflect the November 2014 acquisition of MoGas and its pipeline operations.

The \$1.1 million in financing revenues for the year ended December 31, 2014, primarily represents interest earned as a result of the new Loan Agreements with Black Bison WS, which were executed in March and July 2014.

Cash distributions received from our equity securities for the year ended December 31, 2014 were \$1.9 million. The difference of \$148 thousand over the prior year is attributable to only receiving three distributions from VantaCore in 2014 and to Lightfoot limiting their 2013 distributions to prepare for their IPO. The Company anticipates 2015 cash distributions from our equity securities to be approximately \$1.0 million. Cash distributions received from our other equity securities for the years ended December 31, 2013 and November 30, 2012 were \$1.8 million and \$4.7 million, respectively.

Sales revenue, cost of sales, and operating expenses, excluding depreciation and amortization, related to Omega's natural gas operations for the year ended December 31, 2014 were \$9.7 million, \$7.3 million and \$841 thousand, respectively. The increase in sales revenue and cost of sales over prior year of \$976 thousand and \$557 thousand, respectively, is attributable to the increase in gas prices, increase in system improvement and propane sales and the purchase of gas capacity. Cost of sales decreased \$397 thousand due to the acquisition of MoGas. Since MoGas is a supplier to Omega, revenue and costs are eliminated for consolidation purposes. Operating expenses decreased \$84 thousand over prior year, mostly attributable to 2013 including nonrecurring personnel costs. Sales revenue, cost of sales, and operating expenses, excluding depreciation and amortization, related to Omega's natural gas operations for the year ended December 31, 2013 were \$8.7 million, \$6.7 million and \$925 thousand, respectively. Sales revenue, cost of sales, and operating expenses, excluding depreciation and amortization, related to Omega's natural gas operations for the year ended November 30, 2012 were \$8.0 million, \$6.1 million and \$740 thousand, respectively.

Expenses

Total expenses from operations for the year ended December 31, 2014 was \$7.9 million. The most significant components of the variance from the prior year are outlined in the following table and explained below:

	Expenses			
	For the Years Ended			Pro Forma
	December 31, 2014	December 31, 2013	November 30, 2012	December 31, 2014 ⁽¹⁾
Management fees	\$ 3,467,660	\$ 2,637,265	\$ 1,046,796	\$ 4,585,671
Asset acquisition expense	929,188	806,083	377,834	929,188
Professional fees, directors' fees and other	3,475,905	2,436,516	1,457,181	3,745,443
Total	\$ 7,872,753	\$ 5,879,864	\$ 2,881,811	\$ 9,260,302

⁽¹⁾Pro forma results of operations illustrating the effects of all 2014 transactions as if they occurred on January 1, 2014, see Pro forma discussion presented herein.

Management fees for the year ended December 31, 2014 were \$3.5 million. The increase, as compared to the year ended December 31, 2013, is due to the 2014 acquisitions of the Portland Terminal and MoGas Pipeline, along with loan agreements with Black Bison WS. The increase from November 30, 2012 to December 31, 2013 is primarily due to the 2012 acquisition of the Pinedale LGS.

Asset acquisition expense represents costs incurred throughout the year as we pursue potential opportunities to expand our REIT-qualified asset portfolio. Annual costs for the year ended December 31, 2014 are \$123 thousand higher than the year ended December 31, 2013. Costs incurred during the year ended December 31, 2014 correspond to the MoGas transaction and the pursuit of potential acquisitions. The increase of \$428 thousand for the year ended December 31, 2013 compared to prior year is due to the pursuit of potential acquisitions. Generally, we expect asset acquisition expenses to be repaid over time from income generated by acquisitions. However, any particular quarter may reflect significant expenses arising from third party legal, engineering and consulting fees that are incurred in the early to mid stages of due diligence.

The remaining expenses, which include professional and directors' fees and other expenses, totaled \$3.5 million for the year ended December 31, 2014. The increase of \$1.0 million as compared to the year ended December 31, 2013 is driven by professional fees incurred preparing for two stock offerings, additional costs associated with transitioning to a REIT, such as legal, financial audit and tax costs and other professional fees and services. The \$979 thousand increase in expenses from November 30, 2012

to December 31, 2013 is driven by incremental costs related to Pinedale LGS, additional costs associated with transitioning to a REIT, such as legal, financial audit and tax costs and other professional fees and services.

Non-Controlling Interest Attributable to Adjusted EBITDA Items

Based on Prudential's 18.95 percent ownership interest in Pinedale LP, the Company is required to make a further adjustment to the adjusted EBITDA items presented above to exclude the portion attributable to Prudential's non-controlling interest, which totaled \$3.8 million for the year ended December 31, 2014, compared \$3.7 million for the year ended December 31, 2013. The increase of \$81 thousand is attributable to an increase in rent due to the CPI rent adjustment of \$76k per quarter and a decrease in professional fees at Pinedale LP.

Adjusted EBITDA Attributable to CORR Stockholders

Adjusted EBITDA attributable to CORR Stockholders for the year ended December 31, 2014 was \$22.0 million as compared to \$15.8 million and \$5.6 million for the years ended December 31, 2013 and November 30, 2012, respectively. As noted above, the increase in adjusted EBITDA is primarily related to the acquisitions of the Portland Terminal Facility and MoGas, as well as the loan agreements with Black Bison WS. The acquisition of the Pinedale LGS accounts for the majority of the fluctuation from the prior year.

PRO FORMA ADJUSTMENTS

The preceding unaudited pro forma condensed consolidated results of operations are based upon currently available information and certain estimates and assumptions made by management; therefore, actual results could differ materially from the pro forma information. However, we believe the assumptions provide a reasonable basis for presenting the significant effects of the transactions noted herein. We believe pro forma adjustments give appropriate effect to those assumptions and are properly applied in the pro forma information. The 2014 transactions include: the Portland Terminal Facility Acquisition and Lease, the Black Bison Note Receivable, the Four Wood Note Receivable, the MoGas Pipeline System Acquisition and the VantaCore sale to Natural Resource Partners.

Lease Revenue, Net Cash Distributions, Financing Revenue and Operating Results

The amount of incremental pro forma lease revenue for the year ended December 31, 2014 is \$686 thousand which includes \$653 thousand related to the Portland Terminal Facility and approximately \$33 thousand related to a minor lease acquired in connection with the MoGas transaction.

The amount of incremental pro forma financing revenue is \$1.5 million for the year ended December 31, 2014. The amount of incremental pro forma financing revenue related to the Black Bison WS loan agreement and the SWDE loan agreement is \$886 thousand and \$618 thousand, respectively, for the year ended December 31, 2014.

The change in net cash distributions received reflected in the pro forma results of operations assumes that VantaCore was sold on January 1, 2014. The pro forma adjustment to remove VantaCore activity results in a decrease of cash distributions received of \$1.1 million for the year ended December 31, 2014.

Transportation revenue is generated by MoGas Pipeline's natural gas transportation services. The amount of incremental pro forma transportation revenue is \$13.0 million for the year ended December 31, 2014. Because of our ownership of Omega, transportation revenue and cost of sales are decreased due to inter-company eliminations by \$2.0 million for the year ended December 31, 2014.

Transportation, maintenance and general and administrative expense relates to costs incurred from the operations of MoGas. The amount of incremental pro forma transportation, maintenance and general and administrative operating expense is \$4.0 million for the year ended December 31, 2014.

The pro forma adjustment to expenses is due to an increase in management fees and other expenses. The incremental increase of \$1.1 million in management fees is due to the addition of approximately \$172 million in managed assets for the Portland Terminal Facility and MoGas Pipeline, and an average decrease of approximately \$1.9 million due to the sale of VantaCore. The pro forma adjustment of \$270 thousand in other expenses is due to an incremental increase in other expenses from MoGas of \$283 thousand and an incremental decrease in other expenses of \$13 thousand from the sale of VantaCore.

The following table presents a reconciliation of Adjusted EBITDA to Income attributable to CORR stockholders reported in the consolidated statements of operations and comprehensive income:

	For the Years Ended			
	December 31, 2014	December 31, 2013	November 30, 2012	Pro Forma December 31, 2014 ⁽³⁾
Adjusted EBITDA Attributable to CORR Stockholders	\$ 21,983,503	\$ 15,819,465	\$ 5,580,540	\$ 32,730,796
Other Adjustments:				
Net distributions and dividend income not recorded as income	(118,235)	(1,222,615)	(4,985,370)	(212,629)

Depreciation & amortization	(13,195,255)	(11,491,285)	(1,118,269)	(16,159,746)
Interest expense, net	(3,675,122)	(3,288,378)	(81,123)	(5,368,673)
Non-controlling interest attributable to depreciation, amortization and interest expense	2,259,428	2,268,117	—	2,259,428
Income tax benefit (expense)	225,563	(2,949,518)	(7,228,934)	982,217
Income Attributable to CORR Stockholders	<u>\$ 7,013,856</u>	<u>\$ 4,502,339</u>	<u>\$ 12,348,721</u>	<u>\$ 13,389,963</u>
Adjusted EBITDA per share (basic and diluted)	\$ 0.67	\$ 0.66	\$ 0.61	\$ 0.70
Net earnings per share (basic and diluted)	\$ 0.21	\$ 0.19	\$ 1.34	\$ 0.29
AFFO per share (basic and diluted) ⁽¹⁾	\$ 0.56	\$ 0.52	\$ 0.43	\$ 0.61
Book value per share (basic and diluted) ⁽²⁾	\$ 6.66	\$ 7.34	\$ 10.76	\$ 6.66

⁽¹⁾For a full reconciliation of AFFO per share (basic and diluted) to Income Attributable to CORR Stockholders, see FFO/AFFO Reconciliation table presented herein.

⁽²⁾For a full reconciliation of book value per share (basic and diluted) to Income Attributable to CORR Stockholders, see Book Value Per Share table presented herein.

⁽³⁾Pro forma results of operations illustrating the effects of all 2014 transactions as if they occurred on January 1, 2014, see pro forma discussion presented herein.

Net Distributions and Dividend Income Not Recorded as Income

The following table summarizes the breakout of net distributions and dividends reported as income (loss) on the income statement. The table shows the gross distributions and dividend income received from our investment securities on a cash basis, less the amounts that were comprised of distributions and dividends not reported in income received from investment securities (return of capital):

	For the Years Ended			
	December 31, 2014	December 31, 2013	November 30, 2012	Pro Forma December 31, 2014 ⁽¹⁾
Distributions and dividend income received from investment securities	\$ 1,955,018	\$ 1,807,429	\$ 4,705,975	\$ 896,686
Less: distributions and dividends not reported in income (recorded as a cost reduction)	(118,235)	(1,222,615)	(4,985,370)	(212,629)
Net distributions and dividends reported as income (loss)	<u>\$ 1,836,783</u>	<u>\$ 584,814</u>	<u>\$ (279,395)</u>	<u>\$ 684,057</u>

⁽¹⁾Pro forma results of operations illustrating the effects of all 2014 transactions as if they occurred on January 1, 2014, see pro forma discussion presented herein.

Net Realized and Unrealized Gains and Losses on Securities

The decrease in realized and unrealized gains and losses from other equity securities for the year ended December 31, 2014 totaled \$5.8 million, as compared to the year ended December 31, 2013. For the year ended December 31, 2014, the Company recognized an unrealized loss on the fair value adjustment of our other equity securities of \$466 thousand. Further, the characterization of distributions received from public and private investments is estimated based on prior year activity. After receiving final 2013 K-1s, which depict to the Company's share of income and losses from the investment in the security, it was determined that \$863 thousand of previously unrealized gain should be reclassified as dividend income. For the year ended December 31, 2013, the Company recognized an unrealized gain on the fair value adjustment of our other equity securities of \$5.3 million and a realized gain of \$316 thousand from the sale of publicly traded securities. Further, it was determined that \$567 thousand of previously

recognized gain should be reclassified as dividend income. For the year ended December 31, 2013, \$2.7 million of the \$5.4 million gain is attributable to activity in the first quarter of 2013, which included the sale of the Company's remaining trading securities and the fair value adjustment of other equity securities which remain in our investment portfolio. Net realized and unrealized gains for the fiscal year 2012 was \$20.2 million, which was primarily related to the sale of High Sierra during 2012.

Depreciation and Amortization

Depreciation expense increased \$1.7 million for the year ended December 31, 2014, as compared to the prior year period. The increase is attributable to the newly acquired Portland Terminal Facility, \$1.4 million, and MoGas Pipeline, \$309 thousand, respectively. For the year ended December 31, 2013, depreciation of the Pinedale LGS and related acquisition costs accounted for \$8.9 million of the \$10.4 million increase as compared to the year ended November 30, 2012. PNM depreciation increased by \$1.6 million for the for the year ended December 31, 2013 due to a change in accounting estimate, which is further discussed in Footnote 4 of the Notes to the Consolidated Financial Statements. Included in depreciation expense is \$2.3 million for the years ended December 31, 2014 and 2013, attributable to EIP leased asset. Depreciation expense of approximately \$837 thousand was incurred on our EIP leased property for the fiscal year ended 2012. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this quarterly report on Form 10-K. Depreciation for Omega remained relatively flat between the years ended December, 31, 2014, December 31, 2013 and November 30, 2012, as there were no major acquisitions or disposals of property, plant or equipment.

Interest Expense

Interest expense was approximately \$3.7 million for the year ended December 31, 2014 as compared to \$3.3 million for the year ended December 31, 2013. The increase is mostly attributable to the deferred debt costs associated with the KeyBank and Regions Revolver facilities; as well as interest incurred from the draw on the Regions Revolver Facility as part of the MoGas Transaction. For the year ended December 31, 2013, interest expense increased \$3.2 million as compared to the year ended November 30, 2012. The increase is mostly attributable to the \$70 million credit facility, which was used to partially fund the Pinedale LGS acquisition, resulting in additional interest costs of approximately \$3.3 million for the year ended December 31, 2013. In connection with the credit facility, we executed interest rate swap derivatives to add stability to our interest expense and to manage our exposure to interest rate movements on our LIBOR-based borrowings. Interest rate swaps involve the receipt of variable-rate amounts from a counterparty in exchange for us making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount. (See Note 15 of the Notes to the Consolidated Financial Statements for further information regarding interest rate swap derivatives.) A mark-to-market adjustment to the value of the derivatives resulted in noncash charges to interest expense of \$40 thousand for the year ended December 31, 2013. The remaining increase is related to cash settlements in connection with the derivatives and amortization of debt issuance cost.

Non-Controlling Interest Attributable to Depreciation, Amortization and Interest Expense

Due to Prudential's 18.95 percent ownership interest in Pinedale LP, the Company must make adjustments for non-controlling interests. Non-controlling interest attributable to depreciation, amortization and interest expense items was \$2.3 million for the years ended December 31, 2014 and 2013.

Net Income Attributable to CORR Stockholders

Net income attributable to common stockholders was \$7.0 million, or \$0.21 per common share, for the year ended December 31, 2014 as compared to \$4.5 million, or \$0.19 per common share, for the year ended December 31, 2013. Net income attributable to common stockholders was \$12.3 million, or \$1.34 per common share, for the year ended November 30, 2012.

PRO FORMA ADJUSTMENTS

The pro forma adjustments to net distributions and dividend income not recorded as income, and net realized and unrealized gain on securities assume that VantaCore was sold on January 1, 2014. Net distributions and dividend income not recorded as income decreased by \$94 thousand for the year ended December 31, 2014. Net realized and unrealized loss on securities increased by \$375 thousand for the year ended December 31, 2014.

The pro forma adjustment to interest expense is due to the amortization of fees associated with and borrowings on the Regions Bank credit facility in connection with the MoGas transaction. The incremental increase in pro forma cash interest expense is \$1.7 million for the year ended December 31, 2014.

The income tax adjustment is related to the effect of the pro forma adjustments due to the purchase of the MoGas pipeline, the issuance of financing notes to Black Bison WS and SWD Enterprises, and the sale of VantaCore. Income tax expense adjustments

for the MoGas Pipeline, the financing notes to Black Bison WS and SWD Enterprises, and the sale of VantaCore have been calculated at historical rates of 40 percent, 35 percent and 39 percent, respectively, for the period ended December 31, 2014.

Results of Operations for the One-Month Transition Period Ended December 31, 2012 and the Comparative One-Month Period Ended December 31, 2011

On February 5, 2013, the Board of Directors of the Company approved a change in the Company's fiscal year end from November 30 to December 31. This change to the calendar year reporting cycle began January 1, 2013. As a result of the change, the Company is reporting a December 2012 fiscal month transition period, which is separately reported in this Annual Report on Form 10-K for the calendar year ending December 31, 2014.

Following is a comparison of lease revenues, security distributions and operating results, and expenses, for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011:

	For the One- Month Transition Period Ended	For the Comparative One-Month Period Ended
	December 31, 2012	December 31, 2011
Lease Revenue, Security Distributions, and Operating Results		
Leases:		
Lease revenue	\$ 857,909	\$ 212,748
Other Equity Securities:		
Net cash distributions received	2,325	119,275
Operations:		
Sales revenue	868,992	866,864
Cost of sales	(686,976)	(719,686)
Operating expenses, excluding depreciation and amortization	(48,461)	(51,283)
Net Operations, excluding depreciation and amortization	133,555	95,895
Total Lease Revenue, Security Distributions, and Operating Results	\$ 993,789	\$ 427,918
Expenses	(589,661)	(140,744)
Non-controlling interest attributable to adjusted EBITDA items	(113,448)	—
Adjusted EBITDA attributable to CORR Stockholders	\$ 290,680	\$ 287,174

Lease Revenue, Security Distributions, and Operating Results

Total lease revenue, security distributions, and operating results for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011, were approximately \$994 thousand and \$428 thousand, respectively. The 2012 lease revenue includes lease revenue from the Pinedale LGS investment beginning December 20, 2012, which primarily accounts for the \$645 thousand difference between periods. Cash distributions received from investments decreased approximately \$117 thousand, due to the Company liquidating its portfolio of trading securities in December 2012. Operating results related to Omega operations for the one-month transition period ended December 31, 2012 increased by \$38 thousand as compared to the one-month period ended December 31, 2011. Sales revenue related to Omega operations for the one-month transition period ended December 31, 2012 was fairly level at \$869 thousand. Cost of sales for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011 were \$687 thousand and \$720 thousand, respectfully. The \$33 thousand difference between periods results from the lower gas usage rates in the winter of 2012. Operating expense remained level for the one-month transition period ended December 31, 2012 in relation to the comparative one-month period ended December 31, 2011 at approximately \$48 thousand.

Expenses

Total reported expenses from operations for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011 were approximately \$590 thousand and \$141 thousand, respectively. The variance is due to expenses incurred during the acquisition of the Pinedale LGS. The most significant components of the variation are outlined in the following table:

Expenses from Operations			
	For the One-Month Transition Period Ended December 31, 2012	For the Comparative One-Month Period Ended December 31, 2011	Increase
Management fees, net of expense reimbursements	\$ 155,242	\$ 81,081	\$ 74,161
Asset acquisition expense	64,733	—	64,733
Professional fees, directors' fees and other	369,686	59,663	310,023
Total	\$ 589,661	\$ 140,744	\$ 448,917

Management fees, asset acquisition expense and professional fees, directors' fees, other expenses for the one-month transition period ended December 31, 2012 totaled \$155 thousand, \$65 thousand, and \$370 thousand, respectively. Management fees, asset acquisition expense and professional fees, directors' fees, other expenses for the comparative one-month period ended December 31, 2011 totaled \$81 thousand, \$0, and \$60 thousand, respectively. The variance of \$449 thousand is primarily due to additional expenditures associated with the acquisition of the Pinedale LGS.

Non-Controlling Interest Attributable to Adjusted EBITDA Items

Due to Prudential's 18.95 percent ownership interest in Pinedale LP, the Company must make adjustments for non-controlling interests. Adjusted EBITDA items attributable to Prudential's non-controlling interest was \$113 thousand for the one-month transition period ending December 31, 2012.

Adjusted EBITDA Attributable to CORR Stockholders

Adjusted EBITDA attributable to CORR Stockholders for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011 was \$291 thousand and \$287 thousand, respectfully. The increase in adjusted EBITDA is primarily related to the acquisition of the Pinedale LGS.

The following table presents a reconciliation of Income attributable to CORR stockholders reported in the consolidated statements of operations and comprehensive income to Adjusted EBITDA:

	For the One- Month Transition Period Ended December 31, 2012	For the Comparative One-Month Period Ended December 31, 2011
Adjusted EBITDA Attributable to CORR Stockholders	\$ 290,680	\$ 287,174
Other Adjustments:		
Net distributions and dividend income not recorded as income	—	(89,153)
Net realized and unrealized gain on securities	(1,928,553)	1,578,046
Depreciation & amortization	(501,324)	(82,206)
Interest expense, net	(416,137)	(7,084)
Non-controlling interest attributable to depreciation, amortization and interest expense	131,795	—
Income tax expense	920,143	(628,493)
Income Attributable to CORR Stockholders	\$ (1,503,396)	\$ 1,058,284
Adjusted EBITDA per share (basic and diluted)	\$ 0.02	\$ 0.03
Net earnings (loss) per share (basic and diluted)	\$ (0.10)	\$ 0.12

Net Distributions and Dividend Income Not Recorded as Income

The following table summarizes the breakout of net distributions and dividends reported as income (loss) on the income statement.

The table shows the gross distributions and dividend income received from our investment securities on a cash basis, less the amounts that were comprised of distributions and dividends not reported in income received from investment securities (return of capital):

Gross Distributions and Dividend Income Received From Investment Securities

	For the One-Month Transition Period Ended	For the Comparative One-Month Period Ended
	December 31, 2012	December 31, 2011
Distributions and dividend income received from investment securities	\$ 2,325	\$ 119,275
Less: distributions and dividends not reported in income (recorded as a cost reduction)	—	(89,153)
Net distributions and dividends reported as income	\$ 2,325	\$ 30,122

Net Realized and Unrealized Gains and Losses on Securities

The decrease in realized and unrealized gains and (losses) from trading and other equity securities for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011 totaled \$(1.9) million and \$1.6 million, respectively. During 2011, our income was still primarily derived from our portfolio of trading and other equity securities. By the end of 2012, we had liquidated the majority of our trading securities and had acquired the Pinedale LGS, now our largest source of income.

Depreciation and Amortization

The acquisition of the Pinedale LGS drove the increase in costs, with Pinedale depreciation expense accounting for the majority of the total increase for the one month transition period ended December 31, 2012.

Depreciation expense increased by \$417 thousand between periods. This increase is mainly due to the depreciation incurred for Pinedale LGS, which was \$286 thousand for the one-month transition period ended December 31, 2012. PNM depreciation increased by \$131 thousand for the one-month transition period ended December 31, 2012 relative to the comparative one-month period ended December 31, 2011, see Footnote 4 for further discussion. Omega's depreciation remained level between periods at \$24 thousand as there were no major acquisitions or disposals of property, plant, or equipment.

Interest Expense

Interest expense was approximately \$416 thousand and \$7 thousand for the one-month transition period ended December 31, 2012 and the comparative one-month period ended December 31, 2011, respectively. The increase is attributable to the \$70 million credit facility, which was used to partially fund the Pinedale LGS acquisition, resulting in additional interest costs.

Non-Controlling Interest Attributable to Depreciation, Amortization and Interest Expense

Due to Prudential's 18.95 percent ownership interest in Pinedale LP, the Company must make adjustments for non-controlling interests. Non-controlling interest attributable to depreciation, amortization and interest expense items was \$132 thousand for the one-month transition period ended December 31, 2012.

Net Income

Net income (loss) for the one-month transition period ended December 31, 2012 was \$(1.5) million. Net income (loss) for the comparative one-month period ended December 31, 2011 was \$1.1 million. December 2012 was a month of transition as the company liquidated its trading securities portfolio resulting in losses that were only somewhat offset by a partial month of lease revenues from the newly acquired Pinedale LGS leased asset.

Book Value per Share

Analysis of Equity	December 31, 2014	December 31, 2013
Warrants, no par value; 0 and 945,594 issued and outstanding at December 31, 2014 and December 31, 2013 (5,000,000 authorized)	\$ —	\$ 1,370,700
Capital stock, non-convertible, \$0.001 par value; 46,605,055 and 24,156,163 shares issued and outstanding at December 31, 2014 and December 31, 2013 (100,000,000 shares authorized)	46,605	24,156
Additional paid-in capital	309,950,440	173,441,019
Accumulated retained earnings	—	1,580,062
Accumulated other comprehensive income	453,302	777,403
Total CorEnergy Equity	310,450,347	177,193,340
Shares outstanding	46,605,055	24,156,163
Book Value per Share	<u>\$ 6.66</u>	<u>\$ 7.34</u>

As of December 31, 2014, our equity increased by approximately \$133.3 million to \$310.5 million from \$177.2 million as of December 31, 2013. This increase principally consisted of net proceeds from our January and November share offerings of approximately \$141.7 million and a net increase in equity resulting from operations for the year ended December 31, 2014 of approximately \$7.0 million, partially offset by a decrease due to dividends paid of approximately \$15.3 million.

NAREIT FFO

As defined by the National Association of Real Estate Investment Trusts, NAREIT FFO represents net income (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable operating property, real estate-related depreciation and amortization (excluding amortization of deferred financing costs or loan origination costs) and after adjustments for unconsolidated partnerships and joint ventures.

FFO ADJUSTED FOR SECURITIES INVESTMENTS (FFO)

Due to the legacy investments that we hold, we have also historically presented a measure of FFO, which we refer herein as FFO Adjusted for Securities Investments, derived by further adjusting NAREIT FFO for Distributions received from investment securities, Income tax expense, net and Net distributions and dividend income. Historically, we have labeled FFO Adjusted for Securities Investments as "FFO" in our periodic reports. Both NAREIT FFO and FFO Adjusted for Securities Investments are supplemental, non-GAAP financial measures.

We present NAREIT FFO and FFO Adjusted for Securities Investments because we consider it an important supplemental measure of our operating performance and believe that it is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. FFO is a key measure used by the Company in assessing performance and in making resource allocation decisions.

Both NAREIT FFO and FFO Adjusted for Securities Investments are intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions, and that may also be the case with the energy infrastructure assets in which we invest. Because NAREIT FFO and FFO Adjusted for Securities Investments exclude depreciation and amortization unique to real estate and gains and losses from property dispositions and extraordinary items, it provides a performance measure that, when compared year over year, reflects the impact to operations from trends in base and participating rent, company operating costs, development activities and interest costs, thereby providing perspective not immediately apparent from net income.

We calculate NAREIT FFO in accordance with standards established by the Board of Governors of the National Association of Real Estate Investment Trusts, in its March 1995 White Paper (as amended in November 1999 and April 2002) and FFO Adjusted for Securities Investment as NAREIT FFO with additional adjustments described above due to our legacy investments. This may differ from the methodology for calculating FFO utilized by other equity REITs and, accordingly may not be comparable to such other REITs. NAREIT FFO and FFO Adjusted for Securities Investments do not represent amounts available for management's discretionary use because of needed capital for replacement or expansion, debt service obligations or other commitments and uncertainties. NAREIT FFO and FFO Adjusted for Securities Investments as historically reported by the Company should be considered as an alternative to net income (computed in accordance with GAAP), as an indicator of our financial performance or to cash flow from operating activities (computed in accordance with GAAP), as an indicator of our liquidity, or as an indicator of funds available for our cash needs, including our ability to make distributions or to service our indebtedness.

AFFO

AFFO is a supplemental, non-GAAP financial measure which we define as FFO Adjusted for Securities Investment plus transaction costs, amortization of debt issuance costs, deferred leasing costs, above-market rent, and certain costs of a nonrecurring nature, less maintenance, capital expenditures (if any), amortization of debt premium and other adjustments as deemed appropriate by Management. Management uses AFFO as a measure of long-term sustainable operational performance.

We target a total return of 8 percent to 10 percent per annum on the infrastructure assets that we own, measured over the long term. We intend to generate this return from the base rent of our leases plus growth through acquisitions and participating portions of our rent and financing interest revenue. If we are successful growing our AFFO per share of common stock, we anticipate being able to increase distributions to our stockholders. In addition, the increase in our AFFO per share of common stock should result in capital appreciation.

AFFO does not represent amounts available for management's discretionary use because such amounts are needed for capital replacement or expansion, debt service obligations or other commitments and uncertainties. AFFO should not be considered as an alternative to net income (computed in accordance with GAAP), as an indicator of our financial performance or to cash flow from operating activities (computed in accordance with GAAP), as an indicator of our liquidity, or as an indicator of funds available for our cash needs, including our ability to make distributions or service our indebtedness.

In light of the per share AFFO growth that we foresee in our operations, we are targeting 1 percent to 3 percent annual dividend growth. We can provide no assurances regarding our total return or annual dividend growth. See "Risk Factors" for a discussion of the many factors that may affect our ability to make distributions at targeted rates, or at all.

The following table presents a comparison of NAREIT FFO, FFO Adjusted for Securities Investment and AFFO, for the years ended December 31, 2014 and December 31, 2013 and pro forma for the year ended December 31, 2014:

⁽¹⁾Pro forma results of operations illustrating the effects of all 2014 transactions as if they occurred on January 1, 2014

⁽²⁾For further discussion regarding pro forma adjustments, refer to the information presented above in this Item 7 under the heading "Results of Operations"

NAREIT FFO

NAREIT FFO for the years ended December 31, 2014 and December 31, 2013 totaled approximately \$18.5 million and \$14.3 million, respectively. NAREIT FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition above.

FFO ADJUSTED FOR SECURITIES INVESTMENTS (FFO)

FFO for the year ended December 31, 2014 totals approximately \$18.5 million. FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition, above. In addition, we have made adjustments for noncash items impacting net income for the proforma year ended December 31, 2014 by eliminating net realized and unrealized gain on other equity securities of approximately \$466 thousand; adding distributions received from investment securities of approximately \$1.9 million; and adding back income tax expense of approximately \$226 thousand. For the year ended December 31, 2013, adjustments we made for noncash items impacting net income by eliminating a net realized and unrealized gain on other equity securities of approximately \$5.6 million; adding distributions received from investment securities of approximately \$1.8 million; and adding back income tax expense of approximately \$2.9 million. For the year ended December 31, 2014 and 2013, \$274 thousand of net income is attributable to the PNM Lease Agreement. Included in the amount being added back to depreciation expense is \$2.3 million of depreciation attributable to EIP leased asset for years ended December 31, 2014 and 2013. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

AFFO

AFFO for the years ended December 31, 2014 and 2013 totals approximately \$18.6 million and \$12.7 million, respectively. In addition to the adjustments outlined in the AFFO definition above, we have included an adjustment to back out lease revenue associated with the EIP investment. This adjustment totals \$2.2 million for the years ended December 31, 2014 and 2013. Based on the economic return to CorEnergy resulting from the sale of our 40 percent undivided interest in EIP, we determined that it was appropriate to eliminate the portion of EIP lease income attributable to return of capital, as a means to more accurately reflect the EIP lease revenue contribution to CorEnergy-sustainable AFFO. CorEnergy believes that the portion of the EIP lease revenue attributable to return of capital, unless adjusted, overstates CorEnergy's distribution-paying capabilities and is not representative of sustainable EIP income over the life of the lease. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

PRO FORMA NAREIT FFO

Pro forma NAREIT FFO for the proforma year ended December 31, 2014 totaled approximately \$27.8 million. Pro forma NAREIT FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition above.

PRO FORMA FFO ADJUSTED FOR SECURITIES INVESTMENTS (PRO FORMA FFO)

Pro forma FFO for the year ended December 31, 2014 totals approximately \$27.9 million. Pro forma FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition, above. In addition, we have made adjustments for noncash items impacting net income for the year ended December 31, 2014 by eliminating net realized and unrealized gain on other equity securities of approximately \$841 thousand; adding distributions received from investment securities of approximately \$883 thousand; and adding back income tax expense of approximately \$1.0 million. For the year ended December 31, 2014, \$274 thousand of net income is attributable to the PNM Lease Agreement. Included in the amount being added back to depreciation expense is \$2.3 million of depreciation attributable to EIP leased asset for year ended December 31, 2014. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

PRO FORMA AFFO

Pro forma AFFO for the year ended December 31, 2014 totals approximately \$28.2 million. In addition to the adjustments outlined in the AFFO definition above, we have included an adjustment to back out lease revenue associated with the EIP investment. This adjustment totals \$2.2 million for the proforma year ended December 31, 2014. Based on the economic return to CorEnergy resulting from the sale of our 40 percent undivided interest in EIP, we determined that it was appropriate to eliminate the portion of EIP lease income attributable to return of capital, as a means to more accurately reflect the EIP lease revenue contribution to CorEnergy-sustainable proforma AFFO. CorEnergy believes that the portion of the EIP lease revenue attributable to return of capital, unless adjusted, overstates CorEnergy's distribution-paying capabilities and is not representative of sustainable EIP income over the life of the lease. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

NAREIT FFO, FFO ADJUSTED FOR SECURITIES INVESTMENTS (FFO), AFFO

The following table presents a comparison of NAREIT FFO, FFO Adjusted for Securities Investments (FFO) and AFFO for each of the calendar quarters of 2014:

NAREIT FFO, FFO Adjusted for Securities Investments (FFO) and AFFO Reconciliation				
	For the Three Months Ended			
	December 31, 2014	September 30, 2014	June 30, 2014	March 31, 2014
Net Income (attributable to CorEnergy Stockholders):	\$ 14,370	\$ 1,888,418	\$ 3,005,908	\$ 2,105,159
Add:				
Depreciation	3,560,077	3,237,261	3,204,911	3,131,637
Less:				
Non-Controlling Interest attributable to FFO reconciling items	411,455	411,455	411,455	411,455
NAREIT Funds from operations (NAREIT FFO)	3,162,992	4,714,224	5,799,364	4,825,341
Add:				
Distributions received from investment securities	244,438	864,575	341,484	491,260
Income tax expense, net	(1,806,838)	324,883	742,879	513,513
Less:				
Net distributions and dividend income	136,885	1,686,637	—	—
Net realized and unrealized gain (loss) on other equity securities	(2,978,764)	(865,470)	2,084,026	1,294,182
Funds from operations adjusted for securities investments (FFO)	4,442,471	5,082,515	4,799,701	4,535,932
Add:				
Transaction costs	789,648	102,591	20,732	16,217
Amortization of debt issuance costs	205,845	306,300	144,840	144,840
Amortization of deferred lease costs	15,342	15,343	15,342	15,342
Amortization of above market leases	72,983	72,985	72,985	72,984
Noncash costs associated with derivative instruments	(17,588)	(18,200)	(17,443)	(17,489)
Less:				
EIP Lease Adjustment	542,809	542,809	542,809	542,809
Non-Controlling Interest attributable to AFFO reconciling items	23,150	23,286	23,179	23,170
Adjusted funds from operations (AFFO)	\$ 4,942,742	\$ 4,995,439	\$ 4,470,169	\$ 4,201,847
Weighted Average Shares	38,779,981	31,641,851	31,637,568	29,973,357
NAREIT FFO per share	\$ 0.08	\$ 0.15	\$ 0.18	\$ 0.16
FFO adjusted for securities investments (FFO) per share	\$ 0.11	\$ 0.16	\$ 0.15	\$ 0.15
AFFO per share	\$ 0.13	\$ 0.16	\$ 0.14	\$ 0.14

NAREIT FFO

NAREIT FFO for the three months ended December 31, 2014 totals approximately \$3.2 million. NAREIT FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition above.

FFO ADJUSTED FOR SECURITIES INVESTMENTS (FFO)

FFO for the three months ended December 31, 2014 totals approximately \$4.4 million. FFO was calculated in accordance with the National Association of Real Estate Investment Trust's definition, above. In addition, we have made adjustments for noncash items impacting net income for the three months ended December 31, 2014 by eliminating net realized and unrealized losses on other equity securities of approximately \$3.0 million; adding distributions received from investment securities of approximately \$244 thousand; and adding back income tax expense of approximately \$1,807 thousand. For the three-month period ended December 31, 2014, \$69 thousand of net income is attributable to the PNM Lease Agreement. Included in the amount being added back to depreciation expense is \$570 thousand of depreciation attributable to EIP leased asset for three-month period ended December 31, 2014. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

AFFO

AFFO for the three months ended December 31, 2014 totals approximately \$4.9 million. In addition to the adjustments outlined in the AFFO definition above, we have included an adjustment to back out lease revenue associated with the EIP investment. This adjustment totals \$543 thousand for the three month period ended December 31, 2014. Based on the economic return to CorEnergy resulting from the sale of our 40 percent undivided interest in EIP, we determined that it was appropriate to eliminate the portion of EIP lease income attributable to return of capital, as a means to more accurately reflect the EIP lease revenue contribution to CorEnergy-sustainable AFFO. CorEnergy believes that the portion of the EIP lease revenue attributable to return of capital, unless adjusted, overstates CorEnergy's distribution-paying capabilities and is not representative of sustainable EIP income over the life of the lease. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

FEDERAL AND STATE INCOME TAXATION

In 2013 we qualified, and in March 2014 elected (effective as of January 1, 2013), to be treated as a REIT for federal income tax purposes (which we refer to as the "REIT Election"). Because certain of our assets may not produce REIT-qualifying income or be treated as interests in real property, those assets are held in wholly-owned TRSs in order to limit the potential that such assets and income could prevent us from qualifying as a REIT.

For years ended in 2012 and before, the distributions we made to our stockholders from our earnings and profits were treated as qualified dividend income ("QDI") and return of capital. QDI is taxed to our individual shareholders at the maximum rate for long-term capital gains, which through tax year 2012 was 15 percent and beginning in tax year 2013 will be 20 percent. The Company has elected to be taxed as a REIT for 2013 rather than a C corporation and generally will not pay federal income tax on taxable income of the REIT that is distributed to our stockholders. As a REIT, our distributions from earnings and profits will be treated as ordinary income and a return of capital, and generally will not qualify as QDI. To the extent that the REIT had accumulated C corporation earnings and profits from the periods prior to 2013, we distributed such earnings and profits in 2013. A portion of our normal distributions in 2013 have been characterized for federal income tax purposes as a distribution of those earnings and profits from non-REIT years and have been treated as QDI. In addition, to the extent we receive taxable distributions from our TRSs, or the REIT received distributions of C corporation earnings and profits, such portion of our distribution will be treated as QDI.

As a REIT, the Company holds and operates certain of our assets through one or more wholly-owned TRSs. Our use of TRSs enables us to continue to engage in certain businesses while complying with REIT qualification requirements and also allows us to retain income generated by these businesses for reinvestment without the requirement of distributing those earnings. In the future, we may elect to reorganize and transfer certain assets or operations from our TRSs to the Company or other subsidiaries, including qualified REIT subsidiaries.

The Company's trading securities and other equity securities are limited partnerships or limited liability companies which are treated as partnerships for federal and state income tax purposes. As a limited partner, the Company reports its allocable share of taxable income in computing its own taxable income. To the extent held by a TRS, the TRS's tax expense or benefit is included in the Consolidated Statements of Income based on the component of income or gains and losses to which such expense or benefit relates. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. A valuation allowance is recognized if,

based on the weight of available evidence, it is more likely than not that some portion or all of the deferred income tax asset will not be realized.

If we cease to qualify as a REIT, the Company, as a C corporation, would be obligated to pay federal and state income tax on its taxable income. Currently, the highest regular marginal federal income tax rate for a corporation is 35 percent. The Company may be subject to a 20 percent federal alternative minimum tax on its federal alternative minimum taxable income to the extent that its alternative minimum tax exceeds its regular federal income tax.

SEASONALITY

The Company's wholly-owned subsidiary, Omega, experiences a substantial amount of seasonality in gas sales. As a result, overall sales and operating income are generally higher in the first and fourth quarters and lower during the second and third quarters of each year. Alternatively, another wholly-owned subsidiary, MoGas, has stable revenues throughout the year, however, will attempt to complete necessary pipeline maintenance during "non-heating" season, or quarters two and three. Due to the seasonal nature of Omega and MoGas, operating results for the interim periods are not necessarily indicative of the results that may be expected for the full year.

ASSET PORTFOLIO AND RELATED DEVELOPMENTS

An overview of our asset portfolio and related operations, including our remaining private equity securities as of December 31, 2014, is included under "Assets and Private Equity Investments" under Item 1 "Business" of this report and additional information is presented in Notes 3, 4, 5 and 6 in the Notes to the Consolidated Financial Statements included in this report. This section provides additional information concerning the asset portfolio, including our remaining private equity securities, and related developments during the year ended December 31, 2014.

Pinedale LGS

The Pinedale Lease Agreement with Ultra Wyoming, a subsidiary of Ultra Petroleum, has a fifteen year initial term and may be extended for additional five-year terms at the sole discretion of Ultra Wyoming. During the initial fifteen-year term, Pinedale LP will receive a fixed minimum annual rent of \$20 million, adjusted annually for changes based on the CPI, subject to a 2 percent annual cap. The annual adjustment for changes in the CPI commenced January 1, 2014, resulting in an increase in quarterly rent of \$76 thousand, the quarterly increase effective January 1, 2015 is \$85 thousand. In January 2014, we also became eligible for a variable rent component based on the volume of liquid hydrocarbons and water that flowed through the Pinedale LGS in a prior month. As of December 31, 2014, no variable rent based on throughput was due under the Pinedale Lease Agreement. The maximum annual rental payments under the Pinedale Lease Agreement during the initial fifteen-year term are \$27.5 million. For the year ended December 31, 2014, UPL reported net income of \$543 million, an increase of \$305 million from the prior year ended December 31, 2013.

During 2014, Ultra Petroleum acquired 19,600 net mineral acres and associated oil and gas production in the Pinedale field in Sublette County, Wyoming from SWEPI, LP, an affiliate of Royal Dutch Shell. As part of the transaction, Ultra Petroleum exchanged producing and non-producing properties in Pennsylvania and paid cash of \$925.0 million. As a result of the transaction, Ultra Petroleum now operates a higher percentage of its properties and is expected to have increased control over its capital allocation. Ultra Petroleum believes that the transaction should lead to improved returns, higher reserves, and more sales in higher value markets.

Portland Terminal Facility

During the fifteen-year initial term of the Portland Lease Agreement, Arc Terminals will make base monthly rental payments and variable rent payments based on the volume of liquid hydrocarbons that flowed through the Portland Terminal Facility in the prior month.

The base rent in the initial year of the Portland Lease Agreement increased to approximately \$418 thousand per month starting with August 2014 and each month thereafter. The base rent is also expected to increase based on a percentage of specified construction costs incurred by LCP Oregon, estimated at \$10 million. Assuming such improvements are completed, the base rent will increase by approximately \$95,800 per month. As of December 31, 2014, additional spending on terminal-related projects totaled approximately \$6.0 million. Base rent as of December 31, 2014 was approximately \$471 thousand. The base rent is not influenced by the flow of hydrocarbons.

Variable rent will result from the flow of hydrocarbons through the Portland Terminal in excess of a designated threshold of 12,500 barrels per day of oil equivalent. Variable rent is capped at 30 percent of total rent, which would be the equivalent of the Portland Terminal Facility's expected throughput capacity. As of December 31, 2014, no variable rent based on throughput was due under

the Portland Lease Agreement. The Portland Lease Agreement also contains certain renewal provisions, as well as certain termination and purchase rights subject to advance notice and required payments to the Company as provided therein. Our ownership interest in the Portland Terminal Facility partially secures borrowings under the Company's \$90 million revolving credit facility with Regions Bank.

During February 2015, Arc Logistics Partners LP, agreed to acquire a crude unloading terminal and a 4-mile crude oil pipeline, the Joliet Terminal, which are in the final stage of construction in Joliet, Illinois and are expected to be complete in April 2015. The acquisition will not close until the Joliet Terminal becomes commercially operable. Once complete, the Joliet Terminal will have the capability to unload approximately 85,000 barrels of crude oil per day, have approximately 300,000 thousand barrels of storage and a 4-mile pipeline connection to a common carrier crude oil pipeline. The facility will have rail and marine access and capabilities as well as more than 80 acres of land available for future expansion.

MoGas Acquisition

In November 2014, the Company issued common stock, the proceeds of which, together with borrowings under our revolving line of credit, were used to capitalize our wholly-owned TRS, Corridor MoGas. Concurrently, Corridor MoGas used the proceeds to acquire all of the membership interests of two entities that own and operate the MoGas Pipeline System, an approximately 263 mile interstate natural gas pipeline system in and around St. Louis and extending into central Missouri and certain related real and personal property. The MoGas Pipeline System, which is regulated by the Federal Energy Regulatory Commission, delivers natural gas to both investor-owned and municipal local distribution systems and has eight firm transportation customers. The MoGas Pipeline System receives natural gas at three receipt points and delivers that natural gas at 22 delivery points. Our ownership interest in the MoGas Pipeline System partially secures borrowings under the Company's \$90 million revolving credit facility with Regions Bank. Additionally, as part of the capitalization, Corridor MoGas has a \$90 million term note with the Company. See Note 5 of the Notes to the Consolidated Financial Statement included in this annual report on Form 10-K for additional information concerning this acquisition.

Black Bison Financing Notes Receivable

On March 13, 2014, our subsidiary Corridor Bison entered into a REIT Loan Agreement ("Black Bison REIT Loan") with Black Bison WS, pursuant to which Corridor Bison agreed to loan Black Bison WS up to \$11.5 million. Corridor Bison increased the Black Bison Loan to \$12 million on July 24, 2014. Also, on July 24, 2014, our subsidiary, CorEnergy BBWS, Inc. entered into a TRS Loan Agreement ("BBWS TRS Loan"), pursuant to which CorEnergy BBWS agreed to loan Black Bison WS up to \$3.3 million. The proceeds of the Black Bison Loan and the BBWS TRS Loan (collectively, the "Black Bison Notes Receivable") were used by Black Bison WS and its affiliates to finance the acquisition and development of real property that will provide water disposal services for the oil and natural gas industry. Total borrowings under the Black Bison Notes Receivable total \$15.3 million with the BBWS TRS Loan being structurally subordinate to the Black Bison REIT Loan with respect to priority of security interest and cash flows. In connection with these transactions, we also acquired warrants to purchase up to 18.72 percent of the outstanding equity of Black Bison Intermediate Holdings, LLC. See Note 6 of the Notes to the Consolidated Financial Statement included in this annual report on Form 10-K for additional information concerning this transaction.

Four Wood Financing Notes Receivable

On December 31, 2014, the Company entered into two separate loan agreements (the Four Wood REIT Loan Agreement and the Four Wood TRS Loan Agreement, collectively, "the Four Wood Loan Agreements") with a total commitment to lend \$11 million with SWD Enterprises, LLC ("SWDE") for the purpose of acquiring a salt-water disposal well. At closing, the Company funded \$4 million (the "Four Wood REIT Loan") of the \$10 million total commitment to lend under the Four Wood REIT Loan Agreement from a newly-formed, wholly-owned, REIT subsidiary, Four Wood Corridor, LLC. ("Four Wood Corridor"), and \$1 million (the "Four Wood TRS Loan"), representing the full commitment to lend under the Four Wood TRS Loan Agreement, from the Company's pre-existing wholly owned TRS, Corridor Private, Inc. ("CorPrivate"), to SWDE. The Four Wood TRS Loan is structurally subordinate to the REIT Loan with respect to priority of security interest and cash flows. Any advances subsequent to the initial advance, and up to \$11 million, will be approved by the Company at its sole discretion. See Note 6 of the Notes to the Consolidated Financial Statement included in this annual report on Form 10-K for additional information concerning this transaction.

Eastern Interconnect Project

The Eastern Interconnect Project ("EIP") is leased to Public Service Company of New Mexico ("PNM") under a triple-net lease. The EIP lease terminates on April 1, 2015, with the sale of the Company's 40 percent undivided interest for \$7.7 million. The remaining lease payments were received in full on January 2, 2014. Please refer to Note 4 for additional discussion of the PNM Purchase Agreement and its effects on the consolidated financial statements included in this annual report on Form 10-K.

Mowood, Omega Pipeline

Mowood Corridor, Inc. is a wholly-owned taxable REIT subsidiary of the Company and represents less than one percent of the Company's total assets. Mowood, LLC is wholly-owned by Mowood Corridor, Inc. and is the holding company of Omega Pipeline. Omega Pipeline owns and operates a natural gas distribution system at the US Army's Fort Leonard Wood, in south central Missouri. Omega Pipeline serves the natural gas needs of Fort Leonard Wood and other customers in the surrounding area. The Company provides financing to Mowood secured by Omega Pipeline's real property assets which allows for a maximum principal balance of \$5.3 million. At December 31, 2014 and December 31, 2013, the principal balance outstanding was \$5.3 million.

The agreement with the Department of Defense ("DOD") was set to expire on January 31, 2015. On January 28, 2015, the DOD awarded Omega a 6 month bridge extension of the current agreement for Omega to continue providing natural gas and gas distribution services until a new agreement is reached. On October 21, 2014, the DOD formally solicited qualifications and proposals from other parties that may be interested in providing the services Omega currently provides. In this solicitation, the DOD stated that Omega is the owner of the distribution system, and that any interested party must have a feasible plan to either procure the existing system from Omega, partner with Omega, install a new natural gas distribution system or create another alternative to natural gas. It also states that if no acceptable alternatives come forward, it is the DOD's intent to award a new 10 year contract to Omega. Based on these statements from the DOD and its knowledge of the local market, Omega currently expects that an additional ten-year term will be agreed to by the DOD by the second quarter of 2015. See Note 10 of the Notes to the Consolidated Financial Statement included in this report for additional information on Omega Pipeline.

Private Security Assets

As of December 31, 2014, investments in securities of energy infrastructure companies represents 2 percent of the Company's total assets. Following is a summary of the fair values of the other equity securities that we held at December 31, 2014 as they compare to the fair values at December 31, 2013.

Fair Value of Other Equity Securities				
Portfolio Company	Fair Value at December 31, 2014	Fair Value at December 31, 2013	\$ Change	% Change
Lightfoot	\$ 9,217,181	\$ 10,528,743	\$ (1,311,562)	(12.5)%
VantaCore*	—	12,775,578	(12,775,578)	(100.0)%
Black Bison Warrant	355,000	—	355,000	n/a
Total Other Equity Securities	<u>\$ 9,572,181</u>	<u>\$ 23,304,321</u>	<u>\$ (13,732,140)</u>	<u>(58.9)%</u>

* This investment was liquidated prior to 12/31/14, as discussed below.

Lightfoot

The fair value of Lightfoot Capital Partners, LP and Lightfoot Capital Partners GP LLC (collectively, "Lightfoot") as of December 31, 2014, decreased \$957 thousand, or 9.1 percent, as compared to the valuation at December 31, 2013, primarily due to the change in value of Arc Logistics' publicly traded shares and slightly offset by a decrease in the Company's marketability discount. The Company received a fourth quarter distribution of approximately \$244 thousand. ARCX is the publicly listed common unit trading symbol for Arc Logistics. On the last day of December the value declined 11.7 percent from \$19.30 to \$17.06 per share. During the time period January 1, 2015 through March 12, 2015, it has since traded back to a volume weighted average price of \$18.47 per share.

Based on the minimum quarterly distributions that Arc Logistics plans to make following its IPO as described in its IPO prospectus, and ongoing discussions with Lightfoot's management, the Company currently expects to receive distributions of approximately \$1 million from Lightfoot during fiscal 2015, provided there are no reductions in the distributions to fund other uses of capital at Lightfoot. The Company expects distributions to be funded primarily by Lightfoot's distributions from Arc Logistics. However, both the ability of Arc Logistics to make quarterly distributions and the amount of such distributions will be dependent on Arc Logistics' business results, and neither Arc Logistics nor Lightfoot is under any obligation to make such distributions. Accordingly, there can be no assurance that our expectations concerning 2015 distributions from Lightfoot will be realized.

VantaCore

On October 1, 2014, Natural Resource Partners L.P. completed its acquisition of VantaCore Partners LP. The Company's portion of the sale proceeds was approximately \$13.6 million, of which \$2.9 million will be held in escrow pending certain post-closing obligations or the expiration of certain time periods. The Company elected to pay income tax on the VantaCore sale as cash distributions are received. The first cash tax payment attributable to the gain on the sale of VantaCore, approximately \$2.3 million, was paid in the fourth quarter. The remaining cash tax payments are expected to be made in subsequent years as distributions

from escrow are received. For additional details, please refer to Item 2.01 of the Company's Current Report on Form 8-K, filed with the SEC on October 7, 2014.

Formerly Owned High Sierra Energy, LP and High Sierra Energy, GP ("High Sierra")

On June 19, 2012, NGL Energy Partners, LP and certain of its affiliates (collectively "NGL") acquired High Sierra. By March 31, 2013, the Company had liquidated all its NGL holdings. Upon receipt of the final 2012 K-1, tax expense related to the sale was recognized in the second quarter of 2013.

Formerly Owned International Resource Partners, LP

The escrow receivable due the Company as of November 30, 2012, which related to the sale of International Resource Partners, LP, was settled during the second quarter of 2013 upon satisfaction of certain post-closing obligations. The fair value of the escrow receivable reflected a discount for the potential that the full amount due to the Company would not be realized. The actual payment received in the amount of \$1.0 million exceeded the balance recorded of \$699 thousand, resulting in a second quarter gain of approximately \$307 thousand.

CONTRACTUAL OBLIGATIONS

The following table summarizes our significant contractual payment obligations as of December 31, 2014.

Contractual Obligations					
	Notional Value	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-Term Debt	\$ 67,060,000	\$ 3,528,000	\$ 63,532,000	\$ —	\$ —
Interest payments on long-term debt		2,268,834	2,152,498	—	—
Totals		\$ 5,796,834	\$ 65,684,498	\$ —	\$ —

The Company's revolving credit facilities and Mowood Note Payable are not included in the above table because they relate to indebtedness under a line of credit with no fixed repayment schedule. Fees paid to Corridor under the Management Agreement and the Administrative Agreement are not included because they vary as a function of the value of our total assets under management. For additional information see Note 11 in the Notes to the Consolidated Financial Statements in this report.

In December of 2012, Pinedale LP entered into a \$70 million secured term credit facility with KeyBank to finance a portion of the acquisition of the Pinedale LGS. The primary term of the credit facility is three years, with an option for a one-year extension. Under the KeyBank credit facility, Pinedale LP is obligated to make monthly principal payments, which began in the second year of the term, equal to 0.42 percent of the \$70 million loan outstanding. Interest accrues at a variable annual rate equal to LIBOR plus 3.25 percent. For purposes of the above presentation, interest payments were calculated using the LIBOR rate in effect at December 31, 2014 (0.17% at December 31, 2014).

OFF-BALANCE SHEET ARRANGEMENTS

We do not have, and are not expected to have, any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

MAJOR TENANTS

As of December 31, 2014 the Company had three significant leases. The table below displays the impact of leases on total leased properties and total lease revenues for the periods presented.

	As a Percentage of					
	Leased Properties		Lease Revenues			
	As of December 31, 2014	As of December 31, 2013	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013	For the Year Ended November 30, 2012	For the One-Month Transition Period December 31, 2012
Pinedale LGS	79.17%	94.23%	71.94%	88.68%	—	75.20%
Portland Terminal Facility	17.24%	—	18.98%	—	—	—
Public Service of New Mexico	3.07%	5.77%	9.05%	11.32%	100.00%	24.80%

Pinedale LGS

In December of 2012, the Company entered into a lease guaranteed by Ultra Petroleum, which is material to the Company. In view of the fact that Ultra Petroleum leases a substantial portion of the Company's net leased property which is a significant source of revenues and operating income, its financial condition and ability and willingness to satisfy its obligations under its lease with the Company, are expected to have a considerable impact on the results of operation going forward.

Ultra Petroleum is currently subject to the reporting requirements of the Exchange Act and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of Ultra Petroleum can be found on the SEC's website at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of Ultra Petroleum, but has no reason to doubt the accuracy or completeness of such information. In addition, Ultra Petroleum has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. Summary Consolidated Balance Sheets and Consolidated Statements of Operations for Ultra Petroleum are provided in Note 4 in the Notes to the Consolidated Financial Statements included in this annual report on Form 10-K.

Portland Terminal Facility

In January 2014, the Company entered into a triple-net lease with Arc Terminals for use of the Portland Terminal Facility, which is guaranteed by Arc Logistics. Arc Logistics has an equity market capitalization of approximately \$245 million as of March 12, 2015, based on the number of common and subordinated units outstanding as of Arc Logistics' 2015 annual report on Form 10-K filed with the SEC on March 12, 2015.

Arc Logistics is currently subject to the reporting requirements of the Exchange Act and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of Arc Logistics can be found on the SEC's web site at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of Arc Logistics but has no reason to doubt the accuracy or completeness of such information. In addition, Arc Logistics has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. None of the information in the public reports of Arc Logistics that are filed with the SEC is incorporated by reference into, or in any way form, a part of this filing.

EIP

The Company's investment in EIP is leased under a net operating lease with various terms to PNM. PNM is a subsidiary of PNM Resources Inc. ("PNM Resources"), which is currently subject to the reporting requirements of the Exchange Act and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of PNM Resources can be found on the SEC's website at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of PNM Resources but has no reason to doubt the accuracy or completeness of such information. In addition, PNM Resources has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. None of the information in the public reports of PNM Resources that are filed with the SEC is incorporated by reference into, or in any way, form part of this filing.

DIVIDENDS

The following table sets forth distributions for the years ended December 31, 2014, December 31, 2013 and November 30, 2012. Distributions are shown in the period in which they were declared. A dividend relating to the fourth quarter of 2013 was declared and paid in January 2014.

	Amount	
<u>2014</u>		
Fourth Quarter	\$	0.1300
Third Quarter	\$	0.1300
Second Quarter	\$	0.1290
First Quarter	\$	0.1250
<u>2013</u>		
Fourth Quarter ⁽¹⁾	\$	—
Third Quarter	\$	0.1250
Second Quarter	\$	0.1250
First Quarter	\$	0.1250
<u>2012</u>		
Fourth Quarter	\$	0.1100
Third Quarter	\$	0.1100
Second Quarter	\$	0.1100
First Quarter	\$	0.1100

(1) The 2013 fourth quarter dividend was paid in the first quarter of 2014. On January 3, 2014, our Board declared a dividend of \$0.125 per share, payable January 23, 2014 to common stockholders of record as of January 13, 2014.

Our portfolio of real property assets, promissory notes, and investment securities generates cash flow to us from which we pay distributions to stockholders. For the period ended December 31, 2014, the sources of our stockholder distributions include lease and financing revenue from our real property assets and distributions from our investment securities. The amount of any distribution is recorded by the Company on the ex-dividend date. The characterization of any distribution for federal income tax purposes will not be determined until after the end of the taxable year.

In consideration of the additional lease income available to support distributions following our acquisition of the Portland Terminal Facility, our Board of Directors approved an increase in our quarterly distribution payable to stockholders, effective beginning from the date we closed on such acquisition, to \$0.13 per share from \$0.125 per share. This increase was reflected in the first quarter 2014 distribution of \$0.129 per share that we announced on April 30, 2014 (prorated for the partial quarter following the closing of the Portland Terminal Facility on January 21, 2014). Our second quarter 2014 distribution of \$0.13 per share was announced on July 31, 2014 and reflects a full quarter of revenue from the Portland Terminal Facility. Our third quarter 2014 distribution of \$0.13 per share was announced on October 31, 2014 and paid on November 28, 2014. Our fourth quarter distribution of \$0.13 per share was announced on January 28, 2015 and was paid on February 27, 2015.

In 2013, CorEnergy changed its fiscal year as part of its transition from a business development company to a REIT. As a result of this change, the dividend payment schedule for calendar 2013 varied from prior years. Going forward, the Company intends to maintain a quarterly February/May/August/November dividend payment cycle. Dividend payouts may be affected by cash flow requirements and remain subject to other risks and uncertainties. There is no assurance that we will continue to make regular distributions.

A REIT is generally required to distribute during the taxable year an amount equal to at least 90 percent of the REIT taxable income (determined under Internal Revenue Code section 857(b)(2), without regard to the deduction for dividends paid). We intend to adhere to this requirement in order to maintain our REIT status. The Board of Directors will continue to determine the amount of any distribution that we expect to pay our stockholders.

IMPACT OF INFLATION AND DEFLATION

Deflation can result in a decline in general price levels, often caused by a decrease in the supply of money or credit. The predominant effects of deflation are high unemployment, credit contraction and weakened consumer demand. Restricted lending practices could impact our ability to obtain financings or to refinance our properties and our tenants' ability to obtain credit. During inflationary periods, we intend for substantially all of our tenant leases to be designed to mitigate the impact of inflation. Generally our leases include rent escalators that are based on the CPI, or other agreed upon metrics that increase with inflation.

LIQUIDITY AND CAPITAL RESOURCES

Overview

At December 31, 2014, we had approximately \$53.0 million available for future investment. The \$53.0 million represents cash plus revolver availability totaling \$65.6 million less the following near-term commitments:

- current maturities of long-term debt of \$3.5 million;
- accounts payable and other accrued liabilities totaling \$3.9 million;
- management fee payable of \$1.2 million; and
- the remaining commitment of approximately \$4.0 million in additional capital improvements in connection with the Portland Terminal Facility.

There are opportunities that are in preliminary stages of review, and consummation of any of these opportunities depends on a number of factors beyond our control. There can be no assurance that any of these acquisition opportunities will result in consummated transactions. As part of our disciplined investment philosophy, we plan to use a moderate level of leverage, approximately 25 percent to 50 percent of assets, supplemented with accretive equity issuance as needed, subject to current market conditions. We may invest in assets subject to greater leverage which could be both recourse and non-recourse to us.

Cash Flows - Operating, Investing and Financing Activities

We had approximately \$7.6 million of cash and cash equivalents as of December 31, 2014, a net decrease of approximately \$10.4 million as compared to December 31, 2013.

Cash Flows from Operating Activities

For the year ended December 31, 2014, cash provided by operating activities totaled approximately \$16.9 million, representing an increase of \$9.2 million as compared to the year ended December 31, 2013. This increase was primarily attributable to increases in revenues due to the addition of the Portland Terminal Facility, MoGas Pipeline System and two energy infrastructure financing investments during 2014.

For the year ended December 31, 2013, cash provided by operating activities totaled approximately \$7.7 million, representing a decrease of \$1.9 million as compared to the year ended November 30, 2012. This decrease was attributable to aggregate operating cash flow reductions of \$21.1 million caused by (i) a reduction in lease payments from EIP due to a portion of the scheduled 2013 rental payments having been prepaid in 2012 in connection with the agreement to sell EIP to PNM Resources, (ii) decreases in cash distributions received (and an increase in income tax payments) related to the December 2012 liquidation of our portfolio of trading securities, (iii) an increase in interest expense due to debt incurred to finance the Pinedale LGS acquisition, (iv) an increase in management fees due to the increase in our total assets resulting from the Pinedale LGS acquisition, (v) delays in certain DOD contract payments to Omega resulting from the Federal budget sequestration, and (vi) miscellaneous increases in certain other expenses, mostly offset by a \$19.2 million increased lease revenue due to receiving our first full year of rent under the Pinedale LGS lease with UPL.

For the year ended November 30, 2012, cash provided by operating activities totaled approximately \$9.6 million, representing an increase of \$6.9 million as compared to the year ended November 30, 2011. This increase was primarily attributable to a \$1.4 million increase in revenues due to receipt of a full year of lease payments under the EIP lease which was only in place for six months in 2011, as well as receipt of advance rent of approximately \$2.4 million in connection with the agreement to sell EIP to PNM Resources and a \$2.1 increase in distributions received from our investment securities.

Cash provided by operating activities of \$767 thousand during the one-month transition period ended December 31, 2012 was primarily attributable to the rent payment received for the partial first-month associated with the acquisition and lease of the Pinedale LGS.

Cash Flows from Investing Activities

Net cash used in investing activities was \$177.1 million for the year ended December 31, 2014, as compared to net cash provided by investing activities of \$5.4 million and \$9.0 million for the years ended December 31, 2013 and November 30, 2012, respectively, and net cash used in investing activities of \$180.4 million for the one-month transition period ended December 31, 2012.

Significant factors impacting cash flows from investing activities during fiscal 2014 included the following:

- \$168.2 million of investment expenditures primarily related to the acquisitions of the Portland Terminal Facility and the MoGas Pipeline System.
- \$20.6 million invested in the Black Bison and Four Wood energy infrastructure financing notes receivable.
- \$10.8 million in proceeds from the sale of investment securities, primarily related to the sale of VantaCore in October 2014.

Significant factors impacting cash flows from investing activities during fiscal 2013 included the following:

- \$1.8 million of investment expenditures primarily related to the acquisition of the Pinedale LGS, as well as the pursuit of other investment opportunities.
- \$5.6 million in proceeds from additional sales to liquidate our legacy portfolio of investment securities.
- Approximately \$1.8 million in cash distributions received from our investment securities.

Significant factors impacting cash flows from investing activities during fiscal 2012 included the following:

- \$943 thousand of investment expenditures primarily related to the acquisition of the Pinedale LGS.
- \$10.0 million in proceeds from additional sales to liquidate our legacy portfolio of investment securities.

Significant factors impacting cash flows from investing activities during the one-month transition period ended December 31, 2012 included the following:

- \$205.7 million of investment expenditures primarily related to the acquisition of the Pinedale LGS.
- \$26.1 million in proceeds from the liquidation of our legacy portfolio of trading equity securities.

Cash Flows from Financing Activities

Net cash provided by financing activities was \$149.8 million for the year ended December 31, 2014, as compared to net cash used in financing activities of \$12.8 million and \$7.1 million for the years ended December 31, 2013 and November 30, 2012, respectively, and net cash provided by financing activities of \$183.0 million for the one-month transition period ended December 31, 2012.

Significant factors impacting cash flows from financing activities during fiscal 2014 included the following:

- Net proceeds of \$141.7 million from two underwritten public offerings of common stock in January 2014 (in conjunction with our acquisition of the Portland Terminal Facility) and November 2014 (in conjunction with our acquisition of the MoGas Pipeline System).
- Net proceeds from revolving line of credit borrowings, net of payments on our revolving line of credit and related debt financing costs, of \$28.8 million.
- Dividends and distributions of \$17.9 million paid to holders of our common stock and the holder of the non-controlling interest in Pinedale LP.
- Principal payments of \$2.9 million on the KeyBank secured term credit facility that financed a portion of the Pinedale LGS acquisition (as discussed below).

Significant factors impacting cash flows from financing activities during fiscal 2013 included the following:

- Dividends and distributions of \$12.2 million paid to holders of our common stock and the holder of the non-controlling interest in Pinedale LP.
- Additional offering costs of \$523 thousand related to the December 2012 underwritten public offering of common stock that partially financed the acquisition of the Pinedale LGS.
- Additional debt financing costs of \$145 thousand related to the establishment of a new revolving line of credit.
- Net proceeds from revolving line of credit borrowings of \$82 thousand (consisting of advances of \$221 thousand offset by payments of \$139 thousand).

Significant factors impacting cash flows from financing activities during fiscal 2012 included the following:

- Dividends of \$3.9 million paid to holders of our common stock.
- \$1.1 million of debt financing costs incurred in connection with the establishment of the KeyBank secured term credit facility that financed a portion of the Pinedale LGS acquisition (as discussed below).

- Net proceeds from revolving line of credit borrowings of \$120 thousand (consisting of advances of \$5.3 million offset by payments of \$5.2 million).
- Principal payments of \$2.2 million on the note payable assumed as part of the acquisition of the EIP asset. The note matured on October 1, 2012.

Significant factors impacting cash flows from financing activities during the one-month transition period ended December 31, 2012 included the following:

- Net proceeds of \$84.5 million from an underwritten public offering of common stock that partially financed the acquisition of the Pinedale LGS.
- \$30.0 million in equity proceeds from the co-investment in Pinedale LP by Prudential.
- Net financing proceeds of \$68.6 million (\$70.0 million net of debt financing costs of \$1.4 million) from the KeyBank secured term credit facility that partially financed the Pinedale LGS acquisition.
- Net payments on revolving line of credit borrowings of \$120 thousand (consisting of payments of \$650 thousand offset by advances of \$530 thousand).

Revolving and Term Credit Facilities

Pinedale Facility

Pinedale LP has a \$70.0 million secured term credit facility with KeyBank (the "KeyBank Term Facility") that provides for monthly payments of principal and interest. Outstanding balances under the credit facility generally accrue interest at a variable annual rate equal to LIBOR plus 3.25 percent. The KeyBank Term Facility is secured by the Pinedale LGS. Pinedale LP is obligated each month to pay all accrued interest and, beginning March 7, 2014, 0.42 percent of the principal amount outstanding on the loan on March 1, 2014. The KeyBank Term Facility will remain in effect through December 2015, with an option to extend through December 2016.

Interest rate swaps involve the receipt of variable-rate amounts from a counterparty in exchange for making fixed-rate payments over the life of the agreement without exchange of the underlying notional amount. In December of 2012 we executed interest rate swap derivatives covering \$52.5 million of notional value of the KeyBank Term Facility, to add stability to our interest expense and to manage our exposure to interest rate movements on our LIBOR based borrowings. The interest rate swap derivatives executed in December of 2012 have remained in place and effectively fixes the rate of interest applicable to the KeyBank Term Facility at a base rate of 3.25 percent plus 0.865 percent.

Additional Credit Facilities of the REIT

On May 8, 2013, we entered into a \$20.0 million revolving line of credit with KeyBank to fund general working capital needs and if necessary, to provide short-term financing for the acquisition of additional real property assets. The primary term of the facility was three years with the option for a one-year extension. As of September 26, 2014 there had been no borrowings against the KeyBank Revolver and the agreement was terminated.

On September 26, 2014 the company entered into a \$30.0 million revolving credit facility with Regions Bank, then on November 24, 2014, increased the credit facility, to \$90.0 million in conjunction with the MoGas acquisition. There were no borrowings on the Regions Revolver between September 26, 2014 and November 24, 2014. The facility has a maturity of November 24, 2018. For the first six months, subsequent to the increase, the facility will bear interest on the outstanding balance at a rate of LIBOR plus 3.50 percent. On and after May 24, 2015, the interest rate will be determined by a pricing grid where the applicable interest rate is anticipated to be LIBOR plus 2.75 percent to 3.50 percent, depending on the company's leverage ratio at such time. As of December 31, 2014, the outstanding balance on the Regions Revolver was \$32.0 million.

The Regions Revolver is secured by substantially all of the assets owned by the company and its subsidiaries other than (i) the assets held by Mowood, LLC, Omega Pipeline Company, Pinedale Corridor, LP and Pinedale, GP Inc. (the "Unrestricted Subs") and (ii) the equity investments in the Unrestricted Subs.

MoGas Credit Facility

In conjunction with the MoGas acquisition, MoGas Pipeline LLC and United Property systems, LLC, as co-borrowers, entered into a revolving credit agreement dated November 24, 2014 (the "MoGas Revolver"), with certain lenders, including Regions Bank as agent for such lenders. Pursuant to the MoGas Revolver, the co-borrowers may borrow, prepay and reborrow loans up to \$3.0 million outstanding at any time. Interest accrues under the MoGas Revolver at the same rate and pursuant to the same

terms as it accrues under the Regions Revolver. As of December 31, 2014, there is \$0 outstanding against the MoGas Revolver. As of December 31, 2014, the co-borrowers are in compliance of all covenants of the MoGas Revolver.

Mowood/Omega Credit Facility

On October 15, 2013, Mowood and Omega jointly entered into a new Revolving Note Payable Agreement ("2013 Note Payable Agreement"), replacing a prior \$1.3 million secured Note Payable Agreement (as amended), under which interest accrued and was payable monthly at LIBOR plus 4.00 percent and which expired on October 29, 2013. The 2013 Note Payable Agreement had a maximum borrowing base of \$1.5 million. Borrowings on the 2013 Note Payable Agreement were secured by Mowood's and Omega's assets. Interest accrued at the Prime Lending Rate as published in the Wall Street Journal, plus 0.5 percent (3.75 percent), was payable monthly and in full, with accrued interest, on the termination date of October 15, 2014.

On October 15, 2014, Mowood and Omega renewed the 2013 Note Payable Agreement by entering into a Revolving Note Payable Agreement ("2014 Note Payable Agreement") with a financial institution, extending the maturity date to January 31, 2015. The 2014 Note Payable Agreement has a maximum borrowing base of \$1.5 million. Borrowings on the Note Payable are secured by Mowood's assets. Interest accrues at the Prime Lending Rate as published in the Wall Street Journal, plus 0.5 percent (3.75 percent at December 31, 2014) and is payable monthly, with all outstanding principal and accrued interest payable on the termination date of January 31, 2015. The balance outstanding at December 31, 2014 was approximately \$141 thousand. The Note Payable Agreement contains various restrictive covenants, with the most significant relating to minimum consolidated fixed charge ratio, the incidence of additional indebtedness, member distributions, extension of guaranties, future investments in other subsidiaries and change in ownership. The 2014 Note Payable Agreement provides for an unused credit line fee of 20 basis points per month. Effective January 30, 2015, Mowood and Omega modified the 2014 Note Payable Agreement to extend the maturity date to July 31, 2015.

Debt Covenants

All of our debt agreements contain customary restrictive covenants related to financial and operating performance, including restrictions on additional debt, investments, distributions, etc., and such covenants include exceptions and qualifications. For example, and without limiting the foregoing, the Regions Revolver is subject to (i) a minimum fixed charge ratio of 3.5 to 1.0; (ii) a maximum total leverage ratio of 5.5 to 1.0; (iii) a maximum total recourse leverage ratio (which generally excludes debt from Unrestricted Subs) of 3.25 to 1.0 for the period ending March 31, 2015, and 3.0 to 1.0 thereafter; and (iv) a maximum total funded debt to capitalization ratio of 50 percent. The KeyBank Term Facility is subject to (i) a minimum interest rate coverage ratio of 5.5 to 1.0; (ii) a maximum leverage ratio, as of the date hereof and through the computation period ending August 31, 2015, 3.5 to 1.0 and, thereafter, 3.25 to 1.0; and (iii) a minimum net worth of \$115 million, each measured at the Pinedale LP level and not at the company level.

We were in compliance with all covenants at December 31, 2014.

Equity Offerings

We had a registration statement under the Securities Act of 1933, covering a proposed maximum aggregate offering price of \$300.0 million of securities declared effective by the SEC on June 8, 2012. From that date through December 31, 2014, we conducted the following equity offerings pursuant to such registration statement:

- December 2012 - We issued 14,950,000 shares of common stock in an underwritten public offering, resulting in gross proceeds of \$89.7 million and net proceeds (after underwriting discount) of approximately \$84.6 million, approximately \$73.6 million of which were used to finance the acquisition of the Pinedale LGS.
- January 2014 - We issued 7,475,000 shares of common stock in an underwritten public offering, resulting in gross proceeds of \$49 million and net proceeds (after underwriting discount) of approximately \$45.6 million, which were used to finance the acquisition of the Portland Terminal Facility as described in Item 1 of this report.
- November 2014 - We issued 14,950,000 shares of common stock in an underwritten public offering, resulting in gross proceeds of \$102 million and net proceeds (after underwriting discount) of approximately \$96 million, which were used to finance the acquisition of the MoGas Pipeline System as described in Item 1 of this report.
- DRIP Shares - Additionally, since June 2012, we also have issued common stock under the Company's dividend reinvestment plan that have reduced availability under this registration statement by approximately \$302 thousand.

As of December 31, 2014, the remaining availability under our June 2012 shelf registration statement was approximately \$60.0 million of maximum aggregate offering price of securities. Subsequent to year end we issued an aggregate of 2,250,000 depositary

shares, each representing 1/100th of a share of the Company's 7.375% Series A Cumulative Redeemable Preferred Stock, pursuant to an underwritten public offering under our June 2012 shelf registration statement, resulting in gross proceeds of \$56.3 million and net proceeds (after underwriting discount) of approximately \$54.5 million, which were used to repay outstanding indebtedness under the Regions Revolver and for general corporate purposes.

Liquidity and Capitalization

Our principal investing activities are acquiring and financing midstream and downstream real estate assets with in the U.S. energy infrastructure sector and concurrently entering into long-term triple-net participating leases with energy companies. These investing activities have generally been financed from the proceeds of our equity offerings as well as the term and credit facilities mentioned above. Continued growth of our asset portfolio will depend in part on our continued ability to access funds through additional borrowings and securities offerings. The following is our liquidity and capitalization as of the below noted dates:

Liquidity and Capitalization

	As of the years ended			For the One-Month Transition Period ended	Pro forma information as of December 31,
	December 31, 2014	December 31, 2013	November 30, 2012	December 31, 2012	2014
Cash and cash equivalents	\$ 7,578,164	\$ 17,963,266	\$ 14,333,456	\$ 17,680,783	\$ 30,056,289
Line of credit	\$ 32,141,277	\$ 81,935	\$ 120,000	\$ —	\$ 141,277
Long-term debt	63,532,000	67,060,000	—	70,000,000	63,532,000
Stockholders' equity:					
Preferred stock, convertible, \$0.001 par value	—	—	—	—	23
Capital stock, non-convertible, \$0.001 par value	46,605	24,156	9,191	24,141	46,605
Additional paid-in capital	309,950,440	173,441,019	91,763,475	175,256,675	364,428,543
Accumulated retained earnings	—	1,580,062	5,712,419	4,209,023	—
Accumulated other comprehensive income	453,302	777,403	—	—	453,302
Total stockholders' equity	310,450,347	175,822,640	97,485,085	179,489,839	364,928,473
Total capitalization	\$373,982,347	\$242,882,640	\$ 97,485,085	\$249,489,839	\$ 428,460,473

As a result of the January 2015 Preferred offering and after paying off all principal and accrued interest on the Regions revolver, we had a net increase in cash of \$22.3 million and \$90.0 million undrawn availability. We also have two additional lines of credit for working capital purposes for two of our subsidiaries with Regions Bank and Citizens Bank & Trust Company with maximum availability of \$3.0 million and \$1.5 million, respectively. On January 23, 2015, we had a new shelf registration statement declared effective by the SEC, pursuant to which we may publicly offer additional securities consisting of senior and/or subordinated debt securities, shares of preferred stock (or depositary shares representing fractional interests therein), shares of common stock, warrants or rights to purchase any of the foregoing securities, and units consisting of two or more of these classes or series of securities, with an aggregate offering price of up to \$300.0 million.

Pro forma Information

The information included in the pro forma column above is meant to give effect to the January 2015 offering of preferred stock described above under "Equity Offerings" as if it had taken place on January 1, 2014. The effect on capitalization is as follows:

- Increase in cash of approximately \$22.5 million, net of underwriter's fees and after paying off all outstanding principal on the Regions Revolver
- Increase in additional paid-in capital of approximately \$54.5 million
- Addition of \$22.50 in total par value of the Company's 7.375% Series A Cumulative Redeemable Preferred Stock

Liquidity Analysis

In analyzing our liquidity, we generally expect that our cash provided by operating activities will meet our normal recurring operating expenses, recurring debt service requirements and dividends to shareholders.

In December of 2015, the Pinedale LP KeyBank Term Facility will come to the end of the initial three year term. The facility does, however, provide the option to extend through December 2016. Currently it is our intent to extend the term date through December 2016. Our sources of liquidity as of December 31, 2014, to pay our 2015 commitments, include the amounts available under our revolving credit facilities of approximately \$62.4 million and unrestricted cash on hand of \$7.6 million.

We also believe that we will be able to repay, extend, refinance or otherwise settle our debt obligations for 2016 and thereafter as the debt comes due, and that we will be able to fund our remaining commitments as necessary. However, there can be no assurance that additional financing or capital will be available, or that terms will be acceptable or advantageous to us.

Private Securities Investments

As of December 31, 2014 our remaining securities investments included only illiquid securities issued by privately-held companies. For additional information concerning our remaining private securities investments and related developments during 2014, including the liquidation of our investment in VantaCore Partners LP, please refer to the discussion presented above in this Item 7 under the heading "Asset Portfolio and Related Developments."

During the three-month period ended March 31, 2013, we liquidated the remaining shares of our NGL Energy Partners, LP shares for approximately \$4.6 million cash, which had a carrying value of approximately \$4.3 million. We reported the gains on the securities transactions as Other Income rather than Income from Operations.

We do not plan to make additional investments in securities (other than short-term, highly liquid investments to be held pending acquisition of real property assets and, to the extent compatible with our status as a REIT, equity enhancements to certain of our real property investments), and we intend to liquidate our remaining private securities investments in an orderly manner.

Subsequent Events

For additional information regarding transactions that occurred subsequent to December 31, 2014, see Note 21, Subsequent Events, of the Notes to the Financial Statements included in this annual report on Form 10-K.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our business activities contain elements of market risk. We consider fluctuations in the value of our securities portfolio to be our principal market risk. With respect to our equity securities as of December 31, 2014, there were no material changes to our market risk exposure as compared to the end of our preceding fiscal year ended December 31, 2013.

As of December 31, 2014, the fair value of our securities portfolio (excluding short-term investments) totaled approximately \$9.6 million. We estimate that the impact of a 10 percent increase or decrease in the fair value of these securities, net of related deferred taxes, would increase or decrease net assets applicable to common shareholders by approximately \$585 thousand.

Our equity and debt securities are reported at fair value. The fair value of securities is determined using readily available market quotations from the principal market, if available. Because there are no readily available market quotations for many of the securities in our portfolio, we value a large portion of our securities at fair value as determined in good faith by our Board of Directors under a valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of securities that do not have readily available market quotations, the fair value of our securities may differ significantly from the fair values that would have been used had a ready market quotation existed for such securities, and these differences could be material.

Long-term debt used to finance our acquisitions may be based on floating or fixed rates. As of December 31, 2014, we had \$63.5 million in long-term debt (net of current maturities). The Company uses interest rate swaps to manage its interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including forward interest rate curves. The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash payments and the discounted expected variable cash receipts. The variable cash receipts are based on an expectation of future interest rates (forward curves) derived from observable market interest rate forward curves. Changes in interest rates can cause interest charges to fluctuate on our variable rate debt. Variable rate debt as of December 31, 2014, was comprised of \$14.6 million under the KeyBank \$70 million term credit facility after giving effect to our interest rate swap agreements. A 100 basis point increase in current LIBOR rates would result in an additional \$168 thousand of interest expense for the year ended December 31, 2014, while a 100 basis point decrease in current LIBOR rates would reduce interest expense for such period by \$174 thousand. As of December 31, 2014, the fair value of our hedge derivative totaled approximately \$352 thousand. We estimate that the impact of a 100 basis point increase in the one-month LIBOR rate would increase the hedged derivative asset by \$1.8 million, while a decrease of 100 basis points would decrease the hedged derivative asset by \$1.1 million as of December 31, 2014. See Note 15 of the Notes to the Consolidated Financial Statements included in this annual report on Form 10-K for further information concerning quantitative valuations and the qualitative aspects of our use of interest rate hedge swaps to manage interest rate risk.

We consider the management of risk essential to conducting our businesses. Accordingly, our risk management systems and procedures are designed to identify and analyze our risks, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our financial statements and financial statement schedules are set forth beginning on page F-1 in this Annual Report and are incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Our management is responsible for the preparation, consistency, integrity, and fair presentation of the financial statements. The financial statements have been prepared in accordance with U.S. generally accepted accounting principles applied on a consistent basis and, in management's opinion, are fairly presented. The financial statements include amounts that are based on management's informed judgments and best estimates.

Conclusion Regarding Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Accounting Officer (our principal executive and principal financial officers, respectively), we have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based on that evaluation, these officers concluded that our disclosure controls and procedures were effective to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Accounting Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Our management has established and maintains comprehensive systems of internal control designed to provide reasonable assurance as to the consistency, integrity, and reliability of the preparation and presentation of financial statements and the safeguarding of assets. The concept of reasonable assurance is based upon the recognition that the cost of the controls should not exceed the benefit derived. Our management monitors the systems of internal control and maintains an internal auditing program that assesses the effectiveness of internal control.

Management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of MoGas Pipeline, LLC and United Property Systems, LLC, which are included in the Company's 2014 consolidated financial statements and constituted \$124,900,000 and \$1,414,000 of the Company's total and net assets, respectively, as of December 31, 2014 and \$1,298,000 and \$7,500 of the Company's revenues, respectively, for the year then ended. Management also did not perform an evaluation of the internal control over financial reporting of MoGas Pipeline, LLC and United Property Systems, LLC.

Our management assessed our systems of internal control over financial reporting for financial presentations in conformity with U.S. generally accepted accounting principles as of December 31, 2014. This assessment was based on criteria for effective internal control established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO Report). Based on this assessment, our management has determined that the Company's internal control over financial reporting was effective as of December 31, 2014.

The Board of Directors exercises its oversight role with respect to the systems of internal control primarily through its Audit Committee, which is comprised solely of independent outside directors. The Committee oversees systems of internal control and financial reporting to assess whether their quality, integrity, and objectivity are sufficient to protect shareholders' investments.

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934) during the fiscal quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Ernst & Young has issued an audit report on the Company's internal control over financial reporting. This report begins on the next page.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of CorEnergy Infrastructure Trust, Inc. and Subsidiaries

We have audited CorEnergy Infrastructure Trust, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). CorEnergy Infrastructure Trust, Inc. subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of MoGas Pipeline, LLC and United Property Systems, LLC, which are included in the 2014 consolidated financial statements of CorEnergy Infrastructure Trust, Inc. and constituted \$124,900,000 and \$1,414,000 of total and net assets, respectively, as of December 31, 2014 and \$1,298,000 and \$7,500 of revenues, respectively, for the year then ended. Our audit of internal control over financial reporting of CorEnergy Infrastructure Trust, Inc. also did not include an evaluation of the internal control over financial reporting of MoGas Pipeline, LLC and United Property Systems, LLC.

In our opinion, CorEnergy Infrastructure Trust, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of CorEnergy Infrastructure Trust, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the years in the periods ended December 31, 2014 and 2013, and November 30, 2012, and the one-month transition period from December 1, 2012 through December 31, 2012 of CorEnergy Infrastructure Trust, Inc. and subsidiaries and our report dated March 16, 2015 expressed an unqualified opinion thereon.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Codes of Ethics

We have adopted a code of ethics, which applies to our principal executive officer and principal financial officer. We have also adopted a code of ethics that establishes procedures for personal investments and restricts certain personal securities transactions. Personnel subject to the code of ethics may invest in securities for their personal investment accounts, including securities that may be purchased or held by us, so long as such investments are made in accordance with the code of ethics. This information may be obtained, without charge, upon request by calling us at (816) 875-3705 or toll-free at (877) 699-2677 and on our Web site at <http://coreenergy.corridortrust.com>.

You may also read and copy the codes of ethics at the Securities and Exchange Commission's Public Reference Room in Washington, D.C. You may obtain information on the operation of the Public Reference Room by calling the Securities and Exchange Commission at (800) SEC-0330. In addition, the codes of ethics are available on the EDGAR Database on the Securities and Exchange Commission's Internet site at <http://www.sec.gov>. You may obtain copies of the codes of ethics, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the Securities and Exchange Commission's Public Reference Section, Washington, D.C. 20549.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") imposes a wide variety of regulatory requirements on publicly-held companies and their insiders. The Sarbanes-Oxley Act requires us to review our policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated thereunder. We will continue to monitor our compliance with all future regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we are in compliance therewith.

As of December 31, 2014, we are an accelerated filer. As an accelerated filer for the fiscal year ended December 31, 2014, we are required to prepare and include in our annual report to stockholders for such period a report regarding management's assessment of our internal control over financial reporting under the Securities Exchange Act of 1934 (the "1934 Act") and have included this report in Item 9A of this Annual Report on Form 10-K.

Additional information incorporated by reference to the sections captioned "Nominees for Directors," "Incumbent Directors Remaining in Office," "Information About Executive Officers," "Board of Directors Meetings and Committees," "Section 16(a) Beneficial Ownership Reporting Compliance" and "Stockholder Proposals and Nominations for the 2016 Annual Meeting" in our proxy statement for our 2015 Annual Stockholder Meeting will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated by reference to the sections captioned "Director Compensation Table" and "Compensation Committee Interlocks and Insider Participation" in our proxy statement for our 2015 Annual Stockholder Meeting to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Incorporated by reference to the sections captioned "Security Ownership of Management and Certain Beneficial Owners" in our proxy statement for our 2015 Annual Stockholder Meeting to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Incorporated by reference to the sections captioned "Nominees for Director," "Incumbent Directors Remaining in Office," "Board of Directors Meetings and Committees" and "Certain Relationships and Related Party Transactions" in our proxy statement for our 2015 Annual Stockholder Meeting to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Incorporated by reference to the section captioned "Independent Registered Public Accounting Firm Fees and Services" in our proxy statement for our 2015 Annual Stockholder Meeting to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report.

PART IV

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

CorEnergy Infrastructure Trust, Inc

We have audited the accompanying consolidated balance sheets of CorEnergy Infrastructure Trust, Inc. (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of comprehensive income, equity and cash flows for each of the years in the periods ended December 31, 2014, December 31, 2013 and November 30, 2012 and the one-month transition period from December 1, 2012 through December 31, 2012. Our audits also included the financial statement schedules listed in the Index at Item 15(a). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of CorEnergy Infrastructure Trust, Inc. at December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for each of the years in the periods ended December 31, 2014 and December 31, 2013, and November 30, 2012 and for the one-month transition period from December 1, 2012 through December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.?

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), CorEnergy Infrastructure Trust Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 16, 2015 expressed an unqualified opinion thereon.

CorEnergy Infrastructure Trust, Inc.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2014

1. INTRODUCTION AND BASIS OF PRESENTATION

Introduction

CorEnergy Infrastructure Trust, Inc. ("CorEnergy"), was organized as a Maryland corporation and commenced operations on December 8, 2005. The Company's shares are listed on the New York Stock Exchange under the symbol "CORR." As used in this report, the terms "we", "us", "our" and the "Company" refer to CorEnergy and its subsidiaries.

We are primarily focused on acquiring and financing midstream and downstream real estate assets within the U.S. energy infrastructure sector and concurrently entering into long-term triple-net participating leases with energy companies. We also may provide other types of capital, including loans secured by energy infrastructure assets. Targeted assets include pipelines, storage tanks, transmission lines and gathering systems, among others. These sale-leaseback or real property mortgage transactions provide the energy company with a source of capital that is an alternative to sources such as corporate borrowing, bond offerings, or equity offerings. Many of our leases contain participation features in the financial performance or value of the underlying infrastructure real property asset. The triple-net lease structure requires that the tenant pay all operating expenses of the business conducted by the tenant, including real estate taxes, insurance, utilities, and expenses of maintaining the asset in good working order.

Taxable REIT subsidiaries hold our securities portfolio, operating businesses and certain financing notes receivable as follows:

- Corridor Public Holdings, Inc. and its wholly-owned subsidiary Corridor Private Holdings, Inc ("CorPrivate"), hold our securities portfolio.
- Mowood Corridor, Inc. and its wholly-owned subsidiary, Mowood, LLC ("Mowood"), which is the holding company for one of our operating companies, Omega Pipeline Company, LLC ("Omega").
- Corridor MoGas, Inc. ("CorMoGas") holds two other operating companies, MoGas Pipeline, LLC ("MoGas") and United Property Systems, LLC ("UPS").
- CorEnergy BBWS, Inc. ("BBWS"), CorPrivate and Corridor Leeds Path West, Inc. ("Leeds Path West") hold financing notes receivable.

Change in Fiscal Year End

On February 5, 2013, the Board of Directors of the Company approved a change in the Company's fiscal year end from November 30 to December 31. This change to the calendar year reporting cycle began January 1, 2013. As a result of the change, the Company reported a December 2012 fiscal month transition period, which was reported in the Quarterly Report on Form 10-Q for the calendar quarter ended March 31, 2013 and is included in this Annual Report on Form 10-K for the calendar year ending December 31, 2014.

Financial information for the year ended December 31, 2012 has not been included in this Form 10-K for the following reasons: (i) the year ended November 30, 2012 provides as meaningful a comparison to the years ended December 31, 2013 and 2014 as would the year ended December 31, 2012; (ii) there are no significant factors, seasonal or other, that would impact the comparability of information if the results for the year ended December 31, 2012 was presented in lieu of results for the year ended November 30, 2012; and (iii) it was not practicable or cost justified to prepare this information.

Basis of Presentation and Use of Estimates

The accompanying consolidated financial statements include our accounts and the accounts of our wholly owned subsidiaries and have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") set forth in the ASC, as published by the FASB, and with the Securities and Exchange Commission ("SEC") instructions to Form 10-K. The accompanying consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair presentation of the Company's financial position, results of operations and cash flows for the periods presented. There were no adjustments that, in the opinion of management, were not of a normal and recurring nature. All intercompany transactions and balances have been eliminated in consolidation, and our net earnings are reduced by the portion of net earnings attributable to noncontrolling interests.

The Company consolidates certain entities when it is deemed to be the primary beneficiary in a variable interest entity ("VIE"), as defined in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic on Consolidation. The Topic on Consolidation requires the consolidation of VIEs in which an enterprise has a controlling financial interest. The equity method of accounting is applied to entities in which the Company is not the primary beneficiary as defined in the

Consolidation Topic of FASB ASC, or does not have effective control, but can exercise influence over the entity with respect to its operations and major decisions. This topic requires an ongoing reassessment.

2. SIGNIFICANT ACCOUNTING POLICIES

A. *Use of Estimates* – The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, recognition of distribution income and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Actual results could differ from those estimates.

B. *Leased Property* – The Company includes assets subject to lease arrangements within Leased property, net of accumulated depreciation, in the Consolidated Balance Sheets. Lease payments received are reflected in Lease revenue on the Consolidated Statements of Income, net of amortization of any off-market adjustments. Costs in connection with the creation and execution of a lease are capitalized and amortized over the lease term. See Note 4 for further discussion.

C. *Cash and Cash Equivalents* – The Company maintains cash balances at financial institutions in amounts that regularly exceed FDIC insured limits. The Company's cash equivalents are comprised of short-term, liquid money market instruments.

D. *Long-Lived Assets* – Property and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful life of the asset. Expenditures for repairs and maintenance are charged to operations as incurred, and improvements, which extend the useful lives of assets, are capitalized and depreciated over the remaining estimated useful life of the asset.

The Company initially records long-lived assets at their purchase price plus any direct acquisition costs, unless the transaction is accounted for as a business combination. If the transaction is accounted for as a business combination, the Company allocates the purchase price to the acquired tangible and intangible assets and liabilities based on their estimated fair values. See Note 5 for further information.

E. *Intangibles and Goodwill* – The Company may acquire long-lived assets that are subject to an existing lease contract with the seller or other lessee party and the Company may assume outstanding debt of the seller as part of the consideration paid. If, at the time of acquisition, the existing lease or debt contract is not at current market terms, the Company will record an asset or liability at the time of acquisition representing the amount by which the fair value of the lease or debt contract differs from its contractual value. Such amount is then amortized over the remaining contract term as an adjustment to the related lease revenue or interest expense.

The Company periodically reviews its long-lived assets, primarily real estate and goodwill, for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. The Company's review involves comparing current and future operating performance of the assets, the most significant of which is undiscounted operating cash flows, to the carrying value of the assets. Based on this analysis, a provision for possible loss is recognized, if any.

In connection with the MoGas transaction, the Company recorded approximately \$1.7 million in goodwill. Goodwill represents the excess of the purchase price paid over the estimated fair value of the net assets acquired. Refer Note 5 for further details of the acquisition. The company will review goodwill for impairment at least annually or whenever events or circumstances indicate the carrying value of an asset may not be recoverable. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss would be recognized for the amount of the excess.

No impairment write-downs were recognized during the years ended December 31, 2014, December 31, 2013 or November 30, 2012, or for the one-month transition period ended December 31, 2012

F. *Investment Securities* – The Company's investments in securities are classified as either trading or other equity securities:

- *Trading securities* – The Company's publicly traded equity securities were classified as trading securities and were historically reported at fair value. The Company liquidated its trading securities in order to acquire real asset investments. As of March 31, 2013, all trading securities had been sold.
- *Other equity securities* – The Company's other equity securities represent interests in private companies which the Company has elected to report at fair value under the fair value option.
- *Realized and unrealized gains and losses on trading securities and other equity securities* – Changes in the fair values of the Company's securities during the period reported and the gains or losses realized upon sale of securities during the period are reflected as other income or expense within the accompanying Consolidated Statements of Income.

G. Security Transactions and Fair Value – Security transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis.

For equity securities that are freely tradable and listed on a securities exchange or over-the-counter market, the Company values those securities at their last sale price on that exchange or over-the-counter market on the valuation date. If the security is listed on more than one exchange, the Company will use the price from the exchange that it considers to be the principal, which may not necessarily represent the last sale price. If there has been no sale on such exchange or over-the-counter market on such day, the security will be valued at the mean between the last bid price and last ask price on such day.

The Company also holds investments in illiquid securities including debt and equity securities of privately-held companies. These investments generally are subject to restrictions on resale, have no established trading market and are valued on a quarterly basis. Because of the inherent uncertainty of valuation, the fair values of such investments, which are determined in accordance with procedures approved by the Company's Board of Directors, may differ materially from the values that would have been used had a ready market existed for the investments.

The Company determines fair value to be the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company has determined the principal market, or the market in which the Company exits its private portfolio investments with the greatest volume and level of activity, to be the private secondary market. Typically, private companies are bought and sold based on multiples of EBITDA, cash flows, net income, revenues, or in limited cases, book value.

For private company investments, value is often realized through a liquidity event. Therefore, the value of the company as a whole (enterprise value) at the reporting date often provides the best evidence of the value of the investment and is the initial step for valuing the Company's privately issued securities. For any one company, enterprise value may best be expressed as a range of fair values, from which a single estimate of fair value will be derived. In determining the enterprise value of a portfolio company, an analysis is prepared consisting of traditional valuation methodologies including market and income approaches. The Company considers some or all of the traditional valuation methods based on the individual circumstances of the portfolio company in order to derive its estimate of enterprise value.

The fair value of investments in private portfolio companies is determined based on various factors, including enterprise value, observable market transactions, such as recent offers to purchase a company, recent transactions involving the purchase or sale of the equity securities of the company, or other liquidation events. The determined equity values may be discounted when the Company has a minority position, or is subject to restrictions on resale, has specific concerns about the receptivity of the capital markets to a specific company at a certain time, or other comparable factors exist.

The Company undertakes a multi-step valuation process each quarter in connection with determining the fair value of private investments. We have retained an independent valuation firm to provide third party valuation consulting services based on procedures that the Company has identified and may ask them to perform from time to time on all or a selection of private investments as determined by the Company. The multi-step valuation process is specific to the level of assurance that the Company requests from the independent valuation firm. For positive assurance, the process is as follows:

- The independent valuation firm prepares the valuations and the supporting analysis.
- The valuation report is reviewed and approved by senior management.
- The Audit Committee of the Board of Directors reviews the supporting analysis and accepts the valuations.

H. Financing Notes Receivable – Financing notes receivable are presented at face value plus accrued interest receivable and deferred loan origination costs and net of related direct loan origination fees. As of December 31, 2014 and 2013, approximately \$85 thousand and \$0, respectively, of net deferred debt costs and fees are included in the accompanying Consolidated Balance Sheets. The deferred costs and fees are amortized over the life of the loans. For the years ended December 31, 2014, December 31, 2013, November 30, 2012, and the one-month transition period ended December 31, 2012, \$1 thousand, \$0, \$0, and \$0, respectively, is included in Financing Revenue within the Consolidated Statements of Income.

The Company reviews its financing notes receivable to determine if the balances are realizable based on factors affecting the collectibility of those balances. Factors may include credit quality, timeliness of required periodic payments, past due status and management discussions with obligors. The Company believes that its financing notes receivable balance is fully collectible as of December 31, 2014. At December 31, 2014 the Company determined that an allowance for financing notes receivable was not necessary. The financing notes receivable are discussed more fully in Note 6.

I. *Lease Receivable* – Lease receivables are determined according to the terms of the lease agreements entered into by the Company and its lessees, as discussed within Note 4. Lease payments by our tenants, have remained timely and without lapse.

J. *Accounts Receivable* – Accounts receivable are presented at face value net of an allowance for doubtful accounts. Accounts are considered past due based on the terms of sale with the customers. The Company reviews accounts for collectibility based on an analysis of specific outstanding receivables, current economic conditions and past collection experience. At December 31, 2014 and 2013, the Company determined that an allowance for doubtful accounts was not necessary.

K. *Derivative Instruments and Hedging Activities* - FASB ASC 815, *Derivatives and Hedging* (“ASC 815”), provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain the Company's objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments. Accordingly, the Company's derivative assets and liabilities are presented on a gross basis.

As required by ASC 815, the Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Derivatives may also be designated as hedges of the foreign currency exposure of a net investment in a foreign operation. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. The Company may enter into derivative contracts that are intended to economically hedge certain of its risks, even though hedge accounting does not apply or the Company elects not to apply hedge accounting.

FASB ASC 820, *Fair Value Measurements and Disclosure* (“ASC 820”), defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. In accordance with ASC 820, the Company made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio.

L. *Fair Value Measurements* - Various inputs are used in determining the fair value of the Company’s assets and liabilities. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical investments
- Level 2 – other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)
- Level 3 – significant unobservable inputs (including the Company’s own assumptions in determining the fair value of investments)

ASC 820 applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements; accordingly, the standard does not require any new fair value measurements of reported balances. ASC 820 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, ASC 820 establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity. In instances where the

determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

M. Revenue Recognition – Specific recognition policies for the Company's revenue items are as follows:

- *Lease revenue* – Base rent related to the Company's leased property is recognized on a straight-line basis over the term of the lease when collectibility is reasonably assured. Contingent rent is recognized when it is earned. Rental payments received in advance are classified as unearned revenue and included as a liability within the Consolidated Balance Sheets. Unearned revenue is amortized ratably over the lease period as revenue recognition criteria are met. Rental payments received in arrears are accrued and classified as Lease Receivable and included in assets within the Consolidated Balance Sheets.
- *Sales revenue* – Revenues related to natural gas distribution and performance of management services are recognized in accordance with GAAP upon delivery of natural gas and upon the substantial performance of management and supervision services related to the expansion of the natural gas distribution system. Omega, acting as a principal, provides for transportation services and natural gas supply for its customers. In addition, Omega is paid fees for the operation and maintenance of its natural gas distribution system, including any necessary expansion of the distribution system. Omega is responsible for the coordination, supervision and quality of the expansions while actual construction is generally performed by third party contractors. Revenues from expansion efforts are recognized in accordance with GAAP using either a completed contract or percentage of completion method based on the level and volume of estimates utilized, as well as the certainty or uncertainty of our ability to collect those revenues.
- *Transportation revenue* – MoGas generates revenue from natural gas transportation and recognizes that revenue on firm contracted capacity over the contract period regardless of the amount of natural gas that is transported. For interruptible or volumetric based transportation, revenue is recognized when physical deliveries of natural gas are made at the delivery point agreed upon by both parties.
- *Financing revenue* – Our financing notes receivable are considered a core product offering and therefore the related income is presented as a component of operating income in the revenue section. For increasing rate loans, base interest income is recorded ratably over the life of the loan, using the effective interest rate. The net amount of deferred loan origination fees and costs are amortized on a straight-line basis over the life of the loan and reported as an adjustment to yield in financing revenue. Participating financing revenues are recorded when specific performance criteria have been met.

N. Cost of Sales – Included in the Company's cost of sales are the amounts paid for gas and propane, along with related transportation, which are delivered to customers, as well as, the cost of material and labor related to the expansion of the Omega natural gas distribution system.

O. Transportation, maintenance and general and administrative – These expenses are incurred both internally and externally. The internal expenses relate to system control, pipeline operations, maintenance, insurance and taxes. Other internal expenses include payroll cost for employees associated with gas control, field employees, the office manager and the vice presidents of operations and finance. The external costs consist of professional services such as audit and accounting, legal and regulatory and engineering.

P. Asset Acquisition Expenses – Costs incurred in connection with the research of real property acquisitions not expected to be accounted for as business combinations are expensed until it is determined that the acquisition of the real property is probable. Upon such determination, costs incurred in connection with the acquisition of the property are capitalized as described in paragraph (D) above. Deferred costs related to an acquisition that we have determined, based on our judgment, not to pursue are expensed in the period in which such determination is made.

Q. Offering Costs – Offering costs related to the issuance of common stock are charged to additional paid-in capital when the stock is issued.

R. Debt Issuance Costs – Costs incurred for the issuance of new debt are capitalized and amortized over the debt term. See Note 14 for further discussion.

S. Distributions to Stockholders – Distributions to stockholders are determined by the Board of Directors and are recorded on the ex-dividend date.

T. *Other Income Recognition* – Specific policies for the Company's other income items are as follows:

- *Securities Transactions and Investment Income Recognition* – Securities transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis. Distributions received from our equity investments are generally comprised of ordinary income, capital gains and distributions received from investment securities from the portfolio company. The Company records investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on information available from each portfolio company and other industry sources. These estimates may subsequently be revised based on information received from the portfolio companies after their tax reporting periods are concluded, as the actual character of these distributions are not known until after our fiscal year end.

Subsequent to November 30, 2012, the Company reallocated the amount of 2012 income and return of capital it recognized for the period December 1, 2011 to November 30, 2012 based on the 2012 tax reporting information received from the individual portfolio companies. This reclassification amounted to an increase in net distributions and dividend income on securities of \$567 thousand or \$0.06 per share; a decrease in net realized and unrealized gains on trading and other equity securities of \$567 thousand or \$0.06 per share for the year ended November 30, 2012. This reclassification had no impact on net income.

Subsequent to December 31, 2013, the Company reallocated the amount of 2013 income and return of capital it recognized for the period January 1, 2013 to December 31, 2013 based on the 2013 tax reporting information received from the individual portfolio companies. This reclassification amounted to an increase in net distributions and dividend income on securities of \$863 thousand or \$0.04 per share; a decrease in net realized and unrealized gains on other equity securities of \$863 thousand or \$0.04 per share for the year ended December 31, 2013. This reclassification had no impact on net income.

- *Dividends and distributions from investments* – Dividends and distributions from investments are recorded on their ex-dates and are reflected as other income within the accompanying Consolidated Statements of Income. Distributions received from the Company's investments are generally characterized as ordinary income, capital gains and distributions received from investment securities. The portion characterized as return of capital is paid by our investees from their cash flow from operations. The Company records investment income, capital gains and distributions received from investment securities based on estimates made at the time such distributions are received. Such estimates are based on information available from each company and other industry sources. These estimates may subsequently be revised based on information received from the entities after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year end of the Company.

U. *Federal and State Income Taxation* – In 2013 we qualified, and in March 2014 elected (effective as of January 1, 2013), to be treated as a REIT for federal income tax purposes. Because certain of our assets may not produce REIT-qualifying income or be treated as interests in real property, those assets are held in wholly-owned Taxable REIT Subsidiaries ("TRSs") in order to limit the potential that such assets and income could prevent us from qualifying as a REIT.

For years ended in 2012 and before, the distributions we made to our stockholders from our earnings and profits were treated as qualified dividend income ("QDI") and return of capital. QDI is taxed to our individual shareholders at the maximum rate for long-term capital gains, which through tax year 2012 was 15 percent and beginning in tax year 2013 will be 20 percent. The Company has elected to be taxed as a REIT for 2013 rather than a C corporation and generally will not pay federal income tax on taxable income of the REIT that is distributed to our stockholders. As a REIT, our distributions from earnings and profits will be treated as ordinary income and a return of capital, and generally will not qualify as QDI. To the extent that the REIT had accumulated C corporation earnings and profits from the periods prior to 2013, we distributed such earnings and profits in 2013. A portion of our normal distributions in 2013 have been characterized for federal income tax purposes as a distribution of those earnings and profits from non-REIT years and have been treated as QDI. In addition, to the extent we receive taxable distributions from our TRSs, or the REIT received distributions of C corporation earnings and profits, such portion of our distribution will be treated as QDI.

As a REIT, the Company holds and operates certain of our assets through one or more wholly-owned TRSs. Our use of TRSs enables us to continue to engage in certain businesses while complying with REIT qualification requirements and also allows us to retain income generated by these businesses for reinvestment without the requirement of distributing those earnings. In the future, we may elect to reorganize and transfer certain assets or operations from our TRSs to the Company or other subsidiaries, including qualified REIT subsidiaries.

The Company's trading securities and other equity securities are limited partnerships or limited liability companies which are treated as partnerships for federal and state income tax purposes. As a limited partner, the Company reports its allocable share of

taxable income in computing its own taxable income. To the extent held by a TRS, the TRS's tax expense or benefit is included in the Consolidated Statements of Income based on the component of income or gains and losses to which such expense or benefit relates. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred income tax asset will not be realized.

If we cease to qualify as a REIT, the Company, as a C corporation, would be obligated to pay federal and state income tax on its taxable income. Currently, the highest regular marginal federal income tax rate for a corporation is 35 percent. The Company may be subject to a 20 percent federal alternative minimum tax on its federal alternative minimum taxable income to the extent that its alternative minimum tax exceeds its regular federal income tax.

V. Recent Accounting Pronouncements – In August 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-15, Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern (“ASU No. 2014-15”) that will require management to evaluate whether there are conditions and events that raise substantial doubt about the Company’s ability to continue as a going concern within one year after the financial statements are issued on both an interim and annual basis. Management will be required to provide certain footnote disclosures if it concludes that substantial doubt exists or when its plans alleviate substantial doubt about the Company’s ability to continue as a going concern. ASU No. 2014-15 becomes effective for annual periods beginning in 2016 and for interim reporting periods starting in the first quarter of 2017. The Company does not expect the adoption of this amendment to have a material impact on its consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09 “Revenue from Contracts with Customers.” ASU No. 2014-09 adds to the FASB ASC by detailing new guidance in order to make a more clarified set of principles for recognizing revenue from customer contracts. ASU No. 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Management is still in the process of evaluating this amendment and has not selected a transition method, however, does not expect adoption to have a material impact on the Company's consolidated financial statements.

In April 2014, the FASB issued ASU 2014-08 “Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity.” Under this guidance, only disposals representing a strategic shift in operations would be presented as discontinued operations. This guidance requires expanded disclosure that provides information about the assets, liabilities, income and expenses of discontinued operations. Additionally, the guidance requires additional disclosure for a disposal of a significant part of an entity that does not qualify for discontinued operations reporting. This guidance will be effective for reporting periods beginning on or after December 15, 2014 with early adoption permitted for disposals or classifications of assets as held-for-sale that have not been reported in financial statements previously issued or available for issuance. It is expected that fewer disposal transactions will meet the new criteria to be reported as discontinued operations. The Company has elected early adoption of the standard and the effects of applying the revised guidance did not have a material effect on the consolidated financial statements and related disclosures. Refer to the Consolidated Balance Sheets and Note 3 for further information.

In July 2013, the FASB issued ASU No. 2013-11 “Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists.” ASU No. 2013-11 amends FASB ASC Topic 740 *Income taxes*, to include explicit guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. ASU No. 2013-11 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Management has adopted this amendment and it did not have a material impact on the Company's consolidated financial statements.

3. LEASED PROPERTIES

Pinedale LGS

Our subsidiary, Pinedale Corridor, LP (“Pinedale LP”), owns a system of gathering, storage, and pipeline facilities (the “Liquids Gathering System” or “Pinedale LGS”), with associated real property rights in the Pinedale Anticline in Wyoming.

Physical Assets

The Pinedale LGS consists of more than 150 miles of pipelines with 107 receipt points and four above-ground central gathering facilities. The system is leased to and used by Ultra Petroleum Corp. ("Ultra Petroleum") as a method of separating water, condensate and associated flash gas from a unified stream and subsequently selling or treating and disposing of the separated products. Prior to entering the Pinedale LGS, a commingled hydrocarbon stream is separated into wellhead natural gas and a liquids stream. The wellhead natural gas is transported to market by a third party. The remaining liquids, primarily water, are transported by the Pinedale LGS to one of its four central gathering facilities where they pass through a three-phase separator which separates condensate, water and associated natural gas. Condensate is a valuable hydrocarbon commodity that is sold by Ultra Petroleum; water is transported to disposal wells or a treatment facility for re-use; and the natural gas is sold or otherwise used by Ultra Petroleum for fueling on-site operational equipment.

The asset is depreciated for book purposes over an estimated useful life of 26 years. The amount of depreciation recognized for the leased property for the years ended December 31, 2014, December 31, 2013 and November 30, 2012, and for the one-month transition period ended December 31, 2012 was \$8.9 million, \$8.9 million, \$0, and \$286 thousand, respectively.

See Note 4 for further information regarding the Pinedale Lease Agreement (as defined therein).

Non-Controlling Interest Partner

Prudential Financial, Inc. ("Prudential") funded a portion of the Pinedale LGS acquisition and, as a limited partner, holds 18.95 percent of the economic interest in Pinedale LP. The general partner, Pinedale GP, holds the remaining 81.05 percent of the economic interest.

Debt

Pinedale LP borrowed \$70 million pursuant to a secured term credit facility with KeyBank National Association ("KeyBank") serving as a lender and the administrative agent on behalf of other lenders participating in the credit facility. The credit facility will remain in effect through December 2015, with an option to extend through December 2016. The credit facility is secured by the Pinedale LGS. See Note 14 for further information regarding the credit facility.

Portland Terminal Facility

On January 21, 2014, we completed a follow-on equity offering of 7,475,000 shares of common stock, raising approximately \$49 million in gross proceeds at \$6.50 per share (net proceeds of approximately \$46 million after underwriters' discount). Concurrently, our subsidiary, LCP Oregon, used the net proceeds from the offering to close on a Purchase and Sale Agreement to acquire a petroleum products terminal facility and certain associated real property rights located in Portland, Oregon ("Portland Terminal Facility") for \$40 million in cash. LCP Oregon also entered into a long-term triple-net Lease Agreement relating to the use of the Portland Terminal Facility (the "Portland Lease Agreement") with Arc Terminals Holdings LLC ("Arc Terminals"), an indirect wholly-owned subsidiary of Arc Logistics Partners LP ("Arc Logistics").

The Portland Terminal Facility is a rail and marine facility adjacent to the Willamette River in Portland, Oregon. The 39-acre site has 84 tanks with a total storage capacity of approximately 1,500,000 barrels. The Portland Terminal Facility is capable of receiving, storing and delivering crude oil and refined petroleum products. Products are received and delivered via railroad or marine (up to Panamax size vessels). The marine facilities are accessed through a neighboring terminal facility via an owned pipeline. The Portland Terminal Facility offers heating systems, emulsions and an on-site product testing laboratory as ancillary services.

At the acquisition date we anticipated funding an additional \$10 million of terminal-related improvement projects in support of Arc Terminals' commercial strategy to optimize the Portland Terminal Facility and generate stable cash flows, including: i) upgrade a portion of the existing storage assets; ii) enhance existing terminal infrastructure; and iii) develop, design, engineer and construct throughput expansion opportunities. As of December 31, 2014, additional spending on terminal-related projects totaled approximately \$6.0 million.

The asset is depreciated for book purposes over an estimated useful life of 30 years. The amount of depreciation recognized for the leased property for each of the years ended December 31, 2014, December 31, 2013, November 30, 2012, and for the one-month transition period ended December 31, 2012 was \$1.4 million, \$0, \$0 and \$0, respectively.

See Note 4 for further information regarding the Portland Lease Agreement related to the Portland Terminal Facility assets.

LEASED PROPERTY HELD FOR SALE

Eastern Interconnect Project (EIP)

Physical Assets

The EIP transmission assets are utilized by the lessee to move electricity across New Mexico between Albuquerque and Clovis. The physical assets include 216 miles of 345 kilovolt (unaudited) transmission lines, towers, easement rights, converters and other grid support components. Originally, the assets were depreciated for book purposes over an estimated useful life of 20 years. Pursuant to the Purchase Agreement discussed in Note 4, the Company reevaluated the residual value used to calculate its depreciation of the EIP, and determined that a change in estimate was necessary. The change in estimate resulted in higher depreciation expenses beginning in November of 2012 through the expiration of the lease in April 2015.

The amount of depreciation expense related to the EIP leased property for the years ended December 31, 2014, December 31, 2013 and November 30, 2012 and for the one-month transition period ended December 31, 2012 was \$2.3 million, \$2.3 million, \$837 thousand and \$190 thousand, respectively.

EIP Leased Property Held for Sale consists of the following:

EIP Leased Property Held for Sale		
	December 31, 2014	December 31, 2013
Leased asset	\$ 14,126,849	\$ 14,126,849
Less: accumulated depreciation	(5,878,933)	(3,600,251)
Net leased asset held for sale	\$ 8,247,916	\$ 10,526,598

See Note 4 for further information regarding the Purchase Agreement with PNM and the PNM Lease Agreement related to the EIP transmission assets.

4. LEASES

As of December 31, 2014 the Company had three significant leases. The table below displays the impact of leases on total leased properties and total lease revenues for the periods presented.

	As a Percentage of					
	Leased Properties		Lease Revenues			
	As of December 31, 2014	As of December 31, 2013	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013	For the Year Ended November 30, 2012	For the One-Month Transition Period December 31, 2012
Pinedale LGS	79.17%	94.23%	71.94%	88.68%	—	75.20%
Portland Terminal Facility	17.24%	—	18.98%	—	—	—
Public Service of New Mexico	3.07%	5.77%	9.05%	11.32%	100.00%	24.80%

Pinedale LGS

Pinedale LP entered into a long-term triple-net Lease Agreement on December 20, 2012, relating to the use of the Pinedale LGS (the “Pinedale Lease Agreement”) with Ultra Wyoming LGS, LLC (“Ultra Wyoming”), another indirect wholly-owned subsidiary of Ultra Petroleum. Ultra Wyoming utilizes the Pinedale LGS to gather and transport a commingled stream of oil, natural gas and water, then further utilizes the Pinedale LGS to separate this stream into its separate components. Ultra Wyoming's obligations under the Pinedale Lease Agreement are guaranteed by Ultra Petroleum and Ultra Petroleum's operating subsidiary, Ultra Resources, Inc. (“Ultra Resources”), pursuant to the terms of a related parent guaranty. Annual rent for the initial term under the Pinedale Lease Agreement is a minimum of \$20 million (as adjusted annually for changes based on the Consumer Price Index (“CPI”), subject to annual maximum adjustments of 2 percent), with the exact rental amount determined by the actual volume of the components handled by the Pinedale LGS, subject to Pinedale LP not being in default under the Pinedale Lease Agreement. For 2014, the increase in quarterly rent was \$76 thousand, based on the CPI adjustment as specified in the lease terms. Total annual rent may not exceed \$27.5 million.

As of December 31, 2014 and December 31, 2013, approximately \$796 thousand and \$857 thousand, respectively, of net deferred lease costs are included in the accompanying Consolidated Balance Sheets. The deferred costs are amortized over the 15 year life of the Pinedale LGS lease. For the years ended December 31, 2014, December 31, 2013, November 30, 2012, and the one-month

transition period ended December 31, 2012, \$61 thousand, \$61 thousand, \$0, and \$2 thousand, respectively, is included in amortization expense within the Consolidated Statements of Income.

The assets, which comprise the Pinedale LGS, include real property and land rights to which the purchase consideration was allocated based on relative fair values and equaled \$122.3 million and \$105.7 million, respectively, at the time of acquisition. The land rights are being depreciated over the 26 year life of the related land lease with associated depreciation expense expected to be approximately \$4.1 million for each of the next five years.

In view of the fact that Ultra Petroleum leases a substantial portion of the Company's net leased property, which is a significant source of revenues and operating income, its financial condition and ability and willingness to satisfy its obligations under its lease with the Company are expected to have a considerable impact on the results of operation going forward.

Ultra Petroleum is currently subject to the reporting requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of Ultra Petroleum can be found on the SEC's website at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of Ultra Petroleum, but has no reason not to believe the accuracy or completeness of such information. In addition, Ultra Petroleum has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. Summary Consolidated Balance Sheets and Consolidated Statements of Operations for Ultra Petroleum are provided below.

Portland Terminal Facility

LCP Oregon entered into the Portland Lease Agreement on January 21, 2014. Arc Logistics has guaranteed the obligations of Arc Terminals under the Portland Lease Agreement. The Portland Lease Agreement grants Arc Terminals substantially all authority to operate the Portland Terminal Facility. During the initial term, Arc Terminals will make base monthly rental payments and variable rent payments based on the volume of liquid hydrocarbons that flowed through the Portland Terminal Facility in the prior month. The base rent in the initial year of the Portland Lease Agreement increased to approximately \$418 thousand per month starting with August 2014 and each month thereafter. The base rent is also expected to increase during the initial year of the Portland Lease Agreement based on a percentage of specified construction costs at the Portland Terminal Facility incurred by LCP Oregon, estimated at inception to be \$10 million (unaudited). Base rent increased to approximately \$471 thousand per month as of December 31, 2014. In 2014, \$241 thousand in incremental rent was received due to construction completed during the year. Variable rent is capped at 30 percent of total rent, which would be the equivalent of the Portland Terminal Facility's expected throughput capacity.

Arc Logistics is a fee-based, growth-oriented Delaware limited partnership formed by Lightfoot to own, operate, develop and acquire a diversified portfolio of complementary energy logistics assets. In November 2013, Arc Logistics completed its initial public offering ("IPO"). Arc Logistics' public disclosures filed with the SEC indicate that Arc Logistics is principally engaged in the terminaling, storage, throughput and transloading of crude oil and petroleum products with energy logistics assets strategically located in the East Coast, Gulf Coast and Midwest regions of the U.S. Arc Terminals is a wholly-owned subsidiary of Arc Logistics.

Arc Logistics is currently subject to the reporting requirements of the Exchange Act and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of Arc Logistics can be found on the SEC's web site at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of Arc Logistics but has no reason to doubt the accuracy or completeness of such information. In addition, Arc Logistics has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. None of the information in the public reports of Arc Logistics that are filed with the SEC is incorporated by reference into, or in any way form, a part of this filing.

Lease of Property Held for Sale

Public Service Company of New Mexico ("PNM")

The EIP leased asset held for sale is leased on a triple net basis through April 1, 2015 (the "PNM Lease Agreement") to PNM, an independent electric utility company serving approximately 500 thousand customers (unaudited) in New Mexico. PNM is a subsidiary of PNM Resources Inc. (NYSE: PNM) ("PNM Resources").

At the time of acquisition, the rate of the PNM Lease Agreement was determined to be above market rates for similar leased assets and the Company recorded an intangible asset of \$1.1 million for this premium which is being amortized as a reduction to lease revenue over the remaining lease term. See Note 13 below for further details of the intangible asset.

On November 1, 2012 the Company entered into a definitive Purchase Agreement with PNM to sell the Company's 40 percent undivided interest in the EIP upon termination of the PNM Lease Agreement on April 1, 2015 for \$7.68 million. Upon execution of the Agreement, the schedule of the lease payments under the PNM Lease Agreement was changed so that the last scheduled semi-annual lease payment was received by the Company on October 1, 2012. Additionally, PNM's remaining basic lease payments due to the Company were accelerated. The semi-annual payments of approximately \$1.4 million that were originally scheduled to be paid on April 1, and October 1, 2013, were received by the Company on November 1, 2012. The three remaining lease payments due April 1, 2014, October 1, 2014 and April 1, 2015 were paid in full on January 2, 2014. For the years ended December 31, 2014 and 2013 and November 30, 2012, revenue of \$2.6 million was included in lease revenue on the income statement. For the one-month transition period ended December 31, 2012, \$213 thousand was included in lease revenue on the income statement.

PNM Resources is currently subject to the reporting requirements of the Exchange Act and is required to file with the SEC annual reports containing audited financial statements and quarterly reports containing unaudited financial statements. The audited financial statements and unaudited financial statements of PNM Resources can be found on the SEC's web site at www.sec.gov. The Company makes no representation as to the accuracy or completeness of the audited and unaudited financial statements of PNM Resources but has no reason to doubt the accuracy or completeness of such information. In addition, PNM Resources has no duty, contractual or otherwise, to advise the Company of any events that might have occurred subsequent to the date of such financial statements which could affect the significance or accuracy of such information. None of the information in the public reports of PNM Resources that are filed with the SEC is incorporated by reference into, or in any way form, a part of this filing.

The future contracted minimum rental receipts for all net leases as of December 31, 2014 are as follows:

Future Minimum Lease Receipts	
Years Ending December 31,	Amount
2015	\$ 26,342,843
2016	26,347,143
2017	26,347,143
2018	26,347,143
2019	26,451,645
Thereafter	223,510,092
Total	\$ 355,346,009

5. MOGAS ACQUISITION

On November 24, 2014, our wholly owned taxable REIT subsidiary, Corridor MoGas, Inc. ("Corridor MoGas"), executed a Purchase Agreement (the "MoGas Purchase Agreement") with Mogas Energy, LLC ("Seller") to acquire all of the equity interests of two entities, MoGas Pipeline, LLC ("MoGas") and United Property Systems, LLC ("UPS") (collectively, the "MoGas Transaction"). MoGas is the owner and operator of an approximately 263 mile interstate natural gas pipeline system in and around St. Louis and extending into central Missouri. The Pipeline System, regulated by the Federal Energy Regulatory Commission ("FERC"), delivers natural gas to both investor-owned and municipal local distribution systems and has eight firm transportation customers. The Pipeline System receives natural gas at three receipt points and delivers that natural gas at 22 delivery points. UPS owns 10.28 acres of real property that includes office and storage space which is leased to MoGas. A portion of that land is also leased to an operator of a small cement plant owned by a third party. The combined purchase price of MoGas and UPS was \$125 million, funded by a combination of equity proceeds and revolving credit facility, as further discussed in Note 14 to these Consolidated Financial Statements.

On November 17, 2014, the Company completed a follow-on equity offering of 14,950,000 shares of common stock, raising approximately \$102 million in gross proceeds at \$6.80 per share (net proceeds of approximately \$96 million after underwriters' discount). Then on November 24, 2014, the Company borrowed \$32 million (net proceeds of approximately \$29 million after \$3 million in fees). The total cash proceeds of \$125 million were then used to capitalize Corridor MoGas, \$90 million of which was in the form of a term note, who then concurrently used the cash to fund the purchase price to the Seller, \$7 million of which, was placed in an indemnity escrow account. The Purchase Agreement describes the circumstances under which escrowed funds are to be released and the party to receive such released funds. Currently the Company has no reason to believe that any of the funds in escrow will be returned.

The Company is accounting for the acquisition under the acquisition method in accordance with ASC 805, *Business Combinations* ("ASC 805"), and the initial accounting for this business combination is substantially complete but subject to further adjustment as certain information becomes available. The Company's assessment of the fair values and the allocation of purchase price to the identified tangible and intangible assets is its current best estimate of fair value. However, this assessment is subject to change due to information not readily available at the acquisition date, reclassification adjustments for presentation and adjustments to our valuation assumptions. The following table summarizes the acquisition date fair values of the assets acquired and liabilities assumed, which the Company determined using Level 1, Level 2 and Level 3 inputs:

Acquisition Date Fair Values	
	Amount
Leased Property:	
Land	\$ 210,000
Buildings and improvements	1,188,000
Total Leased Property	\$ 1,398,000
Property and Equipment:	
Land	\$ 580,000
Depreciable property:	
Natural Gas Pipeline	119,081,732
Vehicles and Trailers	378,000
Office Equipment	43,400
Total Property and Equipment	\$ 119,503,132
Goodwill	\$ 1,718,868
Cash and cash equivalents	4,098,274
Accounts receivable	1,357,905
Prepaid assets	125,485
Accounts payable and other accrued liabilities	(3,781,664)
Net assets acquired	\$ 125,000,000

The fair values of land, depreciable property and goodwill were determined using internally developed models that were based on market assumptions and comparable transportation data as well as external valuations performed by unrelated third parties. The market assumptions used as inputs to the Company's fair value model include replacement construction costs, leasing assumptions, growth rates, discount rates, terminal capitalization rates and transportation yields. The Company uses data on its existing portfolio of investments as well as similar market data from third party sources, when available, in determining these Level 3 inputs. The carrying value of cash and cash equivalents, accounts receivable, prepaid assets and accounts payable and other accrued liabilities, approximate fair value due to their short term, highly liquid nature.

The value of goodwill recognized upon acquisition was determined based on the allocation of the purchase price amongst land and depreciable property and subject to a working capital requirement as outlined in the Purchase Agreement. Management believes that goodwill in the transaction results from various benefits. The pipeline system interconnects with three receipt points, the Panhandle Eastern, Rockies Express and Mississippi River Transmission Pipelines, which allows MoGas the flexibility to source natural gas from a variety of gas producing regions in the U.S. This advantageous position enhances operational efficiency, and allows MoGas customers to procure natural gas in times of peak demand and scarce supply. Two of the largest MoGas customers are also two large suppliers of natural gas for the St. Louis area. Additionally, the characteristics of the tangible assets and operations acquired in the MoGas Transaction are consistent with Company investment criteria and strategy. Some of these criteria include investments that are fixed asset intensive, with long depreciable lives, capable of providing stable cash flows due to limited commodity price sensitivity, as well as, experienced management teams capable of effectively and efficiently operating the assets now and through possible future growth opportunities. Goodwill related to this acquisition is deductible for income tax purposes.

Unaudited Pro Forma Financial Information

The following table illustrates the effect on the Consolidated Statements of Income and Comprehensive Income as well as earnings per share - basic and diluted as if the Company had consummated the MoGas Transaction as of January 1, 2013:

	Year Ended December 31,	
	2014	2013
Total Revenue ⁽¹⁾	\$ 53,315,951	\$ 42,551,314
Total Expenses ⁽²⁾	35,742,957	33,429,175
Operating Income	17,572,994	9,122,139
Other Income (Expense) ⁽³⁾	(3,997,916)	1,137,606
Tax Benefit (Expense) ⁽⁴⁾	641,304	(734,461)
Net Income	14,216,382	9,525,284
Less: Net Income attributable to non-controlling interest	1,556,157	1,466,767
Net Income attributable to CORR Stockholders	\$ 12,660,225	\$ 8,058,517
Earnings per share:		
Basic and Diluted	\$ 0.27	\$ 0.21
Weighted Average Shares of Common Stock Outstanding:		
Basic and Diluted ⁽⁵⁾	46,181,724	39,099,396

(1) Includes elimination adjustments for intercompany sales and rent.

(2) Includes adjustments for an increase in management fee payable, elimination of intercompany purchases and rent, depreciation, and other miscellaneous expenses.

(3) Includes adjustments for interest expense and other miscellaneous income.

(4) Includes an adjustment for a deferred tax benefit.

(5) Shares outstanding were adjusted for the November 17, 2014 follow-on equity offering mentioned above.

The Company recognized \$625 thousand of acquisition related costs that were expensed in the current period. These costs are included in Asset acquisition expense in the Consolidated Statements of Income.

6. FINANCING NOTES RECEIVABLE

Black Bison Financing Note Receivable

On March 13, 2014, our wholly-owned subsidiary, Corridor Bison, LLC ("Corridor Bison") entered into a Loan Agreement with Black Bison Water Services, LLC ("Black Bison WS"). Black Bison WS's initial loan draw in the amount of \$4.3 million was used to acquire real property in Wyoming and to pay loan transaction expenses. Corridor Bison agreed to loan Black Bison WS up to \$11.5 million (the "Black Bison Loan") to finance the acquisition and development of real property that will provide water sourcing, water disposal, or water treating and recycling services for the oil and natural gas industry.

On July 23, 2014, the Company increased its secured financing to Black Bison WS from \$11.5 million to \$15.3 million. The Company executed an amendment to the Loan Agreement to increase the loan to \$12 million, and entered into an additional loan for \$3.3 million from a taxable REIT subsidiary of the Company, CorEnergy BBWS, Inc. ("CorEnergy BBWS"), on substantially the same terms (the "TRS Loan" and, together with the Black Bison Loan, as amended, the "Loans"). The purpose of the increase in the secured financing was to fund the acquisition and development of real property and related equipment that will provide water sourcing, water disposal, or water treating and recycling services for the oil and natural gas industry. There were no other material changes to the terms of the loan agreement. In connection with the Amendment and the TRS Loan, the Company fully funded the remainder of the \$15.3 million capacity of the combined Loans.

Interest will initially accrue on the outstanding principal amount of both Loans at an annual base rate of 12 percent, which base rate will increase by 2 percent of the current base rate per year. In addition, starting in April 2015 and continuing for each month thereafter, the outstanding principal of the Loans will bear variable interest calculated as a function of the increase in volume of water treated by Black Bison WS during the particular month. The base interest plus variable interest, paid monthly, is capped at 19 percent per annum. The Loans mature on March 31, 2024 and are to be amortized by quarterly payments beginning March 31, 2015 and annual prepayments based upon free cash flows of the Borrower and its affiliates commencing in April 2015. The Loans are secured by the real property and equipment held by Black Bison WS and the outstanding equity in Black Bison WS and

its affiliates. The Loans are also guaranteed by all affiliates of Black Bison WS. The Company believes the notes receivable are fully collectible as of December 31, 2014.

As a condition to the Black Bison Loan, Corridor Bison acquired a Warrant to purchase a number of equity units, which as of March 13, 2014 represented 15 percent of the outstanding equity of Black Bison Intermediate Holdings, LLC ("Intermediate Holdings"). Corridor Bison paid \$34 thousand for the Warrant, which amount was determined to represent the fair value of the Warrant as of the date of purchase. The exercise price of the Warrant was \$3.16 per unit. The exercise price increases at a rate of 12 percent per annum.

In anticipation of the July 2014 modifications to the Black Bison agreements described above, Corridor Bison assigned to CorEnergy BBWS its rights and obligations in the Warrant dated March 13, 2014. As a condition of the TRS Loan, the parties entered into an Amended and Restated Warrant, pursuant to which the amount available to purchase thereunder was increased to a number of equity units, which as of July 23, 2014 represented 18.72 percent of the outstanding equity of Intermediate Holdings. CorEnergy BBWS paid an additional \$51 thousand for this increase in the amount that could be purchased pursuant to the Amended and Restated Warrant. The amount paid was determined to be the current value of the incremental amount that could be purchased under the Amended and Restated Warrant.

Four Wood Financing Note Receivable

On December 31, 2014, our wholly-owned subsidiary, Four Wood Corridor, LLC ("Four Wood Corridor"), entered into a Loan Agreement with SWD Enterprises, LLC ("SWD Enterprises"), pursuant to which Four Wood Corridor made a loan to SWD Enterprises for \$4.0 million. Concurrently, our TRS, CorPrivate entered into a TRS Loan Agreement with SWD Enterprises, pursuant to which Corridor Private made a loan to SWD Enterprises for \$1.0 million. The proceeds of the REIT loan and the TRS loan were used by SWD Enterprises and its affiliates to finance the acquisition of real and personal property that provides saltwater disposal services for the oil and natural gas industry, and to pay related expenses.

For the REIT loan, interest will initially accrue on the outstanding principal at an annual base rate of 12 percent. For the TRS loan, interest will initially accrue on the outstanding principal at an annual base rate of 13 percent. The base rates of both loans will increase by 2 percent of the current base rate per year. In addition, for both loans, starting in January 2016 and continuing for each month thereafter, the outstanding principal of the Loans will bear variable interest calculated as a function of the increase in volume of water treated by SWD Enterprises during the particular month. The base interest plus variable interest, paid monthly, is capped at 19 percent per annum for the REIT loan and 20 percent per annum for the TRS Loan. The Loans mature on December 31, 2024 and are to be amortized by quarterly payments beginning March 31, 2016 and annual prepayments based upon free cash flows of the Borrower and its affiliates commencing on January 15, 2016. The Loans are secured by the real property and equipment held by SWD Enterprises and the outstanding equity in SWD Enterprises and its affiliates. The Loans are also guaranteed by all affiliates of SWD Enterprises. The Company believes the notes receivable are fully collectible as of December 31, 2014.

7. VARIABLE INTEREST ENTITIES

The Company's variable interest in Variable Interest Entities ("VIE" or "VIEs") currently are in the form of equity ownership and loans provided by the Company to a VIE. The Company examines specific criteria and uses its judgment when determining if the Company is the primary beneficiary of a VIE and is therefore required to consolidate the investments. Factors considered in determining whether the Company is the primary beneficiary include risk- and reward-sharing, experience and financial condition of the other partner(s), voting rights, involvement in day-to-day capital and operating decisions, representation on a VIE's executive committee or Board of Directors, whether or not the Company has the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, existence of unilateral kick-out rights or voting rights, and level of economic disproportionality between the Company and the other partner(s).

Consolidated VIEs

As of December 31, 2014, the Company does not have any investments in VIEs that qualify for consolidation.

Unconsolidated VIE

At December 31, 2014, the Company's recorded investment in Black Bison WS and Intermediate Holdings, collectively a VIE that is unconsolidated, was \$15.9 million. The Company's maximum exposure to loss associated with the investment is limited to the Company's outstanding note receivable, related accrued interest receivable and the fair value of the Warrant, discussed in Note 6, totaling \$15.9 million as of December 31, 2014. While this entity is a VIE, the Company has determined that the power to direct the activities of the VIE that most significantly impact the VIE's economic performance is not held by the Company, therefore the VIE is not consolidated.

8. INCOME TAXES

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amount of assets and liabilities for financial reporting and tax purposes. Components of the Company's deferred tax assets and liabilities as of December 31, 2014 and December 31, 2013 are as follows:

Deferred Tax Assets and Liabilities			
	December 31, 2014		December 31, 2013
Deferred Tax Assets:			
Net operating loss carryforwards	\$	(679,692)	\$ (65,248)
Cost recovery of leased and fixed assets		(1,042,207)	(966,914)
Sub-total	\$	(1,721,899)	\$ (1,032,162)
Deferred Tax Liabilities:			
Basis reduction of investment in partnerships	\$	2,842,332	\$ 6,335,805
Net unrealized gain on investment securities		142,154	28,444
Sub-total		2,984,486	6,364,249
Total net deferred tax liability	\$	1,262,587	\$ 5,332,087

For the period ended December 31, 2014, the total deferred tax liability presented above relates to assets held in the Company's TRSs. The Company recognizes the tax benefits of uncertain tax positions only when the position is "more likely than not" to be sustained upon examination by the tax authorities based on the technical merits of the tax position. The Company's policy is to record interest and penalties on uncertain tax positions as part of tax expense. As of December 31, 2014, the Company had no uncertain tax positions and no penalties and interest were accrued. Tax years subsequent to the year ending November 30, 2007 remain open to examination by federal and state tax authorities.

Total income tax expense differs from the amount computed by applying the federal statutory income tax rate of 35 percent for the years ended December 31, 2014, December 31, 2013, November 30, 2012 and for the one-month transition period ended December 31, 2012 to income or loss from operations and other income and expense for the years presented, as follows:

Income Tax Expense (Benefit)				
	For the Years Ended			For the One-Month Transition Period Ended
	December 31, 2014	December 31, 2013	November 30, 2012	December 31, 2012
Application of statutory income tax rate	\$ 2,375,903	\$ 2,608,151	\$ 6,852,179	\$ (848,239)
State income taxes, net of federal tax benefit	(47,731)	273,174	442,455	(64,771)
Dividends received deduction	—	—	(1,221)	(7,133)
Income of Real Estate Investment Trust not subject to tax	(2,607,207)	(927,254)	—	—
Other	53,472	995,447	(64,479)	—
Total income tax expense	\$ (225,563)	\$ 2,949,518	\$ 7,228,934	\$ (920,143)

Total income taxes are computed by applying the federal statutory rate of 35 percent plus a blended state income tax rate, which was approximately 3.92 percent for the year ended December 31, 2014, 3.11 percent for the year ended December 31, 2013 and 2.26 percent for the other periods presented above. CorEnergy BBWS does not record a provision for state income taxes because it operates only in Wyoming, which does not have state income tax. Because Omega and MoGas primarily only operate in the state of Missouri, a blended state income tax rate of 5 percent was used for the operations of our Omega and MoGas TRSs for the years ended December 31, 2014 and 2013. The restructuring done in December 2012 causes us to hold and operate certain of our assets through one or more TRSs. A TRS is a subsidiary of a REIT that is subject to applicable corporate income tax. For the year ended December 31, 2014, all of the income tax expense presented above relates to the assets and activities held in the Company's TRSs. The components of income tax expense include the following for the periods presented:

Components of Income Tax Expense (Benefit)				
	For the Years Ended			For the One-Month Transition Period Ended
	December 31, 2014	December 31, 2013	November 30, 2012	December 31, 2012
Current tax expense (benefit)				
Federal	\$ 3,456,858	\$ (7,139)	\$ —	\$ 3,610,165
State (net of federal tax benefit)	387,079	20,613	38,107	245,782
AMT benefit	—	—	(8,842)	—
Total current tax expense (benefit)	\$ 3,843,937	\$ 13,474	\$ 29,265	\$ 3,855,947
Deferred tax expense (benefit)				
Federal	(3,634,689)	2,683,483	6,762,974	(4,465,104)
State (net of federal tax benefit)	(434,811)	252,561	436,695	(310,986)
Total deferred tax expense (benefit)	(4,069,500)	2,936,044	7,199,669	(4,776,090)
Total income tax expense (benefit), net	\$ (225,563)	\$ 2,949,518	\$ 7,228,934	\$ (920,143)

As of November 30, 2012, the Company had a net operating loss for federal income tax purposes of approximately \$17.2 million. The net operating loss may be carried forward for 20 years. If not utilized, this net operating loss would have expired as follows: \$8 thousand, \$4.0 million, \$3.4 million, \$24 thousand and \$9.8 million in the years ending November 30, 2028, 2029, 2030, 2031 and 2032, respectively. In the period ending December 31, 2012, all net operating losses of the Company were utilized to reduce the Company's current tax liability. As of December 31, 2013 the TRSs had a net operating loss of \$145 thousand. For the year ended December 31, 2014, the TRSs incurred a total net operating loss of approximately \$1.56 million, resulting in a total net operating loss of approximately \$1.70 million as of December 31, 2014. If not utilized, this net operating loss will expire as follows: \$145 thousand, and \$1.56 million in the years ending December 31, 2033 and 2034. As of November 30, 2012, an alternative minimum tax credit of \$194 thousand was available, which was fully utilized as of December 31, 2012.

The aggregate cost of securities for federal income tax purposes and securities with unrealized appreciation and depreciation, were as follows:

Aggregate Cost of Securities for Income Tax Purposes		
	December 31, 2014	December 31, 2013
Aggregate cost for federal income tax purposes	\$ 4,218,986	\$ 6,604,636
Gross unrealized appreciation	7,436,696	16,699,686
Gross unrealized depreciation	—	—
Net unrealized appreciation	\$ 7,436,696	\$ 16,699,686

The Company provides the following tax information to its common stockholders pertaining to the character of distributions paid during tax year 2012, 2013, and 2014. For a stockholder that received all distributions in cash during 2014, 74 percent will be treated as ordinary dividend income and 26 percent will be treated as return of capital. Of the ordinary dividend income, 48 percent will be treated as qualified dividend income. The per share characterization by quarter is reflected in the following table:

2014 Common Stock Tax Information (unaudited)

We elected effective for our 2013 tax year to be treated as a REIT for federal income tax purposes. Our REIT election, assuming continued compliance with the applicable tests, will continue in effect for 2014 and subsequent tax years. The Company satisfied the annual income test and the quarterly assets tests necessary for us to qualify to be taxed as a REIT for 2013 and 2014. Distributions made during 2013 and treated as qualifying dividend income relate to pre-REIT tax years earnings and profits that were required to be distributed by calendar year end 2013. Distributions made during 2014 and treated as qualifying dividend income relate to taxable dividends received from our TRSs that were received and distributed in 2014.

9. PROPERTY AND EQUIPMENT

Property and equipment consists of the following:

Property and Equipment		
	December 31, 2014	December 31, 2013
Land	\$ 580,000	\$ —
Natural gas pipeline	124,297,157	5,215,424
Vehicles and trailers	506,958	125,117
Office equipment and computers	59,027	15,627
Gross property and equipment	<u>125,443,142</u>	<u>5,356,168</u>
Less: accumulated depreciation	(2,623,020)	(2,037,685)
Net property and equipment	<u>\$ 122,820,122</u>	<u>\$ 3,318,483</u>

The amounts of depreciation of property and equipment recognized for the years ended December 31, 2014, December 31, 2013, November 30, 2012 and the one-month transition period ended December 31, 2012 were \$593 thousand, \$283 thousand, \$281 thousand and \$23 thousand, respectively.

10. CONCENTRATIONS

Mowood, Omega

Omega, an indirect wholly-owned TRS of the Company, had a ten-year contract (the "DOD Agreement") with the Department of Defense ("DOD") to provide natural gas and gas distribution services to Fort Leonard Wood. The DOD Agreement was set to expire on January 31, 2015. On January 28, 2015, the DOD awarded Omega a 6 month bridge extension of the current agreement for Omega to continue providing natural gas and gas distribution services until a new agreement is reached.

Revenue related to the DOD contract accounted for 88 percent, 80 percent, 71 percent, and 84 percent of our sales revenue for the years ended December 31, 2014, December 31, 2013, November 30, 2012, and for the one-month transition period ended December 31, 2012, respectively. Mowood, through its wholly-owned subsidiary Omega, performs management and supervision services related to the expansion of the natural gas distribution system used by the DOD. The amount due from the DOD accounts for 90 percent and 91 percent of the consolidated accounts receivable balances as of December 31, 2014 and December 31, 2013, respectively.

Omega's contracts for its supply of natural gas are concentrated among select providers. Purchases from its largest supplier of natural gas accounted for 61 percent of our cost of sales for the year ended December 31, 2014. This compares to 41 percent, 29 percent and 58 percent for the years ended December 31, 2013, November 30, 2012, and for the one-month transition period ended December 31, 2012, respectively.

MoGas

MoGas, a wholly-owned TRS of the Company, generates revenue from the transportation of natural gas to a concentrated group of eight customers. Transportation revenue relating to MoGas' largest customer accounted for 67 percent of the contracted capacity for the 37 day period ending December 31, 2014 that the Company owned the MoGas pipeline.

11. MANAGEMENT AND ADVISORY AGREEMENTS

On December 1, 2011, the Company executed a Management Agreement with Corridor InfraTrust Management, LLC ("Corridor"). Under the Management Agreement, Corridor (i) presents the Company with suitable acquisition opportunities consistent with the investment policies and objectives of the Company, (ii) is responsible for the day-to-day operations of the Company, and (iii) performs such services and activities relating to the assets and operations of the Company as may be appropriate. A new Management Agreement between the Company and Corridor was approved by the Board of Directors and became effective July 1, 2013. The new agreement does not change in any respect the terms for determination or payment of compensation for the Manager, does not have a specific term, and will remain in place unless terminated by the Company or the Manager in the manner permitted pursuant to the agreement. The new management agreement was amended as of January 1, 2014 to change the methodology for calculating the quarterly management fee.

The terms of the Management Agreement include a quarterly management fee equal to 0.25 percent (1.00 percent annualized) of the value of the Company's Managed Assets as of the end of each quarter. For purposes of the Management Agreement, "Managed Assets" means the total assets of the Company (including any securities receivables, other personal property or real property purchased with or attributable to any borrowed funds) minus (A) the initial invested value of all non-controlling interests, (B) the value of any hedged derivative assets, (C) any prepaid expenses, and (D) all of the accrued liabilities other than (1) deferred taxes and (2) debt entered into for the purpose of leverage. For purposes of the definition of Managed Assets, the Company's securities portfolio will be valued at then current market value. For purposes of the definition of Managed Assets, other personal property and real property assets will include real and other personal property owned and the assets of the Company invested, directly or indirectly, in equity interests in or loans secured by real estate or personal property (including acquisition related costs and acquisition costs that may be allocated to intangibles or are unallocated), valued at the aggregate historical cost, before reserves for depreciation, amortization, impairment charges or bad debts or other similar noncash reserves.

The Management Agreement also includes a quarterly incentive fee of 10 percent of the increase in distributions paid over a threshold distribution equal to \$0.125 per share per quarter. The Management Agreement also requires at least half of any incentive fees to be reinvested in the Company's common stock.

The Company pays Corridor, as the Company's Administrator pursuant to an Administrative Agreement, a fee equal to an annual rate of 0.04 percent of aggregate average daily managed assets, with a minimum annual fee of \$30 thousand.

Tortoise Capital Advisors, L.L.C. ("TCA") is compensated by Corridor to provide investment services related to the monitoring and disposition of our current securities portfolio.

12. FAIR VALUE OF OTHER SECURITIES

The major components of net realized and unrealized gain or loss on trading securities for the years ended December 31, 2014, December 31, 2013 and November 30, 2012, and for the one-month transition period ended December 31, 2012, are as follows:

Major Components of Net Realized and Unrealized Gain (Loss) on Trading Securities				
	For the Years Ended			For the One-Month Transition Period Ended
	December 31, 2014	December 31, 2013	November 30, 2012	December 31, 2012
Net unrealized gain on trading securities	\$ —	\$ —	\$ 3,985,269	\$ 4,663,211
Net realized gain (loss) on trading securities	—	(251,213)	24,664	(6,432,269)
Total net realized and unrealized gain (loss) on trading securities	\$ —	\$ (251,213)	\$ 4,009,933	\$ (1,769,058)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following tables provide the fair value measurements of applicable Company assets and liabilities by level within the fair value hierarchy as of December 31, 2014 and December 31, 2013. These assets and liabilities are measured on a recurring basis.

December 31, 2014

	December 31, 2014	Fair Value		
		Level 1	Level 2	Level 3
Assets:				
Other equity securities	\$ 9,572,181	\$ —	\$ —	\$ 9,572,181
Total Assets	\$ 9,572,181	\$ —	\$ —	\$ 9,572,181

December 31, 2013

	December 31, 2013	Fair Value		
		Level 1	Level 2	Level 3

(1) Located in Net realized and unrealized gain on other equity securities in the Consolidated Statements of Income

On October 1, 2014, Natural Resource Partners L.P. completed its acquisition of VantaCore. The Company's portion of the sale proceeds was approximately \$13.6 million, of which \$2.9 million will be held in escrow pending certain post closing obligations or the expiration of certain time periods. The Company recorded a discount to the escrow receivable of approximately \$370 thousand, resulting in the escrow receivable of approximately \$2.4 million as of December 31, 2014. This results in disposals of other equity securities of approximately \$13.2 million for the year ended December 31, 2014.

The Company utilizes the beginning of reporting period method for determining transfers between levels. There were no transfers between levels 1, 2 or 3 for the years ended December 31, 2014 and December 31, 2013.

In accordance with ASC 820, the Company fair values their derivative financial instruments. Please refer to Footnote 15, Interest Rate Hedge Swaps, for more information.

Valuation Techniques and Unobservable Inputs

The Company's other equity securities, which represent securities issued by private companies, are classified as Level 3 assets. Significant judgment is required in selecting the assumptions used to determine the fair values of these investments. See Note 2, Significant Accounting Policies, for additional discussion.

At December 31, 2013 the Company's investments in private companies were valued using one or a combination of the following valuation techniques: (i) analysis of valuations for publicly traded companies in a similar line of business ("public company analysis"), (ii) analysis of valuations for comparable M&A transactions ("M&A analysis") and (iii) discounted cash flow analysis.

The public company analysis utilizes valuation multiples for publicly traded companies in a similar line of business as the portfolio company to estimate the fair value of such investment. Typically, the Company's analysis focuses on the ratio of enterprise value to earnings before interest expense, income tax expense, depreciation and amortization ("EBITDA") which is commonly referred to as an EV/EBITDA multiple. The Company selects a range of multiples given the trading multiples of similar publicly traded companies and applies such multiples to the portfolio company's EBITDA to estimate the portfolio company's trailing, proforma, projected or average (as appropriate) EBITDA to estimate the portfolio company's enterprise value and equity value. The Company also selects a range of trading market yields of similar public companies and applies such yields to the portfolio company's estimated distributable cash flow. When calculating these values, the Company applies a discount, when applicable, to the portfolio company's estimated equity value for the size of the company and the lack of liquidity in the portfolio company's securities. The M&A analysis utilizes valuation multiples for historical M&A transactions for companies or assets in a similar line of business as the portfolio company to estimate the fair value of such investment. Typically, the Company's analysis focuses on EV/EBITDA

multiples. The Company selects a range of multiples based on EV/EBITDA multiples for similar M&A transactions or similar companies and applies such ranges to the portfolio company's analytical EBITDA to estimate the portfolio company's enterprise value.

The discounted cash flow ("DCF") analysis is used to estimate the equity value for the portfolio company based on estimated DCF of such portfolio company. Such cash flows include an estimate of terminal value for the portfolio company. A present value of these cash flows is determined by using estimated discount rates (based on the Company's estimate for weighted average cost of capital for such portfolio company).

Under all of these valuation techniques, the Company estimated operating results of its portfolio companies (including EBITDA). These estimates utilize unobservable inputs such as historical operating results, which may be unaudited, and projected operating results, which were based on expected operating assumptions for such portfolio company. The Company also consulted with management of the portfolio companies to develop these financial projections. These estimates were sensitive to changes in assumptions specific to such portfolio company as well as general assumptions for the industry. Other unobservable inputs utilized in the valuation techniques outlined above include: possible discounts for lack of marketability, selection of publicly-traded companies, selection of similar M&A transactions, selected ranges for valuation multiples, selected range of yields and expected required rates of return and weighted average cost of capital. The various inputs were weighted as appropriate, and other factors may have been weighted into the valuation, including recent capital transactions of the Company.

Changes in EBITDA multiples, or discount rates may change the fair value of the Company's portfolio investments. Generally, a decrease in EBITDA multiples or DCF multiples, or an increase in discount rates, when applicable, may result in a decrease in the fair value of the Company's portfolio investments.

Quantitative Table for Valuation Techniques used as of December 31, 2013

The following table summarizes the significant unobservable inputs that the Company used to value its portfolio investments categorized as Level 3 as of December 31, 2013.

Significant Unobservable Inputs Used To Value Portfolio Investments						
December 31, 2013						
Assets at Fair Value	Fair Value	Valuation Technique	Unobservable Inputs	Range		Weighted Average
				Low	High	
Other equity securities, at fair value	\$ 23,304,321	Public company historical EBITDA analysis	Historical EBITDA Valuation Multiples	9.6x	10.6x	10.1x
		Public company projected EBITDA analysis	Projected EBITDA Valuation Multiples	8.3x	9.3x	8.8x
		M&A company analysis	EV/LTM 2012 EBITDA	8.3x	9.3x	8.8x
		Discounted cash flow	Weighted Average Cost of Capital	9.5%	14.0%	11.8%

For the year ended December 31, 2014, the Company's investment in Lightfoot is its only remaining private company investment. Lightfoot in turn owns a combination of public and private investments. Therefor Lightfoot was valued using a combination of the following valuation techniques: (i) public share price of private companies investments, discounted for a lack of marketability and (ii) discounted cash flow analysis. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Company's investment may fluctuate from period to period. Additionally, the fair value of the Company's investment may differ from the values that would have been used had a ready market existed for such investment and may differ materially from the values that the Company may ultimately realize.

As of both December 31, 2014 and December 31, 2013, the Company held a 6.7 percent equity interest in Lightfoot. As of December 31, 2013, the Company held a 11.1 percent equity interest in Vantacore.

Certain condensed combined financial information of the unconsolidated affiliates, Lightfoot, is presented in the following tables.

Assets	December 31, 2014	December 31, 2013
Current assets	\$ 25,783,000	\$ 23,535,000
Noncurrent assets	385,256,000	392,062,000
Total Assets	<u>\$ 411,039,000</u>	<u>\$ 415,597,000</u>
Liabilities		
Current liabilities	\$ 14,317,000	\$ 15,342,000
Noncurrent liabilities	113,810,000	105,563,000
Total Liabilities	<u>\$ 128,127,000</u>	<u>\$ 120,905,000</u>
Partner's equity	282,912,000	294,692,000

	For the Year Ending	
	December 31, 2014	December 31, 2013
Revenues	\$ 54,906,000	\$ 47,841,000
Operating expenses	56,482,000	41,254,000
Other income (expenses)	10,632,000	12,907,000
Net income	<u>\$ 9,056,000</u>	<u>\$ 19,494,000</u>
EBITDA	\$ 25,753,000	\$ 39,184,000

For the year ended December 31, 2014, the Company's Warrant Investment was valued using a binomial option pricing model. The key assumptions used in the binomial model are the fair value of equity of the underlying business; the Warrant's strike price; the expected volatility of equity; the time to the Warrant's expiry; the risk-free rate, and the expected dividend yields. Due to the inherent uncertainty of determining the fair value of the Warrant Investment, which does not have a readily available market, the assumptions used the binomial model to value the Company's Warrant Investment were based on Level 2 and Level 3 inputs. These inputs, including the expected volatility and the fair value of equity of the underlying business, may vary significantly from period-to-period, and accordingly, the fair value as of December 31, 2014 may differ materially from the amount that the Company may ultimately realize.

The following section describes the valuation methodologies used by the Company for estimating fair value for financial instruments not recorded at fair value, but fair value is included for disclosure purposes only, as required under disclosure guidance related to the fair value of financial instruments.

Cash and Cash Equivalents — The carrying value of cash, amounts due from banks, federal funds sold and securities purchased under resale agreements approximates fair value.

Escrow Receivable — The escrow receivable due to the Company as of December 31, 2014, which relates to the sale of VantaCore Partners, LP, is anticipated to be released upon satisfaction of certain post-closing obligations and the expiration of certain time periods (50 percent to be released 12 months after close (October 1, 2014), and the other 50 percent released 18 months after close). The fair value of the escrow receivable is reflected net of a discount for the potential that the full amount due to the Company would not be realized.

Financing Notes Receivable — Based on the interest rates for similar financial instruments, the carrying value of the financing notes receivable are considered to approximate fair value.

Long-term Debt — The fair value of the Company's long-term debt is calculated, for disclosure purposes, by discounting future cash flows by a rate equal to the expected market rate for an equivalent transaction.

Line of Credit — The carrying value of the line of credit approximates the fair value due to its short-term nature.

Carrying and Fair Value Amounts

	Level within fair value hierarchy	December 31, 2014		December 31, 2013	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets:					
Cash and cash equivalents	Level 1	\$ 7,578,164	\$ 7,578,164	\$ 17,963,266	\$ 17,963,266
Escrow receivable	Level 2	\$ 2,438,500	\$ 2,438,500	\$ —	\$ —
Financing notes receivable	Level 2	\$ 20,687,962	\$ 20,687,962	\$ —	\$ —
Financial Liabilities:					
Long-term debt	Level 2	\$ 67,060,000	\$ 67,060,000	\$ 70,000,000	\$ 70,000,000
Line of credit	Level 2	\$ 32,141,277	\$ 32,141,277	\$ 81,935	\$ 81,935

13. INTANGIBLES

The Company has recorded an intangible lease asset, related to the PNM Lease Agreement, for the fair value of the amount by which the remaining contractual lease payments exceed market lease rates at the time of acquisition. The intangible lease asset is being amortized on a straight-line basis over the life of the lease term, which expires on April 1, 2015. Annual amortization of the intangible lease asset totaling \$292 thousand for the years ended December 31, 2014, December 31, 2013, and November 30, 2012, and monthly amortization of \$24 thousand for the one-month transition period ended December 31, 2012, is reflected in the accompanying Consolidated Statements of Income as a reduction to lease revenue. These same amounts are included in Amortization expense in the accompanying Consolidated Statements of Cash Flows. Refer to Note 4 for further discussion around the PNM Purchase Agreement.

Intangible Lease Asset		
	December 31, 2014	December 31, 2013
Intangible lease asset	\$ 1,094,771	\$ 1,094,771
Accumulated amortization	(1,021,784)	(729,847)
Net intangible lease asset	\$ 72,987	\$ 364,924

Remaining Estimated Amortization On Intangibles	
Year ending December 31,	Amount
2015	72,987
Total	\$ 72,987

14. CREDIT FACILITIES

Pinedale Facility

On December 20, 2012, Pinedale LP closed on a \$70 million secured term credit facility with KeyBank serving as a lender and as administrative agent on behalf of other lenders participating in the credit facility. Outstanding balances under the KeyBank credit facility will generally accrue interest at a variable annual rate equal to LIBOR plus 3.25 percent (3.42 percent as of December 31, 2014). The credit facility will remain in effect through December 31, 2015, with an option to extend through December 31, 2016. The credit facility is secured by the Pinedale LGS. Pinedale LP is obligated to pay all accrued interest monthly and is further obligated to make monthly principal payments, which began on March 7, 2014, in the amount of \$294 thousand or 0.42 percent of the principal balance as of March 1, 2014. Principal payments totaling approximately \$3.5 million are required in 2015. In the event the Company exercises its option to extend the term an additional year, principal payments totaling \$3.5 million would be required in 2016 with the remaining principal balance due at maturity. The registrant has provided to KeyBank a guarantee against certain inappropriate conduct by or on behalf of Pinedale LP or us. The credit agreement contains, among other restrictions, specific financial covenants including the maintenance of certain financial coverage ratios and a minimum net worth requirement. The Company is required to maintain a restricted collateral account into which Ultra Wyoming makes all lease payments under the Pinedale Lease Agreement. Payments of principal and interest pursuant to the credit facility are drawn by KeyBank directly from the restricted collateral account prior to transferring the remaining cash to the Pinedale LP operating account. The balance in the restricted collateral account at December 31, 2014 was \$0. As of December 31, 2014, Pinedale LP was in compliance with all of the financial covenants of the secured term credit facility.

Pinedale LP's credit facility with KeyBank limits distributions by Pinedale LP to the Company. Distributions by Pinedale LP to the Company are permitted to the extent required for the Company to maintain its REIT qualification, so long as Pinedale LP's obligations to KeyBank have not been accelerated following an Event of Default (as defined in the credit facility). The KeyBank credit facility also requires that Pinedale LP maintain minimum net worth levels and certain leverage ratios, which along with other provisions of the credit facility limit cash dividends and loans to the Company. At December 31, 2014, the net assets of Pinedale LP were \$142.5 million.

As of December 31, 2014 and December 31, 2013, approximately \$501 thousand and \$1.0 million, respectively, in net deferred debt issuance costs related to the KeyBank credit facility are included in the accompanying Consolidated Balance Sheets. The deferred costs will be amortized over the anticipated three-year term of the KeyBank credit facility. For the years ended December 31, 2014, December 31, 2013, November 30, 2012 and the one-month transition period ended December 31, 2012, \$517 thousand, \$515 thousand, \$0, and \$17 thousand, respectively, is included in interest expense within the accompanying Consolidated Statements of Income.

The Company has executed interest rate swap derivatives to add stability to our interest expense and to manage our exposure to interest rate movements on our LIBOR based borrowings. Interest rate swaps involve the receipt of variable-rate amounts from a counterparty in exchange for us making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount. See Note 15 for further information regarding interest rate swap derivatives.

Additional Credit Facilities of the REIT

On May 8, 2013, the Company entered into a \$20 million revolving line of credit with KeyBank. The primary term of the facility was three years with the option for a one-year extension. Outstanding balances under the revolving credit facility (the "KeyBank Revolver") accrued interest at a variable annual rate equal to LIBOR plus 4.0 percent or the Prime Rate plus 2.75 percent. The facility was for the purpose of funding general working capital needs and if necessary, to provide short-term financing for the acquisition of additional real property assets. The amount available to be drawn under this facility was subject to a borrowing base limitation. The agreement was terminated on September 26, 2014.

As of December 31, 2014, and December 31, 2013, approximately \$0 and \$208 thousand, respectively, in net deferred debt issuance costs, related to the KeyBank Revolver, are included in the accompanying Consolidated Balance Sheets. The deferred costs were initially amortized over the anticipated four-year term of the Key Bank Revolver facility. For the years ended December 31, 2014, December 31, 2013, November 30, 2012, and the one-month transition period ended December 31, 2012, \$47 thousand, \$42 thousand, \$0, and \$0, respectively, is included in interest expense within the accompanying Consolidated Statements of Income. Upon termination, the remaining unamortized deferred debt issuance costs totaling approximately \$161 thousand were expensed in full.

On September 26, 2014 the Company entered into a \$30 million revolving credit facility (the "Regions Revolver") with certain lenders and Regions Bank, as an agent for such lenders, then on November 24, 2014, increased the credit facility, to \$90.0 million in conjunction with the MoGas acquisition. There were no borrowings on the line between September 26, 2014 and November 24, 2014. The facility has a maturity of November 24, 2018. For the first six months, subsequent to the increase, the facility will bear interest on the outstanding balance at a rate of LIBOR plus 3.50 percent. On and after May 24, 2015, the interest rate will be determined by a pricing grid where the applicable interest rate is anticipated to be LIBOR plus 2.75 percent to 3.50 percent, depending on the company's leverage ratio at such time. As of December 31, 2014 and December 31, 2013, approximately \$1.3 million and \$0, respectively, in net deferred debt issuance costs related to the Regions Revolver are included in the accompanying Consolidated Balance Sheets. For year ended December 31, 2014 and 2013, approximately \$217 thousand and \$0, respectively, is included in interest expense within the accompanying Consolidated Statements of Income. As of December 31, 2014, there is \$32 million outstanding against the Regions Revolver. As of December 31, 2014, the Company was in compliance of all covenants of the Regions Revolver.

MoGas Credit Facility

In conjunction with the MoGas acquisition, MoGas Pipeline LLC and United Property systems, LLC, as co-borrowers, entered into a revolving credit agreement dated November 24, 2014 (the "MoGas Revolver"), with certain lenders, including Regions Bank as agent for such lenders. Pursuant to the MoGas Revolver, the co-borrowers may borrow, prepay and reborrow loans up to \$3.0 million outstanding at any time. Interest accrues under the MoGas Revolver at the same rate and pursuant to the same terms as it accrues under the Regions Revolver. As of December 31, 2014, there were no outstanding borrowings against the MoGas Revolver. As of December 31, 2014, the co-borrowers are in compliance of all covenants of the MoGas Revolver.

Mowood/Omega Credit Facility

On October 15, 2013, Mowood and Omega entered into a new Revolving Note Payable Agreement ("2013 Note Payable Agreement"), replacing a prior \$1.3 million secured Note Payable Agreement (as amended), under which interest accrued and was payable monthly at LIBOR plus 4.00 percent and which expired on October 29, 2013. The 2013 Note Payable Agreement had a maximum borrowing base of \$1.5 million. Borrowings on the 2013 Note Payable Agreement are secured by Mowood's and Omega's assets. Interest accrued at the Prime Lending Rate as published in the Wall Street Journal, plus 0.5 percent (3.75% as of December 31, 2014), was payable monthly, and in full, with accrued interest, on the termination date of October 15, 2014.

On October 15, 2014, Mowood and Omega renewed the 2013 Note Payable Agreement by entering into a Revolving Note Payable Agreement ("2014 Note Payable Agreement"), extending the maturity date to January 31, 2015. The 2014 Note Payable Agreement has the same terms as the 2013 Note Payable Agreement and includes an unused credit line fee of 20 basis points per month. As of December 31, 2014 there were \$141 thousand in outstanding borrowings under the 2014 Note Payable Agreement. The 2014 Note Payable Agreement contains various restrictive covenants, with the most significant relating to minimum consolidated fixed charge ratio, the incidence of additional indebtedness, member distributions, extension of guaranties, future investments in other subsidiaries and change in ownership. Mowood and Omega were in compliance with the various covenants of the 2014 Note Payable Agreement as of December 31, 2014.

15. INTEREST RATE HEDGE SWAPS

Derivative Financial Instruments

Currently, the Company uses interest rate swaps to manage its interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including forward interest rate curves. The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash payments and the discounted expected variable cash receipts. The variable cash receipts are based on an expectation of future interest rates (forward curves) derived from observable market interest rate forward curves.

To comply with the provisions of ASC 820, the Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees. In conjunction with the FASB's fair value measurement guidance in ASC 820, the Company made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio.

Although the Company has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of December 31, 2014, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

The table below presents the Company's hedged derivative asset measured at fair value on a recurring basis as well as their classification on the Consolidated Balance Sheets as of December 31, 2014 and December 31, 2013, aggregated by the level in the fair value hierarchy within which those measurements fall. Hedges that are valued as receivable by the Company are considered Asset Derivatives and those that are valued as payable by the Company are considered Liability Derivatives.

Derivative Financial Instruments Measured At Fair Value on a Recurring Basis

Balance Sheet Line Item	Balance Sheet Classification	Fair Value Hierarchy		
		Level 1	Level 2	Level 3
December 31, 2014				
Hedged derivative asset	Assets	\$ —	\$ 351,807	\$ —
December 31, 2013				
Hedged derivative asset	Assets	\$ —	\$ 680,968	\$ —

Level 1 – quoted prices in active markets for identical investments

Level 2 – other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)

Level 3 – significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

Risk Management Objective of Using Derivatives

The Company is exposed to certain risk arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk primarily by managing the amount, sources, and duration of its debt funding and the use of derivative financial instruments. Specifically, the Company enters into derivative financial instruments to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments principally related to the Company's investments and borrowings.

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate derivatives are to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses interest rate swaps and caps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount. Interest rate caps designated as cash flow hedges involve the receipt of variable amounts from a counterparty if interest rates rise above the strike rate on the contract in exchange for an upfront premium.

The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges is recorded in Accumulated Other Comprehensive Income ("AOCI") and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The Company elected to designate its interest rate swaps as cash flow hedges in April 2013. During the year ended December 31, 2014, such derivatives were used to hedge the variable cash flows associated with existing variable-rate debt. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings. During the year ended December 31, 2014, there was a loss due to ineffectiveness of approximately \$1 thousand recorded in earnings. Ineffectiveness resulted from interest rate swaps that did not have a fair value of zero at inception of the hedging relationship. During the year ended December 31, 2013, there was a gain due to ineffectiveness of approximately \$6 thousand, recorded in earnings. The Company did not have any derivatives designated as Cash Flow Hedges during the years ended November 30, 2012 or 2011 or the one-month transition period ended December 31, 2012.

Amounts reported in AOCI related to derivatives will be reclassified to interest expense as interest payments are made on the Company's variable-rate debt. Over the next 12 months, the Company estimates that an additional \$209 thousand will be reclassified as an increase to interest expense.

As of December 31, 2014, the Company had the following outstanding interest rate derivatives that were designated as cash flow hedges of interest rate risk:

Outstanding Derivatives Designated as Cash Flow Hedges of Interest Rate Risk

Interest Rate Derivative	Number of Instruments	Notional Amount Outstanding	Effective Date	Termination Date	Floating Rate Received	Fixed Rate Paid
Interest Rate Swap	2	\$52,500,000	February 5, 2013	December 5, 2017	1-month US Dollar LIBOR	0.865%

Non-Designated Hedges

Derivatives not designated as hedges are not speculative and are used to manage the Company's exposure to interest rate movements and other identified risks. Changes in the fair value of derivatives not designated in hedging relationships are recorded directly in earnings and were equal to net losses of approximately \$0, \$75 thousand and \$317 thousand for the year ended December 31, 2014, 2013 and the one-month transition period ended December 31, 2012, respectively. The Company did not have any derivatives during the year ended November 30, 2012.

Tabular Disclosure of the Effect of Derivative Instruments on the Income Statement

The tables below present the effect of the Company's derivative financial instruments on the Income Statement for the years ended December 31, 2014, December 31, 2013, and November 30, 2012 and for the one-month transition period ended December 31, 2012.

Derivatives in Cash Flow Hedging Relationship	For Year Ended December 31,		For Year Ended November 30, 2012	For the One-Month Transition Period Ended December 31, 2012
	2014	2013		
Amount of Gain (Loss) Recognized in AOCI on Derivative (Effective Portion) ⁽¹⁾	\$ (705,826)	\$ 741,344	\$ —	\$ —
Amount of Gain (Loss) Reclassified from AOCI on Derivatives (Effective Portion) Recognized in Net Income ⁽¹⁾	(305,945)	(217,821)	—	—
Amount of Gain (Loss) Recognized in Income on Derivative (Ineffective Portion, Amounts Excluded from Effectiveness Testing) ⁽¹⁾	(897)	5,969	—	—
Derivatives Not Designated as Hedging Instruments				
Amount of Gain (Loss) Recognized in Income on Derivative ⁽²⁾	\$ —	\$ (75,200)	\$ —	\$ (316,756)

(1) Included in "Interest Expense" on the face of the Income Statement

(2) The gain or (loss) recognized in income on derivatives includes changes in fair value of the derivatives as well as the periodic cash settlements and interest accruals for derivatives not designated as hedging instruments

Tabular Disclosure of Offsetting Derivatives

The table below presents a gross presentation, the effects of offsetting, and a net presentation of the Company's derivatives as of December 31, 2014 and December 31, 2013. The net amounts of derivative assets or liabilities can be reconciled to the tabular disclosure of fair value. The tabular disclosure of fair value provides the location that derivative assets and liabilities are presented on the Balance Sheet. There were no offsetting derivative liabilities as of December 31, 2014 and December 31, 2013.

	Offsetting Derivatives					
	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Financial Position	Net Amounts of Assets presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position		
				Financial Instruments	Cash Collateral Received	Net Amount
Offsetting Derivative Assets as of December 31, 2014	\$ 351,807	\$ —	\$ 351,807	\$ —	\$ —	\$ 351,807
Offsetting Derivative Assets as of December 31, 2013	\$ 680,968	\$ —	\$ 680,968	\$ —	\$ —	\$ 680,968

Credit-Risk Related Contingent Features

The Company has agreements with some of its derivative counterparties that contain a provision where if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

As of December 31, 2014, the Company did not have any derivatives that were in a net liability position. Therefore, the credit risk-related contingent features discussed above would not apply as of December 31, 2014.

16. WARRANTS

The Company issued 945,594 warrants (representing the right to purchase one share of the Company's common stock for \$11.41 per common share) on February 7, 2007, all of which expired unexercised on February 6, 2014 and are no longer outstanding as of December 31, 2014.

17. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

	Earnings Per Share			
	For the Years Ended			For the One-Month Transition Period Ended December 31, 2012
	December 31, 2014	December 31, 2013	November 30, 2012	
Net income attributable to CORR Stockholders	\$ 7,013,856	\$ 4,502,339	\$ 12,348,721	\$ (1,503,396)
Basic and diluted weighted average shares ⁽¹⁾	33,028,574	24,149,396	9,182,425	15,564,861
Basic and diluted earnings per share attributable to CORR Stockholders	\$ 0.21	\$ 0.19	\$ 1.34	\$ (0.10)

(1) Warrants to purchase shares of common stock were outstanding during the periods reflected in the table above, but were not included in the computation of diluted earnings per share because the warrants' exercise price was greater than the average market value of the common shares and, therefore, the effect would be anti-dilutive.

18. QUARTERLY FINANCIAL DATA (Unaudited)

	For the Fiscal Quarters Ended			
	March 31, 2014	June 30, 2014	September 30, 2014	December 31, 2014

Net Income (Loss) attributable to CORR Stockholders	\$ (1,503,396)	\$ 1,058,284

20. Contingency

The Company's, wholly owned subsidiary, MoGas, has a contingency arising from its certification proceeding before the FERC. As part of that proceeding, the FERC determined initial rates to be used by MoGas. The Missouri Public Service Commission ("MPSC") alleged that MoGas improperly included a purported acquisition premium associated with purchasing certain assets for the purpose of determining those rates. The FERC held that the issue did not need to be determined until MoGas filed its next rate case, which it was ordered to do within a certain period of time. The MPSC appealed that decision to the United States Court of Appeals for the District of Columbia, which reversed the FERC's decision and remanded the matter to the FERC on the limited issue of whether the premium was properly included in the initial rates. In the interim MoGas filed and settled the required rate case which noted that the outcome of the settlement could impact rates. The FERC continued to maintain that the purchase price of the assets could be included in the rate base. The MPSC petitioned the D.C Circuit for review of the FERC's orders. MoGas is an intervenor in that proceeding. Briefing and oral arguments are concluded and the court's decision is pending.

Management has analyzed the facts and circumstances surrounding this issue and believes it has meritorious defenses and that a loss is not reasonably possible and plans to vigorously defend these allegations. Additionally, pursuant to the terms of the MoGas Purchase Agreement, in the unlikely scenario that MoGas is required to pay damages as a result of the ruling, the seller has agreed to indemnify MoGas in full.

21. SUBSEQUENT EVENTS

The Company performed an evaluation of subsequent events through the date of the issuance of these financial statements and determined that no additional items require recognition or disclosure, except for the following:

Preferred Equity Offering

Subsequent to year end, in January 2015 we issued an aggregate of 2,250,000 depositary shares, each representing 1/100th of a share of the Company's 7.375% Series A Cumulative Redeemable Preferred Stock, pursuant to an underwritten public offering under our June 2012 shelf registration statement, resulting in gross proceeds of \$56.3 million and net proceeds (after underwriting discount) of approximately \$54.5 million, which were used to repay outstanding indebtedness under the Regions Revolver and for general corporate purposes. Further, on January 23, 2015, we had a new shelf registration statement declared effective by the SEC, pursuant to which we may publicly offer additional securities consisting of senior and/or subordinated debt securities, shares of preferred stock (or depositary shares representing fractional interests therein), shares of common stock, warrants or rights to purchase any of the foregoing securities, and units consisting of two or more of these classes or series of securities, with an aggregate offering price of up to \$300.0 million.

Revolver Pay-Down

On January 28, 2015, the Company used proceeds from the Preferred Equity offering to pay the Regions Revolver balance in full. The amount paid included principal and accrued interest and fees.

Dividend Declaration

The 2014 fourth quarter dividend was paid in the first quarter of 2015. On January 28, 2015, our Board declared a dividend of \$0.130 per share, payable February 27, 2015 to shareholders of record on February 13, 2015.

SCHEDULE I - CONDENSED FINANCIAL INFORMATION OF REGISTRANT
CorEnergy Infrastructure Trust, Inc.

CONDENSED BALANCE SHEETS	December 31, 2014	December 31, 2013

STOCK SYMBOL

New York Stock Exchange: CORR

The CorEnergy Symbol

CorEnergy's mark is symbolic of the diversified types of energy assets we manage:

- Blue and gold flames represent oil and gas assets
- The logo shape mimics power transmission towers
- Interchanging leaf-like shapes are representative of potential renewable assets
- The horizontal corridor created by the symbol's components reflects the energy corridors that contain our national system of energy infrastructure assets
