For the fiscal year ended March 31, 2021

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-36437

Dorian LPG Ltd.

(Exact name of registrant as specified in its charter)

Marshall Islands

(State or other jurisdiction of incorporation or organization)

27 Signal Road, Stamford, CT

(Address of principal executive offices)

66-0818228

(I.R.S. Employer Identification No.)

06902

(Zip Code)

Registrant's telephone number, including area code: (203) 674-9900

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of Each Class	Trading Symbol	Name of Each Exchange on Which Registered
Common stock, par value \$0.01 per share	LPG	New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐

Smaller reporting company ☐

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the registrant's common stock held by non-affiliates, based upon the closing price of common stock as reported on the New York Stock Exchange as of September 30, 2020, was approximately \$290,509,924. For this purpose, all outstanding shares of common stock have been considered held by non-affiliates, other than the shares beneficially owned by directors, officers and shareholders of 10% or more of the registrant's outstanding common shares, without conceding that any of the excluded parties are "affiliates" of the registrant for purposes of the federal securities laws. As of June 1, 2021, there were 41,086,069 shares of the registrant's common stock outstanding.

FORWARD-LOOKING STATEMENTS AND SUMMARY OF RISK FACTORS

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the Private Securities Litigation Reform Act of 1995 (the “PSLRA”), including analyses and other information based on forecasts of future results and estimates of amounts not yet determinable and statements relating to our future prospects, developments and business strategies. Such forward-looking statements are intended to be covered by the safe harbor provided for under the sections referenced in the immediately preceding sentence and the PSLRA. Forward-looking statements are identified by their use of terms and phrases such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “forecast,” “intend,” “likely,” “may,” “might,” “pending,” “plan,” “possible,” “potential,” “predict,” “project,” “seeks,” “should,” “targets,” “will,” “would,” and similar expressions, terms and phrases, including references to assumptions.

The forward-looking statements in this report are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management’s examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies that are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to important factors and matters discussed elsewhere in this report, and in the documents incorporated by reference herein, important factors that, in our view, could cause our actual results to differ materially from those discussed in the forward-looking statements include:

- our future operating or financial results;
 - our business strategies, including with respect to acquisitions and chartering, and expected capital spending or operating expenses, as well as any difficulty we may have in managing planned growth properly;
 - shipping trends, including changes in charter rates applicable to alternative propulsion technologies, scrubber equipped and non-scrubber equipped vessels, scrapping rates and vessel and other asset values;
 - changes in trading patterns that impact tonnage requirements;
 - compliance with laws, treaties, rules, regulations and policies (including amendments or other changes thereto) applicable to the liquefied petroleum gas, or LPG, shipping industry, including, without limitation, legislation adopted by international organizations such as the International Maritime Organization and the European Union or by individual countries, as well as the impact and costs of our compliance with, and the potential of liability under, such laws, treaties, rules, regulations and policies;
 - the timing, cost and prospects of purchasing, installing and operating exhaust gas cleaning systems (commonly referred to as “scrubbers”) to reduce sulfur emissions on certain of our vessels;
 - charterers’ increasing emphasis on environmental and safety concerns and investors’ increasing scrutiny and changing expectations with respect to public company Environmental, Social and Governance policies;
 - general economic conditions and specific economic conditions in the oil and natural gas industry and the countries and regions where LPG is produced and consumed;
 - completion of infrastructure projects to support marine transportation of LPG, including export terminals and pipelines;
 - factors affecting supply of and demand for LPG, LPG shipping, and LPG vessels, including, among other things: the production levels, price and worldwide consumption and storage of oil, refined petroleum products and natural gas, including production from United States shale fields; any oversupply of or limited demand for LPG vessels comparable to ours or higher specification vessels; trade conflicts and the imposition of tariffs or otherwise on LPG or LPG products resulting from domestic and international political and geopolitical conditions; and shifts in consumer demand from LPG towards other energy sources;
 - any decrease in the value of the charter-free market values of our vessels or reduction in our charter hire rates and profitability associated with such vessels as a result of increase in the supply of or decrease in
-

- the demand for LPG, LPG shipping or LPG vessels;
 - greater than anticipated levels of LPG vessel newbuilding orders or lower than anticipated rates of LPG vessel scrapping;
 - the aging of the Company's fleet which could result in increased operating costs, impairment or loss of hire;
 - our ability to profitably employ our vessels, including vessels participating in the Helios Pool (defined below);
 - unavailability of spot charters and the volatility of prevailing spot market charter rates, which may affect our ability to realize the expected benefits from our time chartered-in vessels, including those in the Helios Pool;
 - failure of our charterers or other counterparties to meet their obligations under our charter agreements;
 - shareholders' reliance on us to enforce our rights against contract counterparties;
 - competition in the LPG shipping industry, including our ability to compete successfully for future chartering opportunities and newbuilding opportunities (if any);
 - future purchase prices of newbuildings and secondhand vessels and timely deliveries of such vessels (if any) and, relatedly, the risks associated with the purchase of second-hand vessels;
 - the performance of the Helios Pool, including the failure of its significant customers to perform their obligations and the loss or reduction in business from its significant customers (or if the same were to occur with respect to our significant customers);
 - the availability of (and our ability to obtain such) financing and refinancing to fund capital expenditures, acquisitions and other general corporate purposes, the terms of such financing and our ability to comply with the restrictions and other covenants set forth in our existing and future debt agreements and financing arrangements (and to repay or refinance our existing debt and settling of interest rate swaps, if any);
 - our costs, including crew wages, insurance, provisions, repairs and maintenance, general and administrative expenses, drydocking, and bunker prices, as applicable;
 - any inability to retain and recruit qualified key executives, key employees, key consultants or skilled workers and, relatedly, our dependence on key personnel and the availability of skilled workers and the related labor costs;
 - the potential difference in interests between or among certain of our directors, officers, key executives and shareholders;
 - quality and efficiency requirements from customers and developments regarding the technologies relating to oil exploration and the effects of new products and new technology in our industry, including with respect to equipment propulsion and overall vessel efficiency;
 - potential changes in regulation that would require the installation of Engine Power Limitation (EPL) systems on our vessels to reduce fuel use and carbon emissions, and increase the level of energy efficiency;
 - operating hazards in the maritime transportation industry, including accidents, political events, public health threats (including the outbreak of communicable diseases), international hostilities and instability, armed conflict, piracy, attacks on vessels or other petroleum-related infrastructures and acts by terrorists, which may cause potential disruption of shipping routes;
 - the length and severity of the ongoing coronavirus outbreak (COVID-19), including its impact on the demand for commercial seaborne transportation of LPG and the condition of financial markets and the potential knock-on impacts to our global operations;
 - the adequacy of our insurance coverage in the event of a catastrophic event;
 - the failure to protect our information systems against security breaches, or the failure or unavailability of these systems for a significant period;
 - the arresting or attachment of one or more of our vessels by maritime claimants;
 - compliance with and changes to governmental, tax, environmental and safety laws and regulations, which may add to our costs or the costs of our customers;
 - fluctuations in currencies and interest rates and the impact of the discontinuance of the London Interbank Offered Rate, or LIBOR, after 2021 on any of our debt referencing LIBOR in the interest rate;
 - compliance with the United States Foreign Corrupt Practices Act of 1977, the United Kingdom Bribery
-

[Table of Contents](#)

- Act 2010, or other applicable regulations relating to bribery;
- the volatility of the price of shares of our common stock (our “common shares”) and future sales of our common shares;
- our incorporation under the laws of the Republic of the Marshall Islands and the different rights to relief that may be available compared to other countries, including the United States;
- congestion at or blockages of ports or canals;
- if we are required to pay tax on U.S. source income;
- if we are treated as a “passive foreign investment company”; and
- other factors detailed in this report and from time to time in our periodic reports.

Actual results could differ materially from expectations expressed in the forward-looking statements if one or more of the underlying assumptions or expectations proves to be inaccurate or is not realized. You should thoroughly read this report with the understanding that our actual future results may be materially different from and worse than what we expect. Other sections of this report include additional factors that could adversely impact our business and financial performance. Moreover, we operate in an evolving environment. New risk factors and uncertainties emerge from time to time and it is not possible for our management to predict all risk factors and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We qualify all of the forward-looking statements by these cautionary statements.

We caution readers of this report not to place undue reliance on forward-looking statements. Any forward-looking statements contained herein are made only as of the date of this report, and we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

PART I

ITEM 1. BUSINESS

Unless otherwise indicated, references to "Dorian," the "Company," "we," "our," "us," or similar terms refer to Dorian LPG Ltd. and its subsidiaries and predecessors. The terms "Predecessor" and "Predecessor Business" refer to the owning companies of the four vessels that comprised our initial fleet, prior to their acquisition by us. We use the term "VLGC" to refer to very large gas carriers. We use the term "LPG" to refer to liquefied petroleum gas and we use the term "cbm" to refer to cubic meters in describing the carrying capacity of our vessels. Unless otherwise indicated, all references to "U.S. dollars," "USD," and "\$" in this report are to the lawful currency of the United States of America and references to "Norwegian Krone" and "NOK" are to the lawful currency of Norway.

Overview

Dorian was incorporated on July 1, 2013 under the laws of the Republic of the Marshall Islands, is headquartered in the United States and is engaged in the transportation of LPG. Specifically, Dorian and its subsidiaries are focused on owning and operating VLGCs in the LPG shipping industry. Our founding executives have managed vessels in the LPG shipping market since 2002. Our fleet currently consists of twenty-three VLGCs, including our nineteen new fuel-efficient 84,000 cbm ECO-design VLGCs, or our ECO VLGCs, three 82,000 cbm VLGCs, and one time chartered-in VLGC. The twenty-two VLGCs in our fleet, excluding the time chartered-in vessel, have an aggregate carrying capacity of approximately 1.8 million cbm and an average age of 7.2 years as of June 1, 2021. Ten of our technically-managed ECO VLGCs are fitted with exhaust gas cleaning systems (commonly referred to as "scrubbers") to reduce sulfur emissions and another two of our ECO VLGCs are expected to be scrubber-fitted during the second calendar quarter of 2021. We provide in-house commercial and technical management services for all of our vessels, including our vessels deployed in the Helios Pool, which may also receive commercial management services from Phoenix (defined below). Excluding our time chartered-in vessels, we provide in-house technical management services for all of our vessels, including our vessels deployed in the Helios Pool. On March 31, 2021, we entered into a thirteen-year bareboat agreement to charter-in a newbuilding dual-fuel VLGC that is expected to be delivered in March 2023 (see Note 18 to our consolidated financial statements for further details).

On April 1, 2015, we and Phoenix Tankers Pte. Ltd., or Phoenix, a wholly-owned subsidiary of Mitsui OSK Lines Ltd., an unaffiliated third party, began operation of Helios LPG Pool LLC, or the Helios Pool, a joint venture owned 50% by us and 50% by Phoenix. We believe that the operation of certain of our VLGCs in this pool allows us to achieve better market coverage and utilization. Vessels entered into the Helios Pool are commercially managed jointly by Dorian LPG (UK) Ltd., our wholly-owned subsidiary, and Phoenix. The members of the Helios Pool share in the net pool revenues generated by the entire group of vessels participating in the pool, weighted according to certain technical vessel characteristics, and net pool revenues are distributed as variable rate time charter hire to each participant. The vessels entered into the Helios Pool may operate either in the spot market, pursuant to contracts of affreightment, or COAs, or on time charters of two years' duration or less. We and Phoenix have agreed that the Helios Pool will have a right of first refusal to undertake any time charter with an original duration greater than two years. As of June 1, 2021, the Helios Pool operated twenty-nine VLGCs, including twenty-one vessels from our fleet, four Phoenix vessels, and four vessels from other participants.

Our Fleet

The following table sets forth certain information regarding our fleet as of June 1, 2021:

	Capacity (Cbm)	Shipyard	Year Built	ECO Vessel ⁽¹⁾	Scrubber Equipped	Employment	Charter Expiration ⁽²⁾
Dorian VLGCs							
<i>Captain Markos NL</i>	82,000	Hyundai	2006	—	—	Pool ⁽⁴⁾	—

- (1) Represents vessels with very low revolutions per minute, long-stroke, electronically controlled engines, larger propellers, advanced hull design, and low friction paint.
- (2) Represents calendar year quarters.
- (3) Operated pursuant to a bareboat chartering agreement. See Notes 9 and 23 and to our consolidated financial statements included herein.
- (4) “Pool” indicates that the vessel operates in the Helios Pool on a voyage charter with a third party and we receive a portion of the pool profits calculated according to a formula based on the vessel’s pro rata performance in the pool.
- (5) “Pool-TCO” indicates that the vessel is operated in the Helios Pool on a time charter out to a third party and we receive a portion of the pool profits calculated according to a formula based on the vessel’s pro rata performance in the pool.
- (6) Currently on a time charter with an oil major that began in November 2019.
- (7) Currently on time charter with a major oil company that began in March 2019.
- (8) Currently time chartered-in to our fleet with an expiration during the first calendar quarter of 2023.

The LPG Shipping Industry

International seaborne LPG transportation services are generally provided by two types of operators: LPG distributors and traders and independent shipowners. Traditionally the main trading route in our industry has been the transport of LPG from the Arabian Gulf to Asia. With the emergence of the United States as a major LPG export hub, the United States Gulf to Asia and United States to Europe have become important trade routes. Vessels are generally operated under time charters, bareboat charters, spot charters, or COAs. LPG distributors and traders use their fleets not only to transport their own LPG, but also to transport LPG for third-party charterers in direct competition with independent owners and operators in the tanker charter market. We operate in markets that are highly competitive and based primarily on supply and demand of available vessels. Generally, we compete for charters based upon charter rate, customer relationships, operating expertise, professional reputation and vessel specifications (size, age and condition). We also believe that our in-house technical and commercial management allows us to provide superior customer service and reliability that enhances our relationships with our charterers. Our industry is subject to strict environmental regulation, including the treatment of ballast water and greenhouse gas emissions regulations, and we believe our modern, ECO-class fleet and our high level of crew training and vessel maintenance make us a preferred provider of VLGC tonnage. For more information with respect to the aforementioned environmental regulations, please see Item 1. Business—Environmental and Other Regulation in the Shipping Industry.

Our Customers

Our customers, either directly or through the Helios Pool, include or have included global energy companies such as Exxon Mobil Corp., Chevron Corp., China International United Petroleum & Chemicals Co., Ltd., Royal Dutch Shell plc, Equinor ASA, Total S.A., and Sunoco LP, commodity traders such as Glencore plc, Itochu Corporation, Bayegan Group and the Vitol Group and importers such as E1 Corp., Indian Oil Corporation, SK Gas Co. Ltd. Astomos Energy Corporation, and Oriental Energy Company Ltd. or subsidiaries of the foregoing. See “Item 7. Management Discussion and Analysis—Overview” for a discussion of our customers that accounted for more than 10% of our total revenues and “Item 1A. Risk Factors—We expect to be dependent on a limited number of customers for a material part of our revenues, and failure of such customers to meet their obligations could cause us to suffer losses or negatively impact our results of operations and cash flows.” For the years ended March 31, 2021, 2020 and 2019 approximately 92.6%, 89.4% and 75.9% of our revenues, respectively, were generated through the Helios Pool as net pool revenues—related party. See “Item 1A. Risk Factors—We and the Helios Pool operate exclusively in the LPG shipping industry. Due to the general lack of industry diversification, adverse developments in the LPG shipping industry may adversely affect our business, financial condition and operating results.”

We intend to continue to pursue a balanced chartering strategy by employing our vessels on a mix of multi-year time charters, some of which may include a profit-sharing component, shorter-term time charters, spot market voyages and COAs. Two of our vessels are currently on fixed time charters outside of the Helios Pool with an average remaining term of 1.0 year as of June 1, 2021, and six of our VLGCs are on Pool-TCO within the Helios Pool. See “Our Fleet” above for more information.

Further, each of our vessels serves the same type of customer, has similar operations and maintenance requirements, and operates in the same regulatory environment. Based on this, we have determined that we operate in one reportable segment, the international transportation of LPG. Furthermore, when we charter a vessel to a charterer, the charterer is free to trade the vessel worldwide (subject to applicable laws and sanctions regimes) and, as a result, the disclosure of geographic information is impracticable.

Competition

LPG carrier capacity is primarily a function of the size of the existing world fleet, the number of newbuildings being delivered and the scrapping of older vessels. According to industry sources, as of May 25, 2021, there were 1,497 LPG capable carriers with an aggregate capacity of approximately 38.2 million cbm. As of such date, a further 137 LPG capable carriers with an aggregate carrying capacity of roughly 8.0 million cbm were on order for delivery by the end of 2023, equivalent to 20.9% of the existing fleet in capacity terms. In contrast to oil tankers and drybulk carriers, according

to industry sources, the number of shipyards with LPG carrier experience is extremely limited. In the VLGC sector in which we operate, as of May 25, 2021, there were 309 vessels with an aggregate carrying capacity of 25.4 million cbm in the world fleet and 63 vessels with 5.6 million cbm of capacity on order for delivery by the end of 2023.

Our largest competitors for VLGC shipping services include BW LPG Ltd., or BWLPG; Avance Gas Holding Ltd., or Avance; Petredec Pte. Ltd., or Petredec; and Astomos Energy Corporation. According to industry sources, there were approximately 74 owners in the worldwide VLGC fleet as of May 25, 2021, with the top ten owners possessing 49% of the total fleet on a vessel count basis. Competition for the transportation of LPG depends on the price, location, size, age, condition and acceptability of the vessel to the charterer. We believe we own and operate the youngest and second largest fleet in the VLGC size segment, which, in our view, enhances our position relative to that of our competitors. Our 22 VLGCs (excluding the one time chartered-in vessel) have an average age of 7.2 years compared to the global VLGC fleet's average age of 10.3 years. Refer to "Item 1A. Risk Factors—We face substantial competition in trying to expand relationships with existing customers and obtain new customers."

Seasonality

Liquefied gases are primarily used for industrial and domestic heating, as chemical and refinery feedstock, as transportation fuel and in agriculture. The LPG shipping market historically has been stronger in the spring and summer months in anticipation of increased consumption of propane and butane for heating during the winter months. In addition, unpredictable weather patterns in these months tend to disrupt vessel scheduling and the supply of certain commodities. Demand for our vessels therefore may be stronger in our quarters ending June 30 and September 30 and relatively weaker during our quarters ending December 31 and March 31, although 12-month time charter rates tend to smooth out these short-term fluctuations and recent LPG shipping market activity has not yielded the expected seasonal results. To the extent any of our time charters expire during the typically weaker fiscal quarters ending December 31 and March 31, it may not be possible to re-charter our vessels at similar rates. As a result, we may have to accept lower rates or experience off-hire time for our vessels, which may adversely impact our business, financial condition and operating results.

Human Capital

As of March 31, 2021, we employed 83 persons in our offices in the United States, Greece, Denmark and the United Kingdom. In addition to our shore-based employees, we had approximately 519 seafaring staff serving on our commercially-managed vessels. Seafarers are sourced from seafarer recruitment and placement service agencies and are employed with short-term employment contracts.

We recognize that the success of our Company is dependent upon the talents and dedication of our staff, and we are committed to investing in their success. We focus on attracting, developing and retaining a team of highly talented and motivated individuals. We conduct periodic assessments of our pay and benefit practices to help ensure that staff members are compensated fairly and competitively. The Company provides competitive compensation and benefits. In addition to salaries for our shore-based employees, our compensation programs typically include annual bonuses, stock-based compensation awards, company-sponsored retirement savings plans with employer matching opportunities, healthcare and insurance benefits, flexible spending accounts, life insurance, paid time off, family leave, and employee assistance programs.

The health and safety of our staff is of paramount importance to us. With the onset of the COVID-19 pandemic in early 2020, we immediately responded by prioritizing the safety and well-being of our staff by implementing several changes to enhance COVID-19 safety and mitigate related health risks on our vessels. For the Company's non-vessel locations and operations, we implemented various health and safety measures including COVID-19 case tracking and quarantining where and when necessary, daily temperature checks, protective equipment, regular office sanitizing, widely distributing hand-sanitizer, reconfiguring workstations to allow for appropriate distancing, and implementing remote work policies, among other things.

We support meaningful learning and development opportunities. We have formal and informal training programs available and offer reimbursement for qualified workshops, conferences, forums and classes.

By honoring the dignity of each person, we foster a culture of inclusion where everyone is welcome. We do this by embracing diverse voices and experiences, supporting programs and resources that build an authentic and respectful workplace, and providing fair and equitable opportunities for each person to contribute meaningfully. We believe our workforce needs to be diverse, which, in turn, enables us to innovate, collaborate and better deliver to our customers.

Classification, Inspection and Maintenance

Every large commercial seagoing vessel must be "classed" by a classification society. A classification society certifies that a vessel is "in class," signifying that the vessel has been built and maintained in accordance with the rules of the classification society and the vessel's country of registry and the international conventions of which that country is a member. In addition, where surveys are required by international conventions and corresponding laws and ordinances of a flag state, the classification society will undertake them on application or by official order, acting on behalf of the authorities concerned.

For maintenance of the class certificate, regular and special surveys of hull, machinery, including the electrical plant and any special equipment classed, are required to be performed by the classification society, to ensure continuing compliance. The classification societies provide guidelines applicable to LPG vessels relating to extended intervals for drydocking. Every vessel is required to be drydocked every 30 to 36 months for inspection of the underwater parts of the vessel. However, for vessels not exceeding 15 years that have means to facilitate underwater inspection in lieu of drydocking, the drydocking can be skipped and be conducted concurrently with the special survey. Certain cargo vessels that meet the system requirements set by classification societies may qualify for extended drydocking, which extends the 5-year period to 7.5 years, by replacing certain dry-dockings with in-water surveys. If any defects are found, the classification surveyor will issue a "recommendation" which must be rectified by the shipowner within prescribed time limits. The classification society also undertakes on request of the flag state other surveys and checks that are required by the regulations and requirements of that flag state. These surveys are subject to agreements made in each individual case and/or to the regulations of the country concerned. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, drydocking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable which could cause us to be in violation of certain covenants in our loan agreements and financing arrangements. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse impact on our financial condition and results of operations.

Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified as "in class" by a classification society, which is a member of the International Association of Classification Societies, or the IACS. In December 2013, the IACS adopted harmonized Common Structure Rules, or "the Rules," that align with International Maritime Organization, the United Nations agency for maritime safety and the prevention of pollution by vessels, or the IMO, goal standards and apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies. Our VLGCs are currently classed with either Lloyd's Register, the American Bureau of Shipping, or ABS, or Det Norske Veritas, all members of the IACS. All of the vessels in our fleet have been awarded International Safety Management, or ISM, certification and are currently "in class."

We also carry out inspections of the ships, including with a view towards compliance under the Ship Inspection Report Programme ("SIRE") and United States Coast Guard ("USCG") requirements, as applicable, on a regular basis; both at sea and while the vessels are in port. The results of these inspections are documented in a report containing recommendations for improvements to the overall condition of the vessel, maintenance, safety and crew welfare. Based in part on these evaluations, we create and implement a program of continual maintenance and improvement for our vessels and their systems.

Safety, Management of Ship Operations and Administration

Safety is our top operational priority. Our vessels are operated in a manner intended to protect the safety and health of the crew, the general public and the environment. We actively manage the risks inherent in our business and are committed to preventing incidents that threaten safety, such as groundings, fires and collisions. We are also committed to reducing emissions and waste generation. We have established key performance indicators to facilitate regular monitoring of our operational performance. We set targets on an annual basis to drive continuous improvement, and we review performance indicators every three months to determine if remedial action is necessary to reach our targets. Our shore staff performs a full range of technical, commercial and business development services for us. This staff also provides administrative support to our operations in finance, accounting and human resources.

Risk of Loss and Insurance

The operation of any vessel, including LPG carriers, has inherent risks. These risks include mechanical failure, personal injury, crew negligence, human error, collision, property loss, vessel or cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities or piracy. In addition, there is always an inherent possibility of marine disaster, including explosions, spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon shipowners, operators and bareboat charterers of any vessel trading in the exclusive economic zone of the United States for certain oil pollution accidents in the United States, has made liability insurance more expensive for shipowners and operators trading in the United States market. We believe that our present insurance coverage is adequate to protect us against the accident related risks involved in the conduct of our business and that we maintain appropriate levels of environmental damage and pollution insurance coverage consistent with standard industry practice. Additionally, we maintain other insurance policies we believe are customary and are in amounts we believe to be adequate to protect us against material loss. The policies principally provide coverage for public liability, directors and officers' compensation, and insurance against the consequences of a cyber attack. However, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

We have obtained hull and machinery insurance on all our vessels against marine and war risks, which include the risks of damage to our vessels, salvage or towing costs, and actual or constructive total loss. However, our insurance policies contain deductible amounts for which we are responsible. We have also arranged additional total loss coverage for each vessel. This coverage, which is called hull interest and freight interest coverage, provides us additional coverage in the event of the total loss of a vessel.

We have also obtained loss of hire insurance to protect us against loss of income in the event one of our vessels cannot be employed due to damage that is covered under the terms of our hull and machinery insurance (marine and war risks). Under our loss of hire policies, our insurer will pay us an agreed daily rate in respect of each VLGC in excess of 14 days for marine risks and 7 days for war risks for the time that the vessel is out of service as a result of damage, for a maximum of 180 days.

We have also obtained protection and indemnity insurance, which covers our third-party legal liabilities in connection with our shipping activities, and is provided by mutual protection and indemnity associations, or P&I clubs. This insurance includes third-party liability and other expenses related to the injury or death of crew members, passengers and other third parties, loss or damage to cargo, claims arising from collisions with other vessels or from contact with jetties or wharves and other damage to other third-party property, including pollution arising from oil or other substances, and other related costs, including wreck removal. Subject to the capping discussed below, our coverage, except for pollution, is unlimited.

Our current protection and indemnity insurance coverage for pollution is \$1.0 billion per vessel per incident. The thirteen P&I clubs that comprise the International Group of Protection and Indemnity Clubs, or the International Group, insure approximately 90% of the world's commercial tonnage and have entered into a pooling agreement to reinsure each association's liabilities. Each P&I club has capped its exposure in this pooling agreement so that the maximum claim covered by the pool and its reinsurance would be approximately \$8.8 billion per accident or occurrence. We are a member of three P&I clubs: The Standard Club Ireland DAC, The United Kingdom Mutual Steamship Assurance Association

Limited and The London Steam-Ship Owners' Mutual Insurance Association Limited. As a member of these P&I clubs, we are subject to a call for additional premiums based on the clubs' claims record, as well as the claims record of all other members of the P&I clubs comprising the International Group. However, our P&I clubs have reinsured the risk of additional premium calls to limit our additional exposure. This reinsurance is subject to a cap, and there is the risk that the full amount of the additional call would not be covered by this reinsurance.

Our Environmental, Social and Governance Efforts

As one of the leaders in the international transportation of LPG, we are committed to delivering cleaner-burning energy in a safe, reliable and environmentally efficient manner. LPG is a clean, efficient and readily available source of energy, with positive benefits to the environment relative to other fuels. While extending the economic and social benefits of delivering LPG to consumers across the globe, we recognize that the shipping industry is heavily dependent on the burning of fossil fuels, contributing to the warming of the world's climate system. In providing our services, we are committed to reducing our carbon footprint and greenhouse gas emissions. We welcome and support efforts to increase transparency and to promote investors' understanding of how we and our industry peers are addressing the climate change-related risks and opportunities. We have disclosed certain environmental, social and governance (ESG)-related information on our website, including our first ESG Report, aligned with the Sustainability Accounting Standards Board (SASB) Marine Transportation standard, additionally taking into account recommendations provided by the Taskforce on Climate-Related Financial Disclosures (TCFD). The report includes information on how we monitor, manage and perform on material ESG issues in the face of increasing expectations and regulations.

Dorian's ESG strategies, risks and initiatives are overseen by our Board of Directors, which includes independent members and experts in shipping and compliance matters. Our Nominating and Corporate Governance Committee monitors progress of ESG efforts and together with management ensures integrity of reporting. The Company's executive leadership team, led by our Chief Executive Officer, President and Chairman of the Board of Directors, Mr. John C. Hadjipateras, formulates ESG strategies and drives initiatives, while the members of our management set targets, assesses risks, develops policies and procedures and executes the ESG efforts. Some of the ESG initiatives that we have undertaken include:

- operating newer, more technologically advanced ECO vessels, with very low revolutions per minute, long-stroke, electronically controlled engines, larger propellers, advanced hull design, and low friction paint, resulting in enhanced the energy efficiency and reduced greenhouse gas emissions on a ton-mile basis, including the vessels in our existing fleet and our newbuilding dual-fuel VLGC that is expected to be delivered from Kawasaki Heavy Industries in March 2023;
- fitting vessels with exhaust gas cleaning systems, scrubbers, to reduce sulfur emissions to, among other things, comply with the IMO's new fuel regulations which went into effect in January 2020;
- joining the Getting to Zero Coalition, a global alliance of more than 140 companies committed to the decarbonization of deepsea shipping in line with the IMO greenhouse gas emissions reduction strategy;
- implementing and utilizing internal and third-party data collection and analysis software, which allows data to be gathered from our vessels for use in performance optimization, with the aim of reducing our fuel consumption, and carbon dioxide and greenhouse gas emissions;
- including a sustainability-linked pricing mechanism in our 2015 AR Facility (as defined below) and providing relevant carbon emissions data for the vessels in our fleet that are owned or technically managed pursuant to a bareboat charter to our lenders in connection with the Poseidon Principles, which establish a framework for assessing and disclosing the climate alignment of ship finance portfolios with the IMO's target to reduce shipping's total annual greenhouse gas emissions by at least 50% by 2050;
- becoming a signatory to the Neptune Declaration on Seafarer Wellbeing and Crew Change, in a worldwide call to action to end the unprecedented crew change crisis caused by COVID-19;

- establishing risk management and internal control policies and systems to manage risk and ensure compliance with all applicable international and local laws; and
- establishing compliance programs to meet or exceed, when possible and appropriate, all applicable rules and regulations governing the maritime industry, including the items described in the “Environmental and Other Regulation in the Shipping Industry” section below.

Environmental and Other Regulation in the Shipping Industry

General

Government regulation and laws significantly affect the ownership and operation of our fleet. We are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered relating to safety and health and environmental protection including the storage, handling, emission, transportation and discharge of hazardous and non-hazardous materials, and the remediation of contamination and liability for damage to natural resources. Compliance with such laws, regulations and other requirements entails significant expense, including vessel modifications and implementation of certain operating procedures.

A variety of government and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (applicable national authorities such as the USCG, harbor master or equivalent), classification societies, flag state administrations (countries of registry) and charterers, particularly terminal operators. Certain of these entities require us to obtain permits, licenses, certificates and other authorizations for the operation of our vessels. Failure to maintain necessary permits or approvals could require us to incur substantial costs or result in the temporary suspension of the operation of one or more of our vessels.

Increasing environmental concerns have created a demand for vessels that conform to stricter environmental standards. We are required to maintain operating standards for all of our vessels that emphasize operational safety, quality maintenance, continuous training of our officers and crews and compliance with United States and international regulations. We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations and that our vessels have all material permits, licenses, certificates or other authorizations necessary for the conduct of our operations. However, because such laws and regulations frequently change and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these requirements, or the impact of these requirements on the resale value or useful lives of our vessels. In addition, a future serious marine incident that causes significant adverse environmental impact could result in additional legislation or regulation that could negatively affect our profitability.

International Maritime Organization

The International Maritime Organization, the United Nations agency for maritime safety and the prevention of pollution by vessels (the “IMO”), has adopted the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto, collectively referred to as MARPOL 73/78 and herein as “MARPOL,” the International Convention for the Safety of Life at Sea of 1974 (“SOLAS Convention”), and the International Convention on Load Lines of 1966 (the “LL Convention”). MARPOL establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and the handling of harmful substances in packaged forms. MARPOL is applicable to LPG carriers as well as other vessels, and is broken into six Annexes, each of which regulates a different source of pollution. Annex I relates to oil leakage or spilling; Annexes II and III relate to harmful substances carried in bulk in liquid or in packaged form, respectively; Annexes IV and V relate to sewage and garbage management, respectively; and Annex VI, lastly, relates to air emissions. Annex VI was separately adopted by the IMO in September of 1997; new emissions standards, titled IMO-2020, took effect on January 1, 2020.

Vessels that transport gas, including LPG carriers, are also subject to regulation under the International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk, or the “IGC Code,” published by the IMO.

The IGC Code provides a standard for the safe carriage of LPG and certain other liquid gases by prescribing the design and construction standards of vessels involved in such carriage. The completely revised and updated IGC Code entered into force in 2016, and the amendments were developed following a comprehensive five-year review and are intended to take into account the latest advances in science and technology. Compliance with the IGC Code must be evidenced by a Certificate of Fitness for the Carriage of Liquefied Gases in Bulk. Non-compliance with the IGC Code or other applicable IMO regulations may subject a shipowner or a bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports. We believe that each of our vessels is in compliance with the IGC Code.

Our LPG vessels may also become subject to the 2010 HNS Convention, if it is entered into force. The Convention creates a regime of liability and compensation for damage from hazardous and noxious substances (“HNS”), including liquefied gases. The 2010 HNS Convention establishes that the polluter pays by ensuring that the shipping and HNS industries provide compensation for those who have suffered loss or damage resulting from an HNS incident. The following types of damage will be covered by the 2010 HNS Convention: loss of life or personal injury on board or outside the ship carrying the HNS; loss of or damage to property outside the ship; economic losses resulting from contamination, e.g. in the fishing, mariculture and tourism sectors; costs of preventive measures, e.g. clean-up operations at sea and onshore; and costs of reasonable measures of reinstatement of the environment. Shipowners will be held strictly liable up to a maximum limit of liability for the cost of an HNS incident and are required to have insurance that is State certified. The 2010 HNS Convention sets up a two-tier system of compensation composed of compulsory insurance taken out by shipowners and an HNS Fund which comes into play when the insurance is insufficient to satisfy a claim or does not cover the incident. Under the 2010 HNS Convention, if damage is caused by bulk HNS, claims for compensation will first be sought from the shipowner up to a maximum of 100 million Special Drawing Rights (“SDR”). If the damage is caused by packaged HNS or by both bulk and packaged HNS, the maximum liability is 115 million SDR. Once the limit is reached, compensation will be paid from the HNS Fund up to a maximum of 250 million SDR. The 2010 HNS Convention will enter into force 18 months after the date on which it is ratified by at least twelve States, four of which must each have a merchant shipping fleet of no less than 2 million units of gross tonnage. To date, five states (South Africa, Canada, Denmark, Norway and Turkey) have ratified and consented to be bound by the 2010 HNS Convention. Although the 2010 HNS Convention has not been ratified by a sufficient number of countries to enter into force, we cannot estimate the costs that may be needed to comply with any such requirements that may be adopted with any certainty at this time.

In June 2015 the IMO formally adopted the International Code of Safety for Ships using Gases or Low flashpoint Fuels, or the “IGF Code,” which is designed to minimize the risks involved with ships using low flashpoint fuels. The IGF Code will be mandatory under SOLAS through the adopted amendments. The IGF Code and the amendments to SOLAS became effective January 1, 2017.

Air Emissions

In September of 1997, the IMO adopted Annex VI to MARPOL to address air pollution from vessels. Effective May 2005, Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from all commercial vessel exhausts and prohibits “deliberate emissions” of ozone depleting substances (such as halons and chlorofluorocarbons), emissions of volatile compounds from cargo tanks and the shipboard incineration of specific substances. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions, as explained below. Emissions of “volatile organic compounds” from certain vessels, and the shipboard incineration (from incinerators installed after January 1, 2000) of certain substances (such as polychlorinated biphenyls, or “PCBs”) are also prohibited. We believe that all our vessels are currently compliant in all material respects with these regulations.

The Marine Environment Protection Committee, or “MEPC,” adopted amendments to Annex VI regarding emissions of sulfur oxide, nitrogen oxide, particulate matter and ozone depleting substances, which entered into force on July 1, 2010. The amended Annex VI seeks to further reduce air pollution by, among other things, implementing a progressive reduction of the amount of sulfur contained in any fuel oil used on board ships. On October 27, 2016, at its 70th session, the MEPC agreed to implement a global 0.5% m/m sulfur oxide emissions limit (reduced from 3.50%) starting from January 1, 2020 (the “IMO 2020 Cap”). This limitation can be met by using low-sulfur compliant fuel oil, alternative fuels or certain exhaust gas cleaning systems. Ships are now required to obtain bunker delivery notes and

International Air Pollution Prevention (“IAPP”) Certificates from their flag states that specify sulfur content. Additionally, at MEPC 73, amendments to Annex VI to prohibit the carriage of bunkers above 0.5% sulfur on ships were adopted and took effect March 1, 2020. These regulations subject ocean-going vessels to stringent emissions controls, and may cause us to incur substantial costs.

Sulfur content standards are even stricter within certain “Emission Control Areas,” or (“ECAs”). As of January 1, 2015, ships operating within an ECA were not permitted to use fuel with sulfur content in excess of 0.1% m/m. Amended Annex VI establishes procedures for designating new ECAs. Currently, the IMO has designated four ECAs, including specified portions of the Baltic Sea area, North Sea area, North American area and United States Caribbean area. Ocean-going vessels in these areas will be subject to stringent emission controls and may cause us to incur additional costs. Other areas in China are subject to local regulations that impose stricter emission controls. If other ECAs are approved by the IMO, or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the U.S. Environmental Protection Agency (“EPA”) or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations.

Amended Annex VI also establishes new tiers of stringent nitrogen oxide emissions standards for marine diesel engines, depending on their date of installation. At the MEPC meeting held from March to April 2014, amendments to Annex VI were adopted which address the date on which Tier III Nitrogen Oxide (NOx) standards in ECAs will go into effect. Under the amendments, Tier III NOx standards apply to ships that operate in the North American and U.S. Caribbean Sea ECAs designed for the control of NOx produced by vessels with a marine diesel engine installed and constructed on or after January 1, 2016. Tier III requirements could apply to areas that will be designated for Tier III NOx in the future. At MEPC 70 and MEPC 71, the MEPC approved the North Sea and Baltic Sea as ECAs for nitrogen oxide for ships built on or after January 1, 2021. The EPA promulgated equivalent (and in some senses stricter) emissions standards in 2010. As a result of these designations or similar future designations, we may be required to incur additional operating or other costs.

As determined at the MEPC 70, the new Regulation 22A of MARPOL Annex VI became effective as of March 1, 2018 and requires ships above 5,000 gross tonnage to collect and report annual data on fuel oil consumption to an IMO database, with the first year of data collection having commenced on January 1, 2019. The IMO intends to use such data as the first step in its roadmap (through 2023) for developing its strategy to reduce greenhouse gas emissions from ships, as discussed further below.

As of January 1, 2013, MARPOL made mandatory certain measures relating to energy efficiency for ships. All ships are now required to develop and implement Ship Energy Efficiency Management Plans (“SEEMPS”), and new ships must be designed in compliance with minimum energy efficiency levels per capacity mile as defined by the Energy Efficiency Design Index (“EEDI”). Under these measures, by 2025, all new ships built will be 30% more energy efficient than those built in 2014. Additionally, MEPC 75 adopted amendments to MARPOL Annex VI which brings forward the effective date of the EEDI’s “phase 3” requirements from January 1, 2025 to April 1, 2022 for several ship types, including gas carriers, general cargo ships, and LNG carriers.

Additionally, MEPC 75 introduced draft amendments to Annex VI which impose new regulations to reduce greenhouse gas emissions from ships. These amendments introduce requirements to assess and measure the energy efficiency of all ships and set the required attainment values, with the goal of reducing the carbon intensity of international shipping. The requirements include (1) a technical requirement to reduce carbon intensity based on a new Energy Efficiency Existing Ship Index (“EEXI”), and (2) operational carbon intensity reduction requirements, based on a new operational carbon intensity indicator (“CII”). The attained EEXI is required to be calculated for ships of 400 gross tonnage and above, in accordance with different values set for ship types and categories. With respect to the CII, the draft amendments would require ships of 5,000 gross tonnage to document and verify their actual annual operational CII achieved against a determined required annual operational CII. Additionally, MEPC 75 proposed draft amendments requiring that, on or before January 1, 2023, all ships above 400 gross tonnage must have an approved SEEMP on board. For ships above 5,000 gross tonnage, the SEEMP would need to include certain mandatory content. The draft amendments introduced at MEPC 75 may be adopted at the MEPC 76 session, to be held during 2021.

We may incur significant costs to comply with these revised standards, including the need to modify our vessels or engines to consume alternative fuels. Additional or new conventions, laws and regulations may be adopted that could require the installation of expensive emission control systems or engine power limitation (EPL) systems to reduce fuel use and carbon emissions, each of which could adversely affect our business, results of operations, cash flows and financial condition.

Safety Management System Requirements

The SOLAS Convention was amended to address the safe manning of vessels and emergency training drills. The Convention of Limitation of Liability for Maritime Claims (the “LLMC”) sets limitations of liability for a loss of life or personal injury claim or a property claim against ship owners. We believe that our vessels are in substantial compliance with SOLAS and LLMC standards.

Under Chapter IX of the SOLAS Convention, or the International Safety Management Code for the Safe Operation of Ships and for Pollution Prevention (the “ISM Code”), our operations are also subject to environmental standards and requirements. The ISM Code requires the party with operational control of a vessel to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for operating its vessels safely and describing procedures for responding to emergencies. We rely upon the safety management system that we and our technical management team have developed for compliance with the ISM Code. The failure of a vessel owner or bareboat charterer to comply with the ISM Code may subject such party to increased liability, may decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports.

The ISM Code requires that vessel operators obtain a safety management certificate for each vessel they operate. This certificate evidences compliance by a vessel’s management with the ISM Code requirements for a safety management system. No vessel can obtain a safety management certificate unless its manager has been awarded a document of compliance, issued by each flag state, under the ISM Code. We have obtained applicable documents of compliance for our offices and safety management certificates for all of our vessels for which the certificates are required by the IMO. The documents of compliance and safety management certificates are renewed as required.

Regulation II-1/3-10 of the SOLAS Convention governs ship construction and stipulates that ships over 150 meters in length must have adequate strength, integrity and stability to minimize risk of loss or pollution. Goal-based standards amendments in SOLAS regulation II-1/3-10 entered into force in 2012, with July 1, 2016 set for application to new oil tankers and bulk carriers. The SOLAS Convention regulation II-1/3-10 on goal-based ship construction standards for bulk carriers and oil tankers, which entered into force on January 1, 2012, requires that all oil tankers and bulk carriers of 150 meters in length and above, for which the building contract is placed on or after July 1, 2016, satisfy applicable structural requirements conforming to the functional requirements of the International Goal-based Ship Construction Standards for Bulk Carriers and Oil Tankers (“GBS Standards”).

Amendments to the SOLAS Convention Chapter VII apply to vessels transporting dangerous goods and require those vessels be in compliance with the International Maritime Dangerous Goods Code (“IMDG Code”). Effective January 1, 2018, the IMDG Code includes (1) updates to the provisions for radioactive material, reflecting the latest provisions from the International Atomic Energy Agency, (2) new marking, packing and classification requirements for dangerous goods and (3) new mandatory training requirements. Amendments which took effect on January 1, 2020 also reflect the latest material from the UN Recommendations on the Transport of Dangerous Goods, including (1) new provisions regarding IMO type 9 tank, (2) new abbreviations for segregation groups, and (3) special provisions for carriage of lithium batteries and of vehicles powered by flammable liquid or gas.

The IMO has also adopted the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (“STCW”). As of February 2017, all seafarers are required to meet the STCW standards and be in possession of a valid STCW certificate. Flag states that have ratified SOLAS and STCW generally employ the classification societies, which have incorporated SOLAS and STCW requirements into their class rules, to undertake surveys to confirm compliance.

Furthermore, recent action by the IMO's Maritime Safety Committee and United States agencies indicates that cybersecurity regulations for the maritime industry are likely to be further developed in the near future in an attempt to combat cybersecurity threats. For example, cyber-risk management systems must be incorporated by ship-owners and managers by 2021. This might cause companies to create additional procedures for monitoring cybersecurity, which could require additional expenses and/or capital expenditures. The impact of such regulations is hard to predict at this time.

Pollution Control and Liability Requirements

The IMO has negotiated international conventions that impose liability for pollution in international waters and the territorial waters of the signatories to such conventions. For example, the IMO adopted an International Convention for the Control and Management of Ships' Ballast Water and Sediments (the "BWM Convention") in 2004. The BWM Convention entered into force on September 8, 2017. The BWM Convention requires ships to manage their ballast water to remove, render harmless, or avoid the uptake or discharge of new or invasive aquatic organisms and pathogens within ballast water and sediments. The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits, and require all ships to carry a ballast water record book and an international ballast water management certificate.

On December 4, 2013, the IMO Assembly passed a resolution revising the application dates of the BWM Convention so that the dates are triggered by the entry into force date and not the dates originally in the BWM Convention. This, in effect, makes all vessels delivered before the entry into force date "existing vessels" and allows for the installation of ballast water management systems on such vessels at the first International Oil Pollution Prevention ("IOPP") renewal survey following entry into force of the convention. The MEPC adopted updated guidelines for approval of ballast water management systems (G8) at MEPC 70. At MEPC 71, the schedule regarding the BWM Convention's implementation dates was also discussed and amendments were introduced to extend the date existing vessels are subject to certain ballast water standards. Those changes were adopted at MEPC 72. Ships over 400 gross tons generally must comply with a "D-1 standard," requiring the exchange of ballast water only in open seas and away from coastal waters. The "D-2 standard" specifies the maximum amount of viable organisms allowed to be discharged, and compliance dates vary depending on the IOPP renewal dates. Depending on the date of the IOPP renewal survey, existing vessels must comply with the D-2 standard on or after September 8, 2019. For most ships, compliance with the D-2 standard will involve installing on-board systems to treat ballast water and eliminate unwanted organisms. Ballast water management systems, which include systems that make use of chemical, biocides, organisms or biological mechanisms, or which alter the chemical or physical characteristics of the ballast water, must be approved in accordance with IMO Guidelines (Regulation D-3). As of October 13, 2019, MEPC 72's amendments to the BWM Convention took effect, making the Code for Approval of Ballast Water Management Systems, which governs assessment of ballast water management systems, mandatory rather than permissive, and formalized an implementation schedule for the D-2 standard. Under these amendments, all ships must meet the D-2 standard by September 8, 2024. Costs of compliance with these regulations may be substantial. Additionally, in November 2020, MEPC 75 adopted amendments to the BWM Convention which would require a commissioning test of the ballast water management system for the initial survey or when performing an additional survey for retrofits. This analysis will not apply to ships that already have an installed BWM system certified under the BWM Convention. These amendments are expected to enter into force on June 1, 2022.

Once mid-ocean exchange ballast water treatment requirements become mandatory under the BWM Convention, the cost of compliance could increase for ocean carriers and may have a material effect on our operations. However, many countries already regulate the discharge of ballast water carried by vessels from country to country to prevent the introduction of invasive and harmful species via such discharges. The U.S., for example, requires vessels entering its waters from another country to conduct mid-ocean ballast exchange, or undertake some alternate measure, and to comply with certain reporting requirements.

The IMO adopted the International Convention on Civil Liability for Oil Pollution Damage of 1969, as amended by different Protocols in 1976, 1984 and 1992, and amended in 2000 ("the CLC"). Under the CLC and depending on whether the country in which the damage results is a party to the 1992 Protocol to the CLC, a vessel's registered owner may be strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil, subject to certain exceptions. The 1992 Protocol changed certain limits on liability expressed using the International

Monetary Fund currency unit, the Special Drawing Rights. The limits on liability have since been amended so that the compensation limits on liability were raised. The right to limit liability is forfeited under the CLC where the spill is caused by the shipowner's actual fault and under the 1992 Protocol where the spill is caused by the shipowner's intentional or reckless act or omission where the shipowner knew pollution damage would probably result. The CLC requires ships over 2,000 tons covered by it to maintain insurance covering the liability of the owner in a sum equivalent to an owner's liability for a single incident. We have protection and indemnity insurance for environmental incidents. P&I Clubs in the International Group issue the required Bunkers Convention "Blue Cards" to enable signatory states to issue certificates. All of our vessels are in possession of a CLC State issued certificate attesting that the required insurance coverage is in force.

The Protocol Relating to Intervention on the High Seas in Cases of Pollution by Substances other than Oil 1973 (the "Intervention Protocol") applies if there is a casualty involving a ship carrying LNG or LPG. The Intervention Protocol grants coastal states the right to intervene to prevent, mitigate or eliminate the danger of 'substances other than oil', including LNG and LPG, after consulting with other states affected and independent IMO-approved experts. The cost of such measures can usually be recovered by the governmental authority against the shipowner under national law.

Ships are required to maintain a certificate attesting that they maintain adequate insurance to cover an incident. In jurisdictions, such as the United States where the Bunker Convention has not been adopted, various legislative schemes or common law govern, and liability is imposed either on the basis of fault or on a strict-liability basis.

Anti-Fouling Requirements

In 2001, the IMO adopted the International Convention on the Control of Harmful Anti-fouling Systems on Ships, or the "Anti-fouling Convention." The Anti-fouling Convention, which entered into force on September 17, 2008, prohibits the use of organotin compound coatings to prevent the attachment of mollusks and other sea life to the hulls of vessels. Vessels of over 400 gross tons engaged in international voyages will also be required to undergo an initial survey before the vessel is put into service or before an International Anti-fouling System Certificate is issued for the first time; and subsequent surveys when the anti-fouling systems are altered or replaced.

In November 2020, MEPC 75 approved draft amendments to the Anti-fouling Convention to prohibit anti-fouling systems containing cybutryne, which would apply to ships from January 1, 2023, or, for ships already bearing such an anti-fouling system, at the next scheduled renewal of the system after that date, but no later than 60 months following the last application to the ship of such a system. These amendments may be formally adopted at MEPC 76 in 2021.

We have obtained Anti-fouling System Certificates for all of our VLGCs that are subject to the Anti-fouling Convention.

Compliance Enforcement

Noncompliance with the ISM Code or other IMO regulations may subject the ship owner or bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports. The USCG and European Union authorities have indicated that vessels not in compliance with the ISM Code by applicable deadlines will be prohibited from trading in U.S. and European Union ports, respectively. As of the date of this report, each of our vessels is ISM Code certified. However, there can be no assurance that such certificates will be maintained in the future. The IMO continues to review and introduce new regulations. It is impossible to predict what additional regulations, if any, may be passed by the IMO and what effect, if any, such regulations might have on our operations.

Hazardous Substances

In 1996, the International Convention on Liability and Compensation for Damages in Connection with the Carriage of Hazardous and Noxious Substances by Sea, or HNS, was adopted and subsequently amended by the 2010 Protocol, or the 2010 HNS Convention. Our LPG vessels may also become subject to the HNS Convention if it is entered

into force. The Convention creates a regime of liability and compensation for damage from hazardous and noxious substances, including liquefied gases. The 2010 HNS Convention sets up a two-tier system of compensation composed of compulsory insurance taken out by shipowners and an HNS Fund which comes into play when the insurance is insufficient to satisfy a claim or does not cover the incident. Under the 2010 HNS Convention, if damage is caused by bulk HNS, claims for compensation will first be sought from the shipowner up to a maximum of 100 million Special Drawing Rights (“SDR”). If the damage is caused by packaged HNS or by both bulk and packaged HNS, the maximum liability is 115 million SDR. Once the limit is reached, compensation will be paid from the HNS Fund up to a maximum of 250 million SDR. The 2010 HNS Convention has not been ratified by a sufficient number of countries to enter into force, and we cannot estimate the costs that may be needed to comply with any such requirements that may be adopted with any certainty at this time.

In 2012, MEPC adopted a resolution amending the International Code for the Construction of Equipment of Ships Carrying Dangerous Chemicals in Bulk, or the IBC Code. The provisions of the IBC Code are mandatory under MARPOL and the SOLAS Convention. These amendments, which entered into force in June 2014 and took effect on January 1, 2021, pertain to revised international certificates of fitness for the carriage of dangerous chemicals in bulk and identifying new products that fall under the IBC Code. In May 2014, additional amendments to the IBC Code were adopted that became effective in January 2016. These amendments pertain to the installation of stability instruments and cargo tank purging. Our ECO VLGCs are equipped with stability instruments and cargo tank purging. We may need to make certain minor financial expenditures to comply with these amendments for our three modern 82,000 cbm VLGCs.

United States Regulations

The U.S. Oil Pollution Act of 1990 and the Comprehensive Environmental Response, Compensation and Liability Act

The U.S. Oil Pollution Act of 1990 (“OPA”) established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all “owners and operators” whose vessels trade or operate within the U.S., its territories and possessions or whose vessels operate in U.S. waters, which includes the U.S.’s territorial sea and its 200 nautical mile exclusive economic zone around the U.S. The U.S. has also enacted the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”), which applies to the discharge of hazardous substances other than oil, except in limited circumstances, whether on land or at sea. OPA and CERCLA both define “owner and operator” in the case of a vessel as any person owning, operating or chartering by demise, the vessel. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners and operators are “responsible parties” and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel). OPA defines these other damages broadly to include:

- (i) injury to, destruction or loss of, or loss of use of, natural resources and related assessment costs;
- (ii) injury to, or economic losses resulting from, the destruction of real and personal property;
- (iii) loss of subsistence use of natural resources that are injured, destroyed or lost;
- (iv) net loss of taxes, royalties, rents, fees or net profit revenues resulting from injury, destruction or loss of real or personal property, or natural resources;
- (v) lost profits or impairment of earning capacity due to injury, destruction or loss of real or personal property or natural resources; and
- (vi) net cost of increased or additional public services necessitated by removal activities following a discharge of oil, such as protection from fire, safety or health hazards, and loss of subsistence use of natural resources.

OPA contains statutory caps on liability and damages; such caps do not apply to direct cleanup costs. Effective November 12, 2019, the USCG adjusted the limits of OPA liability for a tank vessel, other than a single-hull tank vessel, over 3,000 gross tons liability to the greater of \$2,300 per gross ton or \$19,943,400 (subject to periodic adjustment for inflation). These limits of liability do not apply if an incident was proximately caused by the violation of an applicable U.S. federal safety, construction or operating regulation by a responsible party (or its agent, employee or a person acting pursuant to a contractual relationship) or a responsible party's gross negligence or willful misconduct. The limitation on liability similarly does not apply if the responsible party fails or refuses to (i) report the incident as required by law where the responsible party knows or has reason to know of the incident; (ii) reasonably cooperate and assist as requested in connection with oil removal activities; or (iii) without sufficient cause, comply with an order issued under the Federal Water Pollution Act (Section 311 (c), (e)) or the Intervention on the High Seas Act.

CERCLA contains a similar liability regime whereby owners and operators of vessels are liable for cleanup, removal and remedial costs, as well as damages for injury to, or destruction or loss of, natural resources, including the reasonable costs associated with assessing the same, and health assessments or health effects studies. There is no liability if the discharge of a hazardous substance results solely from the act or omission of a third party, an act of God or an act of war. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5.0 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$500,000 for any other vessel. These limits do not apply (rendering the responsible person liable for the total cost of response and damages) if the release or threat of release of a hazardous substance resulted from willful misconduct or negligence, or the primary cause of the release was a violation of applicable safety, construction or operating standards or regulations. The limitation on liability also does not apply if the responsible person fails or refused to provide all reasonable cooperation and assistance as requested in connection with response activities where the vessel is subject to OPA.

OPA and CERCLA each preserve the right to recover damages under existing law, including maritime tort law. OPA and CERCLA both require owners and operators of vessels to establish and maintain with the USCG evidence of financial responsibility sufficient to meet the maximum amount of liability to which the particular responsible person may be subject. Vessel owners and operators may satisfy their financial responsibility obligations by providing a proof of insurance, a surety bond, qualification as a self-insurer or a guarantee. We comply and plan to comply going forward with the USCG's financial responsibility regulations by providing applicable certificates of financial responsibility.

The 2010 *Deepwater Horizon* oil spill in the Gulf of Mexico resulted in additional regulatory initiatives or statutes, including higher liability caps under OPA, new regulations regarding offshore oil and gas drilling and a pilot inspection program for offshore facilities. However, several of these initiatives and regulations have been or may be revised. For example, the U.S. Bureau of Safety and Environmental Enforcement's ("BSEE") revised Production Safety Systems Rule ("PSSR"), effective December 27, 2018, modified and relaxed certain environmental and safety protections under the 2016 PSSR. Additionally, the BSEE amended the Well Control Rule, effective July 15, 2019, which rolled back certain reforms regarding the safety of drilling operations, and former U.S. President Trump had proposed leasing new sections of U.S. waters to oil and gas companies for offshore drilling. The effects of these proposals and changes are currently unknown, and recently, current U.S. President Biden signed an executive order temporarily blocking new leases for oil and gas drilling in federal waters. Compliance with any new requirements of OPA and future legislation or regulations applicable to the operation of our vessels could impact the cost of our operations and adversely affect our business.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, provided they accept, at a minimum, the levels of liability established under OPA and some states have enacted legislation providing for unlimited liability for oil spills. Many U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. These laws may be more stringent than U.S. federal law. Moreover, some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters, although in some cases, states which have enacted this type of legislation have not yet issued implementing regulations defining vessel owners' responsibilities under these laws. We intend to comply with all applicable state regulations in the ports where our vessels call.

We currently maintain pollution liability coverage insurance in the amount of \$1 billion per incident for each of our vessels. If the damages from a catastrophic spill were to exceed our insurance coverage, it could have an adverse effect on our business and results of operation.

Other United States Environmental Initiatives

The U.S. Clean Air Act of 1970 (including its amendments of 1977 and 1990) (“CAA”) requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. Our vessels are subject to vapor control and recovery requirements for certain cargoes when loading, unloading, ballasting, cleaning and conducting other operations in regulated port areas. The CAA also requires states to draft State Implementation Plans, or “SIPs”, designed to attain national health-based air quality standards in each state. Although state-specific, SIPs may include regulations concerning emissions resulting from vessel loading and unloading operations by requiring the installation of vapor control equipment. Our vessels operating in such regulated port areas with restricted cargoes are equipped with vapor recovery systems that satisfy these existing requirements.

The U.S. Clean Water Act (“CWA”) prohibits the discharge of oil, hazardous substances and ballast water in U.S. navigable waters unless authorized by a duly-issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA. In 2015, the EPA expanded the definition of “waters of the United States” (“WOTUS”), thereby expanding federal authority under the CWA. Following litigation on the revised WOTUS rule, in December 2018, the EPA and Department of the Army proposed a revised, limited definition of “waters of the United States.” The proposed rule was published in the Federal Register on February 14, 2019 and was subject to public comment. On October 22, 2019, the agencies published a final rule repealing the 2015 Rule defining “waters of the United States” and recodified the regulatory text that existed prior to the 2015 Rule. The final rule became effective on December 23, 2019. On January 23, 2020, the EPA published the “Navigable Waters Protection Rule,” which replaces the rule published on October 22, 2019, and redefines “waters of the United States.” This rule became effective on June 22, 2020, although the effective date has been stayed in at least one U.S. state pursuant to court order. The effect of this rule is currently unknown.

The EPA and the USCG have also enacted rules relating to ballast water discharge, compliance with which requires the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial costs, and/or otherwise restrict our vessels from entering U.S. Waters. The EPA will regulate these ballast water discharges and other discharges incidental to the normal operation of certain vessels within United States waters pursuant to the Vessel Incidental Discharge Act (“VIDA”), which was signed into law on December 4, 2018 and replaced the 2013 Vessel General Permit (“VGP”) program (which authorizes discharges incidental to operations of commercial vessels and contains numeric ballast water discharge limits for most vessels to reduce the risk of invasive species in U.S. waters, stringent requirements for exhaust gas scrubbers, and requirements for the use of environmentally acceptable lubricants) and current Coast Guard ballast water management regulations adopted under the U.S. National Invasive Species Act (“NISA”), such as mid-ocean ballast exchange programs and installation of approved USCG technology for all vessels equipped with ballast water tanks bound for U.S. ports or entering U.S. waters. VIDA establishes a new framework for the regulation of vessel incidental discharges under Clean Water Act (CWA), requires the EPA to develop performance standards for those discharges within two years of enactment, and requires the U.S. Coast Guard to develop implementation, compliance and enforcement regulations within two years of EPA’s promulgation of standards. Under VIDA, all provisions of the 2013 VGP and USCG regulations regarding ballast water treatment remain in force and effect until the EPA and U.S. Coast Guard regulations are finalized. Non-military, non-recreational vessels greater than 79 feet in length must continue to comply with the requirements of the VGP, including submission of a Notice of Intent (“NOI”) or retention of a PARI form and submission of annual reports. We have submitted NOIs for our vessels where required. Compliance with the EPA, U.S. Coast Guard and state regulations could require the installation of ballast water treatment equipment on our vessels or the implementation of other port facility disposal procedures at potentially substantial cost, or may otherwise restrict our vessels from entering U.S. waters.

European Union Regulations

In October 2009, the European Union amended a directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Aiding and abetting the discharge of a polluting substance may also lead to criminal penalties. The directive applies to all types of vessels, irrespective of their flag, but certain exceptions apply to warships or where human safety or that of the ship is in danger. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims. Regulation (EU) 2015/757 of the European Parliament and of the Council of 29 April 2015 (amending EU Directive 2009/16/EC) governs the monitoring, reporting and verification of carbon dioxide emissions from maritime transport, and, subject to some exclusions, requires companies with ships over 5,000 gross tonnage to monitor and report carbon dioxide emissions annually, which may cause us to incur additional expenses.

The European Union has adopted several regulations and directives requiring, among other things, more frequent inspections of high-risk ships, as determined by type, age, and flag as well as the number of times the ship has been detained. The European Union also adopted and extended a ban on substandard ships and enacted a minimum ban period and a definitive ban for repeated offenses. The regulation also provided the European Union with greater authority and control over classification societies, by imposing more requirements on classification societies and providing for fines or penalty payments for organizations that failed to comply. Furthermore, the EU has implemented regulations requiring vessels to use reduced sulfur content fuel for their main and auxiliary engines. The EU Directive 2005/33/EC (amending Directive 1999/32/EC) introduced requirements parallel to those in Annex VI relating to the sulfur content of marine fuels. In addition, the EU imposed a 0.1% maximum sulfur requirement for fuel used by ships at berth in the Baltic, the North Sea and the English Channel (the so called “SOx-Emission Control Area”). As of January 2020, EU member states must also ensure that ships in all EU waters, except the SOx-Emission Control Area, use fuels with a 0.5% maximum sulfur content.

On September 15, 2020, the European Parliament voted to include greenhouse gas emissions from the maritime sector in the European Union’s carbon market from 2022. This will require shipowners to buy permits to cover these emissions. Contingent on another formal approval vote, specific regulations are forthcoming and are expected to be proposed in 2021.

International Labour Organization

The International Labour Organization (the “ILO”) is a specialized agency of the UN that has adopted the Maritime Labor Convention 2006 (“MLC 2006”). A Maritime Labor Certificate and a Declaration of Maritime Labor Compliance is required to ensure compliance with the MLC 2006 for all ships that are 500 gross tonnage or over and are either engaged in international voyages or flying the flag of a Member and operating from a port, or between ports, in another country. We believe that all our vessels are in substantial compliance with and are certified to meet MLC 2006.

Greenhouse Gas Regulation

Currently, the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change, which entered into force in 2005 and pursuant to which adopting countries have been required to implement national programs to reduce greenhouse gas emissions with targets extended through 2020. International negotiations are continuing with respect to a successor to the Kyoto Protocol, and restrictions on shipping emissions may be included in any new treaty. In December 2009, more than 27 nations, including the U.S. and China, signed the Copenhagen Accord, which includes a non-binding commitment to reduce greenhouse gas emissions. The 2015 United Nations Climate Change Conference in Paris resulted in the Paris Agreement, which entered into force on November 4, 2016 and does not directly limit greenhouse gas emissions from ships. The U.S. initially entered into the agreement, but on June 1, 2017, former U.S. President Trump announced that the United States intends to withdraw from the Paris Agreement, and the withdrawal became effective on November 4, 2020. On January 20, 2021, U.S. President Biden signed an executive order to rejoin the Paris Agreement, which the U.S. officially rejoined on February 19, 2021.

On April 22, 2021, U.S. President Biden also announced a new target for the U.S. to achieve a 50-52% reduction from 2005 levels in economy-wide net greenhouse pollution by 2030.

At MEPC 70 and MEPC 71, a draft outline of the structure of the initial strategy for developing a comprehensive IMO strategy on reduction of greenhouse gas emissions from ships was approved. In accordance with this roadmap, in April 2018, nations at the MEPC 72 adopted an initial strategy to reduce greenhouse gas emissions from ships. The initial strategy identifies “levels of ambition” to reducing greenhouse gas emissions, including (1) decreasing the carbon intensity from ships through implementation of further phases of the EEDI for new ships; (2) reducing carbon dioxide emissions per transport work, as an average across international shipping, by at least 40% by 2030, pursuing efforts towards 70% by 2050, compared to 2008 emission levels; and (3) reducing the total annual greenhouse emissions by at least 50% by 2050 compared to 2008 while pursuing efforts towards phasing them out entirely. The initial strategy notes that technological innovation, alternative fuels and/or energy sources for international shipping will be integral to achieve the overall ambition. These regulations could cause us to incur additional substantial expenses.

The EU made a unilateral commitment to reduce overall greenhouse gas emissions from its member states from 20% of 1990 levels by 2020. The EU also committed to reduce its emissions by 20% under the Kyoto Protocol’s second period from 2013 to 2020. Starting in January 2018, large ships over 5,000 gross tonnage calling at EU ports are required to collect and publish data on carbon dioxide emissions and other information. As previously discussed, regulations relating to the inclusion of greenhouse gas emissions from the maritime sector in the European Union’s carbon market are also forthcoming.

In the United States, the EPA issued a finding that greenhouse gases endanger the public health and safety, adopted regulations to limit greenhouse gas emissions from certain mobile sources and proposed regulations to limit greenhouse gas emissions from large stationary sources. However, in March 2017, former U.S. President Trump signed an executive order to review and possibly eliminate the EPA’s plan to cut greenhouse gas emissions, and in August 2019, the Administration announced plans to weaken regulations for methane emissions. On August 13, 2020, the EPA released rules rolling back standards to control methane and volatile organic compound emissions from new oil and gas facilities. However, U.S. President Biden recently directed the EPA to publish a proposed rule suspending, revising, or rescinding certain of these rules. The EPA or individual U.S. states could enact environmental regulations that would affect our operations.

Any passage of climate control legislation or other regulatory initiatives by the IMO, the EU, the U.S. or other countries where we operate, or any treaty adopted at the international level to succeed the Kyoto Protocol or Paris Agreement, that restricts emissions of greenhouse gases could require us to make significant financial expenditures which we cannot predict with certainty at this time. We have signed contracts with manufacturers and a qualified system installers for the purchase and installation of scrubbers on ten of our vessels, of which nine have been installed as of June 1, 2021, with the tenth expected to be completed in June 2021. In addition to the added costs, the concern over climate change and regulatory measures to reduce greenhouse gas emissions may reduce global demand for oil and oil products, which would have an adverse effect on our business, financial results and cash flows.

Even in the absence of climate control legislation, our business may be indirectly affected to the extent that climate change may result in sea level changes or certain weather events. In addition, there may be significant physical effects of climate change from greenhouse gas emissions that have the potential to negatively impact our customers, personnel, and physical assets any of which could adversely impact the demand for our services or our ability to recruit personnel.

Vessel Security Regulations

Since the terrorist attacks of September 11, 2001 in the United States, there have been a variety of initiatives intended to enhance vessel security such as the U.S. Maritime Transportation Security Act of 2002 (“MTSA”). To implement certain portions of the MTSA, the USCG issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States and at certain ports and facilities, some of which are regulated by the EPA.

Similarly, Chapter XI-2 of the SOLAS Convention imposes detailed security obligations on vessels and port authorities and mandates compliance with the International Ship and Port Facility Security Code (“the ISPS Code”). The ISPS Code is designed to enhance the security of ports and ships against terrorism. To trade internationally, a vessel must attain an International Ship Security Certificate (“ISSC”) from a recognized security organization approved by the vessel’s flag state. Ships operating without a valid certificate may be detained, expelled from, or refused entry at port until they obtain an ISSC. The various requirements, some of which are found in the SOLAS Convention, include, for example, on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including information on a ship’s identity, position, course, speed and navigational status; on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore; the development of vessel security plans; ship identification number to be permanently marked on a vessel’s hull; a continuous synopsis record kept onboard showing a vessel’s history including the name of the ship, the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship’s identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address; and compliance with flag state security certification requirements.

The USCG regulations, intended to align with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels have on board a valid ISSC that attests to the vessel’s compliance with the SOLAS Convention security requirements and the ISPS Code. Future security measures could have a significant financial impact on us. We intend to comply with the various security measures addressed by MTSA, the SOLAS Convention and the ISPS Code.

The cost of vessel security measures has also been affected by the escalation in the frequency of acts of piracy against ships, notably off the coast of Somalia, including the Gulf of Aden and Arabian Sea area. Substantial loss of revenue and other costs may be incurred as a result of detention of a vessel or additional security measures, and the risk of uninsured losses could significantly affect our business. Costs are incurred in taking additional security measures in accordance with Best Management Practices to Deter Piracy, notably those contained in the BMP5 industry standard.

We seek to manage exposure to losses from the above-described environmental and vessel security laws through our development of appropriate risk management programs, including compliance programs, safety management systems and insurance programs, as applicable.

Taxation

The following is a discussion of the material Marshall Islands and United States federal income tax considerations relevant to a United States Holder and a Non-United States Holder, each as defined below, with respect to the common shares. This discussion does not purport to deal with the tax consequences of owning our common shares to all categories of investors, some of which, such as financial institutions, regulated investment companies, real estate investment trusts, tax exempt organizations, insurance companies, persons holding our common stock as part of a hedging, integrated, conversion or constructive sale transaction or a straddle, traders in securities that have elected the mark to market method of accounting for their securities, persons liable for alternative minimum tax, persons subject to the “base erosion and anti-avoidance” tax, persons who are investors in partnerships or other pass through entities for United States federal income tax purposes or hold our common shares through an applicable partnership interest, dealers in securities or currencies, United States Holders whose functional currency is not the United States dollar, investor that are required to recognize income for U.S. federal income tax purposes no later than when such income is included on an “applicable financial statement” and investors that own, actually or under applicable constructive ownership rules, 10% or more of our shares of common stock, may be subject to special rules. This discussion deals only with holders who purchase and hold the common shares as a capital asset. You are encouraged to consult your own tax advisors concerning the overall tax consequences arising in your own particular situation under United States federal, state, local or non-United States law of the ownership of common shares.

Marshall Islands Tax Considerations

In the opinion of Seward & Kissel LLP, the following are the material Marshall Islands tax consequences of our activities to us and of our common shares to our shareholders. We are incorporated in the Marshall Islands. Under current

Marshall Islands law, we are not subject to tax on income or capital gains, and no Marshall Islands withholding tax will be imposed upon payments of dividends by us to our shareholders.

United States Federal Income Tax Considerations

In the opinion of Seward & Kissel LLP, the following are the material United States federal income tax consequences to us of our activities and to United States Holders and Non-United States Holders, each as defined below, of the common shares. The following discussion of United States federal income tax matters is based on the United States Internal Revenue Code of 1986 as in effect as of the date hereof, or the Code, judicial decisions, administrative pronouncements, and existing and proposed regulations issued by the United States Department of the Treasury, or the Treasury Regulations, all of which are subject to change, possibly with retroactive effect. The discussion below is based, in part, on the description of our business as described in this report and assumes that we conduct our business as described herein.

United States Federal Income Taxation of Operating Income: In General

We anticipate that we will earn substantially all our income from the hiring of vessels for use on a time or spot charter basis, including through the Helios Pool, and from the performance of services directly related to those uses, all of which we refer to as "shipping income."

Unless we qualify for an exemption from United States federal income taxation under the rules of Section 883 of the Code, or Section 883, as discussed below, a foreign corporation such as the Company will be subject to United States federal income taxation on its "shipping income" that is treated as derived from sources within the United States, to which we refer as "United States source shipping income." For United States federal income tax purposes, "United States source shipping income" includes 50% of shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States.

Shipping income attributable to transportation exclusively between non-United States ports will be considered to be 100% derived from sources entirely outside the United States. Shipping income derived from sources outside the United States will not be subject to any United States federal income tax.

Shipping income attributable to transportation exclusively between United States ports is considered to be 100% derived from United States sources. However, we are not permitted by United States law to engage in the transportation of cargoes that produces 100% United States source shipping income.

Unless we qualify for the exemption from tax under Section 883, our gross United States source shipping income would be subject to a 4% tax imposed without allowance for deductions as described below.

Exemption of Operating Income from United States Federal Income Taxation

Under Section 883 and the Treasury Regulations thereunder, a foreign corporation will be exempt from United States federal income taxation of its United States source shipping income if:

- 1) it is organized in a "qualified foreign country" which is one that grants an "equivalent exemption" from tax to corporations organized in the United States in respect of each category of shipping income for which exemption is being claimed under Section 883; and
- 2) one of the following tests is met:
 - A) more than 50% of the value of its shares is beneficially owned, directly or indirectly, by "qualified shareholders," which as defined includes individuals who are "residents" of a qualified foreign country, to which we refer as the "50% Ownership Test"; or

- B) its shares are "primarily and regularly traded on an established securities market" in a qualified foreign country or in the United States, to which we refer as the "Publicly-Traded Test."

The Republic of The Marshall Islands, the jurisdiction where we and our ship-owning subsidiaries are incorporated, has been officially recognized by the United States Internal Revenue Service, or the IRS, as a qualified foreign country that grants the requisite "equivalent exemption" from tax in respect of each category of shipping income we earn and currently expect to earn in the future. Therefore, we will be exempt from United States federal income taxation with respect to our United States source shipping income if we satisfy either the 50% Ownership Test or the Publicly-Traded Test.

We believe that we satisfy the Publicly-Traded Test, a factual determination made on an annual basis, with respect to our taxable year ended March 31, 2021, and we expect to continue to do so for our subsequent taxable years, and we intend to take this position for United States federal income tax reporting purposes. We do not currently anticipate circumstances under which we would be able to satisfy the 50% Ownership Test.

Publicly-Traded Test

The Treasury Regulations under Section 883 provide, in pertinent part, that shares of a foreign corporation will be considered to be "primarily traded" on an established securities market in a country if the number of shares of each class of stock that are traded during any taxable year on all established securities markets in that country exceeds the number of shares in each such class that are traded during that year on established securities markets in any other single country. The Company's common shares, which constitute its sole class of issued and outstanding stock is "primarily traded" on the New York Stock Exchange, or the NYSE, an established securities market for these purposes.

Under the Treasury Regulations, our common shares will be considered to be "regularly traded" on an established securities market if one or more classes of our shares representing more than 50% of our outstanding stock, by both total combined voting power of all classes of stock entitled to vote and total value, are listed on such market, to which we refer as the "listing threshold." Since all of our common shares are listed on the NYSE, we expect to satisfy the listing threshold.

The Treasury Regulations also require that with respect to each class of stock relied upon to meet the listing threshold, (i) such class of stock traded on the market, other than in minimal quantities, on at least 60 days during the taxable year or one-sixth of the days in a short taxable year, which we refer to as the "trading frequency test"; and (ii) the aggregate number of shares of such class of stock traded on such market during the taxable year must be at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short taxable year, which we refer to as the "trading volume" test. We anticipate that we will satisfy the trading frequency and trading volume tests. Even if this were not the case, the Treasury Regulations provide that the trading frequency and trading volume tests will be deemed satisfied if, as is expected to be the case with our common shares, such class of stock is traded on an established securities market in the United States and such shares are regularly quoted by dealers making a market in such shares.

Notwithstanding the foregoing, the Treasury Regulations provide, in pertinent part, that a class of shares will not be considered to be "regularly traded" on an established securities market for any taxable year in which 50% or more of the vote and value of the outstanding shares of such class are owned on more than half the days during the taxable year by persons who each own 5% or more of the vote and value of such class of outstanding stock, to which we refer as the "5% Override Rule."

For purposes of being able to determine the persons who actually or constructively own 5% or more of the vote and value of our common shares, or "5% Shareholders," the Treasury Regulations permit us to rely on those persons that are identified on Schedule 13G and Schedule 13D filings with the Commission, as owning 5% or more of our common shares. The Treasury Regulations further provide that an investment company which is registered under the Investment Company Act of 1940, as amended, will not be treated as a 5% Shareholder for such purposes.

In the event the 5% Override Rule is triggered, the Treasury Regulations provide that the 5% Override Rule will nevertheless not apply if we can establish that within the group of 5% Shareholders, qualified shareholders (as defined for

purposes of Section 883) own sufficient number of shares to preclude non-qualified shareholders in such group from owning 50% or more of our common shares for more than half the number of days during the taxable year.

We believe that we satisfy the Publicly-Traded Test and will not be subject to the 5% Override Rule for taxable year ended March 31, 2021 and we also expect to continue to do so for our subsequent taxable years. However, there are factual circumstances beyond our control that could cause us to lose the benefit of the Section 883 exemption. For example, we may no longer qualify for Section 883 exemption for a particular taxable year if 5% Shareholders were to own, in the aggregate, 50% or more of our outstanding common shares on more than half the days of the taxable year, unless we could establish that within the group of 5% Shareholders, qualified shareholders own sufficient number of our shares to preclude the non-qualified shareholders in such group from owning 50% or more of our common shares for more than half the number of days during the taxable year. Under the Treasury Regulations, we would have to satisfy certain substantiation requirements regarding the identity of our shareholders. These requirements are onerous and there is no assurance that we would be able to satisfy them. Given the factual nature of the issues involved, we can give no assurances in regards of our or our subsidiaries' qualification for the Section 883 exemption.

Taxation in Absence of Section 883 Exemption

If the benefits of Section 883 are unavailable, our United States source shipping income would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions, or the "4% gross basis tax regime," to the extent that such income is not considered to be "effectively connected" with the conduct of a United States trade or business, as described below. Since under the sourcing rules described above, no more than 50% of our shipping income would be treated as being United States source shipping income, the maximum effective rate of United States federal income tax on our shipping income would never exceed 2% under the 4% gross basis tax regime.

To the extent our United States source shipping income is considered to be "effectively connected" with the conduct of a United States trade or business, as described below, any such "effectively connected" United States source shipping income, net of applicable deductions, would be subject to United States federal income tax, currently imposed at a rate of 21%. In addition, we would generally be subject to the 30% "branch profits" tax on earnings effectively connected with the conduct of such trade or business, as determined after allowance for certain adjustments, and on certain interest paid or deemed paid attributable to the conduct of our United States trade or business.

Our United States source shipping income would be considered "effectively connected" with the conduct of a United States trade or business only if:

- we have, or are considered to have, a fixed place of business in the United States involved in the earning of United States source shipping income; and
- substantially all of our United States source shipping income is attributable to regularly scheduled transportation, such as the operation of a vessel that follows a published schedule with repeated sailings at regular intervals between the same points for voyages that begin or end in the United States.

We do not intend to have, or permit circumstances that would result in having, any vessel sailing to or from the United States on a regularly scheduled basis. Based on the foregoing and on the expected mode of our shipping operations and other activities, it is anticipated that none of our United States source shipping income will be "effectively connected" with the conduct of a United States trade or business.

United States Taxation of Gain on Sale of Vessels

Regardless of whether we qualify for exemption under Section 883, we will not be subject to United States federal income tax with respect to gain realized on a sale of a vessel, provided the sale is considered to occur outside of the United States under United States federal income tax principles. In general, a sale of a vessel will be considered to occur outside of the United States for this purpose if title to the vessel, and risk of loss with respect to the vessel, pass to the buyer outside of the United States. It is expected that any sale of a vessel by us will be considered to occur outside of the United States.

United States Federal Income Taxation of United States Holders

As used herein, the term "United States Holder" means a holder that for United States federal income tax purposes is a beneficial owner of common shares and is an individual United States citizen or resident, a United States corporation or other United States entity taxable as a corporation, an estate the income of which is subject to United States federal income taxation regardless of its source, or a trust if a court within the United States is able to exercise primary jurisdiction over the administration of the trust and one or more United States persons have the authority to control all substantial decisions of the trust.

If a partnership holds the common shares, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding the common shares, you are encouraged to consult your tax advisor.

Distributions

Subject to the discussion of passive foreign investment companies below, any distributions made by us with respect to our common shares to a United States Holder will generally constitute dividends to the extent of our current or accumulated earnings and profits, as determined under United States federal income tax principles. Distributions in excess of such earnings and profits will be treated first as a nontaxable return of capital to the extent of the United States Holder's tax basis in its common shares and thereafter as capital gain. Because we are not a United States corporation, United States Holders that are corporations will generally not be entitled to claim a dividends-received deduction with respect to any distributions they receive from us. Dividends paid with respect to our common shares will generally be treated as foreign source dividend income and will generally constitute "passive category income" for purposes of computing allowable foreign tax credits for United States foreign tax credit purposes.

Dividends paid on our common shares to certain non-corporate United States Holders will generally be treated as "qualified dividend income" that is taxable to such United States Holders at preferential tax rates provided that (1) the common shares are readily tradable on an established securities market in the United States (such as the NYSE, on which our common shares will be traded), (2) the shareholder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock becomes ex-dividend, and (3) we are not a passive foreign investment company for the taxable year during which the dividend is paid or the immediately preceding taxable year.

There is no assurance that any dividends paid on our common shares will be eligible for these preferential rates in the hands of such non-corporate United States Holders, although, as described above, we expect such dividends to be so eligible provided an eligible non-corporate United States Holder meets all applicable requirements and we are not a passive foreign investment company in the taxable year during which the dividend is paid or the immediately preceding taxable year. Any dividends paid by us which are not eligible for these preferential rates will be taxed as ordinary income to a non-corporate United States Holder.

Special rules may apply to any "extraordinary dividend"—generally, a dividend in an amount which is equal to or in excess of 10% of a shareholder's adjusted tax basis or dividends received within a one-year period that, in the aggregate, equal or exceed 20% of a shareholder's adjusted tax basis (or fair market value upon the shareholder's election) in a common share—paid by us. If we pay an "extraordinary dividend" on our common shares that is treated as "qualified dividend income," then any loss derived by certain non-corporate United States Holders from the sale or exchange of such common shares will be treated as long-term capital loss to the extent of such dividend.

Sale, Exchange or Other Disposition of Common Shares

Assuming we do not constitute a passive foreign investment company for any taxable year, a United States Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common shares in an amount equal to the difference between the amount realized by the United States Holder from such sale, exchange or other disposition and the United States Holder's tax basis in such shares. Such gain or loss will be treated as long-term capital gain or loss if the United States Holder's holding period is greater than one year at the time of the sale, exchange or other

disposition. Such capital gain or loss will generally be treated as United States source income or loss, as applicable, for United States foreign tax credit purposes. Long-term capital gains of certain non-corporate United States Holders are currently eligible for reduced rates of taxation. A United States Holder's ability to deduct capital losses is subject to certain limitations.

Passive Foreign Investment Company Status and Significant Tax Consequences

Special United States federal income tax rules apply to a United States Holder that holds shares in a foreign corporation classified as a "passive foreign investment company," or a PFIC, for United States federal income tax purposes. In general, we will be treated as a PFIC with respect to a United States Holder if, for any taxable year in which such holder holds our common shares, either:

- at least 75% of our gross income for such taxable year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business); or
- at least 50% of the average value of our assets during such taxable year produce, or are held for the production of, passive income.

For purposes of determining whether we are a PFIC, we will be treated as earning and owning our proportionate share of the income and assets, respectively, of any of our ship-owning subsidiaries in which we own at least 25% of the value of the subsidiary's stock. Income earned, or deemed earned, by us in connection with the performance of services would not constitute passive income. By contrast, rental income would generally constitute "passive income" unless we were treated under specific rules as deriving our rental income in the active conduct of a trade or business.

We believe that income we earn from the voyage charters, and also from time charters, for the reasons discussed below, will be treated as active income for PFIC purposes and as a result, we intend to take the position that we satisfy the 75% income test for our taxable year ended March 31, 2021.

As of the date of this Annual Report, we have taken delivery of all of the vessels under our newbuilding contracts. Accordingly, based on our current and anticipated operations, we do not believe that we will be treated as a PFIC for our taxable year ended March 31, 2021, or subsequent taxable years, and we intend to take such position for our United States federal income tax reporting purposes. Our belief is based principally on the position that the gross income we derive from our voyage or time chartering activities should constitute services income, rather than rental income. Accordingly, such income should not constitute passive income, and the assets that we own and operate in connection with the production of such income, in particular, the vessels, should not constitute passive assets for purposes of determining whether we are a PFIC. There is substantial legal authority supporting this position consisting of case law and IRS pronouncements concerning the characterization of income derived from time charters as services income for other tax purposes. However, there is also authority which characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, no assurance can be given that the IRS or a court of law will accept this position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. In addition, although we intend to conduct our affairs in a manner to avoid being classified as a PFIC with respect to any taxable year, we cannot assure you that the nature of our operations will not change in the future.

As discussed more fully below, for any taxable year in which we are, or were to be treated as, a PFIC, a United States Holder would be subject to different taxation rules depending on whether the United States Holder makes an election to treat us as a "Qualified Electing Fund," which election we refer to as a "QEF election." As an alternative to making a QEF election, a United States Holder should be able to make a "mark-to-market" election with respect to our common shares, as discussed below. A United States holder of shares in a PFIC will be required to file an annual information return containing information regarding the PFIC as required by applicable Treasury Regulations. We intend to promptly notify our shareholders if we determine we are a PFIC for any taxable year.

Taxation of United States Holders Making a Timely QEF Election

If a United States Holder makes a timely QEF election, which United States Holder we refer to as an "Electing Holder," the Electing Holder must report for United States federal income tax purposes its pro rata share of our ordinary earnings and net capital gain, if any, for each of our taxable years during which we are a PFIC that ends with or within the taxable year of the Electing Holder, regardless of whether distributions were received from us by the Electing Holder. No portion of any such inclusions of ordinary earnings will be treated as "qualified dividend income." Net capital gain inclusions of certain non-corporate United States Holders would be eligible for preferential capital gains tax rates. The Electing Holder's adjusted tax basis in the common shares will be increased to reflect any income included under the QEF election. Distributions of previously taxed income will not be subject to tax upon distribution but will decrease the Electing Holder's tax basis in the common shares. An Electing Holder would not, however, be entitled to a deduction for its pro rata share of any losses that we incur with respect to any taxable year. An Electing Holder would generally recognize capital gain or loss on the sale, exchange or other disposition of our common shares. A United States Holder would make a timely QEF election for our common shares by filing one copy of IRS Form 8621 with his United States federal income tax return for the first year in which he held such shares when we were a PFIC. If we take the position that we are not a PFIC for any taxable year, and it is later determined that we were a PFIC for such taxable year, it may be possible for a United States Holder to make a retroactive QEF election effective for such year. If we determine that we are a PFIC for any taxable year, we will provide each United States Holder with all necessary information required for the United States Holder to make the QEF election and to report its pro rata share of our ordinary earnings and net capital gain, if any, for each of our taxable years during which we are a PFIC that ends with or within the taxable year of the Electing Holder as described above.

Taxation of United States Holders Making a "Mark-to-Market" Election

Alternatively, for any taxable year in which we determine that we are a PFIC, and, assuming as we anticipate will be the case, our shares are treated as "marketable stock," a United States Holder would be allowed to make a "mark-to-market" election with respect to our common shares, provided the United States Holder completes and files IRS Form 8621 in accordance with the relevant instructions and related Treasury Regulations. If that election is made, the United States Holder generally would include as ordinary income in each taxable year the excess, if any, of the fair market value of the common shares at the end of the taxable year over such Holder's adjusted tax basis in the common shares. The United States Holder would also be permitted an ordinary loss in respect of the excess, if any, of the United States Holder's adjusted tax basis in the common shares over its fair market value at the end of the taxable year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. A United States Holder's tax basis in his common shares would be adjusted to reflect any such income or loss amount recognized. In a year when we are a PFIC, any gain realized on the sale, exchange or other disposition of our common shares would be treated as ordinary income, and any loss realized on the sale, exchange or other disposition of the common shares would be treated as ordinary loss to the extent that such loss does not exceed the net mark-to-market gains previously included by the United States Holder.

Taxation of United States Holders Not Making a Timely QEF or Mark-to-Market Election

For any taxable year in which we determine that we are a PFIC, a United States Holder who does not make either a QEF election or a "mark-to-market" election for that year, whom we refer to as a "Non-Electing Holder," would be subject to special rules with respect to (i) any excess distribution (i.e., the portion of any distributions received by the Non-Electing Holder on the common shares in a taxable year in excess of 125% of the average annual distributions received by the Non-Electing Holder in the three preceding taxable years, or, if shorter, the Non-Electing Holder's holding period for the common shares), and (ii) any gain realized on the sale, exchange or other disposition of our common shares. Under these special rules:

- the excess distribution or gain would be allocated ratably over the Non-Electing Holder's aggregate holding period for the common shares;
- the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we were a PFIC, would be taxed as ordinary income and would not be "qualified dividend income"; and

- the amount allocated to each of the other taxable years would be subject to tax at the highest rate of tax in effect for the applicable class of taxpayer for that year, and an interest charge for the deemed tax deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

United States Federal Income Taxation of "Non-United States Holders"

As used herein, the term "Non-United States Holder" means a holder that, for United States federal income tax purposes, is a beneficial owner of common shares (other than a partnership) that is not a United States Holder.

If a partnership holds our common shares, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding our common shares, you are encouraged to consult your tax advisor.

Dividends on Common Shares

Subject to the discussion of backup withholding below, a Non-United States Holder generally will not be subject to United States federal income or withholding tax on dividends received from us with respect to our common shares, unless:

- the dividend income is effectively connected with the Non-United States Holder's conduct of a trade or business in the United States; or
- the Non-United States Holder is an individual who is present in the United States for 183 days or more during the taxable year of receipt of the dividend income and other conditions are met.

Sale, Exchange or Other Disposition of Common Shares

Subject to the discussion of backup withholding below, a Non-United States Holder generally will not be subject to United States federal income or withholding tax on any gain realized upon the sale, exchange or other disposition of our common shares, unless:

- the gain is effectively connected with the Non-United States Holder's conduct of a trade or business in the United States; or
- the Non-United States Holder is an individual who is present in the United States for 183 days or more during the taxable year of disposition and other conditions are met.

Income or Gains Effectively Connected with a United States Trade or Business

If the Non-United States Holder is engaged in a United States trade or business for United States federal income tax purposes, dividends on our common shares and gain from the sale, exchange or other disposition of our common shares, that are effectively connected with the conduct of that trade or business (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment), will generally be subject to regular United States federal income tax in the same manner as discussed in the previous section relating to the taxation of United States Holders. In addition, in the case of a corporate Non-United States Holder, its earnings and profits that are attributable to the effectively connected income, which are subject to certain adjustments, may be subject to an additional branch profits tax at a rate of 30%, or at a lower rate as may be specified by an applicable United States income tax treaty.

Backup Withholding and Information Reporting

In general, dividend payments, or other taxable distributions, and the payment of the gross proceeds on a sale of our common shares, made within the United States to a non-corporate United States Holder will be subject to information

reporting. Such payments or distributions may also be subject to backup withholding if the non-corporate United States Holder:

- fails to provide an accurate taxpayer identification number;
- is notified by the IRS that it has have failed to report all interest or dividends required to be shown on its federal income tax returns; or
- in certain circumstances, fails to comply with applicable certification requirements.

Non-United States Holders may be required to establish their exemption from information reporting and backup withholding with respect to dividends payments or other taxable distribution on our common shares by certifying their status on an appropriate IRS Form W-8. If a Non-United States Holder sells our common shares to or through a United States office of a broker, the payment of the proceeds is subject to both United States backup withholding and information reporting unless the Non-United States Holder certifies that it is a non-United States person, under penalties of perjury, or it otherwise establish an exemption. If a Non-United States Holder sells our common shares through a Non-United States office of a Non-United States broker and the sales proceeds are paid outside the United States, then information reporting and backup withholding generally will not apply to that payment. However, United States information reporting requirements, but not backup withholding, will apply to a payment of sales proceeds, even if that payment is made outside the United States, if a Non-United States Holder sells our common shares through a Non-United States office of a broker that is a United States person or has some other contacts with the United States. Such information reporting requirements will not apply, however, if the broker has documentary evidence in its records that the Non-United States Holder is not a United States person and certain other conditions are met, or the Non-United States Holder otherwise establishes an exemption.

Backup withholding is not an additional tax. Rather, a refund may generally be obtained of any amounts withheld under backup withholding rules that exceed the taxpayer's United States federal income tax liability by filing a timely refund claim with the IRS.

Individuals who are United States Holders (and to the extent specified in applicable Treasury regulations, Non-United States Holders and certain United States entities) who hold "specified foreign financial assets" (as defined in Section 6038D of the Code) are required to file IRS Form 8938 with information relating to the asset for each taxable year in which the aggregate value of all such assets exceeds \$75,000 at any time during the taxable year or \$50,000 on the last day of the taxable year (or such higher dollar amount as prescribed by applicable Treasury Regulations). Specified foreign financial assets would include, among other assets, our common shares, unless the common shares are held in an account maintained with a United States financial institution. Substantial penalties apply to any failure to timely file IRS Form 8938, unless the failure is shown to be due to reasonable cause and not due to willful neglect. Additionally, in the event an individual United States Holder (and to the extent specified in applicable Treasury Regulations, a Non-United States Holder or a United States entity) that is required to file IRS Form 8938 does not file such form, the statute of limitations on the assessment and collection of United States federal income taxes of such holder for the related tax year may not close until three years after the date that the required information is filed. United States Holders (including United States entities) and Non-United States Holders are encouraged consult their own tax advisors regarding their reporting obligations in respect of our common shares.

Available Information

Our website is located at www.dorianlpg.com. Information on our website does not constitute a part of this annual report. Our goal is to maintain our website as a portal through which investors can easily find or navigate to pertinent information about us, including our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements, and any other reports, after we file them with the Commission. The public may obtain a copy of our filings, free of charge, through our corporate internet website as soon as reasonably practicable after we have electronically filed such material with, or furnished it to, the Commission. Additionally, these materials, including this annual report and the accompanying exhibits are available from the Commission's website <http://www.sec.gov>.

ITEM 1A. RISK FACTORS

The following risks relate principally to us and our business and the industry in which we operate. Other risks relate principally to the securities markets and ownership of our common shares. Any of the risk factors described below could significantly and negatively affect our business, financial condition and results of operations and our ability to pay dividends, and lower the trading price of our common shares.

Risks Relating to Our Company

We and the Helios Pool operate exclusively in the LPG shipping industry. Due to the general lack of industry diversification, adverse developments in the LPG shipping industry may adversely affect our business, financial condition and operating results.

We currently rely exclusively on the cash flow generated from the vessels in our fleet, all of which are VLGCs operating in the LPG shipping industry (including through the Helios Pool). Unlike some other shipping companies, which have vessels of varying sizes that can carry different cargoes, such as containers, dry bulk, crude oil and oil products, we depend and may to continue to depend exclusively on VLGCs transporting LPG. Similarly, the Helios Pool also depends exclusively on the cash flow generated from VLGCs operating in the LPG shipping industry. General lack of industry diversification makes us vulnerable to adverse developments in the LPG shipping industry, which would have a significantly greater impact on our business, financial condition and operating results than such lack of diversification would if we or the Helios Pool owned and operated more diverse assets or engaged in more diverse lines of business.

Seasonal and other fluctuations in respect of spot market charter rates have had in the past and may have in the future a negative effect on our revenues, results of operations and cash flows.

As of the date of this annual report, twenty-one vessels from our fleet, including the time chartered-in vessel, operate in the Helios Pool, which employs vessels on short-term time charters, COAs, or in the spot market, the latter of which exposes us to fluctuations in spot market charter rates. We also employ two of our VLGCs on fixed time charters outside of the Helios Pool. As these fixed time charters expire, we may employ these vessels in the spot market.

Generally, VLGC spot market rates are highly seasonal, typically demonstrating strength in the second and third calendar quarters as suppliers build inventory for high consumption during the northern hemisphere winter. However, 12-month time charter rates tend to smooth out these short-term fluctuations and recent LPG shipping market activity has not yielded the expected seasonal results. The successful operation of our vessels in the competitive and highly volatile spot charter market depends on, among other things, obtaining profitable spot charters, which depends greatly on vessel supply and demand and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to retrieve cargo.

The spot charter market may fluctuate significantly based upon LPG and LPG vessel supply and demand. The successful operation of our vessels in the competitive spot charter market depends on, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling in ballast to pick up cargo. The spot market is very volatile and there have been and will be periods when spot charter rates decline below the operating cost of vessels. If future spot charter rates decline, we may be unable to operate our vessels trading in the spot market profitably, meet our obligations, including payments on indebtedness, or pay dividends in the future. Furthermore, as charter rates for spot charters are fixed for a single voyage which may last up to several weeks, during periods in which spot charter rates are rising, we will generally experience delays in realizing the benefits from such increases. If spot charter rates decline in the future, then we may not be able to profitably operate our vessels trading in the spot market or participating in the Helios Pool; meet our obligations, including payments on indebtedness; or pay dividends.

Further, although our two fixed time charters outside of the Helios Pool generally provide reliable revenues, they also limit the portion of our fleet available for spot market voyages during an upswing in the market, when spot market voyages might be more profitable. Conversely, when the current charters for the two vessels in our fleet on fixed time charters outside of the Helios Pool expire (or if such charters are terminated early), we may not be able to re-charter these

vessels at similar or higher rates, or at all. As a result, we may have to accept lower rates or experience off hire time for our vessels, which would adversely impact our revenues, results of operations and financial condition.

We and/or our pool managers may not be able to successfully secure employment for our vessels or vessels in the Helios Pool, which could adversely affect our financial condition and results of operations.

As of June 1, 2021, twenty-one of our vessels, including the time chartered-in vessel, are operating within the Helios Pool, which employs vessels on short-term time charters, COAs, or in the spot market, and two of our vessels are on fixed time charters outside of the Helios Pool that expire between the first calendar quarter of 2022 and the fourth calendar quarter of 2022. We cannot assure you that we will be successful in finding employment for our vessels in the spot market, on time charters or otherwise, or that any employment will be at profitable rates. Moreover, as vessels entered into the Helios Pool are commercially managed by our wholly-owned subsidiary and Phoenix, we also cannot assure you that we or they will be successful in finding employment for the vessels in the Helios Pool or that any employment will be profitable. Any inability to locate suitable employment for our vessels or the vessels in the Helios Pool could affect our general financial condition, results of operation and cash flow as well as the availability of financing.

We face substantial competition in trying to expand relationships with existing customers and obtain new customers.

The process of obtaining new charter agreements is highly competitive and generally involves an intensive screening and competitive bidding process, which, in certain cases, extends for several months. Contracts in the time charter market are awarded based upon a variety of factors, including:

- the size, age, fuel efficiency, and condition of a vessel;
- the operator's industry relationships, experience and reputation for customer service, quality operations and safety;
- the quality, experience and technical capability of the crew;
- the experience of the crew with the operator and type of vessel;
- the operator's relationships with shipyards and the ability to get suitable berths;
- the operator's construction management experience, including the ability to obtain on-time delivery of new vessels according to customer specifications; and
- the operator's willingness to accept operational risks pursuant to the charter, such as allowing termination of the charter for force majeure events.

Contracts in the spot market are awarded based upon a variety of factors as well, and include:

- the location of the vessel; and
- competitiveness of the bid in terms of overall price.

Our vessels, and the vessels operating in the Helios Pool, operate in a highly competitive market and we expect substantial competition for providing transportation services from a number of companies (both LPG vessel owners and operators). We anticipate that an increasing number of maritime transport companies, including many with strong reputations and extensive resources and experience, has entered or will enter the LPG shipping market. Our existing and potential competitors may have significantly greater financial resources than us. In addition, competitors with greater resources may have larger fleets, or could operate larger fleets through consolidations, acquisitions, newbuildings or pooling of their vessels with other companies, and, therefore, may be able to offer a more competitive service than us or the Helios Pool, including better charter rates. We expect competition from a number of experienced companies providing contracts for gas transportation services to potential LPG customers, including state-sponsored entities and major energy companies affiliated with the projects requiring shipping services. As a result, we (including the Helios Pool) may be

unable to expand our relationships with existing customers or to obtain new customers on a profitable basis, if at all, which would have a material adverse effect on our business, financial condition and operating results.

We and the Helios Pool are subject to risks with respect to counterparties, and failure of such counterparties to meet their obligations could cause us to suffer losses or negatively impact our results of operations and cash flows.

We have entered into, and expect to enter into in the future, various contracts, including charter agreements, COAs, shipbuilding contracts, credit facilities and financing arrangements, including leasing arrangements, that subject us to counterparty risks. Similarly, the Helios Pool has entered into, and expects to enter into in the future, various contracts, including charters and COAs, that subject it to counterparty risks. The ability and willingness of our and the Helios Pool's counterparties to perform their obligations under any contract will depend on a number of factors that are beyond our control and may include, among other things, general economic conditions, the condition of the maritime and LPG industries, the overall financial condition of the counterparty, charter rates for specific types of vessels, and various expenses. For example, a reduction of cash flow resulting from declines in world trade or the lack of availability of debt or equity financing may result in a significant reduction in the ability of our charterers or the Helios Pool's charterers to make required charter payments. In addition, in depressed market conditions, charterers and customers may no longer need a vessel that is then under charter or contract or may be able to obtain a comparable vessel at lower rates. As a result, charterers and customers may seek to renegotiate the terms of their existing charter agreements or avoid their obligations under those contracts. Should a counterparty fail to honor its obligations under agreements with us or the Helios Pool, we could sustain significant losses and a significant reduction in the charter hire we earn from the Helios Pool, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We expect to be dependent on a limited number of customers for a material part of our revenues, and failure of such customers to meet their obligations could cause us to suffer losses or negatively impact our results of operations and cash flows.

For the year ended March 31, 2021, the Helios Pool accounted for 93% of our total revenues. No other individual charterer accounted for more than 10%. Within the Helios Pool, one charterer represented 16% of net pool revenues—related party, for the year ended March 31, 2021. We expect that a material portion of our revenues will continue to be derived from a limited number of customers. The ability of each of our customers to perform their obligations under a contract with us will depend on a number of factors that are beyond our control. Should the aforementioned customers fail to honor their obligations under agreements with us or the Helios Pool, we could sustain material losses that could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Restrictions on VLGC transits and increased toll charges at the Panama Canal may have an adverse effect on our results of operations.

In June 2016, the expansion of the Panama Canal, or the Canal, was completed. The new locks allow the Canal to accommodate significantly larger vessels, including VLGCs, which we operate. Since the completion of the Canal, transit from the United States Gulf to Asia, an important trade route for our customers, has been shortened by approximately 15 days compared to transiting via the Cape of Good Hope. According to industry sources, over 90% of the US-to-Asia LPG voyages had switched to the Canal by November 2016. In response, Panamanian authorities increased tolls for VLGCs crossing the Canal by approximately 29% in October 2017. Additionally, the Panamanian authorities increased the toll by 15% in April 2020. Finally, the Panama Canal Authorities decreed that the slots for transit by VLGCs could only be reserved up to 14 days in advance of a proposed transit. This change has resulted in longer wait times and resales of slots among VLGC operators at significantly higher rates than those charged by the Panama Canal Authority. These restrictions have added waiting time to transits, which is typically not paid for by charterers. If subsequent decisions by the Panamanian authorities result in increased rates or additional waiting time for our VLGCs to cross the Canal and these factors are not reflected in charter rates, it may have an adverse effect on our results of operations and cash flows.

Our indebtedness and financial obligations may adversely affect our operational flexibility and financial condition.

As of March 31, 2021, we had outstanding indebtedness of \$602.1 million, of which \$534.3 million is hedged or fixed. Amounts owed under our current credit facility and financing arrangements, and any future credit facilities or

financing arrangements, will require us to dedicate a part of our cash flow from operations to paying interest and principal payments, as applicable. These payments will limit funds available for working capital, capital expenditures, acquisitions, dividends, stock repurchases and other purposes and may also limit our ability to undertake further equity or debt financing in the future. Our indebtedness and obligations under our financing arrangements also increase our vulnerability to general adverse economic and industry conditions, limits our flexibility in planning for and reacting to changes in the industry, and places us at a disadvantage to other, less leveraged, competitors.

Our credit facility bears interest at variable rates and we anticipate that any future credit facilities will also bear interest at variable rates. Increases in prevailing rates could increase the amounts that we would have to pay to our lenders or financing counterparties, even though the outstanding principal amount remains the same, and our net income and available cash flows would decrease as a result.

We expect our earnings and cash flow to vary from year to year mainly due to the cyclical nature of the LPG shipping industry. If we do not generate or reserve enough cash flow from operations to satisfy our debt or financing obligations, we may have to undertake alternative financing plans, such as:

- seeking to raise additional capital;
- refinancing or restructuring our debt or financing obligations;
- selling our VLGCs; and/or
- reducing or delaying capital investments.

However, these alternative financing plans, if necessary, may not be sufficient to allow us to meet our debt or financing obligations. If we are unable to meet our debt or financing obligations and we default on our obligations under our debt agreement or financing arrangements, our lenders could elect to declare our outstanding borrowings and certain other amounts owed, together with accrued interest and fees, to be immediately due and payable and foreclose on the vessels securing that debt, and our counterparties may seek to repossess the vessels subject to our debt agreement or financing arrangements.

Our existing and future debt and financing agreements contain and are expected to contain restrictive covenants that may limit our liquidity and corporate activities, which could have an adverse effect on our financial condition and results of operations.

Our debt agreement and financing arrangements contain, and any future debt agreements or financing arrangements are expected to contain, customary covenants and event of default clauses, including cross-default provisions that may be triggered by a default under one of our other contracts or agreements and restrictive covenants and performance requirements, which may affect operational and financial flexibility. Such restrictions could affect, and in many respects limit or prohibit, among other things, our ability to pay dividends, incur additional indebtedness, create liens, sell assets, or engage in mergers or acquisitions. These restrictions could limit our ability to plan for or react to market conditions or meet extraordinary capital needs or otherwise restrict corporate activities. There can be no assurance that such restrictions will not adversely affect our ability to finance our future operations or capital needs.

Our agreements relating to the \$758 million debt facility that we entered into in March 2015 with a group of banks and financial institutions, which are secured by, among other things, fifteen of our VLGCs, require us to maintain specified financial ratios and satisfy financial covenants. In June 2015, May 2017, and July 2019, we entered into agreements to amend the \$758 million debt facility. Collectively, we refer to the \$758 million debt facility and these amendments as the 2015 Facility. In April 2020, we refinanced the commercial tranche of the 2015 Facility pursuant to an Amended and Restated Facility Agreement. As used henceforth, the “2015 AR Facility” shall refer to the 2015 Facility, as amended and restated by the Amended and Restated Facility Agreement. As of March 31, 2021, we were in compliance with the financial and other covenants contained in the 2015 AR Facility. As of June 1, 2021, approximately \$385.0 remains outstanding under the 2015 AR Facility.

The 2015 AR Facility conditions payments of dividends by us to our shareholders and by our subsidiaries to us on the absence of an event of default and such payments not creating an event of default.

As a result of the restrictions in our debt agreement and financing arrangements, or similar restrictions in our future debt agreements or financing arrangements, we may need to seek permission from our lenders or counterparties in order to engage in certain corporate actions. Our lenders' or counterparties' interests may be different from ours and we may not be able to obtain their permission when needed or at all. This may prevent us from taking actions that we believe are in our best interest, which may adversely impact our revenues, results of operations and financial condition.

A failure by us to meet our payment and other obligations, including our financial and value to loan covenants, could lead to defaults under our current or future secured loan agreements. In addition, a default under one of our current or future credit facilities could result in the cross-acceleration of our other indebtedness. Our lenders could then accelerate our indebtedness and foreclose on our fleet.

The market values of our vessels may decrease, which could cause us to breach covenants in our loan agreements or record an impairment loss, or negatively impact our ability to enter into future financing arrangements, and as a result could have a material adverse effect on our business, financial condition and results of operations.

The 2015 AR Facility, which is secured by, among other things, liens on the vessels in our fleet contains various financial covenants, including requirements relating to our financial condition, financial performance and liquidity. For example, we are required to maintain a minimum ratio of the market value of the vessels securing a loan to the principal amount outstanding under such loan. The market value of LPG carriers is sensitive to, among other things, changes in the LPG carrier charter markets, with vessel values deteriorating when LPG carrier charter rates are anticipated to fall and improving when charter rates are anticipated to rise. LPG vessel values remain subject to significant fluctuations. A decline in the fair market values of our vessels could result in us not being in compliance with certain of these loan covenants. Furthermore, if the value of our vessels deteriorates and our estimated future cash flows decrease, we may have to record an impairment adjustment in our financial statements or we may be unable to enter into future financing arrangements acceptable to us or at all, which would adversely affect our financial results and further hinder our ability to raise capital.

If we are unable to comply with any of the restrictions and covenants in our 2015 AR Facility, financing arrangements, or in future debt financing agreements, and we are unable to obtain a waiver or amendment from our lenders or counterparties for such noncompliance, a default could occur under the terms of those agreements. Our ability to comply with these restrictions and covenants, including meeting financial ratios and tests, is dependent on our future performance and may be affected by events beyond our control. If a default occurs under these agreements, lenders could terminate their commitments to lend or in some circumstances accelerate the outstanding loans and declare all amounts borrowed due and payable. Our vessels serve as security under our debt agreement. If our lenders were to foreclose with respect to their liens on our vessels in the event of a default, such foreclosure could impair our ability to continue our operations. In addition, our current debt agreement contains, and future debt agreements are expected to contain, cross-default provisions, meaning that if we are in default under certain of our current or future debt obligations, amounts outstanding under our current or other future debt agreements may also be in default, accelerated and become due and payable. If any of these events occur, we cannot guarantee that our assets will be sufficient to repay in full all of our outstanding indebtedness, and we may be unable to find alternative financing. Even if we could obtain alternative financing, that financing might not be on terms that are favorable or acceptable to us. In addition, if we find it necessary to sell our vessels at a time when vessel prices are low, we will recognize losses and a reduction in our earnings, which could affect our ability to raise additional capital necessary for us to comply with our debt agreement.

We are exposed to volatility in the London Interbank Offered Rate and we have and we intend to selectively enter into derivative contracts, which can result in higher than market interest rates and charges against our income.

The amounts outstanding under our existing credit facility have been advanced at a floating rate based on the London Interbank Offered Rate, or LIBOR, and changes in LIBOR could affect the amount of interest payable on our debt, and, in turn, could have an adverse effect on our earnings and cash flow. In recent years, LIBOR has been at relatively low levels, but it may rise in the future. Our financial condition could be materially adversely affected if LIBOR rises, although only \$67.2 million of our total debt of \$599.4 million, or 11.2%, is unhedged or unfixed as of June 1, 2021.

Due in part to uncertainty relating to the LIBOR calculation process in recent years, it is likely that LIBOR will be phased out in the future. As a result, lenders have insisted on provisions that entitle the lenders, in their discretion, to replace published LIBOR as the base for the interest calculation with their cost-of-funds rate. If we are required to agree to such a provision in future financing agreements, our lending costs could increase significantly, which would have an adverse effect on our profitability, earnings and cash flow.

In addition, the banks currently reporting information used to set LIBOR will likely stop such reporting after 2021, when their commitment to reporting information ends. On November 30, 2020, ICE Benchmark Administration, the administrator of LIBOR, with the support of the United States Federal Reserve and the United Kingdom's Financial Conduct Authority, announced plans to consult on ceasing publication of U.S. Dollar LIBOR on December 31, 2021 for only the one-week and two-month U.S. Dollar LIBOR tenors, and on June 30, 2023 for all other U.S. Dollar LIBOR tenors. The United States Federal Reserve concurrently issued a statement advising banks to stop new U.S. Dollar LIBOR issuances by the end of 2021. Such announcements indicate that the continuation of LIBOR on the current basis will not be guaranteed after 2021. The Alternative Reference Rate Committee, a committee convened by the U.S. Federal Reserve that includes major market participants, has proposed an alternative rate to replace U.S. Dollar LIBOR: the Secured Overnight Financing Rate, or "SOFR." The impact of such a transition from LIBOR to SOFR would be significant for us because of our substantial indebtedness. Pursuant to our 2015 AR Facility, any alternative basis of interest is to be negotiated and agreed between the applicable lenders under the 2015 AR Facility and us.

We have entered into and may selectively in the future enter into derivative contracts to hedge our overall exposure to interest rate risk related to our credit facility. Entering into swaps and derivatives transactions is inherently risky and presents various possibilities for incurring significant expenses. The derivatives strategies that we employ currently and, in the future, may not be successful or effective, and we could, as a result, incur substantial additional interest costs or losses.

Investments in forward freight derivative instruments could result in losses.

From time to time, we may take hedging or speculative positions in derivative instruments, including freight forward agreements, or FFAs. Upon settlement, if an FFA contracted charter rate is less than the average of the rates, as reported by an identified index, for the specified route and period, the seller of the FFA is required to pay the buyer an amount equal to the difference between the contracted rate and the settlement rate, multiplied by the number of days in the specified period. Conversely, if the contracted rate is greater than the settlement rate, the buyer is required to pay the seller the settlement sum. If we do not correctly anticipate charter rate movements over the specified route and time period when we take positions in FFAs or other derivative instruments, we could suffer losses in the settling or termination of the FFA. This could adversely affect our results of operations and cash flows. As of March 31, 2021, we had no FFAs in our portfolio.

Because we generate all of our revenues in U.S. dollars but incur a portion of our expenses in other currencies, exchange rate fluctuations could adversely affect our results of operations.

We generate all of our revenues in U.S. dollars and the majority of our expenses are also in U.S. dollars. However, a portion of our overall expenses is incurred in other currencies, particularly Euro, Singapore Dollar, Danish Krone, Japanese Yen, British Pound Sterling, and Norwegian Krone. Changes in the value of the U.S. dollar relative to the other currencies, in particular the Euro, or the amount of expenses we incur in other currencies could cause fluctuations in our net income. See "Item 7A. Quantitative and Qualitative Disclosures About Market Risk—Foreign Currency Exchange Rate Risk."

If we fail to manage our growth properly, we may incur significant expenses and losses.

As and when market conditions permit, we may prudently grow our fleet. Acquisition opportunities may arise from time to time, and any such acquisition could be significant. Successfully consummating and integrating acquisitions will depend on:

- locating and acquiring suitable vessels at a suitable price;
- identifying and completing acquisitions or joint ventures;
- integrating any acquired vessels or businesses successfully with our existing operations;
- hiring, training and retaining qualified personnel and crew to manage and operate our growing business and fleet;
- expanding our customer base; and
- obtaining required financing.

Certain acquisition and investment opportunities may not result in the consummation of a transaction and the incurrence of certain advisory costs. Any acquisition could involve the payment by us of a substantial amount of cash, the incurrence of a substantial amount of debt or the issuance of a substantial amount of equity. In addition, we may not be able to obtain acceptable terms for the required financing for any such acquisition or investment that arises.

Growing a business by acquisition presents numerous risks such as undisclosed liabilities and obligations, difficulty in obtaining additional qualified personnel, managing relationships with customers and suppliers and integrating newly acquired vessels into existing infrastructures. Moreover, acquiring any business is subject to risks related to incorrect assumptions regarding the future results of acquired operations or assets or expected cost reductions or other synergies expected to be realized as a result of acquiring operations or assets.

Additionally, the expansion of our fleet may impose significant additional responsibilities on our management and staff, including the management and staff of our in-house commercial and technical managers, and may necessitate that we increase the number of our personnel. Further, there is the risk that we may fail to successfully and timely integrate the operations or management of any acquired businesses or assets and the risk of diverting management's attention from existing operations or other priorities. If we fail to consummate and integrate our acquisitions in a timely and cost-effective manner, our financial condition, results of operations and ability to pay dividends, if any, to our shareholders could be adversely affected. Moreover, we cannot predict the effect, if any, that any announcement or consummation of an acquisition would have on the trading price of our common shares.

An inability to effectively time investments in and divestments of vessels could prevent the implementation of our business strategy and negatively impact our results of operations and financial condition.

Our strategy is to own and operate a fleet large enough to provide global coverage, but not larger than what the demand for our services can support over a longer period by both contracting newbuildings and through acquisitions and divestitures in the second-hand market. Our business is influenced by the timing of investments and/or divestments and contracting of newbuildings. If we are unable to identify the optimal timing of such investments, divestments or contracting of newbuildings in relation to the shipping value cycle due to capital restraints, or otherwise, this could have a material adverse effect on our competitive position, future performance, results of operations, cash flows and financial position.

If our fleet grows in size, we may need to improve our operations and financial systems and recruit additional staff and crew; if we cannot improve these systems or recruit suitable employees, our business and results of operations may be adversely affected.

As and when market conditions permit, we intend to continue to prudently grow our fleet over the long term. We have and may continue to have to invest in upgrading our operating and financial systems. In addition, we may have to recruit additional well-qualified seafarers and shoreside administrative and management personnel. We may not be able to hire suitable employees to the extent we continue to expand our fleet. Our vessels require technically skilled staff with specialized training. If our crewing agents are unable to employ such technically skilled staff, they may not be able to adequately staff our vessels. If we are unable to operate our financial and operations systems effectively or we are unable to recruit suitable employees as we expand our fleet, our results of operation and our ability to expand our fleet may be adversely affected.

We may be unable to attract and retain key management personnel and other employees in the shipping industry without incurring substantial expense, which may negatively affect the effectiveness of our management and our results of operations.

The successful development and performance of our business depends on our ability to attract and retain skilled professionals with appropriate experience and expertise. The loss of the services of any of our senior management or key personnel could have a material adverse effect on our business and operations.

Additionally, obtaining voyage and time charters with leading industry participants depends on a number of factors, including the ability to man vessels with suitably experienced, high-quality masters, officers and crew. In recent years, the limited supply of and increased demand for well-qualified crew has created upward pressure on crewing costs, which we generally bear under our time and spot charters. Increases in crew costs may adversely affect our profitability. In addition, if we cannot retain sufficient numbers of quality on-board seafaring personnel, our fleet utilization will decrease, which could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Our directors and officers may in the future hold direct or indirect interests in companies that compete with us.

Our directors and officers have a history of involvement in the shipping industry and some of them currently, and some of them may in the future, directly or indirectly, hold investments in companies that compete with us. In that case, they may face conflicts between their own interests and their obligations to us.

We cannot provide assurance that our directors and officers will not be influenced by their interests in or affiliation with other shipping companies, or our competitors, and seek to cause us to take courses of action that might involve risks to our other shareholders or adversely affect us or our shareholders. However, we have written policies in place to address such situations if they arise.

Our business and operations involve inherent operating risks, and our insurance and indemnities from our customers may not be adequate to cover potential losses from our operations.

Our vessels are subject to a variety of operational risks caused by adverse weather conditions, mechanical failures, human error, war, terrorism, piracy, or other circumstances or events. We procure hull and machinery insurance, protection and indemnity insurance, which includes environmental damage and pollution insurance coverage, and war risk insurance for our fleet. While we endeavor to be adequately insured against all known risks related to the operation of our ships, there remains the possibility that a liability may not be adequately covered and we may not be able to obtain adequate insurance coverage for our fleet in the future. The insurers may also not pay particular claims. Even if our insurance coverage is adequate, we may not be able to timely obtain a replacement vessel in the event of a loss. There can be no assurance that such insurance coverage will remain available at economic rates. Furthermore, such insurance coverage will contain deductibles, limitations and exclusions, which are standard in the shipping industry and may increase our costs or lower our revenue if applied in respect of any claim.

We may be unable to procure adequate insurance coverage at commercially reasonable rates in the future.

We may not be able to obtain adequate insurance coverage at reasonable rates in the future during adverse insurance market conditions. For example, more stringent environmental regulations have led in the past to increased costs for, and in the future may result in the lack of availability of, insurance against risks of environmental damage or pollution. A marine disaster could exceed our insurance coverage, which could harm our business, financial condition and operating results. Any uninsured or underinsured loss could harm our business and financial condition. In addition, our insurance may be voidable by the insurers as a result of certain of our actions, such as our vessels failing to maintain certification with applicable maritime self-regulatory organizations.

Changes in the insurance markets attributable to terrorist attacks may also make certain types of insurance more difficult for us to obtain. In addition, upon renewal or expiration of our current policies, the insurance that may be available to us may be significantly more expensive than our existing coverage.

Because we obtain some of our insurance through protection and indemnity associations, we may be required to make additional premium payments.

Although we believe we carry protection and indemnity insurance consistent with industry standards, all risks may not be adequately insured against, and any particular claim may not be paid. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. Certain of our insurance coverage is maintained through mutual protection and indemnity associations, and as a member of such associations we may be required to make additional payments, or calls, over and above budgeted premiums if member claims exceed association reserves. These calls will be in amounts based on our claim records, as well as the claim records of other members of the protection and indemnity associations through which we receive insurance coverage for tort liability, including pollution-related liability. In addition, our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expense to us, which could have a material adverse effect on our business, results of operations, cash flows, financial condition, and ability to pay dividends.

We may incur increasing costs for the drydocking, maintenance or replacement of our vessels as they age, and, as our vessels age, the risks associated with older vessels could adversely affect our ability to obtain profitable charters.

The drydocking of our vessels requires significant capital expenditures and loss of revenue while our vessels are off-hire. Any significant increase in the number of days of off-hire due to such drydocking or in the costs of any repairs could have a material adverse effect on our business, results of operations, cash flows and financial condition. Although we do not anticipate that more than one vessel will be out of service at any given time, we may underestimate the time required to drydock our vessels, or unanticipated problems may arise.

In addition, although all of our vessels were built within the past fifteen years, we estimate that our vessels have a useful life of 25 years. In general, the costs of maintaining a vessel in good operating condition increase with the age of the vessel. Older vessels are typically less fuel-efficient than more recently constructed vessels due to improvements in engine technology. Cargo insurance rates increase with the age of a vessel, making older vessels less desirable to charterers.

As our vessels become older, we may have to replace such vessels upon the expiration of their useful lives. Unless we maintain reserves or are able to borrow or raise funds for vessel replacement, we will be unable to replace such older vessels. The inability to replace the vessels in our fleet upon the expiration of their useful lives could have a material adverse effect on our business, results of operations, cash flows and financial condition. Any reserves set aside for vessel replacement will not be available for the payment of dividends to shareholders.

If we purchase secondhand vessels, we will be exposed to increased costs which could adversely affect our earnings.

We may acquire secondhand vessels in the future, and while we typically inspect secondhand vessels prior to purchase, such inspection does not provide us with the same knowledge about their condition that we would have had if these vessels had been built for and operated exclusively by us. A secondhand vessel may have conditions or defects that

we were not aware of when we bought the vessel and which may require us to incur costly repairs to the vessel. These repairs may require us to put a vessel into drydock, which would reduce our fleet utilization and increase our operating costs.

Certain shareholders have a substantial ownership stake in us, and their interests could conflict with the interests of our other shareholders.

According to information contained in public filings, Wellington Management Group LLP; Blackrock, Inc.; John C. Hadjipateras, our Chief Executive Officer, President and Chairman of the Board of Directors; and Kensico Capital Management; as of June 1, 2021, own, or may be deemed to beneficially own, 15.4%, 13.6%, 11.6%, and 10.0%, respectively, of our total shares outstanding. John C. Hadjipateras and Kensico Capital Management are represented on our Board of Directors. As a result of substantial ownership interest along with their or their affiliates' participation on the Board of Directors, John C. Hadjipateras and Kensico Capital Management (our "Principal Shareholders") currently have the ability to influence certain actions requiring shareholders' approval, including increasing or decreasing the authorized share capital, the election of directors, declaration of dividends, the appointment of management, and other policy decisions. While any future transaction with our Principal Shareholders or other significant shareholders could benefit us, their interests could at times conflict with the interests of our other shareholders. Conflicts of interest may also arise between us and our Principal Shareholders or their affiliates, which may result in the conclusion of transactions on terms not determined by market forces. Any such conflicts of interest could adversely affect our business, financial condition and results of operations, and the trading price of our common shares. Moreover, the concentration of ownership may delay, deter or prevent acts that would be favored by our other shareholders or deprive shareholders of an opportunity to receive a premium for their shares as part of a sale of our business. Similarly, this concentration of share ownership may adversely affect the trading price of our shares because investors may perceive disadvantages in owning shares in a company with concentrated ownership.

United States tax authorities could treat us as a "passive foreign investment company," which could have adverse United States federal income tax consequences to United States holders.

A foreign corporation will be treated as a PFIC for United States federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of "passive income" or (2) at least 50% of the average value of the corporation's assets produce or are held for the production of "passive income." For purposes of these tests, "passive income" generally includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services generally does not constitute "passive income." United States shareholders of a PFIC are subject to an adverse United States federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Whether we will be treated as a PFIC for our taxable year ended March 31, 2021 and subsequent taxable years will depend upon the nature and extent of our operations. In this regard, we intend to treat the gross income we derive from our voyage and time chartering activities as services income, rather than rental income. Accordingly, such income should not constitute passive income, and the assets that we own and operate in connection with the production of such income, in particular, our vessels, should not constitute passive assets for purposes of determining whether we are a PFIC. There is substantial legal authority supporting this position consisting of case law and the United States Internal Revenue Service, or the IRS, pronouncements concerning the characterization of income derived from time charters as services income for other tax purposes. However, there is also authority which characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, no assurance can be given that the IRS or a court of law will accept this position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. In addition, although we intend to conduct our affairs in a manner to avoid being classified as a PFIC with respect to any taxable year, we cannot assure you that the nature of our operations will not change in the future.

For any taxable year in which we are, or were to be treated as, a PFIC, United States shareholders would face adverse United States federal income tax consequences. Under the PFIC rules, unless a shareholder makes an election available under the Code (which election could itself have adverse consequences for such shareholders, as discussed below

under "Item 1. Business—Taxation—United States Federal Income Tax Considerations—United States Federal Income Taxation of United States Holders"), excess distributions and any gain from the disposition of such shareholder's common shares would be allocated ratably over the shareholder's holding period of the common shares and the amounts allocated to the taxable year of the excess distribution or sale or other disposition and to any year before we became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations, as appropriate, for that taxable year, and an interest charge would be imposed with respect to such tax. See "Item 1. Taxation—United States Federal Income Tax Considerations—United States Federal Income Taxation of United States Holders" for a more comprehensive discussion of the United States federal income tax consequences to United States shareholders if we are treated as a PFIC.

We may have to pay tax on United States source shipping income, which would reduce our earnings.

Under the Code, 50% of the gross shipping income of a corporation that owns or charters vessels, as we and our subsidiaries do, that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States may be subject to a 4%, or an effective 2%, United States federal income tax without allowance for deduction, unless that corporation qualifies for exemption from tax under Section 883 of the Code and the applicable Treasury Regulations promulgated thereunder.

We believe that we qualify, and we expect to qualify, for exemption under Section 883 for our taxable year ended March 31, 2021 and our subsequent taxable years and we intend to take this position for United States federal income tax return reporting purposes. However, there are factual circumstances beyond our control that could cause us to lose the benefit of this tax exemption and thereby become subject to United States federal income tax on our United States source shipping income. For example, we would no longer qualify for exemption under Section 883 of the Code for a particular taxable year if certain "non-qualified" shareholders with a 5% or greater interest in our common shares owned, in the aggregate, 50% or more of our outstanding common shares for more than half the days during the taxable year. Due to the factual nature of the issues involved, there can be no assurances on that we or any of our subsidiaries will qualify for exemption under Section 883 of the Code.

If we or our subsidiaries were not entitled to exemption under Section 883 of the Code for any taxable year based on our failure to satisfy the publicly-traded test, we or our subsidiaries would be subject for such year to an effective 2% United States federal income tax on the gross shipping income we or our subsidiaries derive during the year that is attributable to the transport of cargoes to or from the United States. The imposition of this taxation would have a negative effect on our business and would decrease our earnings available for distribution to our shareholders.

Risks Relating to our Industry

The cyclical nature of the demand for LPG transportation may lead to significant changes in charter rates, vessel utilization and vessel values, which may adversely affect our revenues, profitability and financial condition.

Historically, the LPG shipping market has been cyclical with attendant volatility in profitability, charter rates and vessel values. The degree of charter rate volatility among different types of gas carriers has varied widely. Because many factors influencing the supply of, and demand for, vessel capacity are unpredictable, the timing, direction and degree of changes in the LPG shipping market are also not predictable. If charter rates decline, our earnings may decrease, particularly with respect to our vessels deployed in the spot market, including through the Helios Pool, but also with respect to our other vessels when their charters expire, as they may not be rechartered on favorable terms when compared to the terms of the expiring charters. Accordingly, a decline in charter rates could have an adverse effect on our revenues, profitability, liquidity, cash flow and financial position.

Future growth in the demand for LPG carriers and charter rates will depend on economic growth in the world economy and demand for LPG product transportation that exceeds the capacity of the growing worldwide LPG carrier fleet. We believe that the future growth in demand for LPG carriers and the charter rate levels for LPG carriers will depend primarily upon the supply and demand for LPG, particularly in the economies of China, India, Japan, Southeast Asia, the Middle East and the United States and upon seasonal and regional changes in demand and changes to the capacity of the world fleet. The capacity of the world LPG shipping fleet appears likely to increase in the near term. Economic growth

may be limited in the near term, and possibly for an extended period, as a result of global economic conditions, or otherwise, which could have an adverse effect on our business and results of operations.

The factors affecting the supply of and demand for LPG carriers are outside of our control, and the nature, timing and degree of changes in industry conditions are unpredictable.

The factors that influence demand for our vessels include:

- global or regional economic, political or geopolitical conditions, including armed conflicts, terrorist activities, embargoes, strikes, tariffs and “trade wars,” particularly in LPG consuming regions;
- changes in global or general industrial activity specifically in the plastics and chemical industries;
- changes in the cost of oil and natural gas from which LPG is derived;
- changes in the consumption of LPG or natural gas due to availability of new, alternative energy sources or changes in the price of LPG or natural gas relative to other energy sources or other factors making consumption of LPG or natural gas less attractive;
- supply of and demand for LPG products;
- the development and location of production facilities for LPG products;
- regional imbalances in production and demand of LPG products;
- changes in the production levels of crude oil and natural gas (including in particular production by OPEC, the United States and other key producers) and inventories;
- the distance LPG and LPG products are to be moved by sea;
- worldwide production of natural gas;
- availability of competing LPG vessels;
- availability of alternative transportation means, including pipelines for LPG, which are currently few in number, linking production areas and industrial and residential areas consuming LPG, or the conversion of existing non-petroleum gas pipelines to petroleum gas pipelines in those markets;
- changes in the price of crude oil and changes to the West Texas Intermediate and Brent Crude Oil pricing benchmarks, and changes in trade patterns;
- development and exploitation of alternative fuels and non-conventional hydrocarbon production;
- governmental regulations, including environmental or restrictions on offshore transportation of natural gas;
- local and international political, economic and weather conditions;
- economic slowdowns caused by public health events such as the ongoing COVID-19 outbreak;
- domestic and foreign tax policies;
- accidents, severe weather, natural disasters and other similar incidents relating to the natural gas industry; and

- sanctions (in particular sanctions on Iran and Venezuela, among others).

The factors that influence the supply of vessel capacity include:

- the number of newbuilding deliveries (including the equivalent of 13% of the capacity of the existing LPG capable carrier fleet expected to be delivered by the end of calendar year 2021);
- the scrapping rate of older vessels;
- LPG vessel prices, including financing costs and the price of steel, other raw materials and vessel equipment;
- the availability of shipyards to build LPG vessels when demand is high;
- changes in environmental and other regulations that may limit the useful lives of vessels;
- technological advances in LPG vessel design and capacity; and
- the number of vessels that are out of service.

A significant decline in demand for the seaborne transport of LPG or a significant increase in the supply of LPG vessel capacity without a corresponding growth in LPG vessel demand could cause a significant decline in prevailing charter rates, which could materially adversely affect our financial condition and operating results and cash flow.

Due in part to COVID-19 outbreak as well as actions by OPEC members and other oil producing countries, energy prices declined significantly during calendar year 2020. If the energy price environment remains low for a prolonged period of time, this could materially and adversely affect our business. In April 2020, oil, natural gas and LPG prices reached their lowest levels since 2002. Although energy prices recovered in the last quarter of 2020 from such lows, demand for energy remains below levels before the pandemic. A continuation of current low natural gas and LPG prices could negatively affect us in a number of ways, including the following:

- a reduction in exploration for or development of new natural gas reserves or projects, or the delay or cancellation of existing projects as energy companies lower their capital expenditures budgets, which may reduce our growth opportunities;
- a decrease in the expected returns relating to investments in LPG projects;
- low gas prices globally and/or weak differentials between prices in the Atlantic Basin and the Pacific Basin leading to reduced inter-basin trading of LPG and reduced demand for LPG shipping;
- lower demand for the types of vessels we own and operate, which may reduce charter rates and revenue available to us upon redeployment of our vessels following the expiration or termination of existing contracts or upon the initial chartering of vessels;
- customers potentially seeking to renegotiate or terminate existing vessel contracts, or failing to extend or renew contracts upon expiration;
- the inability or refusal of customers to make charter payments to us due to financial constraints or otherwise; or
- declines in vessel values, which may result in losses to us upon vessel sales or impairment charges against our earnings and could impact our compliance with the covenants in our loan agreements.

Reduced demand for LPG or LPG fractionation, storage, or shipping, or any reduction or limitation in LPG production capacity, could have a material adverse effect on prevailing charter rates or the market value of our vessels, which could have a material adverse effect on our results of operations and financial condition.

A shift in consumer demand from LPG towards other energy sources or changes to trade patterns may have a material adverse effect on our business.

Substantially all of our earnings are related to the LPG industry. In recent years, there has been a strong supply of natural gas and an increase in the construction of plants and projects involving natural gas, of which LPG is a byproduct. If the supply of natural gas decreases, we may see a concurrent reduction in LPG production and resulting lesser demand and lower charter rates for our vessels and the vessels in the Helios Pool, which could ultimately have a material adverse impact on our revenues, operations and future growth. Additionally, changes in environmental or other legislation establishing additional regulation or restrictions on LPG production and transportation, including the adoption of climate change legislation or regulations, or legislation in the United States placing additional regulation or restrictions on LPG production from shale gas could result in reduced demand for LPG shipping.

A shift in the consumer demand from LPG towards other energy resources such as wind energy, solar energy, or water energy will affect the demand for our LPG carriers. This could have a material adverse effect on our future performance, results of operations, cash flows and financial position.

Seaborne trading and distribution patterns are primarily influenced by the relative advantage of the various sources of production, locations of consumption, pricing differentials and seasonality. Changes to the trade patterns of LPG may have a significant negative or positive impact on the demand for our vessels. This could have a material adverse effect on our future performance, results of operations, cash flows and financial position.

The market values of our vessels may fluctuate significantly. When the market values of our vessels are low, we may incur a loss on sale of a vessel or record an impairment charge, which may adversely affect our earnings and possibly lead to defaults under our loan agreements or under future loan agreements we may enter into.

Vessel values are both cyclical and volatile, and may fluctuate due to a number of different factors, including general economic and market conditions affecting the shipping industry; sophistication and condition of the vessels; types and sizes of vessels; competition from other shipping companies; the availability of other modes of transportation; increases in the supply of vessel capacity; charter rates; the cost and delivery of newbuildings; governmental or other regulations; supply of and demand for LPG products; prevailing freight rates; and the need to upgrade secondhand and previously owned vessels as a result of charterer requirements, technological advances in vessel design, equipment propulsion, overall vessel efficiency, or otherwise. In addition, as vessels grow older, they generally decline in value.

Due to the cyclical nature of the market, if for any reason we sell any of our owned vessels at a time when prices are depressed and before we have recorded an impairment adjustment to our financial statements, the sale may be for less than the vessel's carrying value in our financial statements, resulting in a loss and reduction in earnings. Furthermore, if vessel values experience significant declines and our estimated future cash flows decrease, we may have to record an impairment adjustment in our financial statements, which could adversely affect our financial results. If the market value of our fleet declines, we may not be in compliance with certain provisions of our loan agreements and we may not be able to refinance our debt or obtain additional financing or pay dividends, if any. If we are unable to pledge additional collateral, our lenders could accelerate our debt and foreclose on our vessels.

The IMO 2020 regulations have and may continue to cause us to incur substantial costs and to procure low-sulfur fuel oil directly on the wholesale market for storage at sea and onward consumption on our vessels.

Effective January 1, 2020, the IMO implemented a new regulation for a 0.50% global sulfur cap on emissions from vessels (the "IMO 2020 Regulations"). Under this new global cap, vessels must use marine fuels with a sulfur content of no more than 0.50% against the former regulations specifying a maximum of 3.50% sulfur in an effort to reduce the emission of sulfur oxide into the atmosphere.

We have and may continue to incur costs to comply with these revised standards. Additional or new conventions, laws and regulations may be adopted that could require, among others, the installation of expensive emission control systems and could adversely affect our business, results of operations, cash flows and financial condition.

Currently, eleven of our technically-managed vessels are equipped with scrubbers with an additional vessel expected to complete scrubber-fitting in June 2021 and, as of January 1, 2020, we have transitioned to burning IMO compliant fuels. We have commitments related to scrubbers on an additional two of our VLGCs. We continue to evaluate different options in complying with IMO and other rules and regulations. Since the implementation of the IMO 2020 Regulations five months ago, scrubber-equipped vessels have been permitted to consume high-sulfur fuels instead of low-sulfur fuels. The effect of the implementation of the IMO 2020 Regulations with respect to the availability of high-sulfur fuel around the world is still uncertain; and we cannot guarantee that high-sulfur fuel will not become harder or more expensive to source as a result of such implementation.

In the past, decreases in oil prices in the world markets have caused reduction in the fuel spreads of low-sulfur fuel, which is more expensive than the standard marine fuel containing 3.5% sulfur content. Decrease in the spread between low-sulfur fuel and high-sulfur fuel, or unavailability of high-sulfur fuel at ports on certain trading routes, may cause us to not be as competitive in operating our scrubber-fitted vessels or force us to operate them with compliant fuel. Scarcity in the supply of high-sulfur fuel, or a lower-than anticipated difference in the costs between the two types of fuel, may cause us to fail to recognize anticipated benefits from installing scrubbers.

Fuel is a significant expense in our shipping operations when vessels are under voyage charter and is an important factor in negotiating charter rates. Our operations and the performance of our vessels, and as a result our results of operations, face a host of challenges. These include concerns over higher costs, international compliance, and the availability of both high and low-sulfur fuels at key international bunkering hubs such as Singapore, Houston, Fujairah, or Rotterdam. In addition, we are taking seriously concerns which have recently arisen in Europe that certain blends of low-sulfur fuels can emit greater amounts of harmful black carbon than the high-sulfur fuels they are meant to replace. Costs of compliance with these and other related regulatory changes may be significant and may have a material adverse effect on our future performance, results of operations, cash flows and financial position. As a result, an increase in the price of fuel beyond our expectations may adversely affect our profitability at the time of charter negotiation.

While we carry cargo insurance to protect us against certain risks of loss of or damage to the procured commodities, we may not be adequately insured to cover any losses from such operational risks, which could have a material adverse effect on us. Any significant uninsured or under-insured loss or liability could have a material adverse effect on our business, results of operations, cash flows and financial condition and our available cash.

Increasing scrutiny and changing expectations from investors, lenders and other market participants with respect to our Environmental, Social and Governance (“ESG”) policies may impose additional costs on us or expose us to additional risks .

Companies across all industries are facing increasing scrutiny relating to their ESG policies. Investor advocacy groups, certain institutional investors, investment funds, lenders and other market participants are increasingly focused on ESG practices and in recent years have placed increasing importance on the implications and social cost of their investments. The increased focus and activism related to ESG and similar matters may hinder access to capital, as investors and lenders may decide to reallocate capital or to not commit capital as a result of their assessment of a company’s ESG practices. Companies which do not adapt to or comply with investor, lender or other industry shareholder expectations and standards, which are evolving, or which are perceived to have not responded appropriately to the growing concern for ESG issues, regardless of whether there is a legal requirement to do so, may suffer from reputational damage and the business, financial condition, and/or stock price of such a company could be materially and adversely affected. For more information with respect to our ESG efforts, please see Item 1. Business—Our Environmental, Social and Governance Efforts.

We may face increasing pressures from investors, lenders and other market participants, who are increasingly focused on climate change, to prioritize sustainable energy practices, reduce our carbon footprint and promote sustainability. As a result, we may be required to implement more stringent ESG procedures or standards so that our existing and future investors and lenders remain invested in us and make further investments in us, especially given the

highly focused and specific trade of LPG transportation in which we are engaged. If we do not meet these standards, our business and/or our ability to access capital could be harmed. In connection with the 2015 AR Facility, the margin applicable to certain new facilities (the “New Facilities”) may be adjusted by up to ten (10) basis points (upwards or downwards) per annum for changes in the average efficiency ratio (“AER”) (which weighs carbon emissions for a voyage against the design deadweight of a vessel and the distance travelled on such voyage) for the vessels in our fleet that are owned or technically managed pursuant to a bareboat charter. (Please see Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations—Recent Developments—Refinancing of the Commercial Tranche of the 2015 Facility).

Additionally, certain investors and lenders may exclude fossil fuel transport companies, such as us, from their investing portfolios altogether due to environmental, social and governance factors. These limitations in both the debt and equity capital markets may affect our ability to grow as our plans for growth may include accessing the equity and debt capital markets. If those markets are unavailable, or if we are unable to access alternative means of financing on acceptable terms, or at all, we may be unable to implement our business strategy, which would have a material adverse effect on our financial condition and results of operations and impair our ability to service our indebtedness. Further, it is likely that we will incur additional costs and require additional resources to monitor, report and comply with wide ranging ESG requirements. The occurrence of any of the foregoing could have a material adverse effect on our business and financial condition.

General economic, political and regulatory conditions could materially adversely affect our business, financial position and results of operations, as well as our future prospects.

The global economy remains subject to downside risks, including substantial sovereign debt burdens in countries throughout the world, the United Kingdom’s exit from the EU, or “Brexit” (as described more fully below), continuing turmoil and hostilities in the Middle East, Afghanistan and other geographic areas and the refugee crisis in Europe and the Middle East. There has historically been a strong link between the development of the world economy and demand for LPG shipping. Accordingly, an extended negative outlook for the world economy could reduce the overall demand for our services. More specifically, LPG is used as a feedstock in cyclical businesses, such as the manufacturing of plastics and in the petrochemical industry, that were adversely affected by the economic downturn and, accordingly, continued weakness and any further reduction in demand in those industries could adversely affect the LPG shipping industry. In particular, an adverse change in economic conditions affecting China, India, Japan or Southeast Asia generally could have a negative effect on the demand for LPG products, thereby adversely affecting our business, financial position and results of operations, as well as our future prospects. Additionally, Brexit, or similar events in other jurisdictions, could impact global markets, including foreign exchange and securities markets; any resulting changes in currency exchange rates, tariffs, treaties and other regulatory matters could in turn adversely impact our business and operations.

The global economy faces a number of challenges, including the effects of volatile oil prices, trade tensions between the United States and China and between the United States and the European Union continuing turmoil and hostilities in the Middle East, the Korean Peninsula, North Africa, Venezuela, and other geographic areas and countries, continuing threat of terrorist attacks around the world, continuing instability and conflicts and other recent occurrences in the Middle East and in other geographic areas and countries, continuing economic weakness in the European Union, or the E.U., and stabilizing growth in China, as well as public health concerns stemming from the COVID-19 outbreak. The demand for energy, including oil and gas may be negatively affected by global economic conditions.

Our ability to secure funding is dependent on well-functioning capital markets and on an appetite to provide funding to the shipping industry. If global economic conditions continue to worsen, or if capital markets related financing is rendered less accessible or made unavailable to the shipping industry or if lenders for any reason decide not to provide debt financing to us, we may, among other things not be able to secure additional financing to the extent required, on acceptable terms or at all. If additional financing is not available when needed, or is available only on unfavorable terms, we may be unable to meet our obligations as they come due, or we may be unable to enhance our existing business, complete additional vessel acquisitions or otherwise take advantage of business opportunities as they arise.

Credit markets in the United States and Europe have in the past experienced significant contraction, de-leveraging and reduced liquidity, and there is a risk that the U.S. federal government and state governments and European authorities

continue to implement a broad variety of governmental action and/or new regulation of the financial markets. Global financial markets and economic conditions have been, and continue to be, disrupted and volatile. We face risks attendant to changes in economic environments, changes in interest rates, and instability in the banking and securities markets around the world, among other factors. Major market disruptions may adversely affect our business or impair our ability to borrow amounts under our credit facilities or any future financial arrangements. In the absence of available financing, we also may be unable to take advantage of business opportunities or respond to competitive pressures.

We face risks attendant to changes in economic environments, changes in interest rates, and instability in the banking and securities markets around the world, among other factors. We cannot predict how long the current market conditions will last. However, these recent and developing economic and governmental factors, may have negative effects on charter rates and vessel values, which could in turn have a material adverse effect on our results of operations and financial condition and may cause the price of our ordinary shares to decline.

In Europe, large sovereign debts and fiscal deficits, low growth prospects and high unemployment rates in a number of countries have contributed to the rise of Eurosceptic parties, which would like their countries to leave the Euro. The exit of the United Kingdom, or the U.K., from the European Union, or the EU, as described more fully below and potential new trade policies in the United States further increase the risk of additional trade protectionism.

In China, a transformation of the Chinese economy is underway, as China moves from a production-driven economy towards a service or consumer-driven economy. The Chinese economic transition implies that we do not expect the Chinese economy to return to double digit GDP growth rates in the near term. Furthermore, there is a rising threat of a Chinese financial crisis resulting from massive personal and corporate indebtedness and “trade wars.” The International Monetary Fund has warned that continuing trade tensions, including significant tariff increases, between the United States and China, are expected to result in a cumulative reduction in global GDP. Additionally, following the emergence of COVID-19, industrial activity in China came to a quick halt in early 2020. The outbreak of COVID-19 has continued to be a very negative development for the Chinese economy and has led to an economic contraction. We cannot assure you that the Chinese economy will not continue to contract in the future.

While developments in Europe and China have been without significant immediate impact on our charter rates, an extended period of deterioration in the world economy could reduce the overall demand for our services. Such changes could adversely affect our future performance, results of operations, cash flows and financial position.

Further, governments may turn, and have turned, to trade barriers to protect their domestic industries against foreign imports, thereby depressing shipping demand. For example, there have been continuing trade tensions between the United States and China, including the imposition of tariffs by each country on certain of the other’s goods and products. During 2018 in response to U.S. tariffs on Chinese goods, Chinese imposition of tariffs on U.S. goods included tariffs on U.S. LPG, which have since been relaxed. On January 15, 2020, the United States and China signed a “Phase One” agreement, pursuant to which China agreed to increase purchases and imports of U.S. goods by \$200 billion over 2017 levels during between January 1, 2020 to December 31, 2021. In connection with this agreement, the United States agreed to reduce certain tariffs and indefinitely suspend the imposition of certain additional tariffs. While the Phase One agreement may reduce the risk of adverse effects on United States and Chinese trade policy, the future success of the agreement is uncertain as the Biden Administration has signaled the need to maintain political pressure on China, including with respect to perceived national security and human rights concerns, and has also indicated that it would review the Phase One agreement. Separate from the Phase One agreement, the United States has implemented or is considering implementing a number of policies, which may ultimately reduce trade between the United States and China, including as in response to what have been characterized as human rights abuses in the Xinjian Uyghur Autonomous Region. While it is not yet certain how the Biden Administration will handle each of these policies, the expectation is that most of these measures will remain in place.

Prospective investors should consider the potential impact, uncertainty and risk associated with the development in the wider global economy. Further economic downturn in any of these countries could have a material effect on our future performance, results of operations, cash flows and financial position.

The U.K.'s withdrawal from the European Union may have a negative effect on global economic conditions, financial markets and our business.

In June 2016, a majority of voters in the U.K. elected to withdraw from the EU in a national referendum (informally known as “Brexit”), a process that the government of the U.K. formally initiated in March 2017. Since then, the U.K. and the EU have been negotiating the terms of a withdrawal agreement, which was approved in October 2019 and ratified in January 2020. The U.K. formally exited the EU on January 31, 2020, although a transition period remained in place until December 2020, during which the U.K. was subject to the rules and regulations of the EU. On December 24, 2020, the U.K. and the EU entered into a trade and cooperation agreement (the “Trade and Cooperation Agreement”), which was applied on a provisional basis from January 1, 2021. While the new economic relationship does not match the relationship that existed during the time the U.K. was a member state of the EU, the Trade and Cooperation Agreement sets out preferential arrangements in certain areas such as trade in goods and in services, digital trade and intellectual property. Negotiations between the U.K. and the EU are expected to continue in relation to other areas which are not covered by the Trade and Cooperation Agreement. The long term effects of Brexit will depend on the effects of the implementation and application of the Trade and Cooperation Agreement and any other relevant agreements between the U.K. and EU.

Brexit has also given rise to calls for the governments of other EU member states to consider withdrawal. These developments and uncertainties, or the perception that any of them may occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have a material adverse effect on our business and on our consolidated financial position, results of operations and our ability to pay distributions. Additionally, Brexit or similar events in other jurisdictions, could impact global markets, including foreign exchange and securities markets; any resulting changes in currency exchange rates, tariffs, treaties and other regulatory matters could in turn adversely impact our business and operations.

Brexit contributes to considerable uncertainty concerning the current and future economic environment. Brexit could adversely affect European or worldwide political, regulatory, economic or market conditions and could contribute to instability in global political institutions, regulatory agencies and financial markets.

The state of global financial markets and general economic conditions, as well as the perceived impact of emissions by our vessels on the climate may adversely impact our ability to obtain financing or refinance our credit facility on acceptable terms, which may hinder or prevent us from operating or expanding our business.

Global financial markets and economic conditions have been, and continue to be, volatile. Beginning in February 2020, due in part to fears associated with the spread of COVID-19 (as more fully described below), global financial markets experienced volatility and a steep and abrupt downturn followed by a recovery. Such volatility may continue as the COVID-19 pandemic continues. Credit markets and the debt and equity capital markets have been distressed and the uncertainty surrounding the future of the global credit markets has resulted in reduced access to credit worldwide, particularly for the shipping industry. These issues, along with significant write-offs in the financial services sector, the re-pricing of credit risk and the uncertain economic conditions, have made, and may continue to make, it difficult to obtain additional financing. The current state of global financial markets and current economic conditions might adversely impact our ability to issue additional equity at prices that will not be dilutive to our existing shareholders or preclude us from issuing equity at all. Economic conditions may also adversely affect the market price of our common shares.

Also, as a result of concerns about the stability of financial markets generally, and the solvency of counterparties specifically, the availability and cost of obtaining money from the public and private equity and debt markets has become more difficult. Many lenders have increased interest rates, enacted tighter lending standards, refused to refinance existing debt at all or on terms similar to current debt, and reduced, and in some cases ceased, to provide funding to borrowers and other market participants, including equity and debt investors, and some have been unwilling to invest on attractive terms or even at all. Due to these factors, we cannot be certain that financing will be available if needed and to the extent required, or that we will be able to refinance our existing and future credit facilities, on acceptable terms or at all. If financing or

refinancing is not available when needed, or is available only on unfavorable terms, we may be unable to meet our obligations as they come due or we may be unable to enhance our existing business, complete additional vessel acquisitions or otherwise take advantage of business opportunities as they arise.

In 2019, a number of leading lenders to the shipping industry and other industry participants announced a global framework by which financial institutions can assess the climate alignment of their ship finance portfolios, called the Poseidon Principles, and additional lenders have subsequently announced their intention to adhere to such principles. If the ships in our fleet are deemed not to satisfy the emissions and other sustainability standards contemplated by the Poseidon Principles, the availability and cost of bank financing for such vessels may be adversely affected.

Our operating results are subject to seasonal fluctuations, which could affect our operating results and the amount of available cash with which we can pay dividends or repurchase our common stock .

We operate our LPG carriers in markets that have historically exhibited seasonal variations in demand and, as a result, in charter hire rates. The LPG shipping market is typically stronger in the spring and summer months in anticipation of increased consumption of propane and butane for heating during the winter months, although 12-month time charter rates tend to smooth out these short-term fluctuations and recent LPG shipping market activity has not yielded the expected seasonal results. In addition, unpredictable weather patterns in these months tend to disrupt vessel scheduling and supplies of certain commodities. As a result, our revenues may be stronger in fiscal quarters ended June 30 and September 30, and conversely, our revenues may be weaker during the fiscal quarters ended December 31 and March 31. This seasonality could materially affect our quarterly operating results.

Future technological innovation could reduce our charter hire income and the value of our vessels.

The charter hire rates and the value and operational life of a vessel are determined by a number of factors including the vessel's efficiency, operational flexibility and physical life. Efficiency includes speed, fuel type and economy and the ability to load and discharge cargo quickly. Flexibility includes the ability to enter harbors, utilize related docking facilities and pass through canals and straits. The length of a vessel's physical life is related to its original design and construction, its maintenance and the impact of the stress of operations. We believe that our fleet is among the youngest and most eco-friendly fleet of all our competitors. However, if new LPG carriers are built that are more efficient and environmentally friendly or more flexible or have longer physical lives than our vessels, competition from these more technologically advanced vessels could adversely affect the amount of charter hire payments we receive for our vessels and the resale value of our vessels could significantly decrease. Similarly, if the vessels of the other participants in the Helios Pool fleet become outdated, the amount of charter hire payments to the Helios Pool may be adversely affected. As a result of the foregoing, our results of operations and financial condition could be adversely affected.

Changes in fuel, or bunker, prices may adversely affect profits.

While we do not bear the cost of fuel, or bunkers, under time charters, including for our vessels employed on time charters through the Helios Pool, fuel is a significant expense in our shipping operations when vessels are off-hire or deployed under spot charters. Changes in the price of fuel may adversely affect our profitability. The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by the Organization of Petroleum Exporting Countries and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns. Further, fuel may become much more expensive in the future, including as a result of the IMO 2020 Cap, which may reduce profitability.

We are subject to regulation and liability, including environmental laws, which could require significant expenditures and adversely affect our financial conditions and results of operations.

Our business and the operation of our VLGCs are subject to complex laws and regulations and materially affected by government regulation, including environmental regulations in the form of international conventions and national, state and local laws and regulations in force in the jurisdictions in which the vessels operate, as well as in the country or countries in which the vessels operate, as well as in the country or countries of their registration.

These regulations include, but are not limited to OPA90 that establishes an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills and applies to any discharges of oil from a vessel, including discharges of fuel oil and lubricants, the CAA, the CWA, and requirements of the USCG and the EPA, and the MTSA, and regulations of the IMO, including MARPOL, the Bunker Convention, the IMO International Convention of Load Lines of 1966, as from time to time amended, and the SOLAS Convention. To comply with these and other regulations we may be required to incur additional costs to modify our vessels, meet new operating maintenance and inspection requirements, develop contingency plans for potential spills, and obtain insurance coverage. We are also required by various governmental and quasi-governmental agencies to obtain permits, licenses, certificates and financial assurances with respect to our operations. These permits, licenses, certificates and financial assurances may be issued or renewed with terms that could materially and adversely affect our operations. Because these laws and regulations are often revised, we cannot predict the ultimate cost of complying with them or the impact they may have on the resale prices or useful lives of our vessels. However, a failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations. Additional laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which could materially adversely affect our operations. For example, a future serious incident, such as the April 2010 Deepwater Horizon oil spill in the Gulf of Mexico may result in new regulatory initiatives.

The operation of our vessels is affected by the requirements set forth in the ISM Code. The ISM Code requires ship owners and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. The failure of a ship owner or bareboat charterer to comply with the ISM Code may subject the owner or charterer to increased liability, may decrease available insurance coverage for the affected vessels, or may result in a denial of access to, or detention in, certain ports. In our case, noncompliance with the ISM Code may result in breach of our loan covenants. Currently, each of the vessels in our fleet is ISM Code certified. Because these certifications are critical to our business, we place a high priority on maintaining them. Nonetheless, there is the possibility that such certifications may not be renewed.

We currently maintain, for each of our vessels, pollution liability insurance coverage in the amount of \$1.0 billion per incident. In addition, we carry hull and machinery and protection and indemnity insurance to cover the risks of fire and explosion. Under certain circumstances, fire and explosion could result in a catastrophic loss. We believe that our present insurance coverage is adequate, but not all risks can be insured, and there is the possibility that any specific claim may not be paid, or that we will not always be able to obtain adequate insurance coverage at reasonable rates. If the damages from a catastrophic spill exceeded our insurance coverage, the effect on our business would be severe and could possibly result in our insolvency.

Recent action by the IMO's Maritime Safety Committee and United States agencies indicates that cybersecurity regulations for the maritime industry are likely to be further developed in the near future in an attempt to combat cybersecurity threats. For example, cyber-risk management systems must be incorporated by ship-owners and managers by 2021. This might cause companies to create additional procedures for monitoring cybersecurity, which could require additional expenses and/or capital expenditures. However, the impact of such regulations is hard to predict at this time.

The IMO has imposed updated guidelines for ballast water management systems specifying the maximum amount of viable organisms allowed to be discharged from a vessel's ballast water. Depending on the date of the IOPP renewal survey, existing vessels constructed before September 8, 2017 must comply with the updated D-2 standard on or after September 8, 2019. For most vessels, compliance with the D-2 standard will involve installing on-board systems to treat ballast water and eliminate unwanted organisms. Ships constructed on or after September 8, 2017 are to comply with the D-2 standards on or after September 8, 2017. Currently, nineteen of our VLGCs are in compliance with the updated guidelines. Ballast water management systems, or BWMS, are expected to be installed on the remaining three VLGCs during their next drydock between November 2021 and July 2024 for approximately \$0.8 million per vessel. Costs of compliance may be substantial and adversely affect our revenues and profitability.

Furthermore, United States regulations are currently changing. Although the 2013 Vessel General Permit ("VGP") program and U.S. National Invasive Species Act ("NISA") are currently in effect to regulate ballast discharge,

exchange and installation, the Vessel Incidental Discharge Act (“VIDA”), which was signed into law on December 4, 2018, requires that the EPA develop national standards of performance for approximately 30 discharges, similar to those found in the VGP within two years. On October 26, 2020, the EPA published a Notice of Proposed Rulemaking for Vessel Incidental Discharge National Standards of Performance under VIDA. By approximately 2022, the U.S. Coast Guard must develop corresponding implementation, compliance and enforcement regulations regarding ballast water. The new regulations could require the installation of new equipment, which may cause us to incur substantial costs.

We believe that regulation of the shipping industry will continue to become more stringent and compliance with such new regulations will be more expensive for us and our competitors. Substantial violations of applicable requirements or a catastrophic release from one of our vessels could have a material adverse impact on our financial condition and results of operations.

Climate change and greenhouse gas restrictions may adversely impact our operations and markets.

Due to concern over the risk of climate change, a number of countries and the IMO have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures may include, among others, adoption of cap and trade regimes, carbon taxes, increased efficiency standards, and incentives or mandates for renewable energy. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities could also be adversely affected by compliance with such changes. Additionally, increased regulation of greenhouse gas emissions may incentivize use of alternative energy sources. Unless and until such regulations are implemented and their effects are known, we cannot reasonably or reliably estimate their impact on our financial condition, results of operations and ability to compete. However, any long-term material adverse effect on the LPG industry may adversely affect our financial condition, results of operations and cash flows.

We operate globally, including in countries, states and regions where our businesses, and the activities our consumer customers, could be negatively impacted by climate change. Climate change presents both immediate and long-term risks to us and our customers, with the risks expected to increase over time. Climate risks can arise from physical risks (acute or chronic risks related to the physical effects of climate change) and transition risks (risks related to regulatory and legal, technological, market and reputational changes from a transition to a low-carbon economy). Physical risks could damage or destroy our or our customers’ and clients’ properties and other assets and disrupt our or their operations. For example, climate change may lead to more extreme weather events occurring more often which may result in physical damage and additional volatility within our business operations and potential counterparty exposures and other financial risks. Transition risks may result in changes in regulations or market preferences, which in turn could have negative impacts on our results of operation or the reputation of us and our customers. For example, carbon-intensive industries like LPG are exposed to climate risks, such as those risks related to the transition to a low-carbon economy, as well as low-carbon industries that may be subject to risks associated with new technologies. Ongoing legislative or regulatory uncertainties and changes regarding climate risk management and practices may result in higher regulatory, compliance, credit and reputational risks and costs.

If our vessels call on ports located in countries or territories that are subject to sanctions or embargoes imposed by the United States or other authorities, it could lead to monetary fines or penalties and/or adversely affect our reputation and the market for our common shares.

Since January 1, 2010, none of our vessels has called on ports located in countries or territories subject to country-wide or territory-wide sanctions and/or embargoes imposed by the U.S. government or other authorities or countries identified by the U.S. government or other authorities as state sponsors of terrorism, (“Sanctioned Jurisdictions”). Although we do not expect that our vessels will call on ports located in Sanctioned Jurisdictions and we endeavor to take precautions reasonably designed to mitigate such activities, including relevant trade exclusion clauses in our charter contracts forbidding the use of our vessels in trade that would be in violation economic sanctions, it is possible that on charterers’ instructions, and without our consent, our vessels may call on ports located in such countries or territories in the future. If

such activities result in a sanctions violation, we could be subject to monetary fines, penalties, or other sanctions, and our reputation and the market for our common shares could be adversely affected.

Sanctions and embargo laws and regulations vary in their application, as they do not all apply to the same covered persons or proscribe the same activities, and such sanctions and embargo laws and regulations may be amended or strengthened over time. Current or future counterparties of ours may be affiliated with persons or entities that are or may be in the future the subject of sanctions imposed by the U.S. administration, the EU, and/or other international bodies. If we determine that such sanctions require us to terminate existing or future contracts to which we or our subsidiaries are party or if we are found to be in violation of such applicable sanctions, our results of operations may be adversely affected, we could face monetary fines, penalties, or other sanctions, and we may suffer reputational harm.

Additionally, although we believe that we have been in compliance with all applicable sanctions and embargo laws and regulations, and intend to maintain such compliance, there can be no assurance that we will be in compliance in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations. Any such violation could result in fines, penalties or other sanctions that could severely impact our ability to access U.S. capital markets and conduct our business, and could result in some investors deciding, or being required, to divest their interest, or not to invest, in us. In addition, certain institutional investors may have investment policies or restrictions that prevent them from holding securities of companies that have contracts with countries identified by the U.S. government as state sponsors of terrorism. The determination by these investors not to invest in, or to divest from, our common units may adversely affect the price at which our common units trade. Moreover, our charterers may violate applicable sanctions and embargo laws and regulations as a result of actions that do not involve us or our vessels, and those violations could in turn negatively affect our reputation. Investor perception of the value of our common units may be adversely affected by the consequences of war, the effects of terrorism, civil unrest and governmental actions in these and surrounding countries or territories. In addition, charterers and other parties that we have previously entered into contracts with regarding our vessels may be affiliated with persons or entities that are now or may in the future be the subject of sanctions or embargo laws imposed by the U.S. and other applicable governmental bodies. If we determine that such sanctions require us to terminate existing contracts or if we are found to be in violation of such sanctions or embargo laws, we may suffer reputational harm and our results of operations may be adversely affected.

Our vessels are subject to periodic inspections.

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and SOLAS. Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified “in class” by a classification society which is a member of the International Association of Classification Societies, the IACS. The IACS has adopted harmonized Common Structural Rules, or “the Rules,” which apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies. Our technically-managed VLGCs are currently classed with either Lloyd's Register, ABS or Det Norske Veritas.

A vessel must undergo annual surveys, intermediate surveys, drydockings, and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Our vessels are on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Every vessel is also required to be drydocked every 30 to 36 months for inspection of the underwater parts of such vessel. However, for vessels not exceeding 15 years that have means to facilitate underwater inspection in lieu of drydocking, the drydocking can be skipped and be conducted concurrently with the special survey. Certain cargo vessels that meet the system requirements set by classification societies may qualify for extended drydocking, which extends the 5-year period to 7.5 years, by replacing certain dry-dockings with in-water surveys.

Our vessels also undergo inspections with a view towards compliance under the SIRE and USCG requirements, as applicable. If a vessel does not maintain its class and/or fails any annual survey, intermediate survey, dry-docking, or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable, which would cause us to be in violation of covenants in our loan agreements and insurance contracts or other financing arrangements. This would adversely impact our operations and revenues.

Maritime claimants could arrest our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and others may be entitled to a maritime lien against that vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder may enforce its lien by arresting or attaching a vessel through foreclosure proceedings. The arrest or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest lifted.

In addition, in some jurisdictions, such as South Africa, under the "sister ship" theory of liability, a claimant may arrest both the vessel which is subject to the claimant's maritime lien and any "associated" vessel, which is any vessel owned or controlled by the same owner. Claimants could try to assert "sister ship" liability against one vessel in our fleet for claims relating to another of our ships or, possibly, another vessel managed by one of our shareholders holding more than 5% of our common shares or entities affiliated with them.

Governments could requisition our vessels during a period of war or emergency, resulting in loss of revenues.

The government of a vessel's registry could requisition for title or seize our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. A government could also requisition our vessels for hire. Requisition for hire occurs when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Generally, requisitions occur during a period of war or emergency. Government requisition of one or more of our vessels could have a material adverse effect on our business, results of operations, cash flows and financial condition.

The operation of ocean-going vessels is inherently risky, and an incident resulting in significant loss or environmental consequences involving any of our vessels could harm our reputation and business.

The operation of an ocean-going vessel carries inherent risks. Our vessels and their cargoes are at risk of being damaged or lost because of events such as marine disasters, bad weather, mechanical failures, grounding, fire, explosions, collisions, human error, war, terrorism, piracy, cargo loss, latent defects, acts of God and other circumstances or events. Changing economic, regulatory and political conditions in some countries, including political and military conflicts, have from time to time resulted in attacks on vessels, mining of waterways, piracy, terrorism, labor strikes and boycotts. Damage to the environment could also result from our operations, particularly through spillage of fuel, lubricants or other chemicals and substances used in operations, or extensive uncontrolled fires. These hazards may result in death or injury to persons, loss of revenues or property, environmental damage, higher insurance rates, damage to our customer relationships, market disruptions, delay or rerouting, any of which may also subject us to litigation. As a result, we could be exposed to substantial liabilities not recoverable under our insurances. Further, the involvement of our vessels in a serious accident could harm our reputation as a safe and reliable vessel operator and lead to a loss of business.

If our vessels suffer damage, they may need to be repaired at a dry docking facility and in certain instances such damage may result in lost revenues under and in certain cases the termination of the employment contract under which such vessel is operating. The costs of drydock repairs are unpredictable and may be substantial. We may have to pay drydocking costs that our insurance does not cover at all or in full. The loss of earnings while these vessels are being repaired and repositioned, as well as the actual cost of these repairs, may adversely affect our business and financial condition. In addition, space at drydocking facilities is sometimes limited and not all drydocking facilities are conveniently located. We may be unable to find space at a suitable drydocking facility or our vessels may be forced to travel to a drydocking facility that is not conveniently located to our vessels' positions. The loss of earnings while these vessels are forced to wait for space or to travel or be towed to more distant drydocking facilities may adversely affect our business, financial condition, results of operations and cash flows.

We may be subject to litigation that could have an adverse effect on our business and financial condition.

We are currently not involved in any litigation matters that are expected to have a material adverse effect on our business or financial condition. Nevertheless, we anticipate that we could be involved in litigation matters from time to time in the future. The operating hazards inherent in our business expose us to litigation, including personal injury litigation, environmental litigation, contractual litigation with clients, intellectual property litigation, tax or securities

litigation, and maritime lawsuits including the possible arrest of our vessels. We cannot predict with certainty the outcome or effect of any claim or other litigation matter. Any future litigation may have an adverse effect on our business, financial position, results of operations and our ability to pay dividends, because of potential negative outcomes, the costs associated with prosecuting or defending such lawsuits, and the diversion of management's attention to these matters. Additionally, our insurance may not be applicable or sufficient to cover the related costs in all cases or our insurers may not remain solvent.

Acts of piracy on ocean-going vessels could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels. At present, most piracy and armed robbery incidents are recurrent in the Gulf of Aden region off the coast of Somalia, South China Sea, Sulu Sea and Celebes Sea and in particular the Gulf of Guinea region off Nigeria, which experienced increased incidents of piracy in 2019. Sea piracy incidents continue to occur. If these piracy attacks occur in regions in which our vessels are deployed and are characterized by insurers as "war risk" zones or Joint War Committee "war and strikes" listed areas, premiums payable for such coverage, for which we are responsible with respect to vessels employed on spot charters, but not vessels employed on bareboat or time charters, could increase significantly and such insurance coverage may be more difficult to obtain. In addition, costs to employ onboard security guards could increase in such circumstances. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, detention hijacking as a result of an act of piracy against our vessels, or an increase in cost, or unavailability of insurance for our vessels, could have a material adverse impact on our business, financial condition and results of operations.

Our operations outside the United States expose us to global risks, such as political conflict, terrorism and public health threats, which may interfere with the operation of our vessels and could have a material adverse impact on our operating results, revenues and costs.

We are an international company and primarily conduct our operations outside the United States. Changing economic, political and governmental conditions in the countries where we are engaged in business or where our vessels are registered affect us. In the past, political conflicts have resulted in attacks on vessels or other petroleum-related infrastructures, mining of waterways and other efforts to disrupt shipping. Continuing conflicts, instability and other recent developments in the Middle East and elsewhere, including tensions between the United States and Iran which in January 2020 escalated into a U.S. airstrike in Baghdad that killed a high-ranking Iranian general, and prior attacks involving vessels and vessel seizures in the Strait of Hormuz and off the coast of Gibraltar, the prior attack on an Iranian tanker near the Saudi Arabian port city of Jeddah and the presence of U.S. or other armed forces in Afghanistan, may lead to additional acts of terrorism or armed conflict around the world, and our vessels may face higher risks of being attacked or detained, or shipping routes transited by our vessels, such as the Strait of Hormuz, may be otherwise disrupted. In addition, future hostilities or other political instability in regions where our vessels trade could affect our trade patterns and adversely affect our operations and performance. Further hostilities in or closure of major waterways in the Middle East, Black Sea, or South China Sea region could adversely affect the availability of and demand for crude oil and petroleum products, as well as LPG, and negatively affect our investment and our customers' investment decisions over an extended period of time. In addition, sanctions against oil exporting countries such as Iran, Russia, Sudan and Syria may also impact the availability of crude oil, petroleum products and LPG would increase the availability of applicable vessels thereby negatively impacting charter rates.

Terrorist attacks, or the perception that LPG or natural gas facilities or oil refineries and LPG carriers are potential terrorist targets, could materially and adversely affect the continued supply of LPG. Concern that LPG and natural gas facilities may be targeted for attack by terrorists has contributed to a significant community and environmental resistance to the construction of a number of natural gas facilities, primarily in North America. If a terrorist incident involving a gas facility or gas carrier did occur, the incident may adversely affect necessary LPG facilities or natural gas facilities currently in operation. Furthermore, future terrorist attacks could result in increased volatility of the financial markets in the United States and globally and could result in an economic recession in the United States or the world.

In addition, public health threats, such as the coronavirus, influenza and other highly communicable diseases or viruses, outbreaks of which have from time to time occurred in various parts of the world in which we operate could adversely impact our operations, and the operations of our customers.

Any of these occurrences and related consequences could have a material adverse impact on our operating results, revenues and costs.

The novel coronavirus (COVID-19) pandemic is dynamic and expanding and has negatively affected the shipping and energy industries. The continuation of this outbreak likely would have, and the emergence of other epidemic or pandemic crises could have, material adverse effects on our business, results of operations, or financial condition.

Since the beginning of calendar year 2020, the outbreak of COVID-19 pandemic has negatively affected economic conditions, the supply chain, the labor market, the demand for certain shipped goods regionally as well as globally and may otherwise impact our operations and the operations of our customers and suppliers. The COVID-19 pandemic resulted in numerous actions taken by governments and governmental agencies in an attempt to mitigate the spread of the virus, including travel bans, quarantines, and other emergency public health measures, and a number of countries implemented lockdown measures. These measures have resulted in a significant reduction in global economic activity and extreme volatility in the global financial markets. If the COVID-19 pandemic continues on a prolonged basis or becomes more severe, the adverse impact on the global economy and the rate environment for tankers, containerships, dry bulk and other cargo vessels may deteriorate further and our operations and cash flows may be negatively impacted. The extent of COVID-19's impact on our financial and operational results, which could be material, will depend on the length of time that the pandemic continues and whether subsequent waves of the infection happen. Uncertainties regarding the economic impact of the COVID-19 pandemic are likely to result in sustained market turmoil, which could also negatively impact our business, financial condition and cash flows. Governments are approving large stimulus packages to mitigate the effects of the sudden decline in economic activity caused by the pandemic; however, we cannot predict the extent to which these measures will be sufficient to restore or sustain the business and financial condition of companies in the shipping industry. These measures, though contemplated to be temporary in nature, may continue and increase as countries attempt to contain the outbreak or any reoccurrences thereof.

At this stage, it is difficult to determine the full impact of COVID-19 on our business. Effects of the current pandemic have or may include, among others:

- deterioration of worldwide, regional or national economic conditions and activity, and of demand for global demand for LPG, demand for our services, and charter and spot rates;
- disruptions to our operations as a result of the potential health impact on our employees and crew, and on the workforces of our customers and business partners;
- disruptions to our business from, or additional costs related to, new regulations, directives or practices implemented in response to the pandemic, such as travel restrictions (including for any of our onshore personnel or any of our crew members to timely embark or disembark from our vessels), increased inspection regimes, hygiene measures (such as quarantining and physical distancing) or increased implementation of remote working arrangements;
- potential shortages or a lack of access to required spare parts for our vessels, or potential delays in any repairs to, or scheduled or unscheduled maintenance or modifications or dry docking of, our vessels, as a result of a lack of berths available by shipyards from a shortage in labor or due to other business disruptions, as evidenced by the approximately 60-day delay in drydock experienced by one of our vessels in China;
- delays in vessel inspections and related certifications by class societies, customers or government agencies;
- potential for reduced cash flows and financial condition, including potential liquidity constraints;
- reduced access to capital, including the ability to refinance any existing obligations, as a result of any credit tightening generally or due to continued declines in global financial markets, including to the prices of publicly-traded securities of us, our peers and of listed companies generally;
- a reduced ability to opportunistically sell any of our LPG vessels on the second-hand market, either as a result of

a lack of buyers or a general decline in the value of second-hand vessels;

- a decline in the market value of our vessels, which may cause us to (a) incur impairment charges or (b) breach certain covenants under our financing agreements;
- disruptions, delays or cancellations (i) in the construction of new LPG projects by our customers or export facility operators, which could limit or adversely affect the demand for our vessels or our ability to pursue future growth opportunities and (ii) in connection with among others, vessel special surveys, installation of ballast water systems and scrubber installations, which could increase our off-hire time and decrease revenues; and
- potential deterioration in the financial condition and prospects of our customers or joint venture partners, which could adversely impact their ability or willingness to fulfill their obligations to us, or attempts by customers or third parties to renegotiate existing agreements or invoke force majeure contractual clauses as a result of delays or other disruptions, in each such event in accordance with the terms and conditions of the respective contract.

The COVID-19 pandemic and measures to contain its spread have negatively impacted regional and global economies and trade patterns in markets in which we operate, the way we operate our business, and the businesses of our charterers and suppliers. These negative impacts could continue or worsen, even after the pandemic itself diminishes or ends. Companies, including us, have also taken precautions, such as requiring employees to work remotely and imposing travel restrictions, while some other businesses have been required to close entirely. Moreover, we face significant risks to our personnel and operations due to the COVID-19 pandemic. Our crews face risk of exposure to COVID-19 as a result of travel to ports in which cases of COVID-19 have been reported. Our shore-based personnel likewise face risk of such exposure, as we maintain offices in areas that have been impacted by the spread of COVID-19.

Measures against COVID-19 in a number of countries have restricted crew rotations on our vessels, which may continue or become more severe. As a result, in the fiscal year ended March 31, 2021, we experienced and may continue to experience disruptions to our normal vessel operations caused by increased deviation time associated with positioning our vessels to countries in which we can undertake a crew rotation in compliance with such measures. Delays in crew rotations have led to issues with crew fatigue and may continue to do so, which may result in delays or other operational issues. We have had and expect to continue to have increased expenses due to incremental fuel consumption in order to deviate to certain ports on which we would ordinarily not call during a typical voyage and days in port during which our vessels are unable to earn revenue in order to deviate to certain ports on which we would ordinarily not call during a typical voyage. We may also incur additional expenses associated with testing, personal protective equipment, quarantines, and travel expenses such as airfare costs in order to perform crew rotations in the current environment. In the year ended March 31, 2021, delays in crew rotations have also caused us to incur additional costs related to crew bonuses paid to retain existing crew members and may continue to do so.

Organizations across industries, including ours, are rightly focusing on their employees' well-being, whilst making sure that their operations continue undisrupted and at the same time, adapting to the new ways of operating. As such employees are encouraged or even required to operate remotely which significantly increases the risk of cyber security attacks, although we take many precautions to mitigate such risks.

Further, containment measures and quarantine restrictions adopted by many countries worldwide have caused significant impact on our ability to embark and disembark crew members and on our seafarers themselves. As a result, since the outbreak of COVID-19 and as of the date of this report, we have encountered certain prolonged delays and surrounding complexities in embarking and disembarking crew onto our ships which further resulted in increased operational costs and decreased revenues by reason of off-hires associated with crew rotation and related logistical complications associated with supplying our vessels with spares or other supplies.

The occurrence or continued occurrence of any of the foregoing events or other epidemics or an increase in the severity or duration of the COVID-19 or other epidemics could have a material adverse effect on our business, results of operations, cash flows, financial condition, and value of our vessels.

If labor or other interruptions are not resolved in a timely manner, such interruptions could have a material adverse effect on our financial condition.

We employ masters, officers and crews to man our vessels. If not resolved in a timely and cost-effective manner, industrial action or other labor unrest or any other interruption arising from incidents of whistleblowing whether proven or not, could prevent or hinder our operations from being carried out as we expect and could have a material adverse effect on our business, financial condition, results of operations, and cash flows.

Information technology failures and data security breaches, including as a result of cybersecurity attacks, could negatively impact our results of operations and financial condition, subject us to increased operating costs, and expose us to litigation.

We rely on our computer systems and network infrastructure across our operations, including on our vessels. Despite our implementation of security and back-up measures, all of our technology systems are vulnerable to damage, disability or failures due to physical theft, fire, power loss, telecommunications failure, operational error, or other catastrophic events. Our technology systems are also subject to cybersecurity attacks including malware, other malicious software, phishing email attacks, attempts to gain unauthorized access to our data, the unauthorized release, corruption or loss of our data, loss or damage to our data delivery systems, and other electronic security breaches. In addition, as we continue to grow the volume of transactions in our businesses, our existing IT systems infrastructure, applications and related functionality may be unable to effectively support a larger scale operation, which can cause the information being processed to be unreliable and impact our decision-making or damage our reputation with customers.

Despite our efforts to ensure the integrity of our systems and prevent future cybersecurity attacks, it is possible that our business, financial and other systems could be compromised, especially because such attacks can originate from a wide variety of sources including persons involved in organized crime or associated with external service providers. Those parties may also attempt to fraudulently induce employees, customers or other users of our systems to disclose sensitive information in order to gain access to our data or use electronic means to induce the company to enter into fraudulent transactions. A successful cyber-attack could materially disrupt our operations, including the safety of our vessel operations. Past and future occurrences of such attacks could damage our reputation and our ability to conduct our business, impact our credit and risk exposure decisions, cause us to lose customers or revenues, subject us to litigation and require us to incur significant expense to address and remediate or otherwise resolve these issues, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Further, data protection laws apply to us in certain countries in which we do business. Specifically, the EU General Data Protection Regulation, or GDPR, which was applicable beginning May 2018, increases penalties up to a maximum of 4% of global annual turnover for breach of the regulation. The GDPR requires mandatory breach notification, the standard for which is also followed outside the EU (particularly in Asia). Non-compliance with data protection laws could expose us to regulatory investigations, which could result in fines and penalties. In addition to imposing fines, regulators may also issue orders to stop processing personal data, which could disrupt operations. We could also be subject to litigation from persons or corporations allegedly affected by data protection violations. Violation of data protection laws is a criminal offence in some countries, and individuals can be imprisoned or fined. Any violation of these laws or harm to our reputation could have a material adverse effect on our earnings, cash flows and financial condition.

Risks Relating to Our Common Shares

The price of our common shares has fluctuated in the past, has recently been volatile and may be volatile in the future, and as a result, investors in our common shares could incur substantial losses.

Our stock price has fluctuated in the past, has recently been volatile and may be volatile in the future without any discernable announcements or developments by the company or third parties to substantiate the movement of our stock price. Our stock prices may experience rapid and substantial decreases or increases in the foreseeable future that are unrelated to our operating performance or prospects. In addition, the ongoing outbreak of the novel COVID-19 virus has caused broad stock market and industry fluctuations. The stock market in general and the market for shipping companies in particular have experienced extreme volatility that has often been unrelated to the operating performance of particular

companies. As a result of this volatility, investors may experience substantial losses on their investment in our common shares. The market price for our common shares may be influenced by many factors, including the following:

- investor reaction to our business strategy;
- our continued compliance with the listing standards of the NYSE;
- regulatory or legal developments in the United States and other countries, especially changes in laws or regulations applicable to our industry;
- variations in our financial results or those of companies that are perceived to be similar to us;
- our ability or inability to raise additional capital and the terms on which we raise it;
- declines in the market prices of stocks generally;
- trading volume of our common shares;
- sales of our common shares by us or our stockholders;
- general economic, industry and market conditions; and
- other events or factors, including those resulting from such events, or the prospect of such events, including war, terrorism and other international conflicts, public health issues including health epidemics or pandemics, such as the ongoing COVID-19 pandemic, adverse weather and climate conditions could disrupt our operations or result in political or economic instability.

These broad market and industry factors may seriously harm the market price of our common shares, regardless of our operating performance, and may be inconsistent with any improvements in actual or expected operating performance, financial condition or other indicators of value. Since the stock price of our common shares has fluctuated in the past, has been recently volatile and may be volatile in the future, investors in our common shares could incur substantial losses. In the past, following periods of volatility in the market, securities class-action litigation has often been instituted against companies. Such litigation, if instituted against us, could result in substantial costs and diversion of management's attention and resources, which could materially and adversely affect our business, financial condition, results of operations and growth prospects. There can be no guarantee that our stock price will remain at current prices.

Additionally, recently, securities of certain companies have experienced significant and extreme volatility in stock price due short sellers of shares of common shares, known as a "short squeeze". These short squeezes have caused extreme volatility in those companies and in the market and have led to the price per share of those companies to trade at a significantly inflated rate that is disconnected from the underlying value of the company. Many investors who have purchased shares in those companies at an inflated rate face the risk of losing a significant portion of their original investment as the price per share has declined steadily as interest in those stocks have abated. While we have no reason to believe our shares would be the target of a short squeeze, there can be no assurance that we will not be in the future, and you may lose a significant portion or all of your investment if you purchase our shares at a rate that is significantly disconnected from our underlying value.

Although we have initiated a stock repurchase program, we cannot assure you that we will continue to repurchase shares or that we will repurchase shares at favorable prices.

On August 5, 2019, our Board of Directors authorized the repurchase of up to \$50.0 million of our common shares through the period ended December 31, 2020 (the “Common Share Repurchase Program”). On February 3, 2020, our Board of Directors authorized an increase to our Common Share Repurchase Program to repurchase up to an additional \$50.0 million of our common shares. On December 29, 2020, our Board of Directors authorized an extension of and an increase to the remaining authorization of \$41.4 million under our Common Share Repurchase Program, which was set to expire on December 31, 2020. Following this Board action, we are now authorized to repurchase up to \$50.0 million of our common shares from December 29, 2020 through December 31, 2021. Following the increase and extension of the program, we currently have \$42.0 million of available share repurchase authority remaining. Purchases may be made at our discretion in the form of open market repurchase programs, privately negotiated transactions, accelerated share repurchase programs or a combination of these methods. The actual amount and timing of share repurchases are subject to capital availability, our determination that share repurchases are in the best interest of our shareholders and market conditions. We are not obligated to make any common share repurchases under the Common Share Repurchase Program. As of the date of this annual report we have repurchased 6.0 million aggregate amount of our common shares under the Common Share Repurchase Program at an average price of \$11.17 per share.

Our ability to repurchase shares will depend upon, among other factors, our cash balances and potential future capital requirements for strategic investments, our results of operations, our financial condition, and other factors beyond our control that we may deem relevant. A reduction in repurchases, or the completion of our stock repurchase program, could have a negative impact on our stock price. Additionally, price volatility of our common shares over a given period may cause the average price at which we repurchase our common shares to exceed the stock’s market price at a given point in time. Conversely, repurchases of our common shares could also increase the volatility of the trading price of our common shares and will diminish our cash reserves. As such, we can provide no assurance that we will repurchase shares at favorable prices, if at all. See Note 11 to our consolidated financial statements included herein for a discussion of our Common Share Repurchase Program.

Our board of directors may not declare dividends.

We have not paid any dividends since our inception in July 2013. In general, the terms of our credit facility do not permit us to pay dividends if there is, or the payment of the dividend would result in, an event of default or a breach of a loan covenant.

In the future, we will evaluate the potential level and timing of dividends as soon as profits and cash flows allow. However, the timing and amount of any dividend payments will always be subject to the discretion of our board of directors and will depend on, among other things, earnings, capital expenditure commitments, market prospects, current capital expenditure programs, investment opportunities, the provisions of Marshall Islands law affecting the payment of distributions to shareholders, and the terms and restrictions of our existing and future credit facilities. The LPG shipping industry is highly volatile, and we cannot predict with certainty the amount of cash, if any, that will be available for distribution as dividends in any period. Also, there may be a high degree of variability from period to period in the amount of cash that is available for the payment of dividends.

We may incur expenses or liabilities or be subject to other circumstances in the future that reduce or eliminate the amount of cash that we have available for distribution as dividends, including as a result of the risks described herein. Our growth strategy contemplates that we will primarily finance our acquisitions of additional vessels through debt financings or the net proceeds of future equity issuances on terms acceptable to us. If financing is not available to us on acceptable terms, our board of directors may determine to finance or refinance acquisitions with cash from operations, which would reduce the amount of any cash available for the payment of dividends.

The Republic of Marshall Islands laws also generally prohibit the payment of dividends other than from surplus (retained earnings and the excess of consideration received for the sale of shares above the par value of the shares) or while a company is insolvent or would be rendered insolvent by the payment of such a dividend. We may not have sufficient

surplus in the future to pay dividends and our subsidiaries may not have sufficient funds or surplus to make distributions to us. We can give no assurance that dividends will be paid at any level or at all.

We are a holding company and depend on the ability of our subsidiaries to distribute funds to us in order to satisfy our financial obligations and to make dividend payments.

We are a holding company and our subsidiaries conduct all of our operations and own all of our operating assets. As a result, our ability to satisfy our financial obligations and to pay dividends, if any, to our shareholders depends on the ability of our subsidiaries to generate profits available for distribution to us. The ability of a subsidiary to make these distributions could be affected by a claim or other action by a third party, including a creditor, the terms of our financing arrangements or by the law of its jurisdiction of incorporation which regulates the payment of dividends.

We may issue additional shares in the future, which could cause the market price of our common shares to decline.

We may issue additional common shares in the future without shareholder approval, in a number of circumstances, including in connection with, among other things, future vessel acquisitions or repayment of outstanding indebtedness. Our issuance of additional shares would have the following effects: our existing shareholders' proportionate ownership interest in us will decrease; the amount of cash available for dividends payable per share may decrease; the relative voting strength of each previously outstanding share may be diminished; and the market price of our shares may decline.

A future sale of shares by major shareholders may reduce the share price.

As of the date of this report and based on information contained in documents publicly filed by our Principal Shareholders, our Principal Shareholders own an aggregate of 8.9 million common shares, or approximately 21.6% of our outstanding common shares, and two other major shareholders own approximately 28.8% of our outstanding common shares. Sales or the possibility of sales of substantial amounts of our common shares by any of our Principal Shareholders or other major shareholders could adversely affect the market price of our common shares.

We are incorporated in the Republic of the Marshall Islands, which does not have a well-developed body of corporate law.

We are incorporated in the Republic of the Marshall Islands, which does not have a well-developed body of corporate or case law. As a result, shareholders may have fewer rights and protections under Marshall Islands law than under a typical jurisdiction in the United States. Our corporate affairs are governed by our articles of incorporation and bylaws and by the Marshall Islands Business Corporations Act, or BCA. The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the law of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain United States jurisdictions. Shareholder rights may differ as well. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, we cannot predict whether Marshall Islands courts would reach the same conclusions as United States courts. Therefore, our public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than would shareholders of a corporation incorporated in a United States jurisdiction.

It may be difficult to enforce a United States judgment against us, our officers and our directors because we are a foreign corporation.

We are incorporated in the Republic of the Marshall Islands and most of our subsidiaries are organized in the Republic of the Marshall Islands. Substantially all of our assets and those of our subsidiaries are located outside the United States. As a result, our shareholders should not assume that courts in the countries in which we or our subsidiaries are incorporated or where our assets or the assets of our subsidiaries are located (1) would enforce judgments of United States courts obtained in actions against us or our subsidiaries based upon the civil liability provisions of applicable United States

federal and state securities laws or (2) would enforce, in original actions, liabilities against us or our subsidiaries based upon these laws.

Our organizational documents contain anti-takeover provisions.

Several provisions of our articles of incorporation and our bylaws could make it difficult for our shareholders to change the composition of our board of directors in any one year, preventing them from changing the composition of management. In addition, the same provisions may discourage, delay or prevent a merger or acquisition that shareholders may consider favorable. These provisions include:

- authorizing our board of directors to issue "blank check" preferred shares without shareholder approval;
- providing for a classified board of directors with staggered, three-year terms;
- authorizing the removal of directors only for cause;
- limiting the persons who may call special meetings of shareholders;
- establishing advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted on by shareholders at shareholder meetings; and
- restricting business combinations with interested shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

VLGCs are our principal physical properties and are more fully described in "Our Fleet" in "Item 1. Business." We do not own any real estate. We lease office space at 27 Signal Road, Stamford, Connecticut, 06902, USA; River House, 143-145 Farringdon Road, London, EC1R 3AB, UK; August Bournonvilles Passage 1, 1055 Copenhagen, Denmark; and 24 Poseidonos Avenue, 17674, Kallithea, Greece.

ITEM 3. LEGAL PROCEEDINGS.

We have not been involved in any legal proceedings other than that described below that we believe may have a material effect on our business, financial position, results of operations or liquidity, and we are not aware of any proceedings that are pending or threatened that may have a material effect on our business, financial position, results of operations or liquidity. From time to time we are and expect to be subject to legal proceedings and claims in the ordinary course of our business, such as personal injury and property casualty claims. These claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources.

In January 2021, subsequent to the delivery of one of our VLGCs on time charter, a dispute arose relating to the vessel's readiness to lift a cargo scheduled by the charterer. The facts of the claim are currently in dispute. We have recorded a contingent liability and corresponding expense of \$4.0 million during the year ended March 31, 2021.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common shares have traded on the New York Stock Exchange, or NYSE, since May 9, 2014, under the symbol "LPG." As of June 1, 2021, we had 145 registered holders of our common shares, including Cede & Co., the nominee for the Depository Trust Company. This number excludes shareholders whose stock is held in nominee or street name by brokers.

Tender Offer

On February 2, 2021, we announced a tender offer to purchase up to 7,407,407, or about 14.8%, of our then outstanding common shares at a price of \$13.50 per share. Based on preliminary results indicating that the tender offer was oversubscribed, we elected to increase the number of shares accepted for payment by 997,739, or slightly less than 2% of our then outstanding shares. The number of shares we purchased and canceled from each tendering shareholder was prorated so our purchases in the tender offer totaled of 8,405,146 shares, or approximately 16.8% of our then outstanding common shares, for an aggregate purchase price of approximately \$113.5 million.

Stock Repurchase Program

On August 5, 2019, our Board of Directors authorized the repurchase of up to \$50.0 million of our common shares through the period ended December 31, 2020 (the "Common Share Repurchase Program"). On February 3, 2020, our Board of Directors authorized an increase to our Common Share Repurchase Program to repurchase up to an additional \$50.0 million of our common shares. On December 29, 2020, our Board of Directors authorized an extension of and an increase to the remaining authorization of \$41.4 million under our Common Share Repurchase Program, which was set to expire on December 31, 2020. Following this Board action, we are now authorized to repurchase up to \$50.0 million of our common shares from December 29, 2020 through December 31, 2021. See Note 11 to our consolidated financial statements included herein for a discussion of our Common Share Repurchase Program.

Equity Compensation Plans

Information about the securities authorized for issuance under our equity compensation plan is set forth under "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters—Equity Compensation Plan Information."

Taxation

Please see "Item 1. Business—Taxation" for a discussion of certain tax considerations related to holders of our common shares.

Issuer Purchases of Equity Securities

The table below sets forth information regarding our purchases of our common stock during the quarterly period ended March 31, 2021:

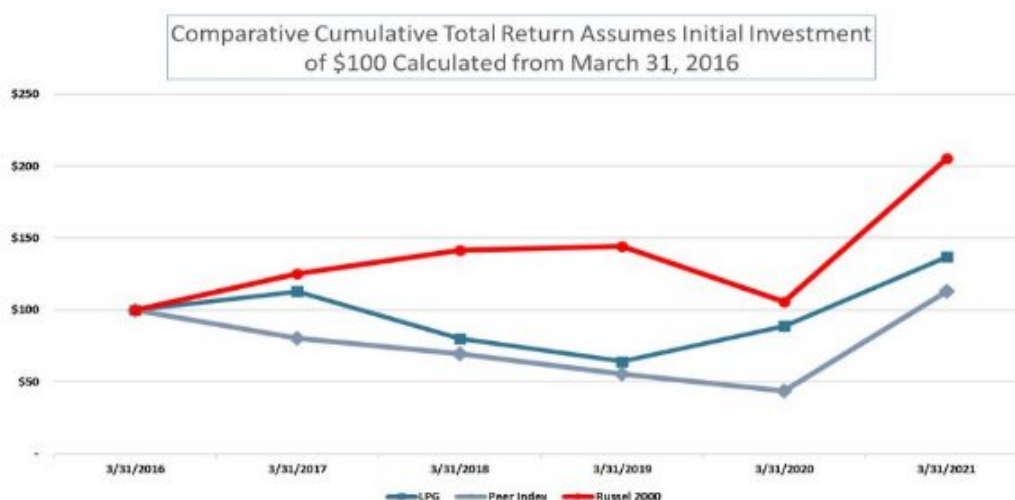

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plan or Programs
January 1 to 31, 2021	—	\$ —	—	\$ 47,916,044
February 1 to 28, 2021	8,405,146	13.50	8,405,146	47,916,044
March 1 to 31, 2021	—	—	—	47,916,044
Total	8,405,146	\$ 13.50	8,405,146	\$ 47,916,044

Purchases of our common shares during the quarterly period ended March 31, 2021 represent share repurchases under the tender offer described above.

Stock Performance Graph

The performance graph below shows the cumulative total return to shareholders of our common stock relative to the cumulative total returns of the Russell 2000 Index and the Dorian Peer Group Index (defined below). The graph tracks the performance of a \$100 investment in our common stock and in each of the indices (with the reinvestment of dividends) from March 31, 2016 to March 31, 2021. The stock price performance included in this graph is not necessarily indicative of future stock price performance.

The Dorian Peer Group Index is a self-constructed peer group that consists of the following direct competitors on a line-of-business basis: BWLPG, NVGS and Avance. NVGS's common stock trades on the New York Stock Exchange, while the common stock of Avance and BWLPG trade on the Oslo Stock Exchange. For the purposes of the below comparison, the cumulative total returns for Avance and BWLPG were converted into U.S. dollars based on the relevant NOK to one USD exchange rate prevailing on the dates listed below.

	3/31/16	3/31/17	3/31/18	3/31/19	3/31/20	3/31/21
Dorian LPG Ltd. ("LPG")	100.00	112.93	80.02	64.21	89.00	136.97
Russell 2000 Index ("RTY Index")	100.00	125.18	141.74	144.14	105.72	205.64
Peer Index	100.00	80.46	69.55	55.33	43.60	113.10
NOK to USD exchange conversion rate	8.2698	8.5945	7.8416	8.6273	10.4017	8.5574

This performance graph shall not be deemed "soliciting material" or to be "filed" with the Commission for purposes of Section 18 of the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Act.

ITEM 6. (Reserved)

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion of our financial condition and results of operations in conjunction with our consolidated financial statements and related notes included herein. Among other things, those financial statements include more detailed information regarding the basis of presentation for the following information. The financial statements have been prepared in accordance with U.S. GAAP and are presented in U.S. dollars unless otherwise indicated. The following discussion contains forward-looking statements that involve risks and uncertainties. As a result of many factors, such as those set forth under "Item 1A—Risk Factors," "Forward-Looking Statements" and elsewhere in this report, our actual results may differ materially from those anticipated in these forward-looking statements.

Overview

We are a Marshall Islands corporation, headquartered in the United States, focused on owning and operating VLGCs. Our fleet currently consists of twenty-three VLGCs, including nineteen new fuel-efficient 84,000 cbm ECO VLGCs, three 82,000 cbm VLGCs, and one time chartered-in VLGC.

Our nineteen ECO VLGCs, which incorporate fuel efficiency and emission-reducing technologies and certain custom features, were acquired by us for an aggregate purchase price of \$1.4 billion and delivered to us between July 2014 and February 2016, seventeen of which were delivered during calendar year 2015 or later.

On April 1, 2015, Dorian and Phoenix began operations of the Helios Pool, which entered into pool participation agreements for the purpose of establishing and operating, as charterer, under a variable rate time charter to be entered into with owners or disponent owners of VLGCs, a commercial pool of VLGCs whereby revenues and expenses are shared. The vessels entered into the Helios Pool may operate either in the spot market, pursuant to COAs or on time charters of two years' duration or less. As of June 1, 2021, twenty-one of our twenty-three VLGCs, including the time chartered-in vessel, were deployed in the Helios Pool.

Our customers, either directly or through the Helios Pool, include or have included global energy companies such as Exxon Mobil Corp., Chevron Corp., China International United Petroleum & Chemicals Co., Ltd., Royal Dutch Shell plc, Equinor ASA, Total S.A., and Sunoco LP, commodity traders such as Glencore plc, Itochu Corporation, Bayegan Group and the Vitol Group and importers such as E1 Corp., Indian Oil Corporation, SK Gas Co. Ltd. Astomos Energy Corporation, and Oriental Energy Company Ltd. or subsidiaries of the foregoing. For the year ended March 31, 2021, the Helios Pool accounted for 93% of our total revenues. No other individual charterer accounted for more than 10%. Within the Helios Pool, one charterer represented 16% of net pool revenues—related party, respectively. For the year ended March 31, 2020, the Helios Pool accounted for 89% of our total revenues. No other individual charterer accounted for more than 10%. Within the Helios Pool, two charterers represented 12% and 11%, respectively of net pool revenues—related party, respectively. For the year ended March 31, 2019, the Helios Pool and one other individual charterer represented 76%, and 14%, respectively, of our total revenues and within the Helios Pool, two charterers each represented 10% of net pool revenues—related party. See "Item 1A. Risk Factors—We operate exclusively in the LPG shipping industry. Due to the general lack of industry diversification, adverse developments in the LPG shipping industry may adversely affect our

business, financial condition and operating results” and “Item 1A. Risk Factors—We expect to be dependent on a limited number of customers for a material part of our revenues, and failure of such customers to meet their obligations could cause us to suffer losses or negatively impact our results of operations and cash flows.”

We continue to pursue a balanced chartering strategy by employing our vessels on a mix of multi-year time charters, some of which may include a profit-sharing component, shorter-term time charters, spot market voyages and COAs. Two of our vessels are currently on fixed time charters outside of the Helios Pool. See “Item 1. Business—Our Fleet” above for more information.

On August 5, 2019, our Board of Directors authorized our Common Share Repurchase Program. For more information please refer to Part II, Item 5, “Market For Registrant’s Common Equity, Related Stockholder Matters And Issuer Purchases Of Equity Securities.”

Recent Developments

On March 31, 2021, we entered into a bareboat agreement to charter-in a newbuilding dual-fuel VLGC that is expected to be delivered from Kawasaki Heavy Industries in March 2023. See Note 18 to our consolidated financial statements for further details on the newbuilding and bareboat charter-in agreement. In April 2021, we made the first payment of \$8.0 million under this commitment.

Vessel Deployment—Spot Voyages, Time Charters, COAs, and Pooling Arrangements

We seek to employ our vessels in a manner that maximizes fleet utilization and earnings upside through our chartering strategy in line with our goal of maximizing shareholder value and returning capital to shareholders when appropriate, taking into account fluctuations in freight rates in the market and our own views on the direction of those rates in the future. As of June 1, 2021, twenty-one of our twenty-three VLGCs, including the time chartered-in vessel, were employed in the Helios Pool, which includes time charters with a term of less than two years.

A spot market voyage charter is generally a contract to carry a specific cargo from a load port to a discharge port for an agreed upon freight per ton of cargo or a specified total amount. Under spot market voyage charters, we pay voyage expenses such as port and fuel costs. A time charter is generally a contract to charter a vessel for a fixed period of time at a set daily or monthly rate. Under time charters, the charterer pays voyage expenses such as port and fuel costs. Vessels operating on time charters provide more predictable cash flows, but can yield lower profit margins than vessels operating in the spot market during periods characterized by favorable market conditions. Vessels operating in the spot market generate revenues that are less predictable but may enable us to capture increased profit margins during periods of improvements in the freight market although we are exposed to the risk of a decline in the freight market and lower utilization. Pools generally consist of a number of vessels which may be owned by a number of different ship owners which operate as a single marketing entity in an effort to produce freight efficiencies. Pools typically employ experienced commercial charterers and operators who have close working relationships with customers and brokers while technical management is typically the responsibility of each ship owner. Under pool arrangements, vessels typically enter the pool under a time charter agreement whereby the cost of bunkers and port expenses are borne by the charterer (*i.e.*, the pool) and operating costs, including crews, maintenance and insurance are typically paid by the owner of the vessel. Pools, in return, typically negotiate charters with customers primarily in the spot market. Since the members of a pool typically share in the revenue generated by the entire group of vessels in the pool, and since pools operate primarily in the spot market, including the pool in which we participate, the revenue earned by vessels placed in spot market related pools is subject to the fluctuations of the spot market and the ability of the pool manager to effectively employ its fleet. We believe that vessel pools can provide cost-effective commercial management activities for a group of similar class vessels and potentially result in lower waiting times and higher earnings.

COAs relate to the carriage of multiple cargoes over the same or several routes at pre-agreed terms, volumes and periods and enables the COA holder to nominate and lift cargoes, without controlling tonnage themselves or having their own vessel in position. COAs are usually based on voyage terms, where all of the vessel's operating, voyage and capital costs are borne by the ship owner.

On April 1, 2015, Dorian and Phoenix began operation of the Helios Pool, which is a pool of VLGC vessels. We believe that the operation of certain of our VLGCs in this pool allows us to achieve better market coverage and utilization. Vessels entered into the Helios Pool are commercially managed jointly by Dorian LPG (UK) Ltd., our wholly-owned subsidiary, and Phoenix. The members of the Helios Pool share in the net pool revenues generated by the entire group of vessels in the pool, weighted according to certain technical vessel characteristics, and net pool revenues (see Note 2 to our consolidated financial statements included herein) are distributed as variable rate time charter hire to each participant. The vessels entered into the Helios Pool may operate either in the spot market, COAs, or on time charters of two years' duration or less. As of June 1, 2021, the Helios Pool operated twenty-nine VLGCs, including twenty-one vessels from our fleet, four Phoenix vessels, and four from other participants.

For further description of our business, please see “Item 1. Business” above.

Important Financial and Operational Terms and Concepts

We use a variety of financial and operational terms and concepts in the evaluation of our business and operations including the following:

Vessel Revenues. Our revenues are driven primarily by the number of vessels in our fleet, the number of days during which our vessels operate and the daily rates that our vessels earn under our charters, which, in turn, are affected by a number of factors, including levels of demand and supply in the LPG shipping industry; the age, condition and specifications of our vessels; the duration of our charters; the timing of when any profit-sharing arrangements are earned; the amount of time that we spend positioning our vessels; the availability of our vessels, which is related to the amount of time that our vessels spend in drydock undergoing repairs and the amount of time required to perform necessary maintenance or upgrade work; and other factors affecting rates for LPG vessels.

We generate revenue by providing seaborne transportation services to customers pursuant to three types of contractual relationships:

Pooling Arrangements. As from April 1, 2015, we began operation of the Helios Pool. Net pool revenues—related party for each vessel is determined in accordance with the profit-sharing terms specified within the pool agreement for the Helios Pool. In particular, the pool manager aggregates the revenues and voyage expenses of all of the pool participants and Helios Pool general and administrative expenses and distributes the net earnings to participants based on:

- pool points (vessel attributes such as cargo carrying capacity, fuel consumption, and speed are taken into consideration); and
- number of days the vessel was on-hire in the Helios Pool in the period.

For the years ended March 31, 2021, 2020, and 2019, approximately 92.6%, 89.4% and 75.9% of our revenue, respectively, was generated through the Helios Pool as net pool revenues—related party.

Voyage Charters. A voyage charter, or spot charter, is a contract for transportation of a specified cargo between two or more designated ports. This type of charter is priced on a current or "spot" market rate, typically on a price per ton of product carried. Under voyage charters, we are responsible for all of the voyage expenses in addition to providing the crewing and other vessel operating services. Revenues for voyage charters are more volatile as they are typically tied to prevailing market rates at the time of the voyage. Our gross revenue under voyage charters are generally higher than under comparable time charters so as to compensate us for bearing all voyage expenses. As a result, our revenue and voyage expenses may vary significantly depending on our mix of time charters and voyage charters. None of our revenue was generated pursuant to voyage charters from our VLGCs not in the Helios Pool for the years ended March 31, 2021, 2020, and 2019.

Time Charters. A time charter is a contract under which a vessel is chartered for a defined period of time at a fixed daily or monthly rate. Under time charters, we are responsible for providing crewing and other vessel

operating services, the cost of which is intended to be covered by the fixed rate, while the customer is responsible for substantially all of the voyage expenses, including bunker fuel consumption, port expenses and canal tolls. LPG is typically transported under a time charter arrangement, with terms ranging up to seven years. In addition, we may also have profit-sharing arrangements with some of our customers that provide for additional payments above a floor monthly rate (usually up to an agreed ceiling) based on the actual, average daily rate quoted by the Baltic Exchange for VLGCs on the benchmark Ras Tanura-Chiba route over an agreed time period converted to a TCE monthly rate. For the years ended March 31, 2021, 2020, and 2019, approximately 6.2%, 10.2% and 23.9%, respectively, of our revenue was generated pursuant to time charters from our VLGCs not in the Helios Pool.

Other Revenues, net. Other revenues, net represent income from charterers, including the Helios Pool, relating to reimbursement of expenses such as costs for security guards and war risk insurance for voyages operating in high risk areas. For the years ended March 31, 2021, 2020, and 2019, approximately 1.2%, 0.4% and 0.2%, respectively, of our revenue was generated pursuant to other revenues, net.

Of these revenue streams, revenue generated from voyage charter agreements is further described in our revenue recognition policy as described in Note 2 to our consolidated financial statements. Revenue generated from pools and time charters is accounted for as revenue earned under recently adopted accounting guidance to update the requirements of financial accounting and reporting for lessees and lessors as described in Note 2 to our consolidated financial statements.

Calendar Days. We define calendar days as the total number of days in a period during which each vessel in our fleet was owned or operated pursuant to a bareboat charter. Calendar days are an indicator of the size of the fleet over a period and affect both the amount of revenues and the amount of expenses that are recorded during that period.

Time Chartered-in Days. We define time chartered-in days as the aggregate number of days in a period during which we time chartered-in vessels from third parties. Time chartered-in days are an indicator of the size of the fleet over a period and affect both the amount of revenues and the amount of charter hire expenses that are recorded during that period.

Available Days. We define available days as the sum of calendar days and time chartered-in days (collectively representing our commercially-managed vessels) less aggregate off hire days associated with major repairs and scheduled maintenance, which include drydockings, vessel upgrades or special or intermediate surveys. We use available days to measure the aggregate number of days in a period that our vessels should be capable of generating revenues.

Operating Days. We define operating days as available days less the aggregate number of days that the commercially-managed vessels in our fleet are off-hire for any reason other than major repairs and scheduled maintenance. We use operating days to measure the number of days in a period that our operating vessels are on hire.

Drydocking. We must periodically drydock each of our vessels for any major repairs and maintenance and for inspection of the underwater parts of the vessel that cannot be performed while the vessels are operating and for any modifications to comply with industry certification or governmental requirements. The classification societies provide guidelines applicable to LPG vessels relating to extended intervals for drydocking. Generally, we are required to drydock a vessel under 15 years of age once every five years unless an extension of the drydocking to seven and one-half years is granted by the classification society and the vessel is not older than 20 years of age. We capitalize costs directly associated with the drydockings that extend the life of the vessel and amortize these costs on a straight-line basis over the period through the date the next survey is scheduled to become due under the "Deferral" method permitted under U.S. GAAP. Costs incurred during the drydocking period which relate to routine repairs and maintenance are expensed as incurred. The number of drydockings undertaken in a given period and the nature of the work performed determine the level of drydocking expenditures.

Fleet Utilization. We calculate fleet utilization by dividing the number of operating days during a period by the number of available days during that period. An increase in non-scheduled off-hire days, including waiting time, would reduce our operating days, and therefore, our fleet utilization. We use fleet utilization to measure our ability to efficiently find suitable employment for our vessels.

Time Charter Equivalent Rate. TCE rate is a measure of the average daily revenue performance of a vessel. TCE rate is a shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (such as time charters, voyage charters) under which the vessels may be employed between the periods. Our method of calculating TCE rate is to divide revenue net of voyage expenses by operating days for the relevant time period.

Voyage Expenses. Voyage expenses are all expenses unique to a particular voyage, including bunker fuel consumption, port expenses, canal fees, charter hire commissions, war risk insurance and security costs. Voyage expenses are typically paid by us under voyage charters and by the charterer under time charters, including our VLGCs chartered to the Helios Pool. Accordingly, we generally only incur voyage expenses for our own account when performing voyage charters or during repositioning voyages between time charters for which no cargo is available or travelling to or from drydocking. We generally bear all voyage expenses under voyage charters and, as such, voyage expenses are generally greater under voyage charters than time charters. As a result, our voyage expenses may vary significantly depending on our mix of time charters and voyage charters.

Charter Hire Expenses. We time charter hire certain vessels from third-party owners or operators for a contracted period and rate in order to charter the vessels to our customers. Charter hire expenses include vessel operating lease expense incurred to charter-in these vessels.

Vessel Operating Expenses. Vessel operating expenses are expenses that are not unique to a specific voyage. Vessel operating expenses are paid by us under each of our charter types. Vessel operating expenses include crew wages and related costs, the costs for lubricants, insurance, expenses relating to repairs and maintenance, the cost of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Our vessel operating expenses will increase with the expansion of our fleet and are subject to change because of higher crew costs, higher insurance premiums, unexpected repair expenses and general inflation. Furthermore, we expect maintenance costs will increase as our vessels age and during periods of drydock.

Daily Vessel Operating Expenses. Daily vessel operating expenses are calculated by dividing vessel operating expenses by calendar days for the relevant time period.

Depreciation and Amortization. We depreciate our vessels on a straight-line basis using an estimated useful life of 25 years from initial delivery from the shipyard and after considering estimated salvage values.

We amortize the cost of deferred drydocking expenditures on a straight-line basis over the period through the date the next drydocking/special survey is scheduled to become due.

General and Administrative Expenses. General and administrative expenses principally consist of the costs incurred in the corporate administration of the vessel and non-vessel owning subsidiaries. We have granted restricted stock awards to certain of our officers, directors, employees and non-employee consultants that vest over various periods (see Note 12 to our consolidated financial statements included herein). Granting of restricted stock results in an increase in expenses. Compensation expense for employees is measured at the grant date based on the estimated fair value of the awards and is recognized over the vesting period and for nonemployees is re-measured at the end of each reporting period based on the estimated fair value of the awards on that date and is recognized over the vesting period.

Critical Accounting Estimates

We prepare our consolidated financial statements in accordance with U.S. GAAP, which requires us to make estimates in the application of our accounting policies based on our best assumptions, judgments and opinions. On a regular basis, management reviews the accounting policies, assumptions, estimates and judgments to ensure that our consolidated financial statements are presented fairly and in accordance with U.S. GAAP. However, because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material. Accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements because they inherently involve significant judgments

and uncertainties. For a description of our material accounting policies, see Note 2 of our consolidated financial statements included herein.

Vessel Depreciation. The cost of our vessels less their estimated residual value is depreciated on a straight-line basis over the vessels' estimated useful lives. We estimate the useful life of each of our vessels to be 25 years from the date the vessel was originally delivered from the shipyard. Based on the current market and the types of vessels we have in our fleet, the residual values of our vessels are based upon a value of approximately \$400 per lightweight ton. An increase in the useful life of our vessels or in their residual value would have the effect of decreasing the annual depreciation charge and extending it into later periods. An increase in the useful life of a vessel may occur as a result of superior vessel maintenance performed, favorable ocean going and weather conditions the vessel is subjected to, superior quality of the shipbuilding or yard, or high freight market rates, which result in owners scrapping the vessels later due to the attractive cash flows. A decrease in the useful life of our vessels or in their residual value would have the effect of increasing the annual depreciation charge and possibly result in an impairment charge. A decrease in the useful life of a vessel may occur as a result of poor vessel maintenance performed, harsh ocean going and weather conditions the vessel is subjected to, or poor quality of the shipbuilding or yard. If regulations place limitations over the ability of a vessel to trade on a worldwide basis, we will adjust the vessel's useful life to end at the date such regulations preclude such vessel's further commercial use.

Impairment of vessels. We review our vessels for impairment when events or circumstances indicate the carrying amount of the asset may not be recoverable. In addition, we compare independent appraisals to our carrying value for indicators of impairment to our vessels. When such indicators are present, an asset is tested for recoverability by comparing the estimate of future undiscounted net operating cash flows expected to be generated by the use of the asset over its remaining useful life and its eventual disposition to its carrying amount. An impairment charge is recognized if the carrying value is in excess of the estimated future undiscounted net operating cash flows. The impairment loss is measured based on the excess of the carrying amount over the fair market value of the asset. The new lower cost basis would result in a lower annual depreciation than before the impairment.

Our estimates of fair market value assume that our vessels are all in good and seaworthy condition without need for repair and if inspected would be certified in class without notations of any kind. Our estimates are based on information available from various industry sources, including:

- reports by industry analysts and data providers that focus on our industry and related dynamics affecting vessel values;
- news and industry reports of similar vessel sales;
- approximate market values for our vessels or similar vessels that we have received from shipbrokers, whether solicited or unsolicited, or that shipbrokers have generally disseminated;
- offers that we may have received from potential purchasers of our vessels; and
- vessel sale prices and values of which we are aware through both formal and informal communications with shipowners, shipbrokers, industry analysts and various other shipping industry participants and observers.

As we obtain information from various industry and other sources, our estimates of fair market value are inherently uncertain. In addition, vessel values are highly volatile; as such, our estimates may not be indicative of the current or future fair market value of our vessels or prices that we could achieve if we were to sell them.

As of March 31, 2021, independent appraisals of the commercially and technically-managed VLGCs in our fleet had no indicators of impairment on any of our VLGCs in accordance with ASC 360 *Property, Plant, and Equipment*. No impairment charges were recognized for the year ended March 31, 2021.

As of March 31, 2020, independent appraisals of the commercially and technically-managed VLGCs in our fleet had indicators of impairment on ten of our VLGCs in accordance with ASC 360 *Property, Plant, and Equipment*. We

determined estimated net operating cash flows for these VLGCs by applying various assumptions regarding future time charter equivalent revenues net of commissions, operating expenses, scheduled drydockings, expected offhire and scrap values. These assumptions were based on historical data as well as future expectations. We estimated spot market rates by obtaining the trailing 10-year historical average spot market rates, as published by maritime industry researchers. Estimated outflows for operating expenses and drydocking expenses were based on historical and budgeted costs and were adjusted for assumed inflation. Utilization was based on our historical levels achieved in the spot market and estimates of a residual value consistent with scrap rates used in management's evaluation of scrap value. Such estimates and assumptions regarding expected net operating cash flows require considerable judgment and were based upon historical experience, financial forecasts and industry trends and conditions. Therefore, based on this analysis, we concluded that no impairment charge was necessary because we believe the vessel carrying values are recoverable. No impairment charges were recognized for the year ended March 31, 2020.

In addition, we performed a sensitivity analysis as of March 31, 2020 to determine the effect on recoverability of changes in TCE rates. The sensitivity analysis suggests that we would not incur an impairment charge on any of the commercially and technically-managed VLGCs in our fleet if daily TCE rates based on the 10-year historical average spot market rates were reduced by 30%. An impairment charge of approximately \$11.3 million on six of our VLGCs would be triggered by a reduction of 40% in the 10-year historical average spot market rates.

As of March 31, 2019, independent appraisals of the commercially and technically-managed VLGCs in our fleet had indicators of impairment on twenty-one of our VLGCs in accordance with ASC 360 *Property, Plant, and Equipment*. Based on the methodology described above on assessing our vessels for impairment, we concluded that no impairment charges were required for the year ended March 31, 2019.

In addition, we performed a sensitivity analysis as of March 31, 2019 to determine the effect on recoverability of changes in TCE rates. The sensitivity analysis suggests that we would not incur an impairment charge on any of the commercially and technically-managed VLGCs in our fleet if daily TCE rates based on the 10-year historical average spot market rates were reduced by 30%. An impairment charge of approximately \$104.1 million on twenty-one of our VLGCs would be triggered by a reduction of 40% in the 10-year historical average spot market rates.

The amount, if any, and timing of any impairment charges we may recognize in the future will depend upon the then current and expected future charter rates and vessel values, which may differ materially from those used in our estimates as of March 31, 2021, 2020 and 2019.

The table set forth below indicates the carrying value of each commercially and technically-managed vessel in our fleet as of March 31, 2021 and 2020 at which times none of the vessels listed in the table below was being held for sale:

Vessels	Capacity (Cbm)	Year Built	Date of Acquisition/ Delivery	Purchase Price/ Original Cost	Carrying value at March 31, 2021 ⁽¹⁾	Carrying value at March 31, 2020 ⁽²⁾
<i>Captain Nicholas ML</i> ⁽³⁾	82,000	2008	7/29/2013	\$ 68,156,079	\$ 45,607,917	\$ 48,770,251

<i>Challenger</i> ⁽³⁾	84,000	2015	12/11/2015	80,576,863	65,535,449	68,044,591
<i>Caravelle</i>	84,000	2016	2/25/2016	81,119,450	66,263,728	69,124,886
	1,842,000			\$ 1,727,946,790	\$ 1,387,186,457	\$ 1,444,995,559

- (1) Our vessels are stated at carrying values (refer to our accounting policy in Note 2 to our consolidated financial statements included herein) including deferred drydocking costs and, as of March 31, 2021, the carrying value of none of our vessels exceeded their estimated market value. On an aggregate fleet basis, the estimated market value of our vessels was higher than their carrying value as of March 31, 2021 by \$82.1 million. There were no indications of impairment on any of our vessels and no impairment was recorded during the year ended March 31, 2021.
- (2) Our vessels are stated at carrying values (refer to our accounting policy in Note 2 to our consolidated financial statements included herein) including deferred drydocking costs and, as of March 31, 2020, the carrying value of ten of our vessels exceeded their estimated market value. On an aggregate fleet basis, the estimated market value of our vessels was higher than their carrying value as of March 31, 2020 by \$5.6 million. No impairment was recorded during the year ended March 31, 2020 as we believed that the carrying value of our vessels was fully recoverable.
- (3) VLGCs for which we believe, as of March 31, 2020, that the estimated fair value is lower than the VLGCs' carrying value. We believe that the aggregate carrying value of these vessels exceeds their aggregate estimated fair value by \$13.1 million as of March 31, 2020. However, as described above, the estimated net operating cash flows for each of these VLGCs were higher than their respective carrying amounts and consequently, no impairment loss was recognized.

Drydocking and special survey costs. We must periodically drydock each of our vessels to comply with industry standards, regulatory requirements and certifications. The classification societies provide guidelines applicable to LPG vessels relating to extended intervals for drydocking. Generally, we are required to drydock a vessel under 15 years of age once every five years unless an extension of the drydocking to seven and one-half years is granted by the classification society and the vessel is not older than 20 years of age.

Drydocking costs are accounted under the deferral method whereby the actual costs incurred are deferred and are amortized on a straight-line basis over the period through the date the next drydocking is scheduled to become due. Costs deferred include expenditures incurred relating to shipyard costs, hull preparation and painting, inspection of hull structure and mechanical components, steelworks, machinery works, and electrical works. Drydocking costs do not include vessel operating expenses such as replacement parts, crew expenses, provisions, luboil consumption, and insurance during the drydock period. Expenses related to regular maintenance and repairs of our vessels are expensed as incurred, even if such maintenance and repair occurs during the same time period as our drydocking.

If a drydocking is performed prior to the scheduled date, the remaining unamortized balances are immediately written off. Unamortized balances of vessels that are sold are written-off and included in the calculation of the resulting gain or loss in the period of the vessel's sale. The nature of the work performed and the number of drydockings undertaken in a given period determine the level of drydocking expenditures.

Fair Value of Derivative Instruments. We use derivative financial instruments to manage interest rate risks. The fair value of our interest rate swap agreements is the estimated amount that we would receive or pay to terminate the agreements at the reporting date, taking into account current interest rates and the current credit worthiness of both us and the swap counterparties. The estimated amount is the present value of estimated future cash flows, being equal to the difference between the benchmark interest rate and the fixed rate in the interest rate swap agreement, multiplied by the notional principal amount of the interest rate swap agreement at each interest reset date.

The fair value of our interest swap agreements at the end of each period is most significantly affected by the interest rate implied by the LIBOR interest yield curve, including its relative steepness. Interest rates have experienced significant volatility in recent years in both the short and long term. While the fair value of our interest rate swap agreements is typically more sensitive to changes in short-term rates, significant changes in the long-term benchmark interest rates also materially impact our interest.

The fair value of our interest swap agreements is also affected by changes in our own and our counterparty specific credit risk included in the discount factor. Our estimate of our counterparty's credit risk is based on the credit default swap spread of the relevant counterparty which is publicly available. The process of determining our own credit worthiness requires significant judgment in determining which source of credit risk information most closely matches our risk profile, which includes consideration of the margin we would be able to secure for future financing. A 10% increase / decrease in our own or our counterparty credit risk would not have had a significant impact on the fair value of our interest rate swaps.

The LIBOR interest rate yield curve and our specific credit risk are expected to vary over the life of the interest rate swap agreements. The larger the notional amount of the interest rate swap agreements outstanding and the longer the remaining duration of the interest rate swap agreements, the larger the impact of any variability in these factors will be on the fair value of our interest rate swaps. We economically hedge the interest rate exposure on a significant amount of our long-term debt and for long durations. As such, we have experienced, and we expect to continue to experience, material variations in the period-to-period fair value of our derivative instruments.

Although we measure the fair value of our derivative instruments utilizing the inputs and assumptions described above, if we were to terminate the interest rate swap agreements at the reporting date, the amount we would pay or receive to terminate the derivative instruments may differ from our estimate of fair value. If the estimated fair value differs from the actual termination amount, an adjustment to the carrying amount of the applicable derivative asset or liability would be recognized in earnings for the current period. Such adjustments have been and could be material in the future.

Results of Operations For The Year Ended March 31, 2021 As Compared To The Year Ended March 31, 2020

Revenues

The following table compares revenues for the years ended March 31:

	2021	2020	Increase / (Decrease)	Percent Change
Net pool revenues—related party	\$ 292,679,614	\$ 298,079,123	\$ (5,399,509)	(1.8)%
Time charter revenues	19,492,595	34,111,230	(14,618,635)	(42.9)%
Other revenues, net	3,766,603	1,239,645	2,526,958	203.8 %
Total	\$ 315,938,812	\$ 333,429,998	\$ (17,491,186)	(5.2)%

Revenues, which represent net pool revenues—related party, time charters and other revenues, net, were \$315.9 million for the year ended March 31, 2021, a decrease of \$17.5 million, or 5.2%, from \$333.4 million for the year ended March 31, 2020. The decrease is primarily attributable to a reduction of average TCE rates and decreased fleet utilization. Average TCE rates of \$39,606 for the year ended March 31, 2021 decreased from \$42,798 for the year ended March 31, 2020. During the year ended March 31, 2021, we recognized a reallocation of prior period pool profits based on a periodic review of actual vessel performance in accordance with the pool participation agreements. This reallocation resulted in a \$707 decrease in our fleet's overall TCE rates for the year ended March 31, 2021 due to adjustments related to the relative speed and consumption performance of all vessels participating in the Helios Pool. This compares to a \$240 increase in our fleet's overall TCE rates for reallocation of prior period pool profits during the year ended March 31, 2020. Excluding this reallocation for both years, TCE rates decreased by \$2,245 when comparing the year ended March 31, 2021 to the year ended March 31, 2020, primarily driven by a reduction in spot market rates. The Baltic Exchange Liquid Petroleum Gas Index, an index published daily by the Baltic Exchange for the spot market rate for the benchmark Ras Tanura-Chiba route (expressed as U.S. dollars per metric ton), averaged \$55.703 for the year ended March 31, 2021 compared to an average of \$67.050 for the year ended March 31, 2020. Our fleet utilization decreased from 95.4% during the year ended March 31, 2020 to 92.8% during the year ended March 31, 2021.

Charter Hire Expenses

Charter hire expenses for the vessels chartered in from third parties were \$18.1 million for the year ended March 31, 2021 compared to \$9.9 million for the year ended March 31, 2020. The increase of \$8.2 million, or 83.9%, was caused by an increase in time chartered-in days, which increased from 426 for the year ended March 31, 2020 to 740 for the year ended March 31, 2021.

Vessel Operating Expenses

Vessel operating expenses were \$78.2 million during the year ended March 31, 2021, or \$9,741 per vessel per calendar day, which is calculated by dividing vessel operating expenses by calendar days for the relevant time period for the vessels that were in our fleet. This was an increase of \$6.7 million, or 9.4%, from \$71.5 million, or \$8,877 per vessel per calendar day, for the year ended March 31, 2020. The increase in vessel operating expenses was primarily the result of a \$6.0 million, or \$755 per vessel per calendar day, increase in operating expenses related to repairs and maintenance, spares and stores, and coolant costs, which is inclusive of an increase of \$0.4 million, or \$54 per vessel per calendar day, in operating expenses related to the drydocking of vessels.

General and Administrative Expenses

General and administrative expenses were \$33.9 million for the year ended March 31, 2021, an increase of \$10.5 million, or 45.1%, from \$23.4 million for the year ended March 31, 2020. This was driven by the recording of a contingent liability of \$4.0 million related to a disputed claim relating to one of our VLGCs readiness to lift a cargo scheduled by a charterer and increases of \$2.0 million in annual cash bonuses to certain employees, \$3.1 million in salaries, wages and benefits, and \$1.4 million in higher insurance premiums.

Interest and Finance Costs

Interest and finance costs amounted to \$27.6 million for the year ended March 31, 2021, a decrease of \$8.5 million from \$36.1 million for the year ended March 31, 2020. The decrease of \$8.5 million during the year ended March 31, 2021 was due to a decrease of \$10.6 million in interest incurred on our long-term debt, primarily resulting from a decrease in average indebtedness and a reduced margin from the refinancing of the Commercial Tranche of the 2015 Facility, partially offset by a reduction of \$2.2 million in amortization of deferred financing fees and loan expenses. Average indebtedness, excluding deferred financing fees, decreased from \$683.9 million for the year ended March 31, 2020 to \$633.7 million for the year ended March 31, 2021. As of March 31, 2021, the outstanding balance of our long-term debt, excluding deferred financing fees, was \$602.1 million.

Unrealized Gain/(Loss) on Derivatives

Unrealized gain on derivatives amounted to approximately \$7.2 million for the year ended March 31, 2021 compared to an unrealized loss of \$18.2 million for the year ended March 31, 2020. The favorable \$25.4 million difference is primarily attributable to an increase of \$20.2 million in favorable fair value changes to our interest rate swaps resulting from changes in forward LIBOR yield curves and \$5.2 million in favorable variances related to the settlement in the current period of our FFA positions.

Realized Gain/(Loss) on Derivatives

Realized loss on derivatives was \$4.6 million for the year ended March 31, 2021, compared to a realized gain of \$2.8 million for the year ended March 31, 2020. The unfavorable \$7.4 million change is primarily attributable to (1) fluctuations in floating LIBOR resulting in a \$6.2 million unfavorable variance on realized losses in the current period on our interest rate swaps and (2) additional realized losses incurred related to settlements on our FFA positions of \$1.2 million.

Results of Operations For The Year Ended March 31, 2020 As Compared To The Year Ended March 31, 2019

For a discussion of the year ended March 31, 2020 compared to the year ended March 31, 2019, please refer to Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended March 31, 2020.

Operating Statistics and Reconciliation of GAAP to non-GAAP Financial Measures

To supplement our financial statements presented in accordance with U.S.GAAP, we present certain operating statistics and non-GAAP financial measures to assist in the evaluation of our business performance. These non-GAAP financial measures include Adjusted earnings before interest, taxes, depreciation and amortization (“Adjusted EBITDA”) and time charter equivalent rate. These non-GAAP financial measures may not be comparable to similarly titled measures used by other companies and should not be considered in isolation or as a substitute for net income and revenues, which are the most directly comparable measures of performance prepared in accordance with GAAP.

We use these non-GAAP financial measures in assessing the performance of our ongoing operations and in planning and forecasting future periods. These adjusted measures provide a more comparable basis to analyze operating results and earnings and are measures commonly used by shareholders to measure our performance. We believe that these adjusted measures, when considered together with the corresponding U.S. GAAP financial measures and the

reconciliations to those measures, provide meaningful supplemental information to assist investors and analysts in understanding our business results and assessing our prospects for future performance.

(in U.S. dollars, except fleet data)	Year ended March 31, 2021	Year ended March 31, 2020	Year ended March 31, 2019
Financial Data			
Adjusted EBITDA	\$ 188,555,935	\$ 233,240,304	\$ 64,408,989
Fleet Data			
Calendar days ⁽¹⁾	8,030	8,052	8,030
Time chartered-in days ⁽¹⁾	740	426	10
Available days ⁽¹⁾	8,505	8,088	7,997
Operating days ⁽¹⁾	7,891	7,715	7,189
Fleet utilization ⁽¹⁾	92.8 %	95.4 %	89.9 %
Average Daily Results			
Time charter equivalent rate	\$ 39,606	\$ 42,798	\$ 21,746
Daily vessel operating expenses ⁽¹⁾	\$ 9,741	\$ 8,877	\$ 8,329

- (1) Refer to “Important Financial and Operational Terms and Concepts” above for definitions of calendar days, time chartered-in days, available days, operating days, fleet utilization, and daily vessel operating expenses.

Adjusted EBITDA

Adjusted EBITDA is an unaudited non-U.S. GAAP financial measure and represents net income/(loss) before interest and finance costs, unrealized (gain)/loss on derivatives, realized (gain)/loss on interest rate swaps, stock-based compensation expense, impairment, and depreciation and amortization and is used as a supplemental financial measure by management to assess our financial and operating performance. We believe that adjusted EBITDA assists our management and investors by increasing the comparability of our performance from period to period. This increased comparability is achieved by excluding the potentially disparate effects between periods of derivatives, interest and finance costs, stock-based compensation expense, impairment, and depreciation and amortization expense, which items are affected by various and possibly changing financing methods, capital structure and historical cost basis and which items may significantly affect net income/(loss) between periods. We believe that including adjusted EBITDA as a financial and operating measure benefits investors in selecting between investing in us and other investment alternatives.

Adjusted EBITDA has certain limitations in use and should not be considered an alternative to net income/(loss), operating income/(loss), cash flow from operating activities or any other measure of financial performance presented in accordance with GAAP. Adjusted EBITDA excludes some, but not all, items that affect net income/(loss). Adjusted EBITDA as presented below may not be computed consistently with similarly titled measures of other companies and, therefore, might not be comparable with other companies.

The following table sets forth a reconciliation of net income/(loss) to Adjusted EBITDA (unaudited) for the periods presented:

(in U.S. dollars)	Year ended March 31, 2021	Year ended March 31, 2020	Year ended March 31, 2019
Net income/(loss)	\$ 92,564,653	\$ 111,841,258	\$ (50,945,905)
Interest and finance costs	27,596,124	36,105,541	40,649,231
Unrealized (gain)/loss on derivatives	(7,202,880)	18,206,769	7,816,401
Realized (gain)/loss on interest rate swaps	3,779,363	(2,403,480)	(3,788,123)
Stock-based compensation expense	3,356,199	3,227,686	5,476,234
Depreciation and amortization	68,462,476	66,262,530	65,201,151
Adjusted EBITDA	\$ 188,555,935	\$ 233,240,304	\$ 64,408,989

Time charter equivalent rate

Time charter equivalent rate, or TCE rate, is a non-U.S. GAAP measure of the average daily revenue performance of a vessel. TCE rate is a shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (such as time charters, voyage charters) under which the vessels may be employed between the periods. Our method of calculating TCE rate is to divide revenue net of voyage expenses by operating days for the relevant time period, which may not be calculated the same by other companies.

The following table sets forth a reconciliation of revenues to TCE rate (unaudited) for the periods presented:

(in U.S. dollars, except operating days)	Year ended March 31, 2021	Year ended March 31, 2020	Year ended March 31, 2019
Numerator:			
Revenues	\$ 315,938,812	\$ 333,429,998	\$ 158,032,485
Voyage expenses	(3,409,650)	(3,242,923)	(1,697,883)
Time charter equivalent	\$ 312,529,162	\$ 330,187,075	\$ 156,334,602
Pool adjustment*	5,579,857	(1,851,722)	—
Time charter equivalent excluding pool adjustment*	\$ 318,109,019	\$ 328,335,353	\$ 156,334,602
Denominator:			
Operating days	7,891	7,715	7,189
TCE rate:			
Time charter equivalent rate	\$ 39,606	\$ 42,798	\$ 21,746
TCE rate excluding pool adjustment*	\$ 40,313	\$ 42,558	\$ 21,746

* Adjusted for the effects of reallocations of pool profits in accordance with the pool participation agreements due to adjustments related to speed and consumption performance of the vessels operating in the Helios Pool.

We determine operating days for each vessel based on the underlying vessel employment, including our vessels in the Helios Pool, or the Company Methodology. If we were to calculate operating days for each vessel within the Helios Pool as a variable rate time charter, or the Alternate Methodology, our operating days and fleet utilization would be increased with a corresponding reduction to our TCE rate. Operating data using both methodologies is as follows:

Company Methodology:	Year ended March 31, 2021	Year ended March 31, 2020	Year ended March 31, 2019
Operating Days	7,891	7,715	7,189
Fleet Utilization	92.8 %	95.4 %	89.9 %
Time charter equivalent rate	\$ 39,606	\$ 42,798	\$ 21,746
Alternate Methodology:			
Operating Days	8,505	8,088	7,991
Fleet Utilization	100.0 %	100.0 %	99.9 %
Time charter equivalent rate	\$ 36,747	\$ 40,824	\$ 19,564

We believe that Our Methodology using the underlying vessel employment provides more meaningful insight into market conditions and the performance of our vessels.

Liquidity and Capital Resources

Our business is capital intensive, and our future success depends on our ability to maintain a high-quality fleet. As of March 31, 2021, we had cash and cash equivalents of \$79.3 million, current restricted cash of \$5.3 million and non-current restricted cash of \$0.1 million.

Our primary sources of capital during the year ended March 31, 2021 were \$170.6 million in cash generated from operations \$24.0 million in net proceeds from the refinancing of the *Cresques*, \$15.0 million in proceeds from the maturity of U.S. treasury bills, and \$2.8 million in net proceeds from the refinancing of the 2015 AR Facility. As of March 31, 2021, the outstanding balance of our long-term debt, net of deferred financing fees of \$10.6 million, was \$591.5 million including \$51.8 million of principal on our long-term debt scheduled to be repaid during the year ending March 31, 2022.

On August 5, 2019, our Board of Directors authorized the repurchase of up to \$50.0 million of our common shares through the period ended December 31, 2020. On February 3, 2020, our Board of Directors authorized an increase to our Common Share Repurchase Program to repurchase up to an additional \$50.0 million of our common shares. On December 29, 2020, our Board of Directors authorized an extension of and an increase to the remaining authorization of \$41.4 million under our Common Share Repurchase Program, which was set to expire on December 31, 2020. Following this Board action, we are now authorized to repurchase up to \$50.0 million of our common shares from December 29, 2020 through December 31, 2021. As of March 31, 2021, our total purchases under this authority totaled 5.5 million of our common shares for an aggregate consideration of \$60.7 million. Following the increase and extension of the program, we currently have \$47.9 million of available share repurchase authority remaining. Purchases may be made at our discretion in the form of open market repurchase programs, privately negotiated transactions, accelerated share repurchase programs or a combination of these methods. The actual amount and timing of share repurchases are subject to capital availability, our determination that share repurchases are in the best interest of our shareholders, and market conditions. We are not obligated to make any common share repurchases under the Common Share Repurchase Program.

On April 23, 2020, we refinanced a 2015-built VLGC, the *Cresques*, pursuant to a memorandum of agreement and a bareboat charter agreement (“*Cresques Japanese Financing*”). On April 21, 2020, we prepaid \$28.5 million, which represented the portion of the then outstanding principal of the 2015 Facility related to the 2015-built VLGC *Cresques*, using cash on hand prior to the closing of the *Cresques Japanese Financing*. Pursuant to the *Cresques Japanese Financing*, we refinanced a 2015-built VLGC, the *Cresques*, from which the proceeds of \$52.5 million increased our unrestricted cash by \$24.0 million after taking into account the aforementioned \$28.5 million we prepaid under the 2015 Facility. Refer to Note 9 to the consolidated financial statements for further details on the prepayment of the 2015 Facility and the refinancing of the *Cresques*.

On April 29, 2020, we amended and restated the 2015 Facility, to among other things, refinance the Original Commercial Tranche through the entry into the New Facilities (as defined above), including (i) a new senior secured term loan facility in an aggregate principal amount of \$155.8 million, which was used to prepay in full the outstanding principal amount under the Original Commercial Tranche and for general corporate purposes and (ii) a new senior secured revolving credit facility in an aggregate principal amount of up to \$25.0 million, which we intend to use for general corporate purposes. Refer to Note 9 to the consolidated financial statements for further details on the refinancing of the Original Commercial Tranche of the 2015 Facility.

On June 11, 2018, we refinanced our 2007-built VLGC, the *Captain John NP*, pursuant to a memorandum of agreement and a bareboat charter agreement (the “*CJNP Japanese Financing*”). In connection therewith, we transferred the *Captain John NP* to the buyer for \$48.3 million and, as part of the agreement, CJNP LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 6 years, with purchase options from the end of year 2 through a mandatory buyout by 2024. We continue to technically manage, commercially charter, and operate the *Captain John NP*. We received \$21.7 million, which increased our unrestricted cash, as part of the transaction, with \$26.6 million to be retained by the buyer as a deposit (the “*CJNP Deposit*”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 6-year bareboat charter term. On October 13, 2020, we exercised the repurchase option under the *CJNP Japanese Financing* and repurchased the *Captain John NP* for \$18.3 million in cash and the application of the *CJNP Deposit* amount.

On February 2, 2021, we announced a tender offer to purchase up to 7,407,407, or about 14.8%, of our then outstanding common shares at a price of \$13.50 per share. Based on preliminary results indicating that the tender offer was oversubscribed, we elected to increase the number of shares accepted for payment by 997,739, or slightly less than 2% of our then outstanding shares. The number of shares we purchased and canceled from each tendering shareholder was prorated so our purchases in the tender offer totaled of 8,405,146 shares, or approximately 16.8% of our then outstanding common shares, for an aggregate purchase price of approximately \$113.5 million.

Operating expenses, including expenses to maintain the quality of our vessels in order to comply with international shipping standards and environmental laws and regulations, the funding of working capital requirements, long-term debt repayments, financing costs, and commitments under the bareboat charter for a newbuilding dual-fuel VLGC as described in Note 18 to our consolidated financial statements represent our short-term, medium-term and long-term liquidity needs as of March 31, 2021. We anticipate satisfying our liquidity needs for at least the next twelve months with cash on hand and cash from operations. We may also seek additional liquidity through alternative sources of debt financings and/or through equity financings by way of private or public offerings. However, if these sources are insufficient to satisfy our short-term liquidity needs, or to satisfy our future medium-term or long-term liquidity needs, we may need to seek alternative sources of financing and/or modifications of our existing credit facility and financing arrangements. There is no assurance that we will be able to obtain any such financing or modifications to our existing credit facility and financing arrangements on terms acceptable to us, or at all.

As part of our growth strategy, we will continue to consider strategic opportunities, including the acquisition of additional vessels. We may choose to pursue such opportunities through internal growth or joint ventures or business acquisitions. We expect to finance the purchase price of any future acquisitions either through internally generated funds, public or private debt financings, public or private issuances of additional equity securities or a combination of these forms of financing.

Cash Flows

The following table summarizes our cash and cash equivalents provided by/(used in) operating, financing and investing activities for the periods presented:

	March 31, 2021	March 31, 2020	March 31, 2019
Net cash provided by operating activities	\$ 170,595,696	\$ 169,036,407	\$ 8,883,433
Net cash provided by/(used in) investing activities	1,021,090	(33,144,834)	(4,520,304)
Net cash used in financing activities	(174,484,467)	(114,651,756)	(67,005,777)
Net increase/(decrease) in cash, cash equivalents, and restricted cash	\$ (2,661,928)	\$ 20,916,481	\$ (62,895,734)

Operating Cash Flows. Net cash provided by operating activities for the year ended March 31, 2021 was \$170.6 million compared with \$169.0 million for the year ended March 31, 2020. The increase is primarily related to changes in working capital, mainly from amounts due from the Helios Pool as distributions from the Helios Pool are impacted by the timing of the completion of voyages and spot market rates, partially offset by a reduction in operating income.

Net cash provided by operating activities for the year ended March 31, 2020 was \$169.0 million compared with \$8.9 million for the year ended March 31, 2019. The increase is primarily related to a sharp increase in our operating income for the year ended March 31, 2020 from increased TCE rates.

Net cash flow from operating activities depends upon our overall profitability, market rates for vessels employed on voyage charters, charter rates agreed to for time charters, the timing and amount of payments for drydocking expenditures and unscheduled repairs and maintenance, fluctuations in working capital balances and bunker costs.

Investing Cash Flows. Net cash provided by investing activities was \$1.0 million for the year ended March 31, 2021, compared with net cash used in investing activities of \$33.1 million for the year ended March 31, 2020. For the year ended March 31, 2021, net cash provided by investing activities was comprised of \$15.0 million in proceeds from the maturity of short-term investments, partially offset by our capital expenditures of \$9.5 million and \$4.7 million in purchases of investment securities.

Net cash used in investing activities was \$33.1 million for the year ended March 31, 2020, compared with net cash used in investing activities of \$4.5 million for the year ended March 31, 2019. For the year ended March 31, 2020, net cash used in investing activities was comprised of our capital expenditures of \$19.9 million and \$14.9 million in purchases of short-term investments, partially offset by \$1.8 million in proceeds from the sale of investment securities. For the year ended March 31, 2019, net cash used in investing activities comprised primarily of our capital expenditures of \$4.0 million and \$0.5 million in purchases of short-term investments.

Financing Cash Flows. Net cash used in financing activities was \$174.5 million for the year ended March 31, 2021, compared with net cash used in financing activities of \$114.7 million for the year ended March 31, 2020. For the year ended March 31, 2021, net cash used in financing activities consisted of the repurchase of common stock of \$126.2 million, repayments of long-term debt of \$99.4 million, and payments of financing costs of \$4.2 million, partially offset by \$55.4 million of proceeds from long-term debt borrowings.

Net cash used in financing activities was \$114.7 million for the year ended March 31, 2020, compared with net cash used in financing activities of \$67.0 million for the year ended March 31, 2019. For the year ended March 31, 2020, net cash used in financing activities consisted of repayments of long-term debt of \$64.0 million and treasury stock repurchases of \$50.6 million. For the year ended March 31, 2019, net cash used in financing activities consisted of repayments of long-term debt of \$130.2 million, treasury stock repurchases of \$1.3 million, and payment of debt financing costs of \$0.6 million, partially offset by proceeds from long-term debt borrowings of \$65.1 million related to the CJNP Japanese Financing, CMNL/CJNPL Japanese Financing, and our 2018 refinancing of our 2008-built VLGC, the *Captain Nicholas ML*, pursuant to a memorandum of agreement and a bareboat charter agreement (the “CNML Japanese Financing”). For more information with respect to the CMNL/CJNP Japanese Financing, the CMNL/CJNP Japanese Financing and the CNML Japanese Financing please see Note 9 to our audited consolidated financial statements included herein

Capital Expenditures. LPG transportation is a capital-intensive business, requiring significant investment to maintain an efficient fleet and to stay in regulatory compliance.

We are generally required to complete a drydock a vessel once every 30 to 36 months for inspection of the underwater parts of the vessel. However, for vessels not exceeding 15 years that have means to facilitate underwater inspection in lieu of drydocking, the drydocking can be skipped and be conducted concurrently with the special survey. Certain cargo vessels that meet the system requirements set by classification societies may qualify for extended drydocking, which extends the 5-year period to 7.5 years, by replacing certain dry-dockings with in-water surveys. Drydocking each vessel takes approximately 10 to 20 days. We spend significant amounts for scheduled drydocking (including the cost of classification society surveys) for each of our vessels.

As our vessels age and our fleet expands, our drydocking expenses will increase. We estimate the current cash outlay for a VLGC special survey to be approximately \$1.0 million per vessel (excluding any capital improvements, such as scrubbers and ballast water management systems, to the vessel that may be made during such drydockings) and the cost of an intermediate survey to be between \$100,000 and \$200,000 per vessel. Ongoing costs for compliance with environmental regulations are primarily included as part of our drydocking and classification society survey costs. Additionally, ballast water management systems are expected to be installed on three of our VLGCs between November 2021 and July 2024 for approximately \$0.8 million per vessel. Further, in October 2016, the International Maritime Organization (the “IMO”) set January 1, 2020 as the implementation date for vessels to comply with its low sulfur fuel oil requirement, which cuts sulfur levels from 3.5% to 0.5%. We may comply with this regulation by (i) consuming compliant fuels on board (0.5% sulfur), which are readily available globally since our last quarterly filing, but at a significantly higher cost; (ii) continuing to consume high-sulfur fuel oil by installing scrubbers for cleaning of the exhaust gases to levels at or below compliance with regulations (0.5% sulfur); or (iii) by retrofitting vessels to be powered by liquefied natural gas or LPG, which may be a viable option subject to the relative pricing of compliant low-sulfur fuel (0.5% sulfur) and LPG. Such costs of compliance with the IMO’s low sulfur fuel oil requirement are significant and could have an adverse effect on our operations and financial results. Currently, eleven of our technically-managed VLGCs are equipped with scrubbers while one additional vessel is expected to be equipped during June 2021. We had contractual commitments for scrubber purchases of \$1.5 million as of March 31, 2021. These amounts only reflect firm commitments for the purchase of scrubber parts and materials as of March 31, 2021. We are not aware of any other proposed regulatory changes or environmental

laws that we expect to have a material impact on our current or future results of operations that we have not already considered. Please see "Item 1A. Risk Factors—Risks Relating to Our Company—We may incur increasing costs for the drydocking, maintenance or replacement of our vessels as they age, and, as our vessels age, the risks associated with older vessels could adversely affect our ability to obtain profitable charters."

On March 31, 2021, we entered into a thirteen year bareboat agreement to charter-in a newbuilding dual-fuel VLGC that is expected to be delivered from Kawasaki Heavy Industries in March 2023. The financing structure of the newbuilding is analogous to that of our Japanese financings pursuant to which a third-party will purchase the vessel and bareboat charter the vessel to us. As part of the agreement, we control the building of the vessel and its use after delivery. The vessel will be built to our specifications; we will supervise the building of the vessel to meet these specifications; and we will technically and commercially manage the vessel after its delivery. Under the agreement, we have commitments of \$24 million of predelivery costs as well as the cost of additional features to meet our specifications and supervision costs for an aggregate total of approximately \$25 million. As of March 31, 2021, we expect to settle the commitments under the agreement with installment payments totaling \$16.0 million in the 12 months following March 31, 2021, of which \$8.0 million was paid in April 2021, and approximately \$9.0 million during the year ended March 31, 2023. As of March 31, 2021, construction of the vessel has not commenced.

Description of Our Debt Obligations

See Note 9 to our consolidated financial statements included herein for a description of our debt obligations.

Recent Accounting Pronouncements

Refer to Note 2 of our consolidated financial statements included herein.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to various market risks, including changes in interest rates, foreign currency fluctuations, and inflation.

Interest Rate Risk

The LPG shipping industry is capital intensive, requiring significant amounts of investment. Much of this investment is provided in the form of long-term debt. Our debt agreement contains interest rates that fluctuate with LIBOR. We have entered into interest rate swap agreements to hedge a majority of our exposure to fluctuations of interest rate risk associated with our 2015 AR Facility. We have hedged \$366.3 million of amortizing principal of the 2015 AR Facility as of March 31, 2021 and thus increasing interest rates could adversely impact our future earnings. For the 12 months following March 31, 2021, a hypothetical increase or decrease of 20 basis points in the underlying LIBOR rates would result in an increase or decrease of our interest expense on our unhedged interest-bearing debt by approximately \$0.1 million assuming all other variables are held constant. See Notes 9 and 19 to our audited consolidated financial statements included herein for a description of our debt obligations and interest rate swaps, respectively.

Foreign Currency Exchange Rate Risk

Our primary economic environment is the international LPG shipping market. This market utilizes the U.S. dollar as its functional currency. Consequently, our revenues are in U.S. dollars and the majority of our operating expenses are in U.S. dollars. However, we incur some of our expenses in other currencies, particularly Euro, Singapore Dollar, Danish Krone, Japanese Yen, British Pound Sterling, and Norwegian Krone. The amount and frequency of some of these expenses, such as vessel repairs, supplies and stores, may fluctuate from period to period. Depreciation in the value of the U.S. dollar relative to other currencies will increase the cost of us paying such expenses. For the year ended March 31, 2021, 23% of our expenses (excluding depreciation and amortization, interest and finance costs and gain/loss on derivatives), were in currencies other than the U.S. dollar, and as a result we expect the foreign exchange risk associated with these operating expenses to be immaterial. We do not have foreign exchange exposure in respect of our credit facility and interest rate swap agreements, as these are denominated in U.S. dollars.

The portion of our business conducted in other currencies could increase in the future, which could expand our exposure to losses arising from currency fluctuations.

Inflation

Certain of our operating expenses, including crewing, insurance and drydocking costs, are subject to fluctuations caused by market forces. Crewing costs in particular have risen over the past number of years as a result of a shortage of trained crews. Please see "Item 1A. Risk Factors—We may be unable to attract and retain key management personnel and other employees in the shipping industry without incurring substantial expense as a result of rising crew costs, which may negatively affect the effectiveness of our management and our results of operations." A shortage of qualified officers makes it more difficult to crew our vessels and may increase our operating costs. If this shortage were to continue or worsen, it may impair our ability to operate and could have an adverse effect on our business, financial condition and operating results. Inflationary pressures on bunker (fuel and oil) costs could have a material effect on our future operations if the number of vessels employed on voyage charters increases. In the case of any vessels that are time-chartered to third parties, it is the charterers who pay for the fuel. If our vessels are employed under voyage charters, freight rates are generally sensitive to the price of fuel. However, a sharp rise in bunker prices may have a temporary negative effect on our results since freight rates generally adjust only after prices settle at a higher level. Please see "Item 1A. Risk Factors—Changes in fuel, or bunker, prices may adversely affect profits."

Forward Freight Agreements

From time to time, we may take hedging or speculative positions in derivative instruments, including FFAs. The usage of such derivatives can lead to fluctuations in our reported results from operations on a period-to-period basis. Generally, freight derivatives may be used to hedge our exposure to the spot market for a specified route and period of time. Upon settlement, if the contracted charter rate is less than the average of the rates reported on an identified index for the specified route and time period, the seller of the FFA is required to pay the buyer the settlement sum, being an amount equal to the difference between the contracted rate and the settlement rate, multiplied by the number of days of the specified period. Conversely, if the contracted rate is greater than the settlement rate, the buyer is required to pay the seller the settlement sum. If we take positions in FFAs or other derivative instruments we could suffer losses in the settling or termination of these agreements. This could adversely affect our results of operations and cash flows. During the year ended March 31, 2020, we entered into a FFAs as an economic hedge to reduce the risk on vessels trading in the spot market and to take advantage of short-term fluctuations in market prices. We do not classify these freight derivatives as cash flow hedges for accounting purposes and therefore gains or losses are recognized in earnings. As of March 31, 2020, we had FFA derivative instruments classified under current liabilities of \$2.6 million. We had no outstanding FFA positions as of March 31, 2021.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

The financial information required by this Item is set forth on pages F-1 to F-33 and is filed as part of this annual report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this Annual Report on Form 10-K.

Based on this evaluation, our management concluded that our disclosure controls and procedures were effective as of March 31, 2021. Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits to the Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Commission rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining an adequate system of internal control over financial reporting, as defined in the Rule 13a-15(f) and 15d-15(f) of the Exchange Act. Our management conducted an evaluation of our effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Our internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of our financial statements in accordance with U.S. GAAP, and that our receipts and expenditures are being made in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements. Because of the inherent limitations of internal controls over financial reporting, misstatements may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on the evaluation, management concluded that our internal control over financial reporting was effective as of March 31, 2021.

The effectiveness of our internal control over financial reporting as of March 31, 2021 has been audited by Deloitte Certified Public Accountants S.A., an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Control over Financial Reporting

Our management with the participation of our principal executive officer and principal financial officer or persons performing similar functions has determined that no change in our internal control over financial reporting (as that term is defined in Rules 13(a)-15(f) and 15(d)-15(f) of the Exchange Act) occurred during the fourth fiscal quarter of our fiscal year ended March 31, 2021 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Limitation on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and our internal control over financial reporting, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and our internal control over financial reporting must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

ITEM 9B. OTHER INFORMATION.

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

Class II Directors — Terms expiring at the Company's 2021 Annual Meeting of Shareholders

Øivind Lorentzen, 70, has served as a director of the Company since July 2013 and is currently the Chairman of the Audit Committee. Mr. Lorentzen is currently Managing Director of Northern Navigation, LLC. Mr. Lorentzen was Non-Executive Vice Chairman of SEACOR Holdings Inc. from early 2015 to April 2021, prior to which he was its Chief Executive Officer. From 1990 until September 2010, Mr. Lorentzen was President of Northern Navigation International, Ltd., an investment management and ship-owning company concentrating in specialized marine transportation and ship finance. From 1979 to 1990, Mr. Lorentzen was Managing Director of Lorentzen Empreendimentos S.A., an industrial and shipping group in Brazil, and he served on its board of directors until December 2005. From 2001 to 2008, Mr. Lorentzen was Chairman of NFC Shipping Funds, a leading private equity fund in the maritime industry. Mr. Lorentzen is a director of the Global Maritime Forum, an international not-for-profit organization dedicated to promoting the potential of the global maritime industry. Mr. Lorentzen earned his undergraduate degree at Harvard College and his MBA from Harvard Business School. Mr. Lorentzen's expertise in the maritime and shipping industries provides him with the important qualifications and skills to serve as a member of our Board of Directors.

John C. Lycouris, 71, serves as Chief Executive Officer of Dorian LPG (USA) LLC and is a director of the Dorian LPG Ltd. since its inception in July 2013. Previously, Mr. Lycouris was a Director and VP/Treasurer of Eagle Ocean, Inc. beginning in 1993 and of Eagle Ocean Transport, Inc. beginning in 2004, where he attended to pre- and post-delivery financings of newbuilding and second-hand vessels in the tanker, LPG, and dry bulk sectors, including execution of a multitude of sale and purchase contracts. Mr. Lycouris' responsibilities also included operational and technical matters as well as investment strategy for a number of portfolios of foreign principals represented by the Companies. Before joining Eagle Ocean, Inc., Mr. Lycouris served as Director of Peninsular Maritime Ltd. a ship brokerage firm in London, UK, which he joined in 1974, and managed the Finance and Accounts departments. Mr. Lycouris holds a BS in Business Administration from Ithaca College and an MBA in Finance from Cornell University. Mr. Lycouris' successful leadership and executive experience, along with his deep knowledge of the commercial, technical and operational aspects of shipping in general and LPG shipping in particular, provide him with the qualifications and skills to serve as a member of our Board of Directors.

Ted Kalborg, 70, has served as a director of the Company since December 12, 2014 and is currently a member of the Audit Committee and Compensation Committee. Mr. Kalborg is the founder of the Tufton Group, a fund management group he founded in 1985 that specializes in the shipping and energy sectors. The group manages hedge funds and private equity funds. Mr. Kalborg's primary focus has been corporate reorganizations. Mr. Kalborg holds a BA from Stockholm School of Economics and received an MBA from Harvard Business School. Mr. Kalborg's diversified experience in the oil drilling, shipping, and investment industries, his specialty in maritime and transportation fund management, and his extensive background serving as director of several other companies equip him with the qualifications and skills to act as a member of our Board of Directors.

Class III Directors — Terms expiring at the Company's 2022 Annual Meeting of Shareholders

John C. Hadjipateras, 70, has served as Chairman of the Board and as our President and Chief Executive Officer and as President of Dorian LPG (USA) LLC since our inception in July 2013. Mr. Hadjipateras has been actively involved in the management of shipping companies since 1972. From 1972 to 1992, Mr. Hadjipateras was the Managing Director of Peninsular Maritime Ltd. in London and subsequently served as President of Eagle Ocean, which provides chartering, sale and purchase, protection and indemnity insurance and shipping finance services. Mr. Hadjipateras has served as a member of the boards of the Greek Shipping Co-operation Committee and of the Council of INTERTANKO, and has been a member of the Baltic Exchange since 1972 and of the American Bureau of Shipping since 2011. Mr. Hadjipateras also served on the Board of Advisors of the Faculty of Languages and Linguistics of Georgetown University and is a trustee of Kidscape, a leading U.K. charity organization. Mr. Hadjipateras was a director of SEACOR Holdings Inc., a global provider of marine transportation equipment and logistics services, from 2000 to 2013. We believe that Mr. Hadjipateras' expertise in the maritime and shipping industries provides him with the qualifications and skills to serve as a member of our Board of Directors.

Malcolm McAvity, 70, has served as a director of the Company since January 2015 and is currently the Chairman of our Nominating and Corporate Governance Committee and a member of our Compensation Committee. Mr. McAvity formerly served as Vice Chairman of Phibro LLC, one of the world's leading international commodities trading firms, from 1986 through 2012. Mr. McAvity has held various positions trading crude oil and other commodities. Mr. McAvity earned a BA from Stanford University and an MBA from Harvard Business School. We believe that Mr. McAvity's experience in commodities trading provides him with the qualifications and skills to serve as a member of our Board of Directors.

Class I Directors — Terms expiring at the Company's 2023 Annual Meeting of Shareholders

Thomas J. Coleman, 54, has served as a director of the Board since September 2013 and is currently our Lead Independent Director, Chairman of the Company's compensation committee (the "Compensation Committee") and a member of the Company's nominating and corporate governance committee (the "Nominating and Corporate Governance Committee"). Mr. Coleman has served as co-Founder and co-President of Kensico Capital Management Corporation ("Kensico") since 2000. Mr. Coleman is also the co-principal of each of Kensico's affiliates. Prior to working with Kensico and its affiliates, Mr. Coleman was employed by Halo Capital Partners ("Halo"). Prior to his employment at Halo, Mr. Coleman founded and served as Chief Executive Officer and a director of PTI Holding Inc. from 1990 until 1995. From October 2012 until January 2014, Mr. Coleman served as a director of WebMD. From February 2011 until its sale in January 2012, Mr. Coleman served as a director of Tekelec, a publicly traded global provider of core network solutions. We believe that Mr. Coleman's knowledge of corporate finance provides him with the qualifications and skills to serve as a member of our Board of Directors.

Christina Tan, 68, has served as a director of the Company since May 1, 2015 and is currently a member of the Audit and Nominating and Corporate Governance Committees. Ms. Tan has been the Chief Executive Officer of the MT Maritime Management Group ("MTM Group") since the beginning of 2020. Ms. Tan has been an officer with the MTM Group for over 30 years, performing in a variety of capacities, including finance and chartering, and was also a board member of Northern Shipping Funds from 2008 to 2015, at which point she remained as a member of the Limited Partnership Advisory Committee (LPAC). For eight years prior to joining MTM Group, Ms. Tan was Vice President of Finance & Trading for Socoil Corporation, a major Malaysian palm oil refiner and trading company. Ms. Tan earned a BA in Economics and Mathematics from Western State College of Colorado. We believe that Ms. Tan's long-standing experience in the shipping industry and in maritime investments provide her with the qualifications and skills to serve as a member of our Board of Directors.

Information about Executive Officers Who Are Not Directors

Theodore B. Young, 53, has served as our Chief Financial Officer, Treasurer and Principal Financial and Accounting Officer since July 2013, as Chief Financial Officer and Treasurer of Dorian LPG (USA) LLC since July 2013, and as head of corporate development for Eagle Ocean from 2011 to 2013. From 2004 to 2011, Mr. Young was a Senior Managing Director and member of the Investment Committee at Irving Place Capital ("IPC"), where he worked on investments in the industrial, transportation and business services sectors. Prior to joining IPC, Mr. Young was a principal at Harvest Partners, a New York-based middle market buyout firm, from 1997 to 2004. There, Mr. Young was active in industrial transactions and played a key role in the firm's multinational investment strategy. Prior to his career in private equity, Mr. Young was an investment banker with Merrill Lynch & Co., Inc. and SBC Warburg Dillon Read and its predecessors in New York, Zurich, and London. Mr. Young holds an AB from Dartmouth College and an MBA from the Wharton School of the University of Pennsylvania with a major in accounting.

Tim T. Hansen, 52, has served as our Chief Commercial Officer since 2018. He joined the Company in 2014 as Chartering Manager and in 2015 became the Managing Director for the Helios LPG Pool London Office. In 2019 he joined the Helios Pool Board of Directors and has since 2020 served as Chairman of the Board. Mr. Hansen began his career at sea in 1985 with AP Moeller Maersk ("Maersk") rising through the ranks in tankers, container and dry cargo vessels, ending his seagoing career as captain of various sized LPG carriers. Mr. Hansen was also a Lieutenant in the Royal Danish Navy from 1992 through 1993, where he served as Skipper on Vessel Traffic Services ("VTS") vessels, performed various coast guard services, and worked as a VTS Operator at Green Belt Traffic Service. Mr. Hansen returned to Maersk in 1993, where he eventually came ashore in 1999 with responsibilities in several sectors including supercargo, operations,

and chartering in the dry cargo segment, Maersk Line and was Senior Charterer in Broestroom. In 2002, Mr. Hansen began to focus on the LPG sector and from 2004 until Maersk's exit from the LPG sector in 2013 was Senior Charterer responsible for the daily employment of handy, mid-size and VLGC vessels.

Alexander C. Hadjipateras, 41, has served as our Executive Vice President of Business Development since July 2013 and is the son of John C. Hadjipateras, the Chairman of the Board of Directors and President and Chief Executive Officer of the Company. Mr. Alexander C. Hadjipateras' main areas of focus are business development, vessel sale and purchase, and assisting in the management of the Company's operations in Athens, Greece. Since joining Eagle Ocean in 2006, Mr. Alexander C. Hadjipateras been involved in its newbuilding program at Sumitomo Shipyard in Japan and Hyundai Heavy Industries in South Korea and worked on Aframax spot chartering. Prior to joining Eagle Ocean, Mr. Alexander C. Hadjipateras worked as a Business Development Manager at Avenue A/ Razorfish, a leading digital advertising agency based in San Francisco. Mr. Alexander C. Hadjipateras has served as a director of the Helios LPG Pool since 2018, a director of the UK P&I Club since 2016, and a director on the Greek Shipping Corporation Committee (GSCC) since 2018. Mr. Alexander C. Hadjipateras graduated from Georgetown University with a BA in history in 2001 and is currently completing an executive MBA at HEC Paris.

Audit Committee

The Audit Committee, established in accordance with Section 3(a)(58)(A) of the Exchange Act, currently consists of Messrs. Lorentzen and Kalborg and Ms. Tan, with Mr. Lorentzen serving as its chairperson. The Audit Committee meets a minimum of four times per year, and during such meetings, the Audit Committee meets with the Company's management, internal auditors and independent external auditors separately from the Board.

Under the Audit Committee charter, the Audit Committee assists the Board in overseeing the quality of the Company's financial statements and its financial reporting practices. To that end, the Audit Committee has direct responsibility for the appointment, replacement, compensation, retention, termination and oversight of the work of the independent registered public accounting firm engaged to prepare an audit report, to perform other audits and to perform review or attest services for us. The Audit Committee confers directly with the Company's independent registered public accounting firm. The Audit Committee also assesses the outside auditors' qualifications and independence. The Audit Committee is responsible for the pre-approval of all audit and non-audit services performed by our independent registered public accounting firm. The Audit Committee acts on behalf of the Board in reviewing the scope of the audit of the Company's financial statements and results thereof. Our Chief Financial Officer has direct access to the Audit Committee. The Audit Committee also oversees the operation of our internal controls covering the integrity of our financial statements and reports, compliance with laws, regulations and corporate policies, and the qualifications, performance and independence of our independent registered public accounting firm. Based on this oversight, the Audit Committee advises the Board on the adequacy of the Company's internal controls, accounting systems, financial reporting practices and the maintenance of the Company's books and records. The Audit Committee is also responsible for determining whether any waiver of our Code of Ethics will be permitted and for reviewing and determining whether to approve any related party transactions required to be disclosed pursuant to Item 404(a) of Regulation S-K. Annually, the Audit Committee recommends that the Board request shareholder ratification of the appointment of the independent registered public accounting firm. The responsibilities and activities of the Audit Committee are further described in the Audit Committee charter.

Our Board of Directors has determined that the Audit Committee consists entirely of directors who meet the independence requirements of the NYSE listing standards and Rule 10A-3 of the Exchange Act. The Board has also determined that each member of the Audit Committee has sufficient knowledge and understanding of the Company's financial statements to serve on the Audit Committee and is financially literate within the meaning of the NYSE listing standards as interpreted by the Board. The Board has further determined that Messrs. Kalborg and Lorentzen and Ms. Tan satisfy the definition of "audit committee financial expert" as defined under federal securities laws.

Anti-Bribery and Corruption Policy

We have an Anti-Bribery and Corruption Policy which memorializes our commitment to adhere faithfully to both the letter and spirit of all applicable anti-bribery legislation in the conduct of our business activities worldwide.

Code of Conduct and Ethics

We have adopted a Code of Ethics applicable to officers, directors and employees (the “Code of Ethics”), which fulfills applicable guidelines issued by the Commission.

Our Code of Ethics and our Anti-Bribery and Corruption Policy can be found on our website at <http://www.dorianlpg.com/investor-center/corporate-governance/>. We will also provide a hard copy of our Code of Ethics and Anti-Bribery and Corruption Policy free of charge upon written request to Dorian LPG Ltd. c/o Dorian LPG (USA) LLC, 27 Signal Road, Stamford, Connecticut 06902. Our employees are required to make written reaffirmation of their commitment to the Anti-Bribery and Corruption Policy and Code of Ethics on an annual basis. Any waiver that is granted, and the basis for granting the waiver, will be publicly communicated as appropriate, including through posting on our website, as soon as practicable. We have granted no waivers to the Anti-Bribery and Corruption Policy since its inception. We granted no waivers under our Code of Ethics during the fiscal year ended March 31, 2021. We intend to post any amendments to and any waivers of our Code of Ethics on our website within four business days.

Shareholder Nominations

There have been no material changes to the procedures by which security holders may recommend nominees to our board of directors.

Delinquent Section 16(A) Reports

Section 16(a) of the Exchange Act requires our directors and executive officers, and beneficial owners of more than ten percent of any class of our registered equity securities including our common stock, to file with the Commission initial reports of beneficial ownership and reports of changes in beneficial ownership of common stock and other equity securities of the Company, and to provide the Company with a copy of those reports.

To the Company’s knowledge, based solely on a review of copies of such reports furnished to the Company, and written representations that no reports were required, during the fiscal year ended March 31, 2021, all Section 16(a) filing requirements applicable to the Company’s officers, directors, and greater than ten percent beneficial owners were complied with, except for one late Form 4 pertaining to one transaction for our Executive Vice President of Business Development, Mr. Alexander C. Hadjipateras, and one late Form 4 pertaining to one transaction for one of our directors, Mr. Ted Kalborg.

ITEM 11. EXECUTIVE COMPENSATION.

Compensation Discussion and Analysis

General

This Compensation Discussion and Analysis (“CD&A”) provides information regarding the compensation program for our executive officers in the fiscal year ended March 31, 2021 (“Fiscal Year 2021”). It describes our compensation philosophy; the objectives of the executive compensation program in Fiscal Year 2021; the elements of the compensation program; and how each element fits into our overall compensation philosophy. Certain information with respect to the compensation program for our executive officers in the fiscal year ended March 31, 2020 (“Fiscal Year 2020”) and in the fiscal year ended March 31, 2022 (“Fiscal Year 2022”) has also been included where the Compensation Committee deemed that such information may be helpful to give context to the disclosure herein.

Our named executive officers (or “NEOs”), consisting of our principal executive officer (“PEO”), principal financial officer (“PFO”), and our three most highly compensated executive officers other than our PEO and PFO for Fiscal Year 2021 are:

- John C. Hadjipateras, President, Chief Executive Officer, and Chairman of the Board of Directors;
- Theodore B. Young, Chief Financial Officer;
- John C. Lycouris, Chief Executive Officer of Dorian LPG (USA) LLC and a Director on our Board of Directors;
- Tim T. Hansen, Chief Commercial Officer; and
- Alexander C. Hadjipateras, Executive Vice President of Business Development.

Highlights for the Fiscal Year Ended 2021

- Revenues of \$315.9 million.
- TCE⁽¹⁾ per operating day rate for our fleet of \$39,606.
- Net income of \$92.6 million, or \$1.86 EPS.
- Adjusted EBITDA⁽¹⁾ of \$188.6 million.
- Repurchased over \$124.8 million of our common stock, or approximately 9.6 million shares, between our previously announced tender offer and common share repurchase program.
- Completed refinancing of commercial tranche of 2015 AR facility resulting in lower interest cost and improved terms.
- Completed refinancing of *Cresques* releasing \$24.0 million of cash.
- Successfully completed 6 drydockings during the fiscal year.
- ESG commitment – AER ahead of trajectory levels for year ended December 31, 2020, crew rotations largely returned to pre-pandemic levels, and anticipate publication of first ESG report.

(1) Time Charter Equivalent and adjusted EBITDA are non-GAAP measures. Refer to the reconciliation of revenues to TCE and net income to adjusted EBITDA included in Item 7. Management Discussion and Analysis of this annual report.

Compensation Philosophy and Objectives

Our compensation philosophy is designed to establish and maintain an executive compensation program that attracts, retains, and rewards talented executives who possess the skills necessary to help the Company achieve its strategic objectives. We believe that the compensation program should (i) align the interests of executives with those of stockholders in achieving and sustaining increases in stockholder value over the short and long-term, (ii) encourage and reward achievement of our annual and longer-term performance objectives, (iii) promote the long-term success of the Company through an appropriate balance of current and long-term compensation opportunities, (iv) differentiate pay based on individual and Company performance, (v) provide competitive compensation relative to the market and (vi) balance incentives for risk management.

As a result, we endeavor to pay competitive total compensation that is guided by market rates and tailored to account for the specific needs and responsibilities of the particular position as well as the unique qualifications of the individual executive. Historically, in light of the cyclical nature of the shipping industry and the volatile and unpredictable markets in which we operate, we have not established specific performance targets for incentive compensation to our NEOs. We apply judgment and reasonable discretion in making compensation decisions to avoid relying on a formulaic

program, taking into account both what has been accomplished and how it has been accomplished in light of the existing commercial environment.

Our goal is to maintain an executive compensation program that is competitive, based on the principles of pay-for-performance, and that follows best practices in executive compensation and corporate governance. To this end, the Compensation Committee routinely evaluates its practices and programs with respect to executive compensation to identify opportunities for improvement.

Key factors affecting the compensation decisions for the NEOs included key financial and statistical measurements, the design and implementation by the NEOs of (i) strategic objectives for us, such as the design and implementation of our commercial strategy, including health and safety initiatives and retrofitting of our vessels with scrubbers; as well as the achievement of our operational goals or goals in a particular area of responsibility for the respective NEOs, such as operations or chartering, (ii) a finance strategy for us, including obtaining or renegotiating financing on favorable terms in a difficult market environment, and (iii) continuing our commitment to our ESG goals including carbon reduction, sustainability, and transparency. In addition, we do not provide for excise tax gross-ups, supplemental executive retirement plans and for the Fiscal Year 2021, as a general matter, we did not provide perquisites for our executive officers. While the Compensation Committee may deem it appropriate to provide perquisites for its executive officers in the future, it has no current intention to do so.

Roles in Setting Executive Compensation

Role of the Compensation Committee

For Fiscal Year 2021, the Compensation Committee consisted of three members of the Board, each of whom qualified as “independent” under the NYSE listing standards and applicable independence standards under Rule 10A-3 of the Securities Exchange Act of 1934 (the “Exchange Act”). In view of the importance that independence plays in executive compensation, the Compensation Committee and the other independent directors regularly meet in executive session, without any members of management present.

The primary role of the Compensation Committee is to establish the Company’s compensation philosophy and strategy and to ensure that the Company’s executives are compensated in a manner consistent with the articulated philosophy and strategy. The Compensation Committee takes many factors into account when making compensation decisions with respect to the NEOs and other senior executives, including:

- Our overall performance;
- Individual performance, tenure, experience, and long-term potential;
- Internal pay equity among the senior leadership team; and
- External, publicly available market data on competitive compensation levels and practices.

Role of the CEO in Setting CEO and Other Executives’ Compensation

All decisions relating to the compensation of Mr. J. Hadjipateras, our Chairman of the Board of Directors and Chief Executive Officer (our “CEO”), are made by the Compensation Committee without him or other members of management present. In making determinations regarding compensation for Dorian’s other NEOs and other selected senior executives, the Compensation Committee considers the recommendations of our CEO (for all executives other than himself).

Our CEO makes recommendations to the Compensation Committee with respect to salary, short-term incentive (bonus), and long-term incentive awards for all executive officers other than himself. He develops those recommendations based on competitive market information, our compensation strategy, his assessment of individual performance, the scope of responsibilities, experience level, time in position, and long-term potential of the particular executive. Our CEO’s

recommendations are subject to review, modification, and ultimately approval of the Compensation Committee or, when sufficiently material, the full Board. All Fiscal Year 2021 compensation decisions reported herein (including base salaries, annual and long-term compensation) were made by the Compensation Committee.

Role of Outside Advisors

The Compensation Committee has the authority to engage independent advisors to assist in carrying out its duties. In April 2021, the Compensation Committee engaged Steven Hall & Partners (“Steven Hall”) as its independent compensation consultant to advise on executive and director compensation arrangements and related governance matters. Additionally, Steven Hall has assisted management in the preparation of this CD&A.

Compensation Consultant Conflict of Interest Assessment: As required by rules adopted by the SEC under the Dodd-Frank Act, the Compensation Committee assessed the relevant factors, including those set forth in Rule 10C-1(b)(4)(i) through (vi) under the Exchange Act, and determined that the work of Steven Hall did not raise any conflict of interest in Fiscal Year 2021.

Consideration of Prior Say-on-Pay Vote Results

We held our first non-binding stockholder advisory vote on executive compensation (“say-on-pay”) at our 2020 annual meeting. Our board, considering the results of the 2020 say-on-pay frequency vote by our stockholders and on the recommendation of our compensation committee, has opted to hold these say-on-pay votes every two years. Our next advisory vote on the frequency of future say-on-pay votes will be held at our 2022 annual meeting of stockholders.

At our 2020 annual meeting, our stockholders overwhelmingly approved our executive compensation, with more than 94% of voting shares cast in favor of the say-on-pay resolution. The Committee considers the results of the most recent say-on-pay vote along with other factors when making executive compensation decisions. The Compensation Committee will continue to engage with stockholders and will consider feedback from them, as well as the results from the 2020 and future advisory votes on executive compensation, when evaluating the Company’s executive compensation program and policies.

Fiscal Year 2021 Peer Group

The Compensation Committee examines the executive compensation of a group of peer companies to stay current with market pay practices and trends, and to understand the competitiveness of our total compensation and its various elements. In general, we strive for total compensation to be competitive with a group of companies that the Compensation Committee believes to be an appropriate compensation reference group (the “Peer Group”). The Compensation Committee reviews the Peer Group at least annually to affirm that it is comprised of companies that are similar to us in terms of industry focus and scope of operations, size (based on revenues and market capitalization), and the competitive marketplace for talent. While the Compensation Committee believes the data derived from any peer group is helpful, it also recognizes that benchmarking is not necessarily definitive in every case.

Most of our direct business competitors are foreign companies that are not required to disclose compensation information for their executive officers on an individual basis and detailed compensation data is, therefore, limited or unavailable. The Peer Group is limited to those companies for which executive compensation data is publicly available, which necessarily eliminates many of the Company’s competitors that are privately held and/or incorporated in jurisdictions that do not require public disclosure of executive compensation. Thus, while the Compensation Committee uses the Peer Group information for informational and analytical purposes, it does not target a specific percentile or make compensation decisions based solely on such information. The Company reviews the Peer Group information in the context of other publicly-available survey data, and alongside annual assessments of corporate and individual performance to make recommendations and decisions on the compensation applicable to the Company’s NEOs.

[Table of Contents](#)

The Peer Group for 2021 consisted of the following eight publicly-traded oil and gas shipping and transportation companies:

Diamond S Shipping Inc.	International Seaways, Inc.	SEACOR Marine LLC
Eagle Bulk Shipping	Overseas Shipholding Group, Inc.	Tidewater, Inc.
Genco Shipping & Trading Ltd.	SEACOR Holdings	

Elements of the Fiscal Year 2021 Executive Officer Compensation Program

The Compensation Committee reviews each element of compensation annually to ensure alignment with its compensation philosophy and objectives, as well as to assess its executive compensation program and levels relative to the competitive marketplace. The executive compensation program consists of the following:

- Base salary;
- Annual bonus;
- Long-term incentive compensation;
- Retirement benefits generally available to all employees; and
- Welfare and similar benefits (e.g., medical, dental, disability and life insurance).

Base Salary

We use salary to compensate our NEOs for services rendered during the year and to recognize the experience, skills, knowledge and responsibilities required of each NEO.

The Compensation Committee reviews the base salaries of the NEOs and compares them to the salaries of senior management among the Peer Group companies. Using this information in conjunction with review of other elements of compensation, the Compensation Committee aims to determine whether the NEO salaries are at levels sufficient to attract, motivate and retain these NEOs in leading the Company and driving stockholder value.

Annual adjustments in base salary, if any, consider individual performance, prior experience, position duties and responsibilities, internal equity and external market practices. The Compensation Committee generally relies on the CEO's evaluation of each NEO's performance (other than his own) in deciding whether to recommend and/or approve merit increases for any NEOs in a given year. In those instances where the duties and responsibilities of a NEO change, the CEO may recommend any adjustments believed to be warranted, and the Compensation Committee will consider all of the factors enumerated above in determining whether to approve any such changes.

For Fiscal Year 2021, the Compensation Committee reviewed the total compensation and salaries of our NEOs for Fiscal Year 2021, Messrs. J. Hadjipateras, Lycouris, Young, Hansen and A. Hadjipateras, taking into consideration market conditions, the recommendations of our Chief Executive Officer (for all executives other than himself), and the desire to retain our experienced, skilled, and knowledgeable NEOs who are essential to leading the Company and driving stockholder value, in keeping with our compensation philosophy. Following its review and using the factors described above, our Compensation Committee increased the annual salary levels as follows: for Mr. J. Hadjipateras, a base salary increase from \$550,000 to \$650,000; for Mr. J. Lycouris, a base salary increase from \$450,000 to \$550,000; for Mr. Young, a base salary increase from \$400,000 to \$500,000; for Mr. Hansen, a base salary increase from DKK 2,625,000 to DKK 3,250,000; and for Mr. A. Hadjipateras, a base salary increase from \$250,000 to \$325,000.

[Table of Contents](#)

The following table summarizes Fiscal Year 2021 base salaries for our NEOs.

Name	Fiscal Year 2021 Salary
John C. Hadjipateras	\$ 650,000
John C. Lycouris	\$ 550,000
Theodore B. Young	\$ 500,000
Tim T. Hansen ⁽¹⁾	\$ 509,297
Alexander C. Hadjipateras	\$ 325,000

(1) Converted from Danish Kroner to U.S. Dollars at a rate of 1 DKK = 0.1567 USD.

Named Executive Officer Base Salary Increases for Fiscal Year 2022

Base Salary increases for our NEOs for the fiscal year ending March 31, 2022, if any, have not been determined by the Compensation Committee and are thus not calculable as of the date of this report. The Compensation Committee expects to determine such increases, if any, no later than September 30, 2021 and the amounts of these increases, if any, will be disclosed in a filing by the Company in a Current Report on Form 8-K under Item 5.02(f) once the amounts are determined.

Annual Bonus

Our NEOs are eligible for cash incentives based on annual performance. We use these annual incentive opportunities to reward and drive initiatives as well as short-term achievements and milestones towards meeting the Company's long-term goals. For Fiscal Year 2020 and Fiscal Year 2021, our NEOs each received discretionary cash bonuses (including a \$1,500 holiday bonus). Factors reviewed in determining bonus amounts include: safety measures such as time lost to injuries and the number and frequency or reportable incidents; operating expense per day; chartering performance; EBITDA; and overall evaluation of individual performance.

The cash bonus amounts in recognition of the NEOs' contributions to the Company for Fiscal Year 2020 and paid in Fiscal Year 2021 are detailed in the table below:

Name	Cash Bonus Awarded ⁽¹⁾
John C. Hadjipateras	\$ 1,225,000
John C. Lycouris	\$ 300,000
Theodore B. Young	\$ 300,000
Tim T. Hansen	\$ 345,613 ⁽²⁾
Alexander C. Hadjipateras	\$ 250,000

(1) In recognition of the NEOs' contributions to the Company for Fiscal Year 2020.

(2) Converted from Danish Kroner to U.S. Dollars at a rate of 1 DKK = 0.1567 USD.

For Fiscal Year 2021, cash bonuses for the NEOs have not been determined by the Compensation Committee and are thus not calculable through the date of this report. The Compensation Committee expects to determine such cash bonuses no later than September 30, 2021, and the amounts of these bonuses, if any, will be disclosed in a filing by the Company in a Current Report on Form 8-K under Item 5.02(f) once the amounts are determined.

Equity-Based Compensation

Our equity-based compensation program is intended to align the interests of our executives with those of our stockholders, and to help reduce the possibility of making excessively risky decisions that could maximize short term profits at the expense of long term value, thereby establishing a direct relationship between executive compensation, long-term operating performance, and sustained increases in stockholder value.

To determine the size of annual equity grants, as described above, our Compensation Committee generally considers the executives' prior performance, their role and responsibility, and their ability to influence the Company's

long-term growth and business performance, including the recommendations of our Chief Executive Officer (except with respect to his own equity award). Our Compensation Committee also considers Peer Group information, as applicable.

The Compensation Committee believes restricted stock serves as a retention and motivation tool for executives in the volatile shipping industry. On May 14, 2020, the Compensation Committee approved the following long-term equity awards for our NEOs in the form of time-based restricted stock in recognition of the officers' contributions to the Company for Fiscal Year 2020: Mr. J. Hadjipateras received 155,654 fully vested restricted shares on June 22, 2020, Messrs. Lycouris, Young, and A. Hadjipateras received 37,500, 35,000, and 30,000 shares of restricted stock on June 15, 2020, vesting in escalating installments on the grant date and the first, second and third anniversary of the grant date, and Mr. Hansen received 40,000 restricted stock units vesting in escalating installments on the first, second and third anniversary of the grant date.

Name	Grant Date	Restricted Stock Awards and Restricted Stock Units	
		Number of shares or units of stock granted ⁽¹⁾	Grant date fair value of shares or units of stock ⁽²⁾
John C. Hadjipateras	6/22/2020	155,654	\$ 1,224,997
John C. Lycouris	6/15/2020	37,500	\$ 307,875
Theodore B. Young	6/15/2020	35,000	\$ 287,350
Tim T. Hansen	6/15/2020	40,000	\$ 328,400
Alexander C. Hadjipateras	6/15/2020	30,000	\$ 246,300

(1) In recognition of the NEOs' contributions to the Company for Fiscal Year 2020.

(2) The market price of the Company's stock on the grant dates of June 15, 2020 and June 22, 2020 was \$8.21 and \$7.87, respectively.

All restricted shares and restricted stock units of a NEO will vest (i) if such named executive officer's employment terminates other than for Cause (as defined in the Severance and CIC Plan (defined below)—see "2014 Executive Severance and Change in Control Severance Plan" below) or on account of death or Disability or (ii) upon a Change of Control (as defined in the Equity Incentive Plan (defined below) and related restricted stock award agreements) that occurs while such NEO is still employed with us.

For Fiscal Year 2021, long-term equity awards for the NEOs have not been determined through the date of this report. The Compensation Committee expects to determine such awards no later than September 30, 2021, and the amounts of these awards, if any, will be disclosed in a filing by the Company in a Current Report on Form 8-K under Item 5.02(f) once the amounts are determined.

Employment Agreements with the NEOs

None of our NEOs, with the exception of Mr. Hansen, are subject to an employment agreement with us or our subsidiaries.

Mr. Hansen has an employment agreement that entitles him to receive certain benefits and payments if his employment terminates in specified separation scenarios. These arrangements are described under the Potential Payments upon Termination and Change in Control section.

Executive Severance and Change in Control Severance Plan

The 2014 Executive Severance and Change in Control Severance Plan (the "Severance and CIC Plan") provides for payments and other benefits in certain circumstances involving a termination of employment, including a termination of employment in connection with a change-in-control. Cash payments in connection with a change-in-control are subject to a double trigger; that is, the executive is not entitled to payment unless there is both a change-in-control and the executive is subsequently terminated without cause (or resigns for good reason) within a two-year period following the change-in-control. Our executives are not entitled to any severance payments as a result of voluntary termination (outside of the retirement context) or if they are terminated for cause. Detailed information with respect to these payments and benefits can be found under the Potential Payments upon Termination and Change in Control section. Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, and Mr. A. Hadjipateras are participants to the Severance and CIC Plan.

Pursuant to the 2014 Equity Incentive Plan, in the event of a change-in-control all outstanding equity awards become fully vested and any forfeiture provisions shall lapse.

The Committee believes that these severance benefits encourage the commitment of our NEOs and ensure that they will be able to devote their full attention and energy to our affairs in the face of potentially disruptive and distracting circumstances.

Additional Information

Retirement Benefits

We provide retirement plan benefits, discussed in this section below, that we believe are customary in our industry. We provide them to remain competitive in retaining talent and attracting new talent to join us.

401(k) Savings Plan

We provide all qualifying full-time employees with the opportunity to participate in our tax-qualified 401(k) savings plan. The plan allows employees to defer receipt of earned salary, up to tax law limits, on a tax-advantaged basis. Accounts may be invested in a wide range of mutual funds. Up to tax law limits, we provide a 3% of salary safe harbor contribution for U.S. employees.

Nonqualified Deferred Compensation

We contribute to retirement accounts for certain Denmark-based employees, including Mr. Hansen based on a percentage of their annual salaries.

Tax Consideration

As part of its role, the Compensation Committee reviews and considers the expected tax treatment to the Company and its executive officers as one of the factors in determining compensation matters. For Fiscal Year 2021 our gross U.S. source income was exempt from tax under Code section 883 and thus deductions for executive compensation are not relevant to the Company's U.S. federal income tax positions. If the Company is not exempt from U.S. federal income taxation by reason of Code section 883 and is subject to U.S. federal income taxation on a net income basis, the deduction of certain items of compensation paid to certain of our executives or former executives may be limited. The Compensation Committee has taken, and intends to continue to take, actions, as appropriate, to attempt to minimize, if not eliminate, the Company's non-deductible compensation expense within the context of maintaining the flexibility that the Compensation Committee believes to be an important element of the Company's executive compensation program.

Risk Assessment

The Compensation Committee believes that the Company's compensation objectives and policies do not create risks that are reasonably likely to have a material adverse effect on the Company. Determinations regarding incentive compensation are based on a discretionary assessment of a variety of factors related to the performance of the Company and the contributions of each executive officer to that performance. Incentive compensation awards are not tied to formulas based on short-term performance, and no one factor disproportionately affects incentive amounts, which diversifies the risk associated with any single indicator of performance. A significant portion of each executive's total compensation is delivered in the form of equity that vests over multiple years, thereby aligning the interests of our executive officers with those of our shareholders. Compensation is determined by our Compensation Committee, which is comprised solely of independent members of our Board of Directors under NYSE listing standards.

Report of the Compensation Committee

The Compensation Committee, comprised entirely of independent directors (as defined under U.S. securities laws, NYSE listing standards and applicable guidelines under the Code), has reviewed the CD&A included in this annual report and discussed that CD&A with management. Based on its review and discussion with management, the Compensation Committee approved the CD&A and recommended to the Dorian Board of Directors that the CD&A be included in this annual report.

Compensation Committee:

Thomas J. Coleman

Ted Kalborg

Malcolm McAvity

Summary Compensation Table

The table below sets forth the compensation earned by our NEOs during the years indicated.

Name and Principal Position	Fiscal Year Ended March 31,	Salary	Bonus ⁽¹⁾	Stock Awards ⁽²⁾	All Other Compensation ⁽³⁾	Total
John Hadjipateras⁽⁴⁾ <i>Chief Executive Officer</i>	2021	\$ 650,000	\$ 1,226,500	\$ 1,224,997	\$ 9,300	\$ 3,110,797
	2020	\$ 550,000	\$ 301,500	\$ 531,187	\$ 8,400	\$ 1,391,087
	2019	\$ 550,000	\$ 301,500	\$ 540,892	\$ 8,250	\$ 1,400,642
John Lycouris⁽⁵⁾ <i>Chief Executive Officer, Dorian LPG (USA) LLC</i>	2021	\$ 550,000	\$ 301,500	\$ 307,875	\$ 9,300	\$ 1,168,675
	2020	\$ 450,000	\$ 201,500	\$ 164,200	\$ 8,400	\$ 824,100
	2019	\$ 450,000	\$ 201,500	\$ 167,200	\$ 8,250	\$ 826,950
Theodore B. Young <i>Chief Financial Officer</i>	2021	\$ 500,000	\$ 301,500	\$ 287,350	\$ 9,300	\$ 1,098,150
	2020	\$ 400,000	\$ 301,500	\$ 164,200	\$ 8,400	\$ 874,100
	2019	\$ 400,000	\$ 201,500	\$ 167,200	\$ 8,250	\$ 776,950
Tim T. Hansen⁽⁶⁾ <i>Chief Commercial Officer</i>	2021	\$ 509,297	\$ 347,024	\$ 328,400	\$ 50,930	\$ 1,235,650
	2020	\$ 390,552	\$ 174,228	\$ 147,780	\$ 39,055	\$ 751,615
	2019	\$ 390,309	\$ 176,538	\$ 150,480	\$ 39,031	\$ 756,358
Alexander C. Hadjipateras <i>Executive Vice President of Business Development</i>	2021	\$ 325,000	\$ 251,500	\$ 246,300	\$ 9,300	\$ 832,100
	2020	\$ 250,000	\$ 146,500	\$ 123,150	\$ 8,400	\$ 528,050
	2019	\$ 250,000	\$ 146,500	\$ 125,400	\$ 8,250	\$ 530,150

- (1) Represents cash bonuses paid to each of the NEOs for the applicable fiscal year and earned in the immediately preceding fiscal year. The amount of cash bonuses earned in respect of the fiscal year ended March 31, 2021 has not yet been determined. The Compensation Committee expects to determine such cash bonuses no later than September 30, 2021, and the amounts of these cash bonuses, if any, will be disclosed in a filing by the Company in a Current Report on Form 8-K under Item 5.02(f) once the amounts are determined.
- (2) The amounts set forth next to each award represent the aggregate grant date fair value of awards computed in accordance with FASB ASC Topic 718. The assumptions used in calculating the grant date fair value reported in these columns are set forth in Note 12 to our consolidated financial statements included herein.
- (3) The amounts set forth represent contributions by the Company to each of the named executive officer's 401(k) defined contribution plan for U.S. employees or retirement account for non-U.S. employees.
- (4) As our Chief Executive Officer, Mr. Hadjipateras does not receive any additional compensation for his services as a director.
- (5) As the Chief Executive Officer of our subsidiary, Dorian LPG (USA) LLC, Mr. Lycouris does not receive any additional compensation for his services as a director.
- (6) Mr. Hansen's salary is calculated using the average applicable exchange rates during each fiscal year for the local currency of employment.

Narrative Disclosure to the Summary Compensation Table

Dorian (Hellas) S.A. ("DHSA") formerly provided technical, crew, commercial management, insurance and accounting services to our vessels and had agreements to outsource certain of these services to Eagle Ocean Transport Inc. ("Eagle Ocean Transport"), which is 100% owned by Mr. John C. Hadjipateras, our Chairman, President and Chief Executive Officer.

Dorian LPG (USA) LLC and its subsidiaries entered into an agreement with DHSA, retroactive to July 2014 and superseding an agreement between Dorian LPG (UK) Ltd. and DHSA, for the provision by Dorian LPG (USA) LLC and its subsidiaries of certain chartering and marine operation services to DHSA, for which income was earned and included in "Other income-related parties" totaling \$0.1 million, \$0.1 million and \$0.2 million for the years ended March 31, 2021, 2020 and 2019, respectively. As of March 31, 2021, \$1.0 million was due from DHSA and included in "Due from related parties."

Eagle Ocean Transport incurs miscellaneous costs on behalf of us, for which we reimbursed Eagle Ocean Transport less than \$0.1 million for each of the years ended March 31, 2021, 2020 and 2019. Such expenses are reimbursed based on their actual cost.

None of our members of senior management, including Mr. Hadjipateras, Mr. Lycouris and Mr. Young, are subject to an employment agreement with us or our subsidiaries.

Equity Compensation

On June 30, 2014, Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, and Mr. A. Hadjipateras received 350,000, 185,000, 90,000, and 30,000 shares of restricted stock, respectively, vesting in equal installments on the third, fourth and fifth anniversary of the grant date. On June 15, 2016, Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, Mr. Hansen and Mr. A. Hadjipateras received 75,000, 30,000, 27,500, 24,000 and 17,500 shares of restricted stock, respectively, vesting in equal installments on the grant date and the first, second and third anniversary of the grant date. On June 15, 2017, Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, Mr. Hansen and Mr. A. Hadjipateras received 75,000, 30,000, 27,500, 24,000, and 17,500 shares of restricted stock, respectively, vesting in equal installments on the grant date and the first, second and third anniversary of the grant date. On June 15, 2018, Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, Mr. Hansen and Mr. A. Hadjipateras received 64,700, 20,000, 20,000, 18,000 and 15,000 shares of restricted stock, respectively, vesting in equal installments on the grant date and the first, second and third anniversary of the grant date. On August 5, 2019, Mr. J. Hadjipateras, Mr. Lycouris, Mr. Young, and Mr. A. Hadjipateras received 64,700, 20,000, 20,000, and 15,000 shares of restricted stock, respectively, vesting in equal installments on the grant date and the first, second and third anniversary of the grant date, and Mr. Hansen received 18,000 restricted stock units vesting in equal installments on the first, second and third anniversary of the grant date. On June 15, 2020, Mr. Lycouris, Mr. Young, and Mr. A. Hadjipateras received 37,500, 35,000 and 30,000 shares of restricted stock, respectively, vesting in escalating installments on the grant date and the first, second and third anniversary of the grant date, and Mr. Hansen received 40,000 restricted stock units vesting in escalating installments on the first, second and third anniversary of the grant date. On June 22, 2020, Mr. J. Hadjipateras received 155,654 shares of restricted stock vesting on the grant date.

All restricted shares and restricted stock units of a named executive officer will vest (i) if such named executive officer's employment terminates other than for Cause (as defined in the Severance and CIC Plan (defined below)—see "2014 Executive Severance and Change in Control Severance Plan" below) or on account of death or Disability or (ii) upon a Change of Control (as defined in the Equity Incentive Plan (defined below) and related restricted stock award agreements) that occurs while such named executive officer is still employed with us.

Outstanding Equity Awards at Fiscal Year-End

The following table sets forth certain information concerning outstanding equity awards as of March 31, 2021, for each NEO:

Name	Grant Date	Restricted Stock Awards and Restricted Stock Units	
		Number of shares or units of stock that have not vested	Market value of shares or units of stock that have not vested ⁽¹⁾
John C. Hadjipateras	8/5/2019	32,350 ⁽³⁾	\$ 424,756
	6/15/2018	16,175 ⁽⁴⁾	\$ 212,378
John C. Lycouris	6/15/2020	30,000 ⁽²⁾	\$ 393,900
	8/5/2019	10,000 ⁽³⁾	\$ 131,300
	6/15/2018	5,000 ⁽⁴⁾	\$ 65,650
Theodore B. Young	6/15/2020	30,000 ⁽²⁾	\$ 393,900
	8/5/2019	10,000 ⁽³⁾	\$ 131,300
	6/15/2018	5,000 ⁽⁴⁾	\$ 65,650
Tim T. Hansen	6/15/2020	40,000 ⁽²⁾	\$ 525,200
	8/5/2019	12,000 ⁽³⁾	\$ 157,560
	6/15/2018	4,500 ⁽⁴⁾	\$ 59,085
Alexander C. Hadjipateras	6/15/2020	25,000 ⁽²⁾	\$ 328,250
	8/5/2019	7,500 ⁽³⁾	\$ 98,475
	6/15/2018	3,750 ⁽⁴⁾	\$ 49,238

- (1) Fair market value of our common stock on March 31, 2021. The amount listed in this column represents the product of the closing market price of the Company's stock as of March 31, 2021 (\$13.13) multiplied by the number of shares or units of stock subject to the award.

- (2) Granted on June 15, 2020 and vested or vests with escalating terms on each of the grant date and first, second and third anniversaries of the date of grant.
- (3) Granted on August 5, 2019 and vested or vests ratably on each of the grant date and first, second and third anniversaries of the date of grant.
- (4) Granted on June 15, 2018 and vested or vests ratably on each of the grant date and first, second and third anniversaries of the date of grant.

Options Exercised and Stock Vested

The following table provides information for the year ended March 31, 2021 concerning the vesting of restricted stock awards by the NEOs. There were no stock options exercised by the NEOs for the year ended March 31, 2021 and no options have been granted by the Company since its inception.

Name	Option Awards		Restricted Stock Awards and Restricted Stock Units	
	Number of shares acquired on exercise	Value realized on exercise	Number of shares acquired on vesting	Value realized on vesting
John C. Hadjipateras ⁽¹⁾	-	-	206,754	\$ 1,656,983
John C. Lycouris ⁽²⁾	-	-	25,000	\$ 209,100
Theodore B. Young ⁽³⁾	-	-	21,875	\$ 183,444
Tim T. Hansen ⁽⁴⁾	-	-	16,500	\$ 140,085
Alexander C. Hadjipateras ⁽⁵⁾	-	-	16,875	\$ 141,431

- (1) Mr. J. Hadjipateras had 34,925 shares of restricted stock vested on June 15, 2020 at a market price of \$8.21, 16,175 shares of restricted stock vested on August 5, 2020 at a market price of \$8.98, and 155,654 shares of restricted stock vested on June 22, 2020 at a market price of \$7.87.
- (2) Mr. Lycouris had 20,000 shares of restricted stock vested on June 15, 2020 at a market price of \$8.21 and 5,000 shares of restricted stock vested on August 5, 2020 at a market price of \$8.98.
- (3) Mr. Young had 16,875 shares of restricted stock vested on June 15, 2020 at a market price of \$8.21 and 5,000 shares of restricted stock vested on August 5, 2020 at a market price of \$8.98.
- (4) Mr. Hansen had 10,500 shares of restricted stock vested on June 15, 2020 at a market price of \$8.21 and 6,000 restricted stock units vested on August 5, 2020 at a market price of \$8.98.
- (5) Mr. A. Hadjipateras had 13,125 shares of restricted stock vested on June 15, 2020 at a market price of \$8.21 and 3,750 shares of restricted stock vested on August 5, 2020 at a market price of \$8.98.

Director Compensation

We pay each non-executive director annual compensation of \$100,000 (50% in cash and 50% as an equity award in a form determined by our Compensation Committee), paid quarterly in arrears. The chairman of the Compensation Committee, the Audit Committee and the Nominating and Corporate Governance Committee each receive additional annual cash compensation of \$15,000. Further, any director serving on a committee of the Board, other than a chairman of a committee, receives additional annual cash compensation of \$10,000 per committee. Beginning October 1, 2020, the payments were made 100% as equity awards. Beginning April 1, 2021, the payments will be made annually in arrears.

Each director is also reimbursed for out-of-pocket expenses in connection with attending meetings of the board of directors or committees. Each director will be fully indemnified by us for actions associated with being a director to the extent permitted under Marshall Islands law. Further, none of the members of our board of directors will receive any benefits upon termination of their directorship positions. Our directors are eligible to receive awards under an equity incentive plan that we adopted prior to the completion of our initial public offering and which is described below under “2014 Equity Incentive Plan.” Our Compensation Committee reviews director compensation annually and makes recommendations to the Board with respect to compensation and benefits provided to the members of the Board. Our Corporate Governance Guidelines provide that director compensation should be fair and equitable to enable the Company to attract qualified members to serve on its Board.

The following table provides certain information concerning the compensation earned by each of our non-employee directors serving on our Board for the year ended March 31, 2021, for services rendered in all capacities:

Name	Fees earned or paid in cash ⁽¹⁾	Restricted Stock Awards and Restricted Stock Units ⁽²⁾	Total
Thomas J. Coleman	\$ 37,500	\$ 92,959	\$ 130,459
Ted Kalborg	\$ 35,000	\$ 90,188	\$ 125,188
Øivind Lorentzen	\$ 32,500	\$ 87,430	\$ 119,930
Malcolm McAvity	\$ 37,500	\$ 92,959	\$ 130,459
Christina Tan	\$ 35,000	\$ 90,188	\$ 125,188

(1) Represents cash compensation earned for services rendered as a director for the fiscal year ended March 31, 2021.

(2) Represents equity compensation for services rendered as a director for the fiscal year ended March 31, 2021. The value of each stock award equals the grant date fair values of \$7.74, \$8.01, \$12.19, and \$13.13 per share on June 30, 2020, September 30, 2020, December 31, 2020 and March 31, 2021, respectively.

2014 Equity Incentive Plan

Our 2014 equity incentive plan (the “2014 Equity Incentive Plan”), which was unanimously adopted by our Board of Directors in April 2014, was approved by a shareholder vote at the 2015 annual meeting of shareholders. Pursuant to the terms of the 2014 Equity Incentive Plan, we expect that directors, officers, and employees (including any prospective officer or employee) of the Company and its subsidiaries and affiliates, and consultants and service providers to (including persons who are employed by or provide services to any entity that is itself a consultant or service provider to) the Company and its subsidiaries and affiliates, as well as entities wholly-owned or generally exclusively controlled by such persons, may be eligible to receive stock appreciation rights, stock awards, restricted stock units and performance compensation awards that the plan administrator determines are consistent with the purposes of the plan and the interests of the Company. The maximum number of shares of common stock that may be granted under the 2014 Equity Incentive Plan shall not exceed 2,850,000 in the aggregate. In June 2014, we granted 655,000 shares of restricted stock to certain of our officers. In March 2015, we granted 274,000 shares of restricted stock to certain of our directors, employees and non-employee consultants, of which 8,506 shares were subsequently forfeited by a former employee and are again available for issuance. In June 2016, we issued 250,000 shares of restricted stock to certain of our executive officers and employees, of which 3,054 shares were subsequently forfeited by three former employees and are again available for issuance. In June 2016, we granted 6,950 shares of stock to certain of our directors. In September 2016, we granted 10,130 shares of stock to certain of our directors. In December 2016, we granted 10,434 shares of stock to certain of our directors and non-employee consultants. In March 2017, we granted 7,194 shares of stock to certain of our directors and non-employee consultants. In June 2017, we issued 259,800 shares of restricted stock to certain of our executive officers and employees, of which 3,018 shares were subsequently forfeited by a former employee and are again available for issuance. In June 2017, we granted 8,664 shares of stock to certain of our directors and non-employee consultants. In September 2017, we granted 10,062 shares of stock to certain of our directors. In December 2017, we granted 9,714 shares of stock to certain of our directors and non-employee consultants. In March 2018, we granted 9,720 shares of stock to certain of our directors and non-employee consultants. In June 2018, we issued 200,000 shares of restricted stock to certain of our executive officers and employees, of which 50,000 restricted shares vested on the grant date and of which 150 shares were subsequently forfeited and are again available for issuance. In June 2018, we granted 9,552 shares of stock to certain of our directors and non-employee consultants. In September 2018, we granted 9,582 shares of stock to certain of our directors and non-employee consultants. In December 2018, we granted 10,416 shares of stock to certain of our directors and non-employee consultants. In March 2019, we granted 12,804 shares of stock to certain of our directors and non-employee consultants. In June 2019, we granted 7,750 shares of stock to certain of our directors. In July 2019, we granted 1,550 shares of stock to a non-employee consultant. In August 2019, we granted 22,500 restricted stock units and issued 175,200 shares of restricted stock to certain of our executive officers and employees, of which 43,802 restricted shares vested on the grant date. In September 2019, we granted 6,470 shares of stock to certain of our directors. In December 2019, we granted 4,745 shares of stock to certain of our directors. In March 2020, we granted 5,060 shares of stock to certain of our directors. In June 2020, we granted 56,450 restricted stock units and issued 188,400 shares of restricted stock to certain of our executive officers and employees, of which 38,975 restricted shares vested on the grant date. In June 2020, we granted 155,654 shares of restricted stock to our executive officer that all vested immediately. In June 2020, we granted 7,575 shares of stock to certain of our directors. In September 2020, we granted 7,600 shares of stock to certain of our directors. In December 2020, we granted 15,105 shares of stock to certain of our directors. In March 2021, we granted 11,431 shares

of stock to certain of our directors. As of June 1, 2021, there were 358,171 shares of restricted stock and restricted stock units that were issued and outstanding, but not yet vested. As of that date, there were 445,216 shares of common stock remaining available for future grants under the 2014 Equity Incentive Plan.

Upon a “Change in Control” (as defined in the 2014 Equity Incentive Plan) of the Company, all unvested restricted stock awards granted under the 2014 Equity Incentive Plan and related restricted stock award agreements will become fully vested.

Retirement Benefits

We provide retirement plan benefits, discussed in this section below, that we believe are customary in our industry. We provide them to remain competitive in retaining talent and attracting new talent to join us.

401(k) Savings Plan

We provide all qualifying full-time employees with the opportunity to participate in our tax-qualified 401(k) savings plan. The plan allows employees to defer receipt of earned salary, up to tax law limits, on a tax-advantaged basis. Accounts may be invested in a wide range of mutual funds. Up to tax law limits, we provide a 3% of salary safe harbor contribution for U.S. employees.

Pension Benefits

Our Greece-based employees have a statutory required defined benefit pension plan according to provisions of Greek law 4093/2012 covering all eligible employees.

Nonqualified Deferred Compensation

We contribute to retirement accounts for certain United Kingdom and Denmark-based employees based on a percentage of their annual salaries.

2014 Executive Severance and Change in Control Severance Plan

Except as set forth under “2014 Equity Incentive Plan” above and as provided under our Executive Severance and Change in Control Severance Plan (the “Severance and CIC Plan”), none of our members of senior management, including Mr. Hadjipateras, Mr. Lycouris and Mr. Young, will receive any benefits as a result of change in control.

We adopted our Severance and CIC Plan in June 2014, under which we expect that certain executive officers of the Company and our subsidiaries and affiliates, may be eligible to receive severance benefits in connection with termination by the Company without Cause (as defined below) or termination by such officer for Good Reason (as defined below). Mr. Hadjipateras, Mr. Lycouris and Mr. Young are participants to the Severance and CIC Plan. A dismissed officer may be eligible for additional severance benefits when dismissed during the period within two years following a change in control of the Company, or in certain cases, during the six-month period prior to a “Change in Control” (as generally defined under the Equity Incentive Plan with the addition of any transaction the board determines to be a Change in Control).

In the event of termination without Cause or for Good Reason, officers subject to the Severance and CIC Plan will be eligible to receive a lump-sum payment equal to two times the sum of such officer’s base salary plus bonus, a pro rata annual bonus for the year of termination, a cash payment equal to 18 months of COBRA continuation coverage and one year’s outplacement services (not to exceed \$10,000). Should such termination take place within two years following a Change in Control of the Company, or in certain cases, during the six-month period prior to a Change in Control (the “CIC Termination Period”), all outstanding equity awards of a terminated officer subject to the Severance and CIC Plan shall vest and the lump-sum payment to the officer will be increased to 2.99 times the sum of the officer’s base salary plus bonus. The participant will receive payments and pay the excise tax, or the payments will be reduced so that no excise tax applies, whatever puts the participant in a better after-tax position. For purposes of the Severance and CIC Plan, “Cause” is generally defined to mean: (i) the willful and continued failure to substantially perform his or her duties, (ii) the willful

engaging in illegal conduct or gross misconduct which is demonstrably and materially injurious to the Company or its affiliates, (iii) engaging in conduct or misconduct that materially harms the reputation or financial position of the Company, (iv) the participant (x) obstructs or impedes, (y) endeavors to influence, obstruct or impede or (z) fails to materially cooperate with, an investigation, (v) the participant withholds, removes, conceals, destroys, alters or by other means falsifies any material which is requested in connection with an investigation, (vi) conviction of, or the entering of a plea of nolo contendere to, a felony or (vii) being found liable in any SEC or other civil or criminal securities law action. For purposes of the Severance and CIC Plan, “Good Reason” generally means (A) with respect to the Chief Executive Officer, Chief Financial Officer and Chief Operating Officer, a material diminution in the nature and scope of the participant’s duties, responsibilities or status, (B) a material diminution in current annual base salary or annual performance bonus target opportunities; or (C) an involuntary relocation to a location more than 25 miles from a participant’s principal place of business, provided that, during the CIC Termination Period, “Good Reason” shall mean (A) (1) any material change in the duties, responsibilities or status (including reporting responsibilities); provided, however, that good reason shall not be deemed to occur upon a change in duties, responsibilities (other than reporting responsibilities) or status that is solely and directly a result of the Company no longer being a publicly traded entity or (2) a material and adverse change in titles or offices (including, if applicable, membership on the board); (B) a more than 10% reduction in the participant’s rate of annual base salary or annual performance bonus or equity incentive compensation target opportunities (including any material and adverse change in the formula for such targets) as in effect immediately prior to such change in control; (C) the failure to continue in effect any employee benefit plan, compensation plan, welfare benefit plan or fringe benefit plan in which the participant is participating immediately prior to such change in control or the taking of any action by the Company, in each case which would materially adversely affect the participant, unless the participant is permitted to participate in other plans providing the participant with materially equivalent benefits in the aggregate; (D) the failure of the Company to obtain the assumption of the Company’s obligations under the plan from any successor; (E) an involuntary relocation of the principal place of business to a location more than 25 miles from the principal place of business immediately prior to such change in control; or (F) a material breach by the Company of the terms of an employment agreement. Although none of our members of senior management, including Mr. Hadjipateras, Mr. Lycouris and Mr. Young, are subject to an employment agreement with us or our subsidiaries, we cannot guarantee that such members will not enter into such agreements in the future.

Prohibition on Hedging

While the Company does not currently have a policy prohibiting its employees, including executive officers, and directors from engaging in hedging transactions (derivatives, equity swaps, forwards, etc.) involving Company securities, the Company does have an insider trading policy that requires, among other things, that all trading in Company shares by “insiders” (as defined below) must be pre-cleared with the Company’s Chief Financial Officer, the Company’s Chief Executive Officer or the Chief Executive Officer of Dorian LPG (USA) LLC (each, an “Authorized Person”) prior to commencing any trade. The relevant Authorized Person will consult as necessary with senior management and/or outside legal counsel to the Company before clearing any proposed trade. The Company’s insider trading policy covers all of the Company’s officers, directors and employees (“insiders”), as well as any transactions in any securities participated in by family members, trusts or corporations directly or indirectly controlled by insiders. In addition, the Company’s insider trading policy applies to transactions engaged in by corporations in which the insider is an officer, director or 10% or greater stockholder and a partnership of which the insider is a partner, unless the insider has no direct or indirect control over the partnership.

President and Chief Executive Officer Pay Ratio

As required by Section 953(b) of the Dodd-Frank Wall Street Reform Act and Item 402(u) of Regulation S-K, we are providing the following information about the relationship of the annual total compensation of our median employee and the annual total compensation of John Hadjipateras, our President and Chief Executive Officer (“CEO”):

This pay ratio is a reasonable estimate calculated in a manner consistent with SEC rules based on our payroll and employment records and other data as described below. The SEC rules for identifying the median compensated employee and calculating the pay ratio based on that employee’s annual total compensation allow companies to adopt a variety of methodologies, to apply certain exclusions and to make reasonable estimates and assumptions that reflect their compensation practices. As such, the pay ratio reported by other companies may not be comparable to the pay ratio reported

above, as other companies may have different employment and compensation practices and may utilize different methodologies, exclusions, estimates and assumptions in calculating their own pay ratios.

The compensation of the Company's median employee ("Median Employee") was determined by reviewing the amount of compensation paid to each of the Company's employees using the data as shown in its payroll records including base salary, bonuses (including equity awards), and other benefits paid by or on behalf of the Company using the same calculation methods and assumptions, disclosed in the Summary Compensation Table. The total reported compensation for Mr. John Hadjipateras in Fiscal Year 2021 was \$3,110,797, as reflected in the Summary Compensation Table included in this Annual Report on Form 10-K, and was approximately 22.3 times the Median Employee's annual total compensation of \$139,385. The methodology used to identify the Median Employee uses the same pay components, as well as the same calculation methods and assumptions, disclosed in the Summary Compensation Table. Given the different methodologies that various public companies will use to determine an estimate of their pay ratio, the estimated ratio reported above should not be used as a basis for comparison between companies. The methodology used to identify the Median Employee excludes consideration of the seafarers who had served on the Company's commercially-managed vessels for one or more days during the year ended March 31, 2021, since such seafarers were employed, and their compensation was determined, by unaffiliated third parties and these seafarers provide services to the Company or its consolidated subsidiaries as independent contractors or "leased" workers. These seafarers are sourced from seafarer recruitment and placement service agencies and are employed with short-term employment contracts.

Compensation Committee Interlocks and Insider Participation

During our last fiscal year, Messrs. Coleman, Kalborg and McAvity served on the Compensation Committee. Each of them is not, nor have any of them ever been, an officer or employee of the Company or any of its subsidiaries. In addition, during the last fiscal year, no executive officer of the Company served as a member of the board of directors or the compensation committee of any other entity that has one or more executive officers serving on our Board or our Compensation Committee.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information known to the Company regarding the beneficial ownership of its common stock as of June 1, 2021 unless otherwise indicated below by (i) each person, group or entity known by the Company to be the beneficial owner of more than 5% of the outstanding shares of its common stock, (ii) each of our directors and director nominees, (iii) each of our NEOs and (iv) all of our executive officers and directors as a group. Unless otherwise stated, the address of each named executive officer and director is c/o Dorian LPG Ltd., c/o Dorian LPG (USA) LLC, 27 Signal Road, Stamford, Connecticut 06902.

Name and Address of Beneficial Owner	Common Shares Beneficially Owned ⁽¹⁾	Percent of Class Beneficially Owned ⁽²⁾
5% Shareholders		
Wellington Management Group LLP ⁽³⁾	6,333,372	15.4 %
Blackrock, Inc. ⁽⁴⁾	5,603,957	13.6 %
Kensico Capital Management Corp. ⁽⁵⁾	4,112,240	10.0 %
Dimensional Fund Advisors LP ⁽⁶⁾	4,071,402	9.9 %
Directors and Executive Officers		
John C. Hadjipateras ⁽⁷⁾	4,767,623	11.6 %
Thomas J. Coleman ⁽⁸⁾	4,145,336	10.1 %
John C. Lycouris ⁽⁹⁾	420,122	1.0 %
Theodore B. Young ⁽¹⁰⁾	136,335	*
Christina Tan	84,084	*
Tim Hansen ⁽¹¹⁾	76,866	*
Alexander C. Hadjipateras	67,249	*
Øivind Lorentzen	51,804	*
Ted Kalborg	48,249	*
Malcolm McAvity	33,096	*
All directors and executive officers as a group (10 persons) ⁽¹²⁾	9,617,681	23.4 %

* The percentage of shares beneficially owned by such director or executive officer does not exceed one percent of the outstanding shares of common stock.

- (1) Each share of common stock is entitled to one vote on matters on which common shareholders are eligible to vote. Beneficial ownership described in the table above has been obtained by the Company only from public filings and information provided to the Company by the listed shareholders for inclusion herein. Beneficial ownership is required to be determined by the shareholder in accordance with the rules under the Exchange Act and consists of either or both voting or investment power with respect to securities. Except as otherwise indicated by footnote, and subject to community property laws where applicable, the persons named in the table have reported that they have sole voting and sole investment power with respect to all shares of common stock shown as beneficially owned by them.
- (2) Percentages based on a total of 41,086,069 shares of common stock outstanding and entitled to vote at the Annual Meeting as of June 1, 2021.
- (3) According to a filing made with the Commission on February 12, 2018, Wellington Management Group LLP ("Wellington Management Group") possesses shared voting power over 4,488,439 shares and shared dispositive power over 6,333,772 shares. According to the filing made with the Commission on February 12, 2018, all shares are owned of record by clients of one or more investment advisers directly or indirectly owned by Wellington Management Group. Those clients have the right to receive, or the power to direct the receipt of, dividends from, or the proceeds from the sale of, such securities. No such client is known to have such right or power with respect to more than 5% of this class of shares. According to the filing made with the Commission on February 12, 2018, the principal business address of Wellington Management Group is c/o Wellington Management Company LLP, 280 Congress Street, Boston, Massachusetts 02210. Wellington Management Group may have made additional transactions in our common shares since its most recent filing with the Commission. Accordingly, the information presented may not reflect all of the shares currently beneficially owned by Wellington Management Group.
- (4) According to the filing made with the Commission on January 27, 2021, Blackrock Inc. possesses sole voting power over 5,546,043 and sole dispositive power over 5,603,957 common shares. Blackrock may have made additional transactions in our common shares since its most recent filing with the Commission. Accordingly, the information presented may not reflect all of the shares currently beneficially owned by Blackrock.

[Table of Contents](#)

- (5) According to a filing made with the Commission March 31, 2021, Kensico possesses shared voting and dispositive power over 4,112,240 shares. According to a filing made with the Commission on March 31, 2021, the principal business address of Kensico is 55 Railroad Avenue, 2nd Floor, Greenwich CT, 06830. Kensico provides investment management services to certain affiliated funds, including Kensico Associates, L.P. and Kensico Offshore Fund Master, Ltd. (collectively, the “Investment Funds”). As Kensico’s co-presidents, Mr. Coleman and Michael B. Lowenstein may be deemed to be controlling persons of Kensico. By virtue of these relationships, Messrs. Coleman and Lowenstein may be deemed to beneficially own the entire number of Dorian shares held by the Investment Funds; however, each disclaims beneficial ownership of any Dorian shares, and proceeds thereof, except to the extent of his pecuniary interest therein. Kensico may have made additional transactions in our common stock since its most recent filings with the Commission. Accordingly, the information presented may not reflect all of the shares currently beneficially owned by Kensico.
- (6) According to the filing made with the Commission on February 12, 2021, Dimensional Fund Advisors LP possesses sole voting power over 3,920,526 shares and sole dispositive power over 4,071,402 shares. According to the filing made with the Commission on February 12, 2021, Dimensional Fund Advisors LP furnishes investment advice to four investment companies registered under the Investment Company Act of 1940, and serves as investment manager or sub-adviser to certain other commingled funds, group trusts and separate accounts (such investment companies, trusts and accounts, collectively referred to as the “Funds”). In certain cases, subsidiaries of Dimensional Fund Advisors LP may act as an adviser or sub-adviser to certain Funds. In its role as investment advisor, sub-adviser and/or manager, Dimensional Fund Advisors LP or its subsidiaries (collectively, “Dimensional”) may possess voting and/or investment power over the securities that are owned by the Funds, and may be deemed to be the beneficial owner of the securities held by the Funds. However, all shares are owned by the Funds. The Funds have the right to receive, or the power to direct the receipt of, dividends from, or the proceeds from the sale of, such securities. To the knowledge of Dimensional, the interest of any one such Fund does not exceed 5% of the class of securities. According to the filing made with the Commission on February 12, 2021, the principal business address of Dimensional is Building One, 6300 Bee Cave Road, Austin, Texas 78746. Dimensional may have made additional transactions in our common shares since its most recent filing with the Commission. Accordingly, the information presented may not reflect all of the shares currently beneficially owned by Dimensional.
- (7) Mr. Hadjipateras possesses sole voting power over 1,880,986 shares, shared voting power over 2,886,637 shares, sole dispositive power over 1,880,986 shares and shared dispositive power over 178,080 shares. Specifically, Mr. Hadjipateras may be deemed to beneficially own (i) 1,880,986 shares over which he has sole voting and dispositive power; (ii) 26,166 shares by virtue of pledges of such shares given under funding and security agreements with each of Theodore B. Young and Alexander J. Ciaputa, pursuant to which Mr. Hadjipateras may be deemed to share the power to vote and dispose of such shares; (iii) 125,000 shares through Mr. Hadjipateras’ spouse, 6,250 shares through Mr. Hadjipateras’ children, and 20,664 through the LMG Trust (Mr. Hadjipateras and his wife are trustees of the LMG Trust and the beneficiary of the LMG Trust is one of their children), pursuant to which Mr. Hadjipateras may be deemed to share the power to vote and dispose of such shares; and (iv) 2,708,557 shares by virtue of a revocable proxy granted to Mr. Hadjipateras by each of Mark C. Hadjipateras, Angeliki C. Hadjipateras, Aikaterini C. Hadjipateras, Konstantinos Markakis, Scott M. Sambur, as Trustee of the Kyveli Trust, and George J. Dambassis, pursuant to which Mr. Hadjipateras may be deemed to share the power to vote such shares. Mr. Hadjipateras disclaims beneficial ownership of the reported Dorian shares, and the proceeds thereof, except to the extent of any pecuniary interest therein.
- (8) According to filings made with the Commission, Mr. Coleman beneficially owns 33,096 Dorian common shares. According to filings made with the Commission, Mr. Coleman serves as co-President of Kensico alongside Mr. Lowenstein. As a controlling person of Kensico, Mr. Coleman thus may be deemed to also beneficially own the entire number of the Company’s common shares held by the Investment Funds discussed above. Mr. Coleman disclaims beneficial ownership of the reported Dorian shares held by the Investment Funds, and the proceeds thereof, except to the extent of any pecuniary interest therein.
- (9) Mr. Lycouris beneficially owns 220,122 common shares. Mr. Lycouris may also be deemed to indirectly beneficially own 200,000 common of our common shares through the Kyveli Trust, of which Mr. Lycouris and other members of his family are beneficiaries. Mr. Lycouris disclaims all beneficial ownership of the common shares beneficially owned by the Kyveli Trust except to the extent of his pecuniary interest therein.
- (10) According to filings made with the Commission, Mr. Young has pledged 13,083 shares to John C. Hadjipateras as security under a funding and security agreement.
- (11) Does not include 52,000 shares of restricted stock units that are subject to vesting.
- (12) To avoid double counting: (i) the 200,000 common shares that may be deemed to be indirectly beneficially owned by Mr. Lycouris through the Kyveli Trust and Mr. Hadjipateras by virtue of a revocable proxy (see Notes 7 and 9 above) are included only once in the total and (ii) the 13,083 common shares that may be deemed to be beneficially owned by Theodore B. Young and John C. Hadjipateras (see Notes 9 and 11 above) are included only once in the total.

Equity Compensation Plan Information

The following table shows information relating to the number of shares authorized for issuance under our equity compensation plans as of March 31, 2021.

March 31, 2021	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
<i>Equity compensation plans</i>			
Approved by shareholders	—	—	445,216 ⁽¹⁾
Not approved by shareholders	—	—	—
Total	—	—	445,216

(1) Represents available shares for future issuance under the 2014 Equity Incentive Plan as of March 31, 2021. See “2014 Equity Incentive Plan” above.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

We describe below transactions and series of similar transactions, since the beginning of our last fiscal year, to which we were and are a party, in which:

- the amounts involved exceeded or will exceed \$120,000; and
- any of our directors, executive officers or holders of more than 5% of our common stock, or an affiliate or immediate family member thereof, had or will have a direct or indirect material interest.

Except as noted otherwise, the Audit Committee or the Board of Directors approved or ratified each arrangement described below (other than arrangements that were entered into prior to the adoption of the related party transaction policy by the Board of Directors).

Business Relationships and Related Person Transactions Policy

We have policies and procedures in place regarding referral of related person transactions to our Audit Committee for consideration and approval. Compensation matters involving any related persons are reviewed and approved by our Compensation Committee. Our Chief Financial Officer, in consultation with our outside counsel, is primarily responsible for the development and implementation of processes and controls to obtain information from the directors and executive officers with respect to related person transactions and for determining, based on the relevant facts and circumstances, whether a related person has a direct or indirect material interest in the transaction. Under our policy, transactions that (i) involve directors, director nominees, executive officers, significant shareholders or other “related persons” in which the Company is or will be a participant and (ii) are of the type that must be disclosed under the Commission’s rules must be referred by the Chief Financial Officer, after consultation with our outside counsel, to our Audit Committee for the purpose of determining whether such transactions are in the best interests of the Company. Under our policy, it is the responsibility of the individual directors, director nominees, executive officers and holders of five percent or more of the Company’s common stock to promptly report to our Chief Financial Officer all proposed or existing transactions in which the Company and they, or any related person of theirs, are parties or participants. The Chief Financial Officer (or the Chief Executive Officer, in the event the transaction in question involves the Chief Financial Officer or a related person of the Chief Financial Officer) is then required to furnish to the chairperson of the Audit Committee reports relating to any transaction that, in the Chief Financial Officer’s judgment with advice of outside counsel, may require reporting pursuant to the Commission’s rules or may otherwise be the type of transaction that should be brought to the attention of the Audit Committee. The Audit Committee considers material facts and circumstances concerning the transaction in question,

consults with counsel and other advisors as it deems advisable and makes a determination or recommendation to the Board of Directors and appropriate officers of the Company with respect to the transaction in question. In its review, the Audit Committee considers the nature of the related person's interest in the transaction, the material terms of the transaction, the relative importance of the transaction to the related person, the relative importance of the transaction to the Company and any other matters deemed important or relevant. Upon receipt of the Audit Committee's recommendation, the Board of Directors or officers, excluding in all such instances the related party, take such action as deemed appropriate and necessary in light of their respective responsibilities under applicable laws and regulations.

Related Party Transactions

Registration Rights Agreement

We entered into a registration rights agreement dated June 3, 2014 (the "Registration Rights Agreement") with Kensico granting Kensico the right, subject to certain terms and conditions, to require us, on up to three separate occasions beginning 180 days following the closing of our initial public offering, to register under the Securities Act of 1933, as amended, our common shares held by Kensico for offer and sale to the public, including by way of an underwritten public offering. In addition, the registration rights agreement grants Kensico the right to require us to make available shelf registration statements permitting sales of shares into the market from time to time over an extended period, and to exercise certain piggyback registration rights permitting participation in certain registrations of common shares by us. All expenses relating to our registration have been and will be borne by us. On July 10, 2015, the Commission declared effective our registration statement on Form S-3 that permits Kensico to offer its shares for resale from time to time, pursuant to the Registration Rights Agreement.

Management Agreements

As of July 1, 2014, vessel management services and the associated agreements for our fleet were transferred from DHSA and are now provided through our wholly owned subsidiaries Dorian LPG (USA) LLC, Dorian LPG (UK) Ltd. and Dorian LPG Management Corp. Prior to the management transfer, DHSA had agreements with Eagle Ocean, a company 100% owned by Mr. John C. Hadjipateras, the Chairman of the Board, our President and our Chief Executive Officer, to provide certain of the vessel management services for our fleet.

In connection with the agreements for the management transfer, Eagle Ocean transferred a certain number of employees and selected assets to our wholly-owned subsidiaries. Eagle Ocean incurs miscellaneous costs, for which we reimbursed Eagle Ocean less than \$0.1 million for the fiscal year ended March 31, 2021.

Dorian LPG (USA) LLC and its subsidiaries entered into an agreement with DHSA, retroactive to July 2014 and superseding an agreement between Dorian LPG (UK) Ltd. and DHSA, for the provision by Dorian LPG (USA) LLC and its subsidiaries of certain chartering and marine operation services to DHSA, for which income was earned and included in other income totaling \$0.1 million for the year ended March 31, 2021. As of March 31, 2021, \$1.0 million was due from DHSA.

For further information regarding our transactions with related parties, please see Note 3 to our audited consolidated financial statements included herein.

Arrangements Involving Family Members

In respect of the year ended March 31, 2021, we paid \$576,500 in salary and cash bonus to Mr. Alexander C. Hadjipateras, a son of Mr. John C. Hadjipateras, the Chairman of the Board, our President and our Chief Executive Officer, for his service as Executive Vice President of Business Development of Dorian LPG (USA) LLC. In the year ended March 31, 2021, Mr. Alexander C. Hadjipateras was also eligible to participate in all benefit programs generally available to employees, including supplemental health care benefits for coverage outside of the United States, and his compensation is commensurate with that of his peers.

In respect of the year ended March 31, 2021, we paid \$195,618 in salary and cash bonus to Peter Hadjipateras, a son of Mr. John C. Hadjipateras, the Chairman of the Board, our President and our Chief Executive Officer, for his service

as Fleet Efficiency Manager. In the year ended March 31, 2021, Mr. Peter Hadjipateras was also eligible to participate in all benefit programs generally available to employees and his compensation is commensurate with that of his peers.

Director Independence

The Board of Directors has determined that, as of the date hereof, each of the following members of our Board of Directors is an “independent director” as defined under the applicable NYSE standards, Commission rules and the Company’s Corporate Governance Guidelines: Messrs. Thomas J. Coleman, Ted Kalborg, Øivind Lorentzen and Malcolm McAvity, and Ms. Christina Tan. Therefore, our Board of Directors has satisfied its objective as set forth in the Company’s Corporate Governance Guidelines as well as NYSE listing standards, requiring that at least a majority of the Board consist of independent directors. As required under the NYSE listing standards, in making its determinations, our Board of Directors has considered whether any director has a direct or indirect material relationship with us that could compromise his or her ability to exercise independent judgment in carrying out his or her responsibilities. In addition, our Board of Directors considered a series of certain specific transactions, relationships and arrangements expressly enumerated in the NYSE independence definition. Specifically, a member of our Board of Directors may be considered independent if such member:

- has not been employed by the Company within the last three years (other than as interim Chairman of the Board of Directors or interim Chief Executive Officer);
- does not have an immediate family member who is, or has been, employed by the Company as an executive officer within the last three years;
- has not received, and does not have an immediate family member who has received, more than \$120,000 in direct compensation from the Company during any twelve-month period within the last three years, other than for services as a member of the Board of Directors or compensation for prior service (including pension or other forms of deferred compensation for prior service, provided such compensation is not contingent in any way on continued service); provided that, compensation received by a director for former service as an interim Chairman or Chief Executive Officer or other executive officer need not be considered in determining independence under this test; provided further that, compensation received by an immediate family member for service as an employee of the Company (other than an executive officer) need not be considered in determining independence under this test;
- (A) is not a current partner or employee of a firm that is the Company’s internal or external auditor; (B) does not have an immediate family member who is a current partner of a firm that is the Company’s internal or external auditor; (C) does not have an immediate family member who is a current employee of a firm that is the Company’s internal or external auditor and personally works on the Company’s audit; and (D) is not, and has not been within the last three years, and does not have an immediate family member who is, or has been within the last three years, a partner or employee of a firm that is the Company’s internal or external auditor and personally worked on Company’s audit within such time;
- is not, and has not been within the last three years, and does not have an immediate family member who is, or has been within the last three years, employed as an executive officer of a public company where any of the Company’s present executive officers at the same time serves or served as a member of such public company’s compensation committee; and
- is not, and has not been within the last three years, an employee of a significant customer or supplier of the Company, including any company that has made payments to, or received payments from, the Company for property or services in an amount which, in any of the last three fiscal years, exceeds the greater of \$1 million, or 2% of such other company’s consolidated gross revenues, and does not have an immediate family member who is, or has been within the last three years, an executive officer of such a significant customer or supplier; provided that contributions to not- for-profit organizations shall not be considered payments for purposes of this test.

After careful review of the categorical tests enumerated under the NYSE independence definition, the individual circumstances of each director with regard to each director’s business and personal activities and relationships as they may

relate to us and our management, the Board has concluded that each of the aforementioned directors has no relationship with the Company that would interfere with such director's exercise of independent judgment in carrying out his responsibilities as a director of the Company.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The following table presents fees for professional services rendered by Deloitte Certified Public Accountants S.A. ("Deloitte"), our independent registered public accounting firm, for the years ended March 31, 2021 and 2020. Deloitte did not bill us for other services during those periods.

	2021	2020
Audit fees ⁽¹⁾	\$ 517,135	\$ 464,542
All other fees ⁽²⁾	3,828	-
Total	\$ 520,963	\$ 464,542

(1) Audit fees consist of aggregate fees for professional services, including out-of-pocket expenses, provided in connection with services rendered for the integrated or financial statement audits of our consolidated financial statements, reviews of interim financial statements included in filings with the Commission, services performed in connection with our registration statement on Form S-3 filed with the Commission in 2020, and other audit services required for SEC or other regulatory filings and related comfort letters, consents and assistance with and review of documents filed with the Commission.

(2) All other fees consist of a subscription for accounting research software.

Audit Committee Pre-Approval Policies and Procedures

The Audit Committee charter sets forth our policy regarding retention of the independent auditors, giving the Audit Committee responsibility for the appointment, replacement, compensation, evaluation and oversight of the work of the independent auditors. As part of this responsibility, our Audit Committee pre-approves the audit and non-audit services performed by our independent auditors in order to assure that they do not impair the auditor's independence from the Company. The Audit Committee has adopted a policy which sets forth the procedures and the conditions pursuant to which services proposed to be performed by the independent auditors may be pre-approved.

There were no non-audit services provided by our independent registered public accounting firm during the fiscal year ended March 31, 2021 with the exception of providing a subscription for accounting research software.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES.

Notes to Consolidated Financial Statements	F-8

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Dorian LPG Ltd.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Dorian LPG Ltd. and subsidiaries (the "Company") as of March 31, 2021 and 2020, the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended March 31, 2021, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2021, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of March 31, 2021, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 2, 2021, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte Certified Public Accountants S.A.
Athens, Greece
June 2, 2021

We have served as the Company's auditor since 2013.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Dorian LPG Ltd.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Dorian LPG Ltd. and subsidiaries (the “Company”) as of March 31, 2021, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2021, based on criteria established in Internal Control — Integrated Framework (2013) issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended March 31, 2021, of the Company and our report dated June 2, 2021, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying “Management’s Annual Report on Internal Control Over Financial Reporting”. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Dorian LPG Ltd.
Notes to Consolidated Financial Statements
(Expressed in United States Dollars)

1. Basis of Presentation and General Information

Dorian LPG Ltd. (“Dorian”) was incorporated on July 1, 2013 under the laws of the Republic of the Marshall Islands, is headquartered in the United States and is engaged in the transportation of liquefied petroleum gas (“LPG”) worldwide through the ownership and operation of LPG tankers. Dorian LPG Ltd. and its subsidiaries (together “we,” “us,” “our,” or the “Company”) are focused on owning and operating very large gas carriers (“VLGCs”), each with a cargo carrying capacity of greater than 80,000 cbm. As of March 31, 2021, our fleet consists of twenty-four VLGCs, including nineteen fuel-efficient 84,000 cbm ECO-design VLGCs (“ECO VLGCs”), three 82,000 cbm VLGCs, and two time chartered-in VLGCs. Ten of our technically-managed ECO VLGCs are fitted with exhaust gas cleaning systems (commonly referred to as “scrubbers”) to reduce sulfur emissions. The installation of scrubbers on an additional two of our technically-managed VLGCs was planned to be completed during the second calendar quarter of 2021. As of March 31, 2021, contractual commitments related to scrubbers totaled \$1.5 million. On March 31, 2021, we entered into a bareboat agreement to charter-in a newbuilding dual-fuel VLGC that is expected to be delivered in March 2023 (see Note 18 for further details).

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) and include the accounts of Dorian LPG Ltd. and its subsidiaries.

On April 1, 2015, Dorian and Phoenix Tankers Pte. Ltd. (“Phoenix”) began operations of Helios LPG Pool LLC (the “Helios Pool”), which entered into pool participation agreements for the purpose of establishing and operating, as charterer, under variable rate time charters to be entered into with owners or disponent owners of VLGCs, a commercial pool of VLGCs whereby revenues and expenses are shared. See Note 3 below for further description of the Helios Pool relationship.

Our subsidiaries, which are all wholly-owned and all are incorporated in Republic of the Marshall Islands (unless otherwise indicated below), as of March 31, 2021 are listed below.

(1) CBM: Cubic meters, a standard measure for LPG tanker capacity

(2) Operated pursuant to a bareboat charter agreement. Refer to Notes 9 below for further information

(3) Upon delivery, will be operated pursuant to a bareboat charter agreement. Refer to Notes 18 below for further information

(4) Expected to be delivered in 2023

Customers

For the years ended March 31, 2021 and 2020, the Helios Pool accounted for 93% and 89% of our total revenues, respectively. No other individual charterer accounted for more than 10%. For the year ended March 31, 2019, the Helios Pool and one other individual charterer represented 76% and 14% of our total revenues, respectively.

COVID-19

The outbreak of COVID-19 resulted in the implementation of numerous actions taken by governments and governmental agencies in an attempt to mitigate the spread of the virus. These measures resulted in a significant reduction in global economic activity and extreme volatility in the global financial markets. The reduction of economic activity significantly reduced the global demand for oil, refined petroleum products (most notably aviation fuel) and LPG. We expect that the impact of the COVID-19 virus and the uncertainty in the supply and demand for fossil fuels, including LPG, will continue to cause volatility in the commodity markets. We experienced and may continue to experience additional costs to effect crew changes. Although to date there has not been any significant effect on our operating activities due to COVID-19, other than an approximately 60-day delay associated with the drydocking of one of our vessels in China

that left drydock in April 2020, the extent to which COVID-19 will impact our results of operation and financial condition will depend on future developments, which are highly uncertain and cannot be predicted, including among others, new information which may emerge concerning the severity of the virus and the actions to contain or treat its impact or any resurgence or mutation of the virus, the availability of vaccines and their global deployment, the development of effective treatments, the imposition of effective public safety and other protective measures and the public's response to such measures. There continues to be a high level of uncertainty relating to how the pandemic will evolve, how governments and consumers will react and progress on the approval and distribution of vaccines. An estimate of the impact cannot therefore be made at this time.

2. Significant Accounting Policies

- (a) **Principles of consolidation:** The consolidated financial statements incorporate the financial statements of the Company and its wholly-owned subsidiaries. Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statements of operations from the effective date of acquisition and up to the effective date of disposal, as appropriate. All intercompany balances and transactions have been eliminated.
- (b) **Use of estimates:** The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.
- (c) **Other comprehensive income/(loss):** We follow the accounting guidance relating to comprehensive income, which requires separate presentation of certain transactions that are recorded directly as components of shareholders' equity. We have no other comprehensive income/(loss) items and, accordingly, comprehensive income/(loss) equals net income/(loss) for the periods presented and thus we have not presented this in the consolidated statement of operations or in a separate statement.
- (d) **Foreign currency translation:** Our functional currency is the U.S. Dollar. Foreign currency transactions are measured and recorded in the functional currency using the exchange rate in effect at the date of the transaction. As of balance sheet date, monetary assets and liabilities that are denominated in a currency other than the functional currency are adjusted to reflect the exchange rate at the balance sheet date and any gains or losses are included in the statement of operations. For the periods presented, we had no foreign currency derivative instruments.
- (e) **Cash and cash equivalents:** We consider highly liquid investments such as time deposits and certificates of deposit with an original maturity of three months or less to be cash equivalents.
- (f) **Short-term investments:** We consider short-term, highly-liquid time deposits placed with financial institutions, which are readily convertible into known amounts of cash with original maturities of more than three months, but less than 12 months at the time of purchase to be short-term investments.
- (g) **Investment securities:** All of our investment securities held are classified as available-for-sale securities and are available to be sold in the future in response to our liquidity needs and asset-liability management strategies, among other considerations. Investment securities are reported at fair value, with unrealized gains and losses reported in in other gain/(loss), net on our consolidated statements of operations.
- (h) **Trade receivables, net and accrued revenues:** Trade receivables, net and accrued revenues, reflect receivables from vessel charters, net of an allowance for doubtful accounts. At each balance sheet date, all potentially uncollectible accounts are assessed individually for purposes of determining the appropriate provision for doubtful accounts. Provision for doubtful accounts for the periods presented was zero.
- (i) **Due from related parties:** Due from related parties reflect receivables from the Helios Pool and other related parties. Distributions of earnings due from the Helios Pool are classified as current and working capital contributed to the Helios Pool is classified as non-current.

- (j) **Inventories:** Inventories consist of bunkers on board the vessels when vessels are unemployed or are operating under voyage charters and lubricants and stores on board the vessels. Inventories are stated at the lower of cost or net realizable value. Cost is determined by the first in, first out method. Net realizable value is the estimated selling price, less reasonably predictable costs of disposal and transportation.
- (k) **Vessels, net:** Vessels, net are stated at cost net of accumulated depreciation and impairment charges. The costs of the vessels acquired as part of a business acquisition are recorded at their fair value on the date of acquisition. The cost of vessels purchased consists of the contract price, less discounts, plus any direct expenses incurred upon acquisition, including improvements, commission paid, delivery expenses and other expenditures to prepare the vessel for her initial voyage. The initial purchase of LPG coolant for the refrigeration of cargo is also capitalized. Allocated interest costs incurred during construction are capitalized. Subsequent expenditures for conversions and major improvements, including scrubbers, are also capitalized when they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Repairs and maintenance are expensed as incurred.
- (l) **Impairment of vessels:** We review our vessels “held and used” for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the estimate of future undiscounted cash flows, excluding interest charges, expected to be generated by the use of the asset is less than its carrying amount, the asset is evaluated for an impairment loss. Measurement of the impairment loss is based on the fair value of the asset.
- (m) **Vessel depreciation:** Depreciation is computed using the straight-line method over the estimated useful life of the vessels, after considering the estimated salvage value. Each vessel’s salvage value is equal to the product of its lightweight tonnage and estimated scrap rate. Management estimates the useful life of its vessels to be 25 years from the date of initial delivery from the shipyard. Secondhand vessels are depreciated from the date of their acquisition through their remaining estimated useful life.
- (n) **Drydocking and special survey costs:** Drydocking and special survey costs are accounted for under the deferral method whereby the actual costs incurred are deferred and are amortized on a straight-line basis over the period through the date the next survey is scheduled to become due. The classification societies provide guidelines applicable to LPG vessels relating to extended intervals for drydocking. Generally, we are required to drydock each of our vessels under 15 years of age every five years until they reach 15 years of age unless an extension of the drydocking to seven and one-half years is requested and granted by the classification society and the vessel is not older than 20 years of age. Costs deferred are limited to actual costs incurred at the yard and parts used in the drydocking or special survey. Costs deferred include expenditures incurred relating to shipyard costs, hull preparation and painting, inspection of hull structure and mechanical components, steelworks, machinery works, and electrical works. If a survey is performed prior to the scheduled date, the remaining unamortized balances are immediately written off. Unamortized balances of vessels that are sold are written-off and included in the calculation of the resulting gain or loss in the period of the vessel’s sale. The amortization charge is presented within Depreciation and amortization in the consolidated statement of operations.
- (o) **Financing costs:** Financing costs incurred for obtaining new loans and credit facilities are deferred and amortized to interest expense over the respective term of the loan or credit facility using the effective interest rate method. Any unamortized balance of costs relating to loans/credit facilities repaid or refinanced is either expensed in the period the repayment or refinancing is made, or deferred and amortized over the terms of the respective credit facility, subject to the accounting guidance regarding Debt—Modifications and Extinguishments. Any unamortized balance of costs related to credit facilities repaid is expensed in the period. Any unamortized balance of costs relating to credit facilities refinanced are deferred and amortized over the term of the respective credit facility in the period the refinancing occurs, subject to the provisions of the accounting guidance relating to Debt—Modifications and Extinguishments. The unamortized financing costs are reflected as a reduction of Long-term debt—net of current portion and deferred financing fees in the consolidated balance sheet.

- (p) **Restricted cash:** Restricted cash represents minimum liquidity to be maintained with certain banks under our borrowing arrangements, pledged cash deposits, and amounts held in escrow. The restricted cash is classified as non-current in the event that its obligation is not expected to be terminated within the next twelve months as they are long-term in nature.
- (q) **Leases:** Refer to Note 10 for a description of our operating lease expenses for the years ended March 31, 2021, 2020, and 2019 and to Note 18 for a description of commitments related to our leases as of March 31, 2021. The following is a description of our leasing arrangements.

Time charter-out contracts

Our time charter revenues are generated from our vessels being hired by a third-party charterer for a specified period in exchange for consideration, which is based on a monthly hire rate. The charterer has the full discretion over the ports subject to compliance with the applicable charter party agreement and relevant laws. In a time charter contract, we are responsible for all the costs incurred for running the vessel such as crew costs, vessel insurance, repairs and maintenance, and lubricants. The charterer bears the voyage related costs such as bunker expenses, port charges and canal tolls during the hire period. The performance obligations in a time charter contract are satisfied on a straight-line basis over the term of the contract beginning when the vessel is delivered to the charterer until it is redelivered back to us. The charterer generally pays the charter hire monthly in advance. We determined that our time charter contracts are considered operating leases and therefore fall under the scope of the guidance because (i) the vessel is an identifiable asset, (ii) we do not have substantive substitution rights, and (iii) the charterer has the right to control the use of the vessel during the term of the contract and derives the economic benefits from such use. Under the guidance, we elected the practical expedient available to lessors to not separate the lease and non-lease components included in the time charter revenue because (i) the pattern of revenue recognition for the lease and non-lease components is the same as it is earned by the passage of time and (ii) the lease component, if accounted for separately, would be classified as an operating lease.

Time charter revenues are recognized when an agreement exists, the price is fixed, service is provided and the collection of the related revenue is reasonably assured. We record time charter revenues on a straight-line basis over the term of the charter as service is provided. Time charter revenues received in advance of the provision of charter service are recorded as deferred income and recognized when the charter service is rendered. Deferred income or accrued revenue also may result from straight-line revenue recognition in respect of charter agreements that provide for varying charter rates. Deferred income and accrued revenue amounts that will be recognized within the next twelve months are presented as current, with amounts to be recognized thereafter presented as non-current. Revenues earned through the profit-sharing arrangements in the time charters represent contingent rental revenues that are recognized when earned and amounts are reasonably assured based on estimates provided by the charterer.

Net pool revenues—related party

As from April 1, 2015, we began operation of a pool. Net pool revenues—related party for each vessel in the pool is determined in accordance with the profit-sharing terms specified within the pool agreement. In particular, the pool manager calculates the net pool revenues using gross revenues less voyage expenses of all the pool vessels and less the general and administrative expenses of the pool and distributes the net pool revenues as time charter hire to participants based on:

- pool points (vessel attributes such as cargo carrying capacity, fuel consumption, and speed are taken into consideration); and
- number of days the vessel participated in the pool in the period.

We recognize net pool revenues—related party on a monthly basis, when the vessel has participated in the pool during the period and the amount of net pool revenues for the month can be estimated reliably. Revenue generated from the pool is accounted for as revenue from operating leases.

Time charter-in contracts

Our time charter-in contracts relate to the charter-in activity of vessels from third parties for a specified period of time in exchange for consideration, which is based on a monthly hire rate. We elected the practical expedient of the guidance that allows for contracts with an initial lease term of 12 months or less to be excluded from the operating lease right-of-use assets and lease liabilities recognized on our consolidated balance sheets.

Under the guidance, we elected the practical expedients available to lessees to not separate the lease and non-lease components included in the charter hire expense because (i) the pattern of revenue recognition for the lease and non-lease components is the same as it is earned by the passage of time and (ii) the lease component, if accounted for separately, would be classified as an operating lease. We elected not to separate the lease and non-lease components included in charter hire expense, but to recognize operating lease expense as a combined single lease component for all time charter-in contracts.

Office leases

We carried forward our historical assessments of (i) whether contracts are or contain leases, (ii) lease classifications, and (iii) initial direct costs. For leases with terms greater than 12 months, we record the related right-of-use asset and lease liability as the present value of fixed lease payments over the lease term. For leases that do not provide a readily determinable discount rate, we use our incremental borrowing rate to discount lease payments to present value.

Under the guidance, we elected the practical expedients available to lessees to not separate the lease and non-lease components included in the office lease expense because (i) the pattern of revenue recognition for the lease and non-lease components is the same as it is earned by the passage of time and (ii) the lease component, if accounted for separately, would be classified as an operating lease. We elected not to separate the lease and non-lease components included in general and administrative expenses, but to recognize operating lease expense as a combined single lease component for all office leases.

- (r) ***Voyage charter revenues:*** In a voyage charter contract, a charterer hires a vessel to transport a specific agreed-upon cargo for a single voyage, which may contain multiple load ports and discharge ports. The consideration in such a contract is determined on the basis of a freight rate per metric ton of cargo carried or occasionally on a lump sum basis. The charter party generally has a minimum amount of cargo. The charterer is liable for any short loading of cargo or "dead" freight. The contract generally has standard payment terms of freight paid within three to five days after completion of loading. The contract generally has a "demurrage" or "despatch" clause. As per this clause, the charterer reimburses us for any potential delays exceeding the allowed laytime as per the charter party clause at the ports visited which is recorded as demurrage revenue. Conversely, the charterer is given credit if the loading/discharging activities happen within the allowed laytime, known as despatch, resulting in a reduction in revenue. The voyage contracts generally have variable consideration in the form of demurrage or despatch. Revenue from voyage charters is recognized when (i) the parties to the contract have approved the contract in the form of a written charter agreement and are committed to perform their respective obligations, (ii) we can identify each party's rights regarding the services to be transferred, (iii) we can identify the payment terms for the services to be transferred, (iv) the charter agreement has commercial substance (that is, the risk, timing, or amount of our future cash flows is expected to change as a result of the contract) and (v) it is probable that we will collect substantially all of the consideration to which we will be entitled in exchange for the services that will be transferred to the charterer.

Voyage charter agreements do not contain a lease and are therefore considered service contracts that fall under the provisions of Accounting Standard Codification ("ASC") 606 *Revenue from Contracts with Customers*. Voyage contracts are considered service contracts which fall under the provisions of ASC 606 because we retain control over the operations of the vessel, including directing the routes taken and vessel speed. Voyage contracts generally have variable consideration in the form of demurrage or despatch. We determined that a voyage charter agreement includes a single performance obligation, which is to provide the charterer with an integrated transportation service within a specified time period. In addition, we have concluded that a contract for a voyage

charter meets the criteria to recognize revenue over time because the charterer simultaneously receives and consumes the benefits of our performance as the voyage progresses and therefore revenues are recognized on a pro rata basis over the duration of the voyage determined on a load-to-discharge port basis. In the event a vessel is acquired or sold while a voyage is in progress, the revenue recognized is based on an allocation formula agreed between the buyer and the seller. Demurrage income represents payments by the charterer to the vessel owner when loading or discharging time exceeds the stipulated time in the voyage charter and is recognized when earned and collection is reasonably assured. Despatch expense represents payments by us to the charterer when loading or discharging time is less than the stipulated time in the voyage charter and is recognized as incurred. Voyage charter revenue relating to voyages in progress as of the balance sheet date are accrued and presented in Trade receivables and accrued revenue in the consolidated balance sheet.

- (s) **Voyage expenses:** Voyage expenses are expensed as incurred, except for expenses during the ballast portion of the voyage (period between the contract date and the date of the vessel's arrival to the load port). Any expenses incurred during the ballast portion of the voyage such as bunker expenses, canal tolls and port expenses are deferred and are recognized on a straight-line basis, in voyage expenses, over the voyage duration as we satisfy the performance obligations under the contract provided these costs are (1) incurred to fulfill a contract that we can specifically identify, (2) able to generate or enhance resources of the company that will be used to satisfy performance of the terms of the contract, and (3) expected to be recovered from the charterer. These costs are considered contract fulfillment costs because the costs are direct costs related to the performance of the contract and are expected to be recovered.
- (t) **Commissions:** Charter hire commissions to brokers or managers, if any, are deferred and amortized over the related charter period and are included in Voyage expenses.
- (u) **Charter hire expenses:** Charter hire expenses in relation to vessels that we may occasionally charter in from third parties are recorded on a straight-line basis over the term of the charter as service is provided. Charter hire expenses paid in advance of the provision of charter service are recorded as a current asset and recognized when the charter service is rendered. Deferred expenses also may result from straight-line recognition in respect of charter agreements that provide for varying charter rates. Deferred expense amounts that will be recognized within the next twelve months are presented as current, with amounts to be recognized thereafter presented as noncurrent.
- (v) **Vessel operating expenses:** Vessel operating expenses are accounted for as incurred on the accrual basis. Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the cost of spares and consumable stores and other miscellaneous expenses.
- (w) **Repairs and maintenance:** All repair and maintenance expenses, including underwater inspection costs are expensed in the period incurred. Such costs are included in Vessel operating expenses.
- (x) **Stock-based compensation:** Stock-based payments to employees and directors are determined based on their grant date fair values and are amortized against income over the vesting period. The fair value is considered to be the closing price recorded on the grant date. We account for restricted stock award forfeitures upon occurrence.
- (y) **Stock repurchases:** We record the repurchase of our shares of common stock at cost based on the settlement date of the transaction. These shares are classified as treasury stock unless canceled, which is a reduction to shareholders' equity. Treasury shares are included in authorized and issued shares, but excluded from outstanding shares.
- (z) **Segment reporting:** Each of our vessels serves the same type of customer, have similar operations and maintenance requirements, operate in the same regulatory environment, and are subject to similar economic characteristics. Based on this, we have determined that our Company operates in one reportable segment, the international transportation of liquid petroleum gas with its fleet of vessels. Furthermore, when we charter a vessel to a charterer, the charterer is free to trade the vessel worldwide and, as a result, the disclosure of geographic information is impracticable.

(aa) **Derivative instruments:** All derivatives are stated at their fair value, as either a derivative asset or a liability. The fair value of the interest rate derivatives is based on a discounted cash flow analysis and their fair value changes are recognized in current period earnings. When the derivatives do qualify for hedge accounting, depending upon the nature of the hedge, changes in fair value of the derivatives are either recognized in current period earnings or in other comprehensive income/(loss) (effective portion) until the hedged item is recognized in the consolidated statements of operations. For the periods presented, no derivatives were accounted for as accounting hedges.

(ab) **Fair value of financial instruments:** In accordance with the requirements of accounting guidance relating to Fair Value Measurements, the Company classifies and discloses its assets and liabilities carried at fair value in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

(ac) **Recent accounting pronouncements:**

Accounting Policies Not Yet Adopted

In March 2020, the Financial Accounting Standards Board (“FASB”) issued Accounting Standard Update (“ASU”) No. 2020-04, “Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting (“ASU 2020-04”).” ASU 2020-04 provides temporary optional expedients and exceptions to the guidance in U.S. GAAP on contract modifications and hedge accounting to ease the financial reporting burdens related to the expected market transition from LIBOR and other interbank offered rates to alternative reference rates. This ASU is effective for adoption at any time between March 12, 2020 and December 31, 2022. In January 2021, FASB issued ASU 2021-01 (Topic 848), which amends and clarifies the existing accounting standard issued in March 2020 for Reference Rate Reform. Reference rates such as LIBOR, are widely used in a broad range of financial instruments and other agreements. The ASU permits entities to elect certain optional expedients and exceptions when accounting for derivative contracts and certain hedging relationships affected by changes in the interest rates used for discounting cash flows, for computing variation margin settlements, and for calculating price alignment interest in connection with reference rate reform activities under way in global financial markets (the “discounting transition”). We are currently evaluating the impact of this adoption on our consolidated financial statements and related disclosures.

3. Transactions with Related Parties

Dorian (Hellas) S.A.

Dorian (Hellas) S.A. (“DHSA”) formerly provided technical, crew, commercial management, insurance and accounting services to our vessels and had agreements to outsource certain of these services to Eagle Ocean Transport Inc. (“Eagle Ocean Transport”), which is 100% owned by Mr. John C. Hadjipateras, our Chairman, President and Chief Executive Officer.

Dorian LPG (USA) LLC and its subsidiaries entered into an agreement with DHSA, retroactive to July 2014 and superseding an agreement between Dorian LPG (UK) Ltd. and DHSA, for the provision by Dorian LPG (USA) LLC and its subsidiaries of certain chartering and marine operation services to DHSA, for which income was earned and included in “Other income-related parties” totaling \$0.1 million, \$0.1 million and \$0.2 million for the years ended March 31, 2021, 2020 and 2019, respectively. As of March 31, 2021, \$1.0 million was due from DHSA and included in “Due from related parties.” As of March 31, 2020, \$1.3 million was due from DHSA and included in “Due from related parties.”

Helios LPG Pool LLC ("Helios Pool")

On April 1, 2015, Dorian and Phoenix began operations of the Helios Pool, which entered into pool participation agreements for the purpose of establishing and operating, as charterer, under variable rate time charters to be entered into with owners or disponent owners of VLGCs, a commercial pool of VLGCs whereby revenues and expenses are shared. We hold a 50% interest in the Helios Pool as a joint venture with Phoenix and all significant rights and obligations are equally shared by both parties. All profits of the Helios Pool are distributed to the pool participants based on pool points assigned to each vessel as variable charter hire and, as a result, there are no profits available to the equity investors as a share of equity. We have determined that the Helios Pool is a variable interest entity as it does not have sufficient equity at risk. We do not consolidate the Helios Pool because we are not the primary beneficiary and do not have a controlling financial interest. In consideration of Accounting Standards Codification ("ASC") 810-10-50-4e, the significant factors considered and judgments made in determining that the power to direct the activities of the Helios Pool that most significantly impact the entity's economic performance are shared, in that all significant performance activities which relate to approval of pool policies and strategies related to pool customers and the marketing of the pool for the procurement of customers for the pool vessels, addition of new pool vessels and the pool cost management, require unanimous board consent from a board consisting of two members from each joint venture investor. Further, in accordance with the guidance in ASC 810-10-25-38D, the Company and Phoenix are not related parties as defined in ASC 850 nor are they de facto agents pursuant to ASC 810-10, the power over the significant activities of the Helios Pool is shared, and no party is the primary beneficiary in the Helios Pool, or has a controlling financial interest. As of March 31, 2021, the Helios Pool operated thirty VLGCs, including twenty-two vessels from our fleet (including two vessels time chartered-in from unrelated parties), four Phoenix vessels, and four from other participants.

As of March 31, 2021, we had net receivables from the Helios Pool of \$78.1 million (net of an amount due to Helios Pool of \$0.1 million which is reflected under "Due to related Parties"), including \$24.2 million of working capital contributed for the operation of our vessels in the pool. As of March 31, 2020, we had receivables from the Helios Pool of \$88.1 million (net of an amount due to Helios Pool of \$0.4 million which is reflected under "Due to related Parties"), including \$24.2 million of working capital contributed for the operation of our vessels in the pool. Our maximum exposure to losses from the pool as of March 31, 2021 is limited to the receivables from the pool. The Helios Pool does not have any third-party debt obligations. The Helios Pool has entered into commercial management agreements with each of Dorian LPG (UK) Ltd. and Phoenix as commercial managers and has appointed both commercial managers as the exclusive commercial managers of pool vessels. Fees for commercial management services provided by Dorian LPG (UK) Ltd. are included in "Other income-related parties" in the consolidated statement of operations and were \$2.0 million, \$1.6 million and \$2.2 million for the years ended March 31, 2021, 2020 and 2019, respectively. Additionally, we received a fixed reimbursement of expenses such as costs for security guards and war risk insurance for vessels operating in high risk areas from the Helios Pool, for which we earned \$3.5 million, \$1.2 million and \$0.3 million for the years ended March 31, 2021, 2020 and 2019 respectively, and are included in "Other revenues, net" in the consolidated statement of operations.

Through our vessel owning subsidiaries, we have chartered vessels to the Helios Pool during the years ended March 31, 2021, 2020 and 2019. The time charter revenue from the Helios Pool is variable depending upon the net results of the pool, operating days and pool points for each vessel. The Helios Pool enters into voyage and time charters with external parties and receives freight and related revenue and, where applicable, incurs voyage costs such as bunkers, port costs and commissions. At the end of each month, the Helios Pool calculates net pool revenues using gross revenues, less voyage expenses of all pool vessels, less fixed time charter hire for any time chartered-in vessels, less the general and administrative expenses of the pool. Net pool revenues, less any amounts required for working capital of the Helios Pool, are distributed, to the extent they have been collected from third-party customers of the Helios Pool, as variable rate time charter hire for the relevant vessel to participants based on pool points (vessel attributes such as cargo carrying capacity, fuel consumption, and speed are taken into consideration) and number of days the vessel participated in the pool in the period. We recognize net pool revenues on a monthly basis, when each relevant vessel has participated in the pool during the period and the amount of net pool revenues for the month can be estimated reliably. Revenue earned from the Helios Pool is presented in Note 13.

4. Inventories

Our inventories by type were as follows:

	March 31, 2021	March 31, 2020
Lubricants	\$ 1,475,228	\$ 1,544,352
Victualing	404,419	328,297
Bonded stores	127,817	123,554
Total	\$ 2,007,464	\$ 1,996,203

5. Vessels, Net

	Cost	Accumulated depreciation	Net book Value
Balance, April 1, 2019	\$ 1,732,993,810	\$ (254,473,496)	\$ 1,478,520,314
Other additions	24,291,423	—	24,291,423
Depreciation	—	(65,152,904)	(65,152,904)
Balance, April 1, 2020	\$ 1,757,285,233	\$ (319,626,400)	\$ 1,437,658,833
Other additions	5,372,597	—	5,372,597
Depreciation	—	(66,003,175)	(66,003,175)
Balance, March 31, 2021	\$ 1,762,657,830	\$ (385,629,575)	\$ 1,377,028,255

Additions to vessels, net mainly consisted of the installment payments on the purchase of scrubbers and other capital improvements for certain of our VLGCs during the years ended March 31, 2021 and 2020. Our vessels, with a total carrying value of \$1,337.4 million and \$1,437.7 million as of March 31, 2021 and 2020, respectively, are first-priority mortgaged as collateral for our long-term debt (refer to Note 9 below). No impairment loss was recorded for the periods presented.

6. Other Fixed Assets, Net

Other fixed assets, net were \$0.1 million and \$0.2 million as of March 31, 2021 and March 31, 2020, respectively, and represent leasehold improvements, software and furniture and fixtures at cost. Accumulated depreciation on other fixed assets, net was \$0.3 million as of both March 31, 2021 and March 31, 2020.

7. Deferred Charges, Net

The analysis and movement of deferred charges, net is presented in the table below:

	Drydocking costs
Balance, April 1, 2019	\$ 2,000,794
Additions	6,329,877
Amortization	(993,945)
Balance, March 31, 2020	\$ 7,336,726
Additions	5,178,916
Amortization	(2,357,440)
Balance, March 31, 2021	\$ 10,158,202

8. Accrued Expenses

Accrued expenses comprised of the following:

	March 31, 2021	March 31, 2020
Accrued contingent claim	\$ 4,000,000	\$ —
Accrued voyage and vessel operating expenses	2,730,803	2,473,385
Accrued employee-related costs	1,301,510	949,310
Accrued professional services	523,950	266,836
Accrued loan and swap interest	204,237	284,985
Accrued board of directors' fees	—	88,750
Other	4,764	17,686
Total	\$ 8,765,264	\$ 4,080,952

9. Long-Term Debt

Description of our Debt Obligations

2015 AR Facility

In March 2015, we entered into a \$758 million debt financing facility with four separate tranches (collectively, with its amendments and restatement, the “2015 AR Facility”). Commercial debt financing (“Commercial Financing”) of \$249 million was provided by ABN AMRO Capital USA LLC (“ABN”); ING Bank N.V., London Branch, (“ING”); DVB Bank SE (“DVB”); Citibank N.A., London Branch (“Citi”); and Commonwealth Bank of Australia, New York Branch, (“CBA”) (collectively the “Commercial Lenders”), while the Export Import Bank of Korea (“KEXIM”) directly provided \$204 million of financing (“KEXIM Direct Financing”). The remaining \$305 million of financing was provided under tranches guaranteed by KEXIM of \$202 million (“KEXIM Guaranteed”) and insured by the Korea Trade Insurance Corporation (“K-sure”) of \$103 million (“K-sure Insured”). Financing under the KEXIM guaranteed and K-sure insured tranches are provided by certain Commercial Lenders; Deutsche Bank AG; and Santander Bank, N.A. As of March 31, 2021, the debt financing is secured by, among other things, fifteen of our ECO VLGCs. On April 29, 2020, we amended and restated the 2015 AR Facility to among other things, refinance the commercial tranche from the 2015 AR Facility (the “Original Commercial Tranche”). Pursuant to the April 2020 amendment and restatement of the 2015 AR Facility, certain new facilities (the “New Facilities”) were made available to us, including (i) a new senior secured term loan facility in an aggregate principal amount of \$155.8 million, a portion of which was used to prepay in full the outstanding principal amount under the Original Commercial Tranche and the balance for general corporate purposes and (ii) a new senior secured revolving credit facility in an aggregate principal amount of up to \$25.0 million, which we intend to use for general corporate purposes. On July 14, 2020 (with retroactive effect to June 30, 2020), we amended the 2015 AR Facility and received approvals from those lenders constituting the “Required Lenders” under the 2015 AR Facility, as applicable, to modify certain financial and security covenants to reflect the Company’s current financial condition.

The 2015 AR Facility contains various covenants providing for, among other things, maintenance of certain financial ratios and certain limitations on payment of dividends, investments, acquisitions and indebtedness.

The 2015 AR Facility is secured by, among other things, (i) first priority Bahamian mortgages on the vessels financed; (ii) first priority assignments of all of the financed vessels’ insurances, earnings, requisition compensation, and management agreements; (iii) first priority security interests in respect of all issued shares or limited liability company interests of the borrowers and vessel-owning guarantors; (iv) first priority charter assignments of all of the financed vessels’ long-term charters; (v) assignments of the interests of any ship manager in the insurances of the financed vessels; (vi) an assignment by the borrower of any bank, deposit or certificate of deposit opened in accordance with the facility; and (vii) a guaranty by the Company guaranteeing the obligations of the borrower and other guarantors under the facility agreement. The 2015 AR Facility further provides that the facility is to be secured by assignments of the borrower’s rights under any hedging contracts in connection with the facility, but such assignments have not been entered into at this time.

The 2015 AR Facility also contains customary covenants that require us to maintain adequate insurance coverage, properly maintain the vessels and to obtain the lender’s prior consent before changes are made to the flag, class or

[Table of Contents](#)

management of the vessels, or entry into a new line of business. The loan facility includes customary events of default, including those relating to a failure to pay principal or interest, breaches of covenants, representations and warranties, a cross-default to certain other debt obligations and non-compliance with security documents, and customary restrictions from paying dividends if an event of default has occurred and is continuing, or if an event of default would result therefrom.

The following financial covenants are the most restrictive from the 2015 AR Facility with which the Company is required to comply, calculated on a consolidated basis, determined and defined according to the provisions of the loan agreement and its amendments:

- The ratio of current assets and long-term restricted cash divided by current liabilities, excluding current portion of long-term debt, shall always be greater than 1.00;
- Maintain minimum shareholders' equity at all times equal to the aggregate of \$400 million;
- The ratio of consolidated net debt to consolidated total capitalization shall not exceed 0.60 to 1.00;
- Fair market value of the mortgaged ships plus any additional security over the outstanding loan balance shall be 145%.
- Minimum liquidity covenant of \$27.5 million; and
- Minimum cash balance \$1.0 million per mortgaged vessel;

The provision applicable to our minimum cash balance requirements were modified under the terms of the amendment to the 2015 AR Facility and as a result our minimum cash balance no longer meets the criteria to be recognized as restricted cash. Accordingly, and with retroactive effect to June 30, 2020, we no longer classify these amounts as restricted cash on our consolidated balance sheets. This requirement was reduced from \$2.2 million per mortgaged vessel under the initial 2015 AR Facility to \$1.0 million per mortgaged vessel per the July 14, 2020 amendment.

The advances in connection with New Facilities are to be repaid on the earlier of (i) the fifth (5th) anniversary of the utilization date of the new senior secured term loan facility, described above, and (ii) March 26, 2025. The New Facilities bear interest at the rate of LIBOR plus a margin of 2.50%. The margin can be decreased by 10 basis points if the Security Leverage Ratio (which is based on our security value ratio for vessels secured under the 2015 AR Facility) is less than .40 or increased by 10 basis points if it is greater than or equal to .60. Pursuant to the terms of the 2015 AR Facility, we have the potential to receive a 10 basis point increase or reduction in the margin applicable to the New Facilities for changes in our Average Efficiency Ratio (which weighs carbon emissions for a voyage against the design deadweight of a vessel and the distance traveled on such voyage). As of March 31, 2021, the set margin was 2.40%.

Certain terms of the borrowings under each tranche of the 2015 AR Facility are as follows:

		Term	Interest Rate Description⁽¹⁾	Interest Rate at March 31, 2021⁽²⁾
			London InterBank Offered Rate ("LIBOR") plus a margin ⁽⁵⁾	
Tranche 1	Commercial Financing	10 years ⁽³⁾		2.60 %
Tranche 2	KEXIM Direct Financing	12 years ⁽⁴⁾	LIBOR plus a margin of 2.45%	2.65 %
Tranche 3	KEXIM Guaranteed	12 years ⁽⁴⁾	LIBOR plus a margin of 1.40%	1.60 %
Tranche 4	K-sure Insured	12 years ⁽⁴⁾	LIBOR plus a margin of 1.50%	1.70 %

⁽¹⁾ The interest rate of the 2015 AR Facility on Tranche 1 is determined in accordance with the agreement as three- or six- month LIBOR plus the applicable margin and the interest rate on Tranches 2, 3 and 4 is determined in accordance with the agreement as three- month LIBOR plus the applicable margin for the respective tranches.

⁽²⁾ The LIBOR rate in effect as of March 31, 2021 was 0.20%.

- (3) The 2015 AR Facility extended the commercial tranche's term from 7 to 10 years.
- (4) The KEXIM Direct Financing, KEXIM Guaranteed, and K-Sure tranches have put options to call for the prepayment on the final payment date of the Commercial Financing tranche subject to specific notifications and commitments for refinancing/renewal of the Commercial Financing tranche.
- (5) The Commercial Financing tranche margin over LIBOR is 2.50% and is reduced by 10 basis points if the Security Leverage Ratio (which is based on our security value ratio for vessels secured under the 2015 AR Facility) is less than .40 or increased by 10 basis points if it is greater than or equal to .60. We also have the potential to receive a 10 basis point increase or reduction in the margin applicable to the New Facilities for changes in our Average Efficiency Ratio (which weighs carbon emissions for a voyage against the design deadweight of a vessel and the distance traveled on such voyage). As of March 31, 2021, the set margin was 2.40%.

The 2015 AR Facility permits the lenders to accelerate the indebtedness if, without the prior written consent of the lenders, (i) one-third of our common shares are owned by any shareholder other than certain entities, directors or officers listed in the agreement; (ii) there are certain changes to our board of directors; or (iii) Mr. John C. Hadjipateras ceases to serve on our board of directors.

We were in compliance with all financial covenants as of March 31, 2021.

Corsair Japanese Financing

On November 7, 2017, we refinanced a 2014-built VLGC, the *Corsair*, pursuant to a memorandum of agreement and a bareboat charter agreement ("Corsair Japanese Financing"). In connection therewith, we transferred the *Corsair* to the buyer for \$65.0 million and, as part of the agreement, Corsair LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 12 years, with purchase options from the end of year 2 onwards through a mandatory buyout by 2029. We continue to technically manage, commercially charter, and operate the *Corsair*. We received \$52.0 million in cash as part of the transaction with \$13.0 million to be retained by the buyer as a deposit (the "Corsair Deposit"), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 12-year bareboat charter term. The refinancing proceeds of \$52.0 million were used to prepay \$30.1 million of the then outstanding principal amount of debt related to the *Corsair*. The remaining proceeds were used to pay legal fees associated with this transaction and for general corporate purposes. The Corsair Japanese Financing is treated as a financing transaction and the VLGC continues to be recorded as an asset on our balance sheet. This debt financing has a fixed interest rate of 4.9%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 12-year term on interest and principal payments made, broker commission fees of 1% of the purchase option price excluding the Corsair Deposit, and a monthly fixed straight-line principal obligation of approximately \$0.3 million over the 12-year term with a balloon payment of \$13.0 million.

Concorde Japanese Financing

On January 31, 2018, we refinanced a 2015-built VLGC, the *Concorde*, pursuant to a memorandum of agreement and a bareboat charter agreement. In connection therewith, we transferred the *Concorde* to the buyer for \$70.0 million and, as part of the agreement, Concorde LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 13 years, with purchase options from the end of year 3 onwards through a mandatory buyout by 2031. We continue to technically manage, commercially charter, and operate the *Concorde*. We received \$56.0 million in cash as part of the transaction with \$14.0 million to be retained by the buyer as a deposit (the "Concorde Deposit"), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 13-year bareboat charter term. The refinancing proceeds of \$56.0 million were used to prepay \$35.1 million of the 2015 AR Facility's then outstanding principal amount. Pursuant to an amendment to the 2015 AR Facility and in conjunction with this prepayment, \$1.6 million of restricted cash was released under the 2015 AR Facility. The remaining proceeds were, or will be, used to pay legal fees associated with this transaction and for general corporate purposes. This transaction is treated as a financing transaction and the *Concorde* continues to be recorded as an asset on our balance sheet. This debt financing has a fixed interest rate of 4.9%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 13-year term on interest and principal payments made, broker commission fees of 1% of an exercised purchase option excluding the Concorde Deposit, and a monthly fixed straight-line principal obligation of approximately \$0.3 million over the 13-year term with a balloon payment of \$14.0 million.

Corvette Japanese Financing

On March 16, 2018, we refinanced a 2015-built VLGC, the *Corvette*, pursuant to a memorandum of agreement and a bareboat charter agreement. In connection therewith, we transferred the *Corvette* to the buyer for \$70.0 million and, as part of the agreement, Corvette LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 13 years, with purchase options from the end of year 3 onwards through a mandatory buyout by 2031. We continue to technically manage, commercially charter, and operate the *Corvette*. We received \$56.0 million in cash as part of the transaction with \$14.0 million to be retained by the buyer as a deposit (the “Corvette Deposit”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 13-year bareboat charter term. The refinancing proceeds of \$56.0 million were used to prepay \$33.7 million of the 2015 AR Facility’s then outstanding principal amount. Pursuant to an amendment to the 2015 AR Facility and in conjunction with this prepayment, \$1.6 million of restricted cash was released under the 2015 AR Facility. The remaining proceeds were, or will be, used to pay legal fees associated with this transaction and for general corporate purposes. This transaction is treated as a financing transaction and the *Corvette* continues to be recorded as an asset on our balance sheet. This debt financing has a fixed interest rate of 4.9%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 13-year term on interest and principal payments made, broker commission fees of 1% of an exercised purchase option excluding the Corvette Deposit, and a monthly fixed straight-line principal obligation of approximately \$0.3 million over the 13-year term with a balloon payment of \$14.0 million.

CJNP Japanese Financing

On June 11, 2018, we refinanced our 2007-built VLGC, the *Captain John NP*, pursuant to a memorandum of agreement and a bareboat charter agreement (the “CJNP Japanese Financing”). In connection therewith, we transferred the *Captain John NP* to the buyer for \$48.3 million and, as part of the agreement, CJNP LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 6 years, with purchase options from the end of year 2 through a mandatory buyout by 2024. We continue to technically manage, commercially charter, and operate the *Captain John NP*. We received \$21.7 million, which increased our unrestricted cash, as part of the transaction with \$26.6 million to be retained by the buyer as a deposit (the “CJNP Deposit”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 6-year bareboat charter term. This transaction is treated as a financing transaction and the *Captain John NP* continues to be recorded as an asset on our balance sheet. This debt financing had a fixed interest rate of 6.0%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 6-year term on interest and principal payments made, broker commission fees of 0.5% paid upon the delivery of the *Captain John NP* to the buyer, broker commission fees of 0.5% payable on the repurchase of the *Captain John NP*, and a monthly fixed straight-line principal obligation of approximately \$0.1 million over the 6-year term with a balloon payment of \$13.0 million. On October 13, 2020, we exercised the repurchase option under the CJNP Japanese Financing and repurchased the *Captain John NP* for \$18.3 million in cash and the application of the CJNP Deposit amount of \$26.6 million, which had been retained by the buyer in connection with the CJNP Japanese Financing, towards the repurchase of the vessel.

CMNL/CJNP Japanese Financing

On June 25, 2018, we refinanced our 2006-built VLGC, the *Captain Markos NL*, pursuant to a memorandum of agreement and a bareboat charter agreement (the “CMNL/CJNP Japanese Financing”). In connection therewith, we transferred the *Captain Markos NL* to the buyer for \$45.8 million and, as part of the agreement, CMNL LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 7 years, with purchase options from the end of year 2 through a mandatory buyout by 2025. We continue to technically manage, commercially charter, and operate the *Captain Markos NL*. We received \$20.6 million, which increased our unrestricted cash, as part of the transaction with \$25.2 million to be retained by the buyer as a deposit (the “CMNL Deposit”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 7-year bareboat charter term. This transaction is treated as a financing transaction and the *Captain Markos NL* continues to be recorded as an asset on our balance sheet. This debt financing has a fixed interest rate of 6.0%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 7-year term on interest and principal payments made, broker commission fees of 0.5% paid upon the delivery of the *Captain Markos NL* to the buyer, broker commission fees of 0.5% payable on the repurchase of the *Captain Markos NL*, and a monthly fixed straight-line principal obligation of

approximately \$0.1 million over the 7-year term with a balloon payment of \$11.0 million. On March 26, 2021, we substituted the *Captain Markos NL* with the *Captain John NP* within this financing. The terms of the new bareboat charter between the buyer and CJNP LPG Transport LLC after the vessel substitution are identical.

CNML Japanese Financing

On June 26, 2018, we refinanced our 2008-built VLGC, the *Captain Nicholas ML*, pursuant to a memorandum of agreement and a bareboat charter agreement (the “CNML Japanese Financing”). In connection therewith, we transferred the *Captain Nicholas ML* to the buyer for \$50.8 million and, as part of the agreement, CNML LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 7 years, with purchase options from the end of year 2 through a mandatory buyout by 2025. We continue to technically manage, commercially charter, and operate the *Captain Nicholas ML*. We received \$22.9 million, which increased our unrestricted cash, as part of the transaction with \$27.9 million to be retained by the buyer as a deposit (the “CNML Deposit”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 7-year bareboat charter term. This transaction is treated as a financing transaction and the *Captain Nicholas ML* continues to be recorded as an asset on our balance sheet. This debt financing has a fixed interest rate of 6.0%, not including financing costs of \$0.1 million, monthly broker commission fees of 1.25% over the 7-year term on interest and principal payments made, broker commission fees of 0.5%, paid upon the delivery of the *Captain Nicholas ML* to the buyer, broker commission fees of 0.5%, payable on the repurchase of the *Captain Nicholas ML*, and a monthly fixed straight-line principal obligation of approximately \$0.1 million over the 7-year term with a balloon payment of \$13.0 million.

Cresques Japanese Financing and Prepayment of the Relevant Tranches of the 2015 AR Facility

On April 21, 2020, we prepaid \$28.5 million of the 2015 AR Facility’s then outstanding principal using cash on hand prior to the closing of the Cresques Japanese Financing (defined below). On April 23, 2020, we refinanced a 2015-built VLGC, the *Cresques*, pursuant to a memorandum of agreement and a bareboat charter agreement (“Cresques Japanese Financing”). In connection therewith, we transferred the *Cresques* to the buyer for \$71.5 million and, as part of the agreement, Dorian Dubai LPG Transport LLC, our wholly-owned subsidiary, bareboat chartered the vessel back for a period of 12 years, with purchase options from the end of year 3 onwards through a mandatory buyout by 2032. We continue to technically manage, commercially charter, and operate the *Cresques*. We received \$52.5 million in cash as part of the transaction with \$19.0 million to be retained by the buyer as a deposit (the “Cresques Deposit”), which can be used by us towards the repurchase of the vessel either pursuant to an early buyout option or at the end of the 12-year bareboat charter term. This transaction is treated as a financing transaction and the *Cresques* continues to be recorded as an asset on our balance sheet. This debt financing has a floating interest rate of one-month LIBOR plus a margin of 2.5%, monthly broker commission fees of 1.25% over the 12-year term on interest and principal payments made, broker commission fees of 0.5% payable on the remaining debt outstanding at the time of the repurchase of the *Cresques*, and a monthly fixed straight-line principal obligation of \$0.3 million over the 12-year term with a balloon payment of \$11.5 million.

Debt Obligations

The table below presents our debt obligations:

	March 31, 2021	March 31, 2020
2015 AR Facility		
Commercial Financing	\$ 155,205,698	\$ 163,385,998
KEXIM Direct Financing	89,474,512	110,716,127
KEXIM Guaranteed	93,997,081	115,385,072
K-sure Insured	46,333,895	57,098,924
Total 2015 AR Facility	\$ 385,011,186	\$ 446,586,121
Japanese Financings		
Corsair Japanese Financing	\$ 40,895,833	\$ 44,145,833
Concorde Japanese Financing	45,500,000	48,730,769
Corvette Japanese Financing	46,038,462	49,269,231
CJNP Japanese Financing	—	19,058,750
CMNL/CJNP Japanese Financing	16,706,845	18,076,488
CNML Japanese Financing	18,855,655	20,261,012
Cresques Japanese Financing	49,080,000	—
Total Japanese Financings	\$ 217,076,795	\$ 199,542,083
Total debt obligations	\$ 602,087,981	\$ 646,128,204
Less: deferred financing fees	10,615,937	11,152,985
Debt obligations—net of deferred financing fees	\$ 591,472,044	\$ 634,975,219
Presented as follows:		
Current portion of long-term debt	\$ 51,820,283	\$ 53,056,125
Long-term debt—net of current portion and deferred financing fees	539,651,761	581,919,094
Total	\$ 591,472,044	\$ 634,975,219

Deferred Financing Fees

The analysis and movement of deferred financing fees is presented in the table below:

	Financing costs
Balance, April 1, 2019	\$ 14,005,830
Additions	40,547
Amortization	(2,893,392)
Balance, March 31, 2020	\$ 11,152,985
Additions	4,158,312
Amortization	(4,695,360)
Balance, March 31, 2021	\$ 10,615,937

Additions for the year ended March 31, 2021 and 2020 represent financing costs associated with the 2015 AR Facility, Cresques Japanese Financing, and CMNL/CJNP Japanese Financing, which have been deferred and are amortized over the life of the respective agreements and are included as part of interest and finance costs in the consolidated statements of operations.

Future Cash Payments for Debt

The minimum annual principal payments, in accordance with the loan agreements, required to be made after March 31, 2021 are as follows:

Year ending March 31:

2022	\$ 51,820,283
2023	51,820,283
2024	51,820,283
2025	204,625,981
2026	72,907,782
Thereafter	169,093,369
Total	\$ 602,087,981

10. Leases

Time charter-in contracts

During the year ended March 31, 2021, we time chartered-in a vessel that was delivered to us in May 2020 with a duration of 12 months with no option periods and, therefore, this operating lease was excluded from operating lease right-of-use asset and lease liability recognition on our consolidated balance sheets. During the year ended March 31, 2020, we time chartered-in a VLGC for a period of greater than 12 months and the applicable right-of-use asset and lease liabilities of \$27.4 million were recognized on our balance sheets as of March 31, 2020. None of the three option periods of up to an aggregate of four years were included in the recognition of the right-of-use asset for the time chartered-in VLGC as market conditions at the time of each option renewal election date for a time charter-in will be major factors in the decision of whether to exercise the option and such conditions are not known at the time of initial recognition. Our time chartered-in VLGCs were deployed in the Helios Pool and earned net pool revenues of \$29.1 million, \$18.3 million, and \$0.1 million for the years ended March 31, 2021, 2020 and 2019, respectively.

Charter hire expenses for the VLGCs time chartered in were as follows:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Charter hire expenses	\$ 18,135,580	\$ 9,861,898	\$ 237,525

Office leases

We currently have operating leases for our offices in Stamford, Connecticut, USA; London, United Kingdom; Copenhagen, Denmark; and Athens, Greece. During the year ended March 31, 2021, we did not enter into and new office leases and did not renew any office leases. During the year ended March 31, 2020, we renewed an operating lease for our London office greater than 12 months and the applicable right-of-use asset and lease liabilities of \$0.2 million were recognized on our balance sheets as of March 31, 2020. At adoption of ASC 842, two option periods for our Athens office were included in the recognition of the right-of-use asset as it is probable that the renewal options of 1-year each will be exercised. We accounted for our Copenhagen office lease using the practical expedient for contracts with initial lease terms of 12 month or less as described above and, during the years ended March 31, 2021 and 2020, expensed \$0.1 million related to this lease within “general and administrative expenses” on our consolidated statement of operations.

Operating lease rent expense related to our office leases was as follows:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Operating lease rent expense	\$ 558,400	\$ 541,574	\$ 471,425

[Table of Contents](#)

For our office leases and time charter-in arrangement, the discount rate used ranged from 3.82% to 5.53%. The weighted average discount rate used to calculate the lease liability was 3.88%. The weighted average remaining lease term on our office leases and a time chartered-in vessel as of March 31, 2021 is 21.9 months.

Our operating lease right-of-use asset and lease liabilities as of March 31, 2021 were as follows:

Description	Location on Balance Sheet	March 31, 2021
Assets:		
Non-current		
Office leases	Operating lease right-of-use assets	\$ 628,253
Time charter-in VLGCs	Operating lease right-of-use assets	\$ 17,043,974
Liabilities:		
Current		
Office Leases	Current portion of long-term operating leases	\$ 440,143
Time charter-in VLGCs	Current portion of long-term operating leases	\$ 9,151,304
Long-term		
Office Leases	Long-term operating leases	\$ 188,324
Time charter-in VLGCs	Long-term operating leases	\$ 7,892,671

Maturities of operating lease liabilities as of March 31, 2021 were as follows:

FY 2022	\$ 10,110,547
FY 2023	8,223,237
Total undiscounted lease payments	18,333,784
Less: imputed interest	(661,342)
Carrying value of lease liabilities	\$ 17,672,442

11. Common Stock

Under the articles of incorporation effective July 1, 2013, the Company's authorized capital stock consists of 500,000,000 registered shares, par value \$0.01 per share, of which 450,000,000 are designated as common share and 50,000,000 shares are designated as preferred shares.

Each holder of common shares is entitled to one vote on all matters submitted to a vote of shareholders. Subject to preferences that may be applicable to any outstanding shares of preferred stock, holders of common shares are entitled to share equally in any dividends, which the Company's board of directors may declare from time to time, out of funds legally available for dividends. Upon dissolution, liquidation or winding-up, the holders of common shares will be entitled to share equally in all assets remaining after the payment of any liabilities and the liquidation preferences on any outstanding preferred stock. Holders of common shares do not have conversion, redemption or pre-emptive rights.

On February 2, 2021, we announced a tender offer to purchase up to 7,407,407, or about 14.8%, of our then outstanding common shares at a price of \$13.50 per share. Based on preliminary results indicating that the tender offer was oversubscribed, we elected to increase the number of shares accepted for payment by 997,739, or slightly less than 2% of our then outstanding shares, pursuant to the terms of the tender offer. The number of shares we purchased and canceled from each tendering shareholder was prorated so our purchases in the tender offer totaled of 8,405,146 shares, or approximately 16.8% of our then outstanding common shares, for an aggregate purchase price of approximately \$113.5 million.

On August 5, 2019, our Board of Directors authorized the repurchase of up to \$50.0 million of our common shares through the period ended December 31, 2020 (the "Common Share Repurchase Program"). On February 3, 2020, our Board of Directors authorized an increase to our Common Share Repurchase Program to repurchase up to an additional \$50.0 million of our common shares. On December 29, 2020, our Board of Directors authorized an extension of and an increase to the remaining authorization of \$41.4 million under our Common Share Repurchase Program, which was set to expire on December 31, 2020. Following this Board action, we are now authorized to repurchase up to \$50.0 million of our common shares from December 29, 2020 through December 31, 2021. As of March 31, 2021, our total purchases

under this authority totaled 5.5 million of our common shares for an aggregate consideration of \$60.7 million. Following the increase and extension of the program, we currently have \$47.9 million of available share repurchase authority remaining. Purchases may be made at our discretion in the form of open market repurchase programs, privately negotiated transactions, accelerated share repurchase programs or a combination of these methods. The actual amount and timing of share repurchases are subject to capital availability, our determination that share repurchases are in the best interest of our shareholders, and market conditions. We are not obligated to make any common share repurchases under the Common Share Repurchase Program.

Refer to Note 12 below for shares granted under the equity incentive plan during the years ended March 31, 2021, 2020, and 2019.

12. Stock-Based Compensation Plans

In April 2014, we adopted an equity incentive plan, which we refer to as the Equity Incentive Plan, under which we expect that directors, officers, and employees (including any prospective officer or employee) of the Company and its subsidiaries and affiliates, and consultants and service providers to (including persons who are employed by or provide services to any entity that is itself a consultant or service provider to) the Company and its subsidiaries and affiliates, as well as entities wholly-owned or generally exclusively controlled by such persons, may be eligible to receive non-qualified stock options, stock appreciation rights, stock awards, restricted stock units and performance compensation awards that the plan administrator determines are consistent with the purposes of the plan and the interests of the Company. We have reserved 2,850,000 of our common shares for issuance under the Equity Incentive Plan, subject to adjustment for changes in capitalization as provided in the Equity Incentive Plan in April 2014. The plan is administered by our compensation committee.

During the year ended March 31, 2021, we granted an aggregate of 188,400 shares of restricted stock vesting in escalating installments on the grant date and on the first, second, and third anniversary of that date and 56,450 restricted stock units to certain of our officers and employees vesting in escalating installments on the first, second, and third anniversaries of the grant date. The shares of restricted stock and restricted stock units were valued at their grant date fair market value and are expensed on a straight-line basis over the respective vesting periods.

During the year ended March 31, 2021, we granted 155,654 shares of stock to our President and Chief Executive Officer, which were valued and expensed at their grant date fair market value.

During the year ended March 31, 2020 we granted an aggregate of 175,200 shares of restricted stock and 22,500 restricted stock units to certain of our officers and employees. One-fourth of the shares of restricted stock vested on the grant date and one-fourth will vest equally on the first, second and third anniversaries of the grant date. One-third of restricted stock units will vest equally on the first, second, and third anniversaries of the grant date. The shares of restricted stock and restricted stock units were valued at their grant date fair market value and are expensed on a straight-line basis over the respective vesting periods.

During the year ended March 31, 2019, we granted 200,000 shares of restricted stock to certain of our officers and employees. One-fourth of these restricted shares vested immediately on the grant date, one-fourth vested one year after grant date, one-fourth will vest two years after grant date, and one-fourth will vest three years after grant date. The restricted shares were valued at their grant date fair market value and expensed on a straight-line basis over the vesting periods.

During the years ended March 31, 2021, 2020, and 2019, we granted 41,711, 24,025, and 35,295 shares of stock, respectively, to our non-executive directors, which were valued and expensed at their grant date fair market value.

During the years ended March 31, 2020, and 2019, we granted 1,550, and 7,059, shares of stock, respectively, to a non-employee consultant, which were valued and expensed at their grant date fair market value. No such shares were granted during the year ended March 31, 2021.

[Table of Contents](#)

Our stock-based compensation expense was \$3.4 million, \$3.2 million and \$5.5 million for the years ended March 31, 2021, 2020, and 2019, respectively, and is included within general and administrative expenses in our consolidated statements of operations. Unrecognized compensation cost as of March 31, 2021 was \$1.9 million and the expense will be recognized over a remaining weighted average life of 1.86 years.

A summary of the activity of our restricted shares as of March 31, 2021 and 2020 and changes during the year ended March 31, 2021 and 2020, are as follows:

Incentive Share/Unit Awards	Number of Shares/Units	Weighted-Average Grant-Date Fair Value
Unvested as of April 1, 2019	641,013	\$ 13.54
Granted	223,275	8.47
Vested	(547,240)	14.64
Unvested as of March 31, 2020	317,048	\$ 8.08
Granted	442,215	8.34
Vested	(400,942)	8.23
Forfeited	(150)	8.36
Unvested as of March 31, 2021	358,171	\$ 8.23

The total fair value of restricted shares that vested during the years ended March 31, 2021, 2020, and 2019 was \$3.4 million, \$5.2 million and \$3.9 million, respectively, which is calculated as the number of shares vested during the period multiplied by the fair value on the vesting date.

13. Revenues

Revenues comprise the following:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Net pool revenues—related party	\$ 292,679,614	\$ 298,079,123	\$ 120,015,771
Time charter revenues	19,492,595	34,111,230	37,726,214
Other revenues, net	3,766,603	1,239,645	290,500
Total revenues	\$ 315,938,812	\$ 333,429,998	\$ 158,032,485

Net pool revenues—related party depend upon the net results of the Helios Pool, and the operating days and pool points for each vessel. Refer to Notes 2 and 3 above for further information.

Other revenues, net mainly represent income from charterers relating to reimbursement of voyage expenses such as costs for security guards and war risk insurance.

14. Voyage Expenses

Voyage expenses comprise the following:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Bunkers	\$ 1,537,007	\$ 1,345,360	\$ 756,354
War risk insurances	1,272,647	1,095,156	13,052
Brokers' commissions	334,333	469,143	440,955
Security cost	221,882	272,985	277,487
Port charges and other related expenses	1,500	5,898	167,230
Other voyage expenses	42,281	54,381	42,805
Total	\$ 3,409,650	\$ 3,242,923	\$ 1,697,883

15. Vessel Operating Expenses

Vessel operating expenses comprise the following:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Crew wages and related costs	\$ 44,017,660	\$ 42,683,848	\$ 41,649,202
Spares and stores	17,061,388	13,249,931	10,625,997
Repairs and maintenance costs	6,096,812	4,416,259	5,594,957
Insurance	3,942,622	4,173,052	3,452,874
Lubricants	3,241,330	3,607,749	3,206,445
Miscellaneous expenses	3,860,057	3,347,530	2,351,093
Total	\$ 78,219,869	\$ 71,478,369	\$ 66,880,568

16. Interest and Finance Costs

Interest and finance costs is comprised of the following:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Interest incurred	\$ 21,665,379	\$ 32,355,390	\$ 36,638,171
Amortization of financing costs	4,695,360	2,893,392	3,136,051
Other financing costs	1,235,385	856,759	875,009
Total	\$ 27,596,124	\$ 36,105,541	\$ 40,649,231

17. Income Taxes

Dorian LPG Ltd. and its vessel-owning subsidiaries are incorporated in the Marshall Islands and under the laws of the Marshall Islands, are not subject to tax on income or capital gains and no Marshall Islands withholding tax will be imposed on dividends paid by the Company to its shareholders. Dorian LPG Ltd. and its vessel-owning subsidiaries are also subject to United States federal income taxation in respect of Shipping Income, unless exempt from United States federal income taxation.

If Dorian LPG Ltd. and its vessel-owning subsidiaries do not qualify for the exemption from tax under Section 883 of the Code, Dorian LPG Ltd. and its subsidiaries will be subject to a 4% tax on its “United States source shipping income,” imposed without the allowance for any deductions. For these purposes, “United States source shipping income” means 50% of the Shipping Income derived by Dorian LPG Ltd. and its vessel-owning subsidiaries that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States.

For our fiscal years ended March 31, 2021, 2020, and 2019, we believe that we qualified, and we expect to qualify, for exemption under Section 883 and as a consequence, our gross United States source shipping income will not be subject to a 4% gross basis tax.

18. Commitments and Contingencies

Commitments under Contracts for Scrubber Purchases

We had contractual commitments to purchase scrubbers to reduce sulfur emissions as of:

	March 31, 2021
Less than one year	\$ 1,523,210
Total	\$ 1,523,210

Commitments under Contracts for Ballast Water Management Systems Purchases

We had contractual commitments to purchase ballast water management systems as of:

	March 31, 2021
Less than one year	\$ 455,500
Total	\$ 455,500

Commitments under Bareboat Charter Header Agreement

On March 31, 2021, we entered into a thirteen year bareboat charter agreement for a newbuilding dual-fuel VLGC that is expected to be delivered from Kawasaki Heavy Industries in March 2023. The structure of the financing of the newbuilding is analogous to that of our Japanese Financings in which a third-party will purchase the vessel and from whom we will bareboat charter the vessel. As part of the agreement, we control the building of the vessel and the use of the vessel after it is delivered. The vessel will be built to our specifications; we will supervise the building of the vessel to meet these specifications; and we will technically and commercially manage the vessel after its delivery. Under the agreement, we have commitments of \$24 million of predelivery costs as well as the cost of additional features to meet our specifications and supervision costs for an aggregate total of approximately \$25 million. As of March 31, 2021, we expect to settle the commitments under the agreement with installment payments totaling \$16.0 million in the 12 months following March 31, 2021 and approximately \$9.0 million during the year ended March 31, 2023. As of March 31, 2021, construction of the vessel has not commenced.

Operating Leases

We had the following commitments as a lessee under operating leases relating to our United States, Greece, United Kingdom, and Denmark offices:

	March 31, 2021
Less than one year	\$ 357,432
One to three years	91,318
Total	\$ 448,750

Time Charter-in

We had the following time charter-in commitments relating to VLGCs either currently in our fleet or contracted to be delivered to our fleet as of:

	March 31, 2021
Less than one year	\$ 10,336,000
One to three years	8,030,000
Total	\$ 18,366,000

Fixed Time Charter Commitments

We had the following future minimum fixed time charter hire receipts based on non-cancelable long-term fixed time charter contracts as of:

	March 31, 2021
Less than one year	\$ 20,147,500
One to three years	5,705,000
Total	\$ 25,852,500

Other

From time to time we expect to be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. Such claims, even if lacking in merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any claim other than that described below, which is reasonably possible and should be disclosed or probable and for which a provision should be established in the consolidated financial statements.

In January 2021, subsequent to the delivery of one of our VLGCs on time charter, a dispute arose relating to the vessel's readiness to lift a cargo scheduled by the charterer. The facts of the claim are currently in dispute. We have recorded a contingent liability in accrued expenses on our consolidated balance sheets as of March 31, 2021 and a corresponding expense of \$4.0 million during the year ended March 31, 2021 is included within general and administrative expenses on our consolidated statement of operations.

19. Financial Instruments and Fair Value Disclosures

Our principal financial assets consist of cash and cash equivalents, investment securities, short-term investments, restricted cash amounts due from related parties, and trade accounts receivable. Our principal financial liabilities consist of long-term debt, accounts payable, amounts due to related parties, derivative instruments and accrued liabilities.

- (a) **Concentration of credit risk:** Financial instruments, which may subject us to significant concentrations of credit risk, consist principally of amounts due from our charterers, including the receivables from Helios Pool, cash and cash equivalents, and restricted cash. We limit our credit risk with amounts due from our charterers, including those through the Helios Pool, by performing ongoing credit evaluations of our charterers' financial condition and generally do not require collateral from our charterers. We limit our credit risk with our cash and cash equivalents and restricted cash by placing it with highly-rated financial institutions.
- (b) **Interest rate risk:** Our long-term bank loans are based on LIBOR and hence we are exposed to movements thereto. We entered into interest rate swap agreements in order to hedge a majority of our variable interest rate exposure related to the 2015 AR Facility.

The principal terms of our interest rate swaps are as follows:

Interest rate swap	Transaction Date	Termination Date	Fixed interest rate	Nominal value March 31, 2021	Nominal value March 31, 2020
2015 AR Facility - Citibank ⁽¹⁾	September 2015	March 2025	1.091 %	\$ 200,000,000	\$ 200,000,000
2015 AR Facility - ING ⁽²⁾	September 2015	March 2025	1.145 %	50,000,000	50,000,000
2015 AR Facility - ABN ⁽³⁾	October 2015	March 2022	1.468 %	26,325,000	37,550,000
2015 AR Facility - Citibank ⁽⁴⁾	October 2015	March 2022	1.380 %	39,487,500	56,325,000
2015 AR Facility - Citibank ⁽⁵⁾	June 2016	March 2022	1.213 %	35,750,774	43,598,575
2015 AR Facility - Citibank ⁽⁶⁾	June 2016	March 2022	1.161 %	14,690,857	17,915,709
				\$ 366,254,131	\$ 405,389,284

(1) Non-amortizing until March 2022, then reduces quarterly with a final settlement of \$95.2 million in March 2025.

(2) Non-amortizing until March 2022, then reduces quarterly with a final settlement of \$23.8 million in March 2025.

(3) Reduces quarterly by \$2.8 million with a final settlement of \$17.9 million due in March 2022.

(4) Reduces quarterly by \$4.2 million with a final settlement of \$26.9 million due in March 2022.

(5) Reduces quarterly by \$2.0 million with a final settlement of \$29.9 million due in March 2022.

(6) Reduces quarterly by \$0.8 million with a final settlement of \$12.3 million due in March 2022.

- (c) **Fair value measurements:** Interest rate swaps are stated at fair value, which is determined using a discounted cash flow approach based on market-based LIBOR swap yield rates. LIBOR swap rates are observable at commonly quoted intervals for the full terms of the swaps and, therefore, are considered Level 2 items in accordance with the fair value hierarchy. The fair value of the interest rate swap agreements approximates the amount that we would have to pay or receive for the early termination of the agreements.

Additionally, we have taken positions in freight forward agreements (“FFAs”) as economic hedges to reduce the risk related to vessels trading in the spot market, including in the Helios Pool, and to take advantage of fluctuations in market prices. Customary requirements for trading FFAs include the maintenance of initial and variation margins based on expected volatility, open position and mark-to-market of the contracts. FFAs are recorded as assets/liabilities until they are settled. Changes in fair value prior to settlement are recorded in unrealized gain/(loss) on derivatives. Upon settlement, if the contracted charter rate is less than the average of the rates for the specified route and time period, as reported by an identified index, the seller of the FFA is required to pay the buyer the settlement sum, being an amount equal to the difference between the contracted rate and the settlement rate, multiplied by the number of days in the specified period covered by the FFA. Conversely, if the contracted rate is greater than the settlement rate, the buyer is required to pay the seller the settlement sum. Settlement of FFAs are recorded in realized gain/(loss) on derivatives. FFAs are considered Level 2 items in accordance with the fair value hierarchy. We had no outstanding FFAs as of March 31, 2021.

The following table summarizes the location on the balance sheet of the financial assets and liabilities that are carried at fair value on a recurring basis, which comprise our financial derivatives all of which are considered Level 2 items in accordance with the fair value hierarchy:

	March 31, 2021		March 31, 2020	
	Current assets Derivative instruments	Current liabilities Derivative instruments	Current assets Derivative instruments	Current liabilities Derivative instruments
Derivatives not designated as hedging instruments				
Forward freight agreements	\$ —	\$ —	\$ —	\$ 2,605,442
Interest rate swap agreements	\$ —	\$ 1,100,529	\$ —	\$ —
	March 31, 2021		March 31, 2020	
	Other non-current assets Derivative instruments	Long-term liabilities Derivative instruments	Other non-current assets Derivative instruments	Long-term liabilities Derivative instruments
Derivatives not designated as hedging instruments				
Interest rate swap agreements	\$ —	\$ 3,454,862	\$ —	\$ 9,152,829

The effect of derivative instruments within the consolidated statement of operations for the periods presented is as follows:

	Location of gain/(loss) recognized	Year ended		
		March 31, 2021	March 31, 2020	March 31, 2019
Derivatives not designated as hedging instruments				
Forward freight agreements—change in fair value	Unrealized gain/(loss) on derivatives	\$ 2,605,442	\$ (2,605,442)	\$ —
Interest rate swaps—change in fair value	Unrealized gain/(loss) on derivatives	4,597,438	(15,601,327)	(7,816,401)
Forward freight agreements—realized gain/(loss)	Realized gain/(loss) on derivatives	(788,670)	396,894	—
Interest rate swaps—realized gain/(loss)	Realized gain/(loss) on derivatives	(3,779,363)	2,403,480	3,788,123
Gain/(loss) on derivatives, net		\$ 2,634,847	\$ (15,406,395)	\$ (4,028,278)

As of March 31, 2021 and March 31, 2020, no fair value measurements for assets or liabilities under Level 1 or Level 3 were recognized in the consolidated balance sheets with the exception of cash and cash equivalents, restricted cash, and securities. We did not have any assets or liabilities measured at fair value on a non-recurring basis during the years ended March 31, 2021, 2020 and 2019.

- (d) **Book values and fair values of financial instruments.** In addition to the derivatives that we are required to record at fair value on our balance sheet (see (c) above) and securities that are included in other current assets in our balance sheet that we record at fair value, we have other financial instruments that are carried at historical cost. These financial instruments include trade accounts receivable, amounts due from related parties, cash and cash equivalents, restricted cash, accounts payable, amounts due to related parties and accrued liabilities for which the historical carrying value approximates the fair value due to the short-term nature of these financial instruments. Cash and cash equivalents, restricted cash and investment securities are considered Level 1 items.

The summary of gains and losses on our investment securities included in other gain/(loss), net on our consolidated statements of operations for the periods presented is as follows:

	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Net gain/(loss) on investment securities	\$ 1,317,890	\$ 1,288,304	\$ (102,244)
Less: Realized gain/(loss) on investment securities	295	1,281,671	—
Unrealized gain/(loss) on investment securities	\$ 1,317,595	\$ 6,633	\$ (102,244)

As of March 31, 2020, we had short-term investments in six-month U.S. treasury bills for which we had not elected the fair value option. The fair value of these instruments is commonly quoted and would be considered Level 1 items under the fair value hierarchy if we elected the fair value option. As of March 31, 2020, the carrying value of the short-term investments in six-month U.S. treasury bills was \$14.9 million and the fair value was \$15.0 million. These short-term investments matured during the year ended March 31, 2021 and we have no such instruments as of March 31, 2021.

We have long-term bank debt and the Cresques Japanese Financing for which we believe the carrying value approximates their fair value as the loans bear interest at variable interest rates, being LIBOR, which is observable at commonly quoted intervals for the full terms of the loans, and hence are considered as Level 2 items in accordance with the fair value hierarchy. We also have long-term debt related to the Corsair Japanese Financing, Concorde Japanese Financing, Corvette Japanese Financing, CMNL/CJNP Japanese Financing, and CNML Japanese Financing (collectively, along with the CJNP Japanese Financing that was repaid in October 2020, the “Japanese Financings”) that incur interest at a fixed-rate with the initial principal amount amortized to the purchase obligation price of each vessel. The Japanese Financings are considered Level 2 items in accordance with the fair value hierarchy and the fair value of each is based on a discounted cash flow analysis using current observable interest rates. The following table summarizes the carrying value and estimated fair value of the Japanese Financings as of:

	March 31, 2021		March 31, 2020	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Corsair Japanese Financing	\$ 40,895,833	\$ 44,298,064	\$ 44,145,833	\$ 48,867,762
Concorde Japanese Financing	45,500,000	49,791,680	48,730,769	54,407,677
Corvette Japanese Financing	46,038,462	50,376,434	49,269,231	55,059,323
CJNP Japanese Financing	—	—	19,058,750	21,006,399
CMNL/CJNP Japanese Financing	16,706,845	18,792,993	18,076,488	20,238,260
CNML Japanese Financing	\$ 18,855,655	\$ 21,195,305	\$ 20,261,012	\$ 22,728,984

20. Retirement Plans

U.S. Defined Contribution Plan

Qualifying full-time employees based in the United States participate in our 401(k) retirement plan and may contribute a portion of their annual compensation to the plan on a tax-advantaged basis, in accordance with applicable tax law limits. On behalf of all participants in the plan, we provide a safe harbor contribution subject to certain limitations. Employee contributions and our safe harbor contributions are vested at all times. We recognized and paid compensation expense associated with the safe harbor contributions totaling \$0.1 million for each of the years ended March 31, 2021, 2020, and 2019.

Greece Defined Benefit Plan

Our employees based in Greece have a required statutory defined benefit pension plan according to provisions of Greek law 2112/20 covering all eligible employees (the “Greek Plan”). We recognized compensation expense and recorded a corresponding liability associated with our projected benefit obligation to the Greek Plan totaling \$0.3 million for the year ended March 31, 2021, less than \$0.1 million for the year ended March 31, 2020, and \$0.1 million for the year ended March 31, 2019.

U.K. and Denmark Retirement Accounts

We contribute to retirement accounts for certain employees based in the United Kingdom and Denmark based on a percentage of their annual salaries. For each of the years ended March 31, 2021 and 2020, we recognized compensation expense of \$0.2 million related to these contributions and for the year ended March 31, 2019, we recognized compensation expense of \$0.1 million related to these contributions.

21. Earnings/(Loss) Per Share (“EPS”)

Basic EPS represents net income/(loss) attributable to common shareholders divided by the weighted average number of common shares outstanding during the measurement period. Our restricted stock shares include rights to receive dividends that are subject to the risk of forfeiture if service requirements are not satisfied, thus these shares are not considered participating securities and are excluded from the basic weighted-average shares outstanding calculation. Diluted EPS represent net income/(loss) attributable to common shareholders divided by the weighted average number of common shares outstanding during the measurement period while also giving effect to all potentially dilutive common shares that were outstanding during the period.

The calculations of basic and diluted EPS for the periods presented were as follows:

(In U.S. dollars except share data)	Year ended		
	March 31, 2021	March 31, 2020	March 31, 2019
Numerator:			
Net income/(loss)	\$ 92,564,653	\$ 111,841,258	\$ (50,945,905)
Denominator:			
Basic weighted average number of common shares outstanding	49,729,358	53,881,483	54,513,118
Effect of dilutive restricted stock and restricted stock units	97,440	233,855	—
Diluted weighted average number of common shares outstanding	<u>49,826,798</u>	<u>54,115,338</u>	<u>54,513,118</u>
EPS:			
Basic	\$ 1.86	\$ 2.08	\$ (0.93)
Diluted	\$ 1.86	\$ 2.07	\$ (0.93)

For the year ended March 31, 2019, there were 641,013 shares of unvested restricted stock excluded from the calculation of diluted EPS because the effect of their inclusion would be anti-dilutive. There were no anti-dilutive shares of unvested restricted stock excluded from the calculation of diluted EPS for the years ended March 31, 2021 and 2020.

22. Selected Quarterly Financial Information (unaudited)

The following tables summarize the 2021 and 2020 quarterly results:

	Three months ended			
	June 30, 2020	September 30, 2020	December 31, 2020	March 31, 2021
Revenues	\$ 73,165,324	\$ 54,710,277	\$ 88,479,024	\$ 99,584,187
Operating income	22,519,802	5,413,760	41,875,535	46,290,595
Net income	12,168,005	537,950	35,825,264	44,033,434
Earnings per common share, basic	0.24	0.01	0.71	0.93
Earnings per common share, diluted	\$ 0.24	\$ 0.01	\$ 0.71	\$ 0.93

	Three months ended			
	June 30, 2019	September 30, 2019	December 31, 2019	March 31, 2020
Revenues	\$ 61,165,546	\$ 91,624,875	\$ 85,437,806	\$ 95,201,771
Operating income	20,272,506	49,266,427	41,758,757	49,771,141
Net income	6,075,059	40,711,896	35,628,912	29,425,391
Earnings per common share, basic	0.11	0.75	0.66	0.56
Earnings per common share, diluted	\$ 0.11	\$ 0.74	\$ 0.66	\$ 0.56

DESCRIPTION OF THE REGISTRANT'S SECURITIES REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934

The following description of the terms of the capital stock of Dorian LPG Ltd. (the "Company," "we," "us" and "our") is not complete and is qualified in its entirety by reference to our Articles of Incorporation, as amended (our "articles of incorporation"), our Bylaws, as amended (our "bylaws"), both of which are exhibits to our Annual Report on Form 10-K, and the Business Corporations Act of 1990, as amended, of the Republic of the Marshall Islands (the "BCA").

Authorized Capitalization

Under our articles of incorporation, our authorized share capital consists of 450 million common shares, par value \$0.01 per share, of which 41,086,069 shares were issued and outstanding as of June 1, 2021 and 50 million preferred shares, par value \$0.01 per share, of which no shares were issued and outstanding as of June 1, 2021. All of our shares are in registered form. 9,985,340 common shares were held in treasury as of June 1, 2021.

Common Shares

Each outstanding common share entitles the holder to one vote on all matters submitted to a vote of shareholders. Subject to preferences that may be applicable to any outstanding preferred shares, holders of common shares are entitled to receive ratably all dividends, if any, declared by our board of directors out of funds legally available for dividends. Upon our dissolution or liquidation or the sale of all or substantially all of our assets, after payment in full of all amounts required to be paid to creditors and to the holders of preferred shares having liquidation preferences, if any, the holders of our common shares will be entitled to receive pro rata our remaining assets available for distribution. Holders of our common shares do not have conversion, redemption or preemptive rights to subscribe to any of our securities. The rights, preferences and privileges of holders of common shares are subject to the rights of the holders of any preferred shares which we may issue in the future.

Preferred Shares

Our articles of incorporation authorize our board of directors to establish one or more series of preferred shares and to determine, with respect to any series of preferred shares, the terms and rights of that series, including:

- the designation of the series;
 - the number of shares of the series, which our board may, except where otherwise provided in the preferred shares designation, increase or decrease, but not below the number of shares then outstanding;
 - whether dividends, if any, will be cumulative or non-cumulative and the dividend rate of the series;
 - the dates at which dividends, if any, will be payable;
 - the redemption rights and price or prices, if any, for shares of the series;
 - the terms and amounts of any sinking fund provided for the purchase or redemption of shares of the series;
 - the amounts payable on shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding-up of the affairs of our company;
 - whether the shares of the series will be convertible into shares of any other class or series, or any other security, of our company or any other corporation, and, if so, the specification of the other class or series or other security, the conversion price or prices or rate or rates and any rate adjustments;
 - restrictions on the issuance of shares of the same series or of any other class or series; and
 - the voting rights, if any, of the holders of the series.
-

Authorized but Unissued Share Capital

The BCA does not require shareholders' approval for any issuance of authorized shares.

Directors

Our articles of incorporation provide that, subject to any rights of holders of preferred shares, our directors shall be divided into three classes. The term of office of one or another of the three classes shall expire each year. The term of our Class I directors will expire at the annual general meeting in 2023, that of our Class II directors will expire at the annual general meeting in 2021 and that of our Class III directors will expire at the annual general meeting in 2022. The directors elected at our general meetings shall be identified as being directors of the same class as the ones they succeed, and shall hold office until the third succeeding annual general meeting. Any vacancies in the Board for any reason, and any created directorships resulting from any increase in the number of directors, may be filled by the vote of not less than a majority of the members of the Board then in office, and any such director so chosen shall hold office until the next election of the class for which such directors shall have been chosen and until their successors shall be elected and qualified. Our articles of incorporation provide that no director may be removed except both for cause and with the affirmative vote of two-thirds of the votes cast at an annual general meeting.

Shareholder Meetings

Under our bylaws, annual meetings of shareholders will be held at a time and place selected by our board of directors. The meetings may be held in or outside of the Republic of The Marshall Islands. Special meetings may be called at any time by a majority of our board of directors, the chairman of our board of directors or an officer of the Company who is also a director. Our board of directors may set a record date between 15 and 60 days before the date of any meeting to determine the shareholders that will be eligible to receive notice and vote at the meeting. One or more shareholders representing at least one-third of the total voting rights of our total issued and outstanding shares present in person or by proxy at a shareholder meeting shall constitute a quorum for the purposes of the meeting.

Dissenters' Rights of Appraisal and Payment

Under the BCA, our shareholders generally have the right to dissent from the sale of all or substantially all of our assets not made in the usual course of our business and receive payment of the fair value of their shares. However, the right of a dissenting shareholder to receive payment of the appraised fair value of his shares is not available under the BCA for the shares of any class or series of stock, which shares at the record date fixed to determine the shareholders entitled to receive notice of and to vote at the meeting of the shareholders to act upon the agreement of merger or consolidation, were either (i) listed on a securities exchange or admitted for trading on an interdealer quotation system or (ii) held of record by more than 2,000 holders. In the event of any further amendment of our articles of incorporation, a shareholder also has the right to dissent and receive payment for his or her shares if the amendment alters certain rights in respect of those shares. The dissenting shareholder must follow the procedures set forth in the BCA to receive payment.

Shareholders' Derivative Actions

Under the BCA, any of our shareholders may bring an action in our name to procure a judgment in our favor, also known as a derivative action, provided that the shareholder bringing the action is a holder of common shares both at the time the derivative action is commenced and at the time of the transaction to which the action relates.

Limitations on Liability and Indemnification of Officers and Directors

The BCA authorizes corporations to limit or eliminate the personal liability of directors to corporations and their shareholders for monetary damages for breaches of directors' fiduciary duties, subject to certain exceptions. Our articles of incorporation include provisions that eliminate the personal liability of directors for monetary damages for actions taken as a director to the fullest extent permitted by law.

Our bylaws provide that we must indemnify our directors and officers to the fullest extent authorized by law. We are also expressly authorized to advance certain expenses (including attorneys' fees) to our directors and officers and carry directors' and officers' insurance providing indemnification for our directors, officers and certain employees for some liabilities. We believe that these indemnification provisions and insurance are useful to attract and retain qualified directors and executive officers.

The limitation of liability and indemnification provisions in our articles of incorporation and bylaws may discourage shareholders from bringing a lawsuit against directors or officers for breach of their fiduciary duty. These provisions may also have the effect of reducing the likelihood of derivative litigation against directors and officers, even though such an action, if successful, might otherwise benefit us and our shareholders. In addition, your investment may be adversely affected to the extent we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions.

There is currently no pending material litigation or proceeding involving any of our directors, officers or employees for which indemnification is sought.

Anti-takeover Effects of Certain Provisions of Our Articles of Incorporation and Bylaws

Several provisions of our articles of incorporation and bylaws, which are summarized below, may have anti-takeover effects. These provisions are intended to avoid costly takeover battles, lessen our vulnerability to a hostile change of control and enhance the ability of our board of directors to maximize shareholder value in connection with any unsolicited offer to acquire us. However, these anti-takeover provisions, which are summarized below, could also discourage, delay or prevent (i) the merger or acquisition of us by means of a tender offer, a proxy contest or otherwise that a shareholder may consider in its best interest and (ii) the removal of incumbent officers and directors.

"Blank Check" Preferred Shares

Under the terms of our articles of incorporation, our board of directors has authority, without any further vote or action by our shareholders, to issue preferred shares and to determine, with respect to any series of preferred shares, the terms and rights of that series. Our board of directors may issue preferred shares on terms calculated to discourage, delay or prevent a change of control of our company or the removal of our management.

Election and removal of directors

Our articles of incorporation prohibit cumulative voting in the election of directors. Our bylaws require parties other than the board of directors to give advance written notice of nominations for the election of directors. Our articles of incorporation also provide that our directors may be removed for cause upon the affirmative vote of not less than two-thirds of the outstanding shares of our capital stock entitled to vote for those directors. These provisions may discourage, delay or prevent the removal of incumbent officers and directors.

Limited actions by stockholders

Our articles of incorporation and our bylaws provide that any action required or permitted to be taken by our shareholders must be effected at an annual or special meeting of shareholders or by the unanimous written consent of our shareholders. Our articles of incorporation and our bylaws provide that, unless otherwise prescribed by law, only a majority of our board of directors, the chairman of our board of directors or an officer of the Company who is also a director may call special meetings of our shareholders and the business transacted at the special meeting is limited to the purposes stated in the notice. Accordingly, a shareholder may be prevented from calling a special meeting for shareholder consideration of a proposal over the opposition of our board of directors and shareholder consideration of a proposal may be delayed until the next annual meeting.

Advance notice requirements for shareholder proposals and director nominations

Our bylaws provide that shareholders seeking to nominate candidates for election as directors or to bring business before an annual meeting of shareholders must provide timely notice of their proposal in writing to the

corporate secretary. Generally, to be timely, a shareholder's notice must be received at our principal executive offices not less than 120 days nor more than 150 days prior to the one-year anniversary of the immediately preceding annual meeting of shareholders. Our bylaws also specify requirements as to the form and content of a shareholder's notice. These provisions may impede shareholders' ability to bring matters before an annual meeting of shareholders or make nominations for directors at an annual meeting of shareholders.

Classified board of directors

As described above, our articles of incorporation provide for the division of our board of directors into three classes of directors, with each class as nearly equal in number as possible, serving staggered three-year terms. Accordingly, approximately one-third of our board of directors will be elected each year. This classified board provision could discourage a third-party from making a tender offer for our shares or attempting to obtain control of us. It could also delay shareholders who do not agree with the policies of our board of directors from removing a majority of our board of directors for two years.

Business combinations

Although the BCA does not contain specific provisions regarding "business combinations" between companies organized under the laws of the Marshall Islands and "interested shareholders," we have included these provisions in our articles of incorporation. Specifically, our articles of incorporation prohibit us from engaging in a "business combination" with certain persons for three years following the date the person becomes an interested shareholder. Interested shareholders generally include:

- any person who is the beneficial owner of 15% or more of our outstanding voting stock; or
- any person who is our affiliate or associate and who held 15% or more of our outstanding voting stock at any time within three years before the date on which the person's status as an interested shareholder is determined, and the affiliates and associates of such person.
- Subject to certain exceptions, a business combination includes, among other things:
- certain mergers or consolidations of us or any direct or indirect majority-owned subsidiary of ours;
- any sale, lease, exchange, mortgage, pledge, transfer or other disposition of our assets or of any subsidiary of ours having an aggregate market value equal to 10% or more of either the aggregate market value of all of our assets, determined on a combined basis, or the aggregate value of all of our outstanding stock;
- certain transactions that result in the issuance or transfer by us of any stock of ours to the interested shareholder;
- any transaction involving us or any of our subsidiaries that has the effect of increasing the proportionate share of any class or series of stock, or securities convertible into any class or series of stock, of ours or any such subsidiary that is owned directly or indirectly by the interested shareholder or any affiliate or associate of the interested shareholder; and
- any receipt by the interested shareholder of the benefit directly or indirectly (except proportionately as a shareholder) of any loans, advances, guarantees, pledges or other financial benefits provided by or through us.

These provisions of our articles of incorporation do not apply to a business combination if:

- before a person became an interested shareholder, our board of directors approved either the business combination or the transaction in which the shareholder became an interested shareholder;
 - upon consummation of the transaction which resulted in the shareholder becoming an interested shareholder, the interested shareholder owned at least 85% of our voting stock outstanding at the time the transaction commenced, other than certain excluded shares;
 - at or following the transaction in which the person became an interested shareholder, the business combination is approved by our board of directors and authorized at an annual or special meeting of shareholders, and not by written consent, by the affirmative vote of the holders of at least two-thirds of our outstanding voting stock that is not owned by the interest shareholder;
-

- the shareholder was or became an interested shareholder prior to the closing of this initial public offering;
- a shareholder became an interested shareholder inadvertently and (i) as soon as practicable divested itself of ownership of sufficient shares so that the shareholder ceased to be an interested shareholder; and (ii) would not, at any time within the three-year period immediately prior to a business combination between us and such shareholder, have been an interested shareholder but for the inadvertent acquisition of ownership; or
- the business combination is proposed prior to the consummation or abandonment of and subsequent to the earlier of the public announcement or the notice required under our articles of incorporation which (i) constitutes one of the transactions described in the following sentence; (ii) is with or by a person who either was not an interested shareholder during the previous three years or who became an interested shareholder with the approval of the board; and (iii) is approved or not opposed by a majority of the members of the board of directors then in office (but not less than one) who were directors prior to any person becoming an interested shareholder during the previous three years or were recommended for election or elected to succeed such directors by a majority of such directors. The proposed transactions referred to in the preceding sentence are limited to:
 - (i) a merger or consolidation of us (except for a merger in respect of which, pursuant to the BCA, no vote of our shareholders is required);
 - (ii) a sale, lease, exchange, mortgage, pledge, transfer or other disposition (in one transaction or a series of transactions), whether as part of a dissolution or otherwise, of assets of us or of any direct or indirect majority-owned subsidiary of ours (other than to any direct or indirect wholly-owned subsidiary or to us) having an aggregate market value equal to 50% or more of either the aggregate market value of all of our assets determined on a consolidated basis or the aggregate market value of all the outstanding shares; or
 - (iii) a proposed tender or exchange offer for 50% or more of our outstanding voting stock.

Transfer Agent

The registrar and transfer agent for the common shares is Computershare Trust Company, N.A.

Listing

Our common shares are listed on the New York Stock Exchange under the symbol “LPG.”

Rule 13a-14(a)/15d-14(a) Certification of the Chief Executive Officer

I, John C. Hadjipateras, certify that:

1. I have reviewed this annual report on Form 10-K of Dorian LPG Ltd.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
