

2010

HILLENBRAND, INC.

2010 ANNUAL REPORT

FINANCIAL HIGHLIGHTS

(Amounts in millions, except dividends per common share)	2010	2009	2008
Net revenue	\$749.2	\$649.1	\$678.1
Gross profit	\$313.3	\$274.4	\$280.5
Operating profit	\$137.9	\$155.0	\$149.6
Net income	\$ 92.3	\$102.3	\$ 93.2
Net cash provided by operating activities	\$118.2	\$123.2	\$101.8
Total shareholders' equity	\$371.9	\$304.0	\$288.4
Cash dividends per common share*	\$ 0.75	\$ 0.74	\$0.365

*Hillenbrand, Inc.'s first dividend as a stand-alone public company was paid June 30, 2008. As a result, there are no dividends reported for the first two quarters of fiscal 2008.

COMPANY PROFILE

For more than a century, the Hillenbrand name has represented a family tradition of quality, service and dedication that extends to our customers, our nearly 3,900 employees and our investors. We focus on a few simple core principles to achieve our goals:

- creating innovative products of superior quality,
- providing excellent service,
- forging enduring customer relationships,
- treating our employees with fairness and respect, and
- relentlessly pursuing continuous improvement.

Following these tenets has enabled our company to generate decades of solid financial results. Furthermore, our commitment to principles-based leadership has formed the Hillenbrand enterprise into an organization that attracts and retains the best talent, often welcoming generations of employees who want to become part of our heritage.

Headquartered in Batesville, Ind., Hillenbrand is a diversified enterprise with multiple subsidiaries concentrated around two distinct businesses.

BATESVILLE CASKET COMPANY

In 1906, John A. Hillenbrand purchased the Batesville Casket Company. It has since grown from a small, local business into the casket industry leader with six manufacturing plants and more than 80 distribution centers across North America — all dedicated to *helping families honor the lives of those they love*®. Funeral directors and their client families rely on Batesville for burial and cremation products constructed to the highest quality standards. The company's history of manufacturing excellence, product innovation, superior customer service, and reliable delivery has helped it become, and remain, a leader in funeral products in North America.

K-TRON

K-Tron International, Inc., is a New Jersey corporation founded in 1964. It is a leading global provider of bulk solids material handling equipment and systems for a wide variety of manufacturing and other industrial processes, particularly in the plastics, food, chemical, pharmaceutical, power generation, coal mining, pulp and paper, and wood and forest products industries. The company serves these customers through two product lines, which focus on feeding and pneumatic conveying equipment (the Process Group) and on size reduction equipment, conveying systems and screening equipment (the Size Reduction Group). K-Tron has manufacturing facilities in the United States, Switzerland and the People's Republic of China, and its equipment is sold and serviced throughout the world.

Revenue
(In Millions of Dollars)

Operating Margin
(Percentage)

As-adjusted operating margin excludes the following items:

2007 — Costs associated with antitrust litigation (\$7.8 million) and becoming a separate public company (\$5.1 million);

2008 — Costs associated with antitrust litigation (\$3.3 million) and becoming a separate public company (\$15.6 million);

2009 — Costs associated with antitrust litigation (\$2.2 million) and becoming a separate public company (\$0.1 million);

2010 — Non-recurring acquisition accounting effects (\$13.3 million) and costs associated with business acquisition (\$10.5 million), antitrust litigation (\$5 million) and restructuring (\$3 million), offset by a sales tax adjustment (\$4.7 million).

Operating Cash Flow
(In Millions of Dollars)

THIS HAS PROVEN TO BE A MOMENTOUS YEAR FOR YOUR COMPANY.

DEAR FELLOW SHAREHOLDER

Businesses all around the world began the year still gripped by the uncertainty created by the worst economic downturn in modern times. Even the funeral services industry, including Batesville Casket Company, was negatively affected by the decline in consumer confidence — something we had not previously experienced. Fortunately, as 2010 progressed, funeral consumers began to return to their family traditions and we, along with Batesville's customers, began to see stability return.

On April 1, 2010, we completed the acquisition of K-Tron International. This significant event was an important inflection point in your company's history. The addition of the two K-Tron business platforms enables us to pursue new pathways to profitable growth as a complement to the stable earnings and cash flow provided by Batesville. So in addition to being a strong, predictable generator of cash and paying an attractive dividend, Hillenbrand now also provides a significant growth component.

BATESVILLE'S SOLID EARNINGS AND STABLE CASH FLOW

We have long been a company with a strong ability to execute our plans. Even in the face of consumer uncertainty and a

decline in the number of burials, driven primarily by increasing cremations, Batesville maintained relatively consistent revenue. The Batesville team effectively used lean business skills to improve its cost structure, yielding a gross margin percentage increase for the year of 110 basis points. In 2010, Batesville became even more efficient and effective, all while providing customers with industry-leading quality and service.

Batesville also continued to lead the funeral products industry in creativity, launching several uniquely differentiated offerings. These new products help funeral directors provide their client families with more meaningful choices to meet a wide range of funeral needs. In addition, Batesville created new ways of helping funeral homes increase their profits in a challenging economy. Most notable was the expansion of the Batesville Interactive Connectivity Suite™ to help funeral homes add new online revenue streams, such as electronic obituaries, digital video tributes and, most recently, a partnership with FTD® florists.

As a result of these and other initiatives, Batesville's solid earnings and stable cash flow will continue to fuel our growth strategy. Not only is Batesville a strong cash engine, it is the

origin of Hillenbrand's culture of execution and the source of our core competencies in strategy management, lean business practices and talent development.

THE FIRST STEP IN OUR ACQUISITION STRATEGY

At the time of the spin in April 2008, when we first emerged as a stand-alone public company, we knew the conditions in funeral service that provide stability also limit growth opportunities. It was clear that Batesville would long be the core of Hillenbrand. It was also clear that we had to identify additional growth opportunities to increase shareholder value at an accelerated pace.

Therefore, after a significant amount of thoughtful evaluation, we chose to embark on a strategy to prudently acquire selected manufacturing businesses that had a record of success, but which could benefit from our core competencies to spur faster and more profitable growth. We formed an experienced acquisition team that reviewed hundreds of potential targets, searching for companies that met our criteria and had healthy cultures and experienced leadership in place. Of equal importance were the inherent growth opportunities in the industries they served.

We ultimately narrowed the choices down to a final few companies, with one rising repeatedly to the top of the list. After 18 months of searching and a very thorough due diligence process, we acquired K-Tron International. With K-Tron came two successful business platforms serving the dry bulk solids material handling industry. The Process Group manufactures equipment and systems used to convey and control the flow of dry bulk solids materials, primarily in the plastics, food and

pharmaceutical industries. The Size Reduction Group tackles larger materials, such as coal, wood and mined minerals, reducing them to sizes that can be efficiently used for such processes as generating power, making paper or producing fertilizer. Both groups have very strong brands and compete in a wide range of geographies.

An important part of my responsibility is ensuring that we assess and manage risk throughout the enterprise. Acquisitions entail risk — just as staying in place entails risk. The K-Tron acquisition changed our risk profile in several ways. Before the K-Tron acquisition, we had one line of business and now we have three. As a result, 75 percent of our revenue is generated by Batesville and 25 percent by K-Tron. We also diversified the source of our earnings and cash flow, not only by industry, but also by geography. While we will naturally have some added exposure to economic cycles, we also now have significantly greater growth opportunities that represent a long runway ahead. Exclusive of one-time acquisition costs and related accounting effects, the K-Tron transaction has been immediately accretive.

We've had no surprises in the nine months since the transaction and the experienced K-Tron leadership team is in place and executing its growth plans. Perhaps most important, its leaders are readily drawing on the Hillenbrand core competencies to further accelerate their performance as we move toward an economic recovery in many parts of the world.

THE YEARS AHEAD

Our long-term goal is to consistently increase shareholder value at a rate exceeding the weighted average cost of capital.

OUR ENTERPRISE-LEVEL STRATEGY CONTINUES TO FOCUS ON BUILDING A STRONG, DIVERSIFIED ORGANIZATION THAT SUPPORTS OPERATING COMPANIES IN MULTIPLE GROWTH-ORIENTED INDUSTRIES.

We measure this return primarily by the amount of cash that we generate. As you have seen in previous shareholder letters, our view is that cash is a fact, while profit is an accountant's opinion.

Our strategy is to grow revenue, net income and cash flow in the operating companies through a combination of organic growth and, primarily in the growth businesses, selected acquisitions.

Our tactics are to provide effective governance and leverage the operating company results by applying the following few core competencies:

- **Strategy management** is the foundation for developing an effective game plan in any business. Strategy without execution is an academic exercise and execution without strategy is prone to chaos. We can help acquired companies sharpen their focus to execute the "critical few" objectives that provide the greatest competitive leverage and generate the best results.
- **Lean business practices** eliminate waste, improve quality and increase operational efficiencies. Lean business is also the backbone of our culture of execution. Batesville has proven that even a slow-growth business can drive superior financial returns by employing continuous improvement/lean business practices throughout the entire value chain. We will do the same for acquired companies.
- **Intentional talent development** is part of Hillenbrand's "genetic code." The business with the best talent has a marked advantage and is best positioned to execute its strategy. We manage the leadership development of our high-potential associates through a variety of assignments to

broaden their viewpoint and stretch their abilities. This enables us to consistently recruit, develop and retain top talent, while providing a strong pipeline for succession planning.

SUMMARY

In 2010, Batesville again demonstrated its ability to provide stable earnings and cash flow in the face of a soft burial market and high competitive pressures. The Batesville team has also launched several initiatives that will create future revenue streams and increase profit margins.

Our business strategy provides a clear map for future organic growth and prudent acquisitions. The K-Tron acquisition was a significant step and we are even more enthusiastic about K-Tron today than we were on the day of closing. We believe that future generations will look back on this as the successful start of the next 100 years for Hillenbrand, Inc.

We are ever mindful of the responsibility of being effective stewards of the capital you entrust to us and we will work diligently to increase the value of your investment in Hillenbrand.

Sincerely,

Kenneth A. Camp
President and Chief Executive Officer
Hillenbrand, Inc.

BATESVILLE CASKET

Batesville Casket is the leader in the design, manufacture, sales and delivery of caskets

and cremation products in the United States and Canada. We understand that our job, at its most basic level, is to help funeral directors create a professional personalized experience for a grieving family. To do that, we create high-quality products that give families a wide variety of choices. We also give funeral directors the freedom to concentrate on caring for their client families by providing them with easy-to-use tools and reliable delivery. At the same time, our support services can help them maintain — and even grow — their profitability. Understanding this mission is what helped us succeed during a challenging fiscal year in 2010.

MARKET OVERVIEW

Echoing the economy, the death care industry experienced more stable conditions in 2010 than in 2009, although they have not yet returned to pre-recession levels. The number of deaths in North America remained relatively flat or slightly declining in 2010. Better health care, a minimal flu season, and improved exercise and nutrition habits have resulted in longer lives for much of the populace. Although the death rate has remained stable, demand for burial products has steadily declined. For several decades, the rate at which families chose cremation increased at a very consistent and measured pace. That changed in 2009, when the economy struggled and families looked for low-cost alternatives — even when it came to funeral services. The growth in cremation was unprecedented. Then in 2010, we saw the cremation adoption rate gradually return to a more normal pattern.

Concerned about the economic uncertainty, families had also turned to lower-priced casket alternatives in 2009. That opened the door for some manufacturers and distributors in the lower tiers, who were already battling manufacturing overcapacity and high fixed costs, to apply aggressive pricing pressure in an attempt to gain market share. That pressure, though less severe, continued in 2010, driven by the still-weak economy and lower demand for our products.

YEAR IN REVIEW

Primarily as a result of lower demand for burial caskets, we posted a 1 percent decrease in 2010 revenue, compared to the previous year. We believe this was consistent throughout the industry, where pricing pressures and product mix-down challenged average selling price and market share for everyone. We responded by implementing successful selling programs mid-year that helped us retain our relative share. In addition, lower commodity costs and supply chain cost efficiencies helped us improve our gross profit margin percentage.

A number of strategic initiatives were key to our stable results in 2010. Because we're a high-touch company committed to helping funeral homes create more meaningful experiences for grieving families, we introduced new products aimed at reflecting a loved one's interests and beliefs. For example, the LifeStories™ products provide families with an innovative way to personalize the casket cap, then supply the family with keepsakes they can display, carry or wear to honor a loved one. Similarly, the new LifeViews™ products turn the casket lid into a canvas for family photographs and mementos. Our Batesville Interactive Connectivity Suite™ increased the ability for families to memorialize the deceased online through electronic obituaries and digital video tributes.

We also helped our funeral home customers improve their profitability, while simultaneously increasing their client families' satisfaction, through a many-layered merchandising program. In 2010, those efforts included our Options® cremation products, helping funeral directors promote the value of a service with each cremation, along with personalized products at the time of the funeral and after the service has concluded.

Our capabilities in lean business processes also played an important role in helping us maintain strong profitability by delivering operational efficiencies across the supply chain. These efforts are recognized throughout our industry and culminated in our metal casket

The LifeStories® collection takes personalization to a new level. It includes 15 caskets, 24 bronze display medallions and smaller medallions that can be engraved and lovingly passed from one generation to the next.

The LifeStories® collection helps families create a lasting link to their departed loved one. Both display and keepsake medallions can be used for a touching home tribute, using one of several display accessories.

With Batesville's LifeView® collection, the casket becomes a canvas for telling a life story, using the family's own photos and precious keepsakes to create a personalized display in the lid.

OUR REPUTATION IS BUILT ON HIGH-QUALITY PRODUCTS, DEPENDABLE DELIVERY, A CAPABLE SALES AND SERVICE ORGANIZATION, AND STRONG OPERATIONS AND MANUFACTURING CAPABILITIES.

manufacturing plant in Manchester, Tenn., being named *ASSEMBLY Magazine's* 2009 Plant of the Year and a 2010 *IndustryWeek* Top 10 Plant. In December 2010, our Vicksburg, Tenn., wood processing plant was named a 2011 *IndustryWeek* Top 10 Plant.

THE YEAR AHEAD

We expect to see the ongoing introduction of new strategies and business models in 2011 as competitors and customers look for ways to improve their bottom-line results in a changing customer and consumer environment. As the industry leader, Batesville Casket is uniquely positioned to address these changes. The core of our business is highly stable, so we will continue to maintain our focus on the sale of burial caskets and cremation products to licensed funeral directors in licensed funeral homes. At the same time, we can capitalize on the strength of our brand to extend our industry reach with new, complementary products and services.

In the long term, we will continue growing our core burial business in several ways, including:

- Leveraging our comprehensive high-velocity distribution system;
- Driving differentiation with new products that add value to a service through personalization and memorialization;
- Improving selling effectiveness through merchandising, call management, customer segmentation and well-aligned sales compensation programs; and
- Continuing to reduce our cost structure by employing lean business principles throughout the organization.

We also will continue exploring growth within non-burial revenue streams.

- The Batesville Interactive Connectivity Suite™ helps funeral home customers connect with consumers for information and education needs. In 2010, we added greater customization to our website offerings by acquiring Memorial Solutions, partnering with Legacy.com

to offer online obituaries and introducing video tributes. As we start 2011, we are pursuing other opportunities that will give funeral homes more ways to add value for their families, while generating additional revenue, such as a partnership with FTD we announced in November 2010 to provide customized, co-branded floral websites to funeral homes that use one of our WebLink™ sites.

- Many families who choose cremation do not have a service, a choice many have indicated in studies that they regret later. Many also are unaware that they can personalize the cremation experience through a wide variety of memorialization products and keepsakes. Our Options® team plans to change that by continuing to provide new products and capabilities that will help funeral directors improve the quality and frequency of funeral services that accompany a cremation and give families personalized ways to remember loved ones both during and after the ceremony.
- In 2010, Batesville purchased the intellectual property of a company that designed polyresin burial vaults. Building on that work, we began to develop and test a new version of the product that meets standards of quality and durability worthy of the Batesville name. Late in the year, we began a limited beta test of this strong, lightweight vault with a small group of customers in the Midwest. Throughout 2011, we will continue to refine the product, develop a new service model and explore ways to add personalization to the vault.

SUMMARY

In the face of an economy that's still uncertain and a highly competitive industry that's fighting for share and bottom-line results, Batesville Casket has a singular focus: to leverage our strengths and brand to drive profitable growth. Our reputation is built on high-quality products, dependable delivery, a capable sales and service organization, and strong operations and manufacturing capabilities. As we look to the future, we plan to expand that reputation by continuing to help improve the quality of funerals and the profitability of our customers — which will help Batesville remain the overwhelming choice for funeral homes.

WebLink, the foundation of Batesville's Connectivity Suite™ by Batesville Interactive, offers templated and custom website designs to allow every funeral home to build a powerful and effective online presence.

The natural warmth and beauty of wood is reflected in every hardwood urn by Options®. The Aldin™ mantel clock, a dual-capacity hardwood urn, is as distinct as the lives of the individuals it celebrates.

Memorial rocks, such as the Sandstone Dual Memorial Rock, create a customized remembrance of loved ones who have chosen cremation, adding a personalized touch to a memorial garden or cemetery.

APRIL 1, 2010

K-TRON JOINS HILLENBRAND FAMILY OF COMPANIES

Late in 2008, as part of Hillenbrand's strategy to supplement our core Batesville Casket operating company with new platforms for growth, we outlined specific criteria necessary for a successful acquisition. The target should have:

- **a strong brand in its defined space;**
- **talented, proven management with close customer relationships;**
- **robust sales and marketing capabilities, primarily in a business-to-business environment;**
- **a strong cultural fit with Hillenbrand; and**
- **the ability to benefit from our core competencies and share its own competitive strengths.**

A disciplined buyer, we evaluated more than 400 companies and closely scrutinized dozens. Then in January 2010, Hillenbrand announced the impending acquisition of K-Tron International, a company that designs, manufactures and sells equipment used in bulk solids materials processing. We engaged in a comprehensive due diligence process, giving us a high level of confidence that this purchase would provide us with everything we expected in a transaction of this magnitude.

We completed the acquisition April 1, 2010. K-Tron's entire management team chose to remain with us, including Ed Cloues, the company's former chairman and CEO, who took a seat on the Hillenbrand board of directors. We were also excited to meet K-Tron's employees, who reinforced our belief that we share a quality-oriented, innovative culture that values customer service.

The transition was carefully planned to minimize interruption to K-Tron's business, which we would manage as a completely separate operating company from Batesville. The first priority was to ensure we had effective financial processes to provide the right level of controls and to yield timely and accurate financial reporting. K-Tron had been a public company on the Nasdaq exchange, so it was acclimated to the requirements. Our teams worked together to transition that information into Hillenbrand's processes. As a result of acquisition timing, K-Tron joined the Hillenbrand family during planning for the 2011 fiscal year, which began October 1, 2010. The Hillenbrand Strategic Management Process includes assessing the competitive arena, formulating strategic initiatives and, finally, identifying and deploying resources for those initiatives. Through the process, we found that K-Tron's growth potential, both organically and through targeted acquisitions, was greater than we had anticipated during the due diligence process.

As planning was concluding, K-Tron began to receive training in lean business concepts that will help the company improve its profitability and cash generation ability. While Batesville is moving into advanced techniques, K-Tron is starting with the basics, but we anticipate the company will learn quickly.

K-Tron has a vast amount of industry knowledge and very capable employees, many of whom have significant longevity with the company. At Hillenbrand, we value those qualities, but also know that an important driver of sustainable business results is having — and deploying — talent effectively. Late in 2010, the Hillenbrand Human Resources Team introduced our talent management process, which will help K-Tron match the best people with the highest-value initiatives, provide succession planning and give the company more flexibility with its top-grade talent.

As Hillenbrand's first acquisition, K-Tron has not only met, but exceeded our expectations. The transition process went very well in 2010 and will continue in 2011, as we continue to use our core competencies to help K-Tron reach the next level of growth.

K-TRON INTERNATIONAL

When you eat a flavored potato chip, it should have just the right combination of spices. When you use medication, you take for granted that it will contain the proper amount of the active ingredient. And when you flip a light switch, you expect the light to come on. You've probably never wondered how those things occur, but the employees at K-Tron International's companies understand that these are complicated processes. Their solutions-based expertise, coupled with the superior designs of K-Tron equipment, provides real value to our customers.

K-Tron serves a variety of industries through two business lines: the Process Group and the Size Reduction Group.

PROCESS GROUP MARKET OVERVIEW

K-Tron's Process Group is a global leader in designing, manufacturing and selling feeding and pneumatic conveying equipment used primarily in dry process manufacturing. We market products under two brands: K-Tron Feeders and K-Tron Premier. The largest end market served by the Process Group is the plastics compounding and base resin industry, with significant sales also coming from food processing, chemicals and pharmaceuticals.

The Process Group is recognized in the industry for precision feeding technology that includes accurate weighing and control capabilities. This is critical for ensuring that medications and foods meet government guidelines and that plastics have exactly the amount of ingredients to ensure the end products are stable and consistent.

The group has strong engineering, manufacturing and sourcing in North America and western Europe, which is also where we have the majority of our sales and support. Approximately 75 percent of the Process Group's revenue is generated through equipment sales and 25 percent through maintenance and the sale of replacement parts.

The market for the Process Group is highly fragmented, global and growing at a rapid rate as more industries in diverse geographies begin to put more automated processes in place.

PROCESS GROUP YEAR IN REVIEW

Generally, the Process Group lags the economy by three to six months as our customers change their production lines to meet demand. This

means that the effect of the economic recession in 2009 wasn't evident in K-Tron's

financial results until late in the year. As the recession continued in early 2010, the Process Group continued to experience lower numbers of original orders and fewer requests for replacement parts.

As the year progressed, we began to see an uptick in orders for replacement parts, indicating that customers were encouraged enough to restart or increase production on some lines, but not yet confident enough to buy new equipment. K-Tron's Process Group finished its first fiscal year under Hillenbrand with U.S. business relatively flat, but showing signs of improvement.

The recovery appeared more pronounced in China, Korea and certain other Asian countries, where factories are beginning to install more automated processes. We also saw some strength in Europe and the Americas late in 2010.

Global gross domestic product grew in 2010 and is expected to continue growing in 2011, which should lead to increased orders for capital equipment.

PROCESS GROUP YEAR AHEAD

Originally, the Process Group was known only for its feeders. Over time, we started to sell additional third-party components, such as pneumatic conveying. The acquisition of Premier Pneumatics in 2006 positioned the company as a single-source supplier of material handling systems under one highly respected brand. In 2011, we intend to capitalize more on this system integration strategy to drive revenue and margin growth. We also anticipate adding other system components through acquisition in the coming years to further support this solutions-based system strategy.

The Process Group's key competency is managing a continuous flow process. Many manufacturing processes are batch-oriented, such as in the pharmaceutical industry. As technology has improved, more companies are moving to fast, efficient continuous flow processes, and we see great potential for our products, both domestically and abroad. This is also a good opportunity to expand our reach with pneumatic conveying equipment and integrated systems on a global basis as facilities retool or bring new operations online.

K-Tron's bulk solids pump uses breakthrough technology to provide gentle, precise feeding of free-flowing pellets, granules and friable products. They can be paired with K-Tron Premier conveying systems.

From rotary valves (front left) to blowers (middle left) to vacuum receivers (front right) to silos (rear), K-Tron Premier produces or engineers all the components required for a complete pneumatic conveying system.

K-Tron is the leading producer of gravimetric feeders, such as these loss-in-weight models. Our patented precision weighing modules and controls are designed for high performance in difficult industrial environments.

K-Tron produces pneumatic conveying and feeding systems specifically designed to meet the high demands of the pharmaceutical industry, where accurate measurement and sanitary materials are critical.

Gundlach is the preferred crushing solution for coal, potash, salts, lime and other industrial minerals where precise product sizing and maximized yield are important. We are the industry leader in this category.

Pennsylvania Crusher's Coalpactor reversible hammermill crushes coal and limestone for fluid bed boiler operations in the production of electric power. It is also used for sizing many other minerals in various industries.

The Centroload™ feeder is the latest innovation from Jeffrey Rader Corporation. It is used to feed aggregates into crushers and impactors more evenly, producing a more uniform product at a reduced cost.

Replacement parts are an important component of Pennsylvania Crusher's business. Electric power plants choose our replacement parts, such as this hammer, because their performance can improve boiler operation.

Our products are well-known in Europe and the Americas, but there are significant opportunities to increase our presence in Asia, the Middle East and the Pacific Rim, particularly in high-growth economies.

SIZE REDUCTION GROUP MARKET OVERVIEW

The Size Reduction Group deals in much larger materials than its Process Group counterpart, with three primary brands: Gundlach, Pennsylvania Crusher and Jeffrey Rader.

Gundlach equipment is most often found at a mining site, turning basketball-sized chunks of coal into softball-sized pieces that can be more easily transported. It also has a strong brand position in North American minerals mining used in fertilizer production. Pennsylvania Crusher is well-known and respected at North American coal-fired power plants, where its equipment reduces the coal even further, creating particles the optimal size for efficient burning in a utility's boiler. Pulp and paper is the key industry for Jeffrey Rader equipment, which coincidentally has also been used for years in Batesville Casket's wood processing plant in Vicksburg, Miss.

These brands derive 40 percent of their revenue from new equipment sales. Large pieces of equipment, they tend to stay in place for decades and have been specifically engineered to fit into that facility's process. The majority of revenue in the Size Reduction Group — 60 percent — comes from the sales of consumable parts, which experience significant wear and tear and require regular maintenance and replacement.

SIZE REDUCTION GROUP YEAR IN REVIEW

K-Tron's Size Reduction Group generally experiences the effects of economic volatility six to nine months later. Throughout 2010, U.S. coal production and energy consumption began to increase, and we saw a resulting gradual growth in consumable parts orders. As power plants and coal mines increase production to meet demand, we expect

to see these orders increase further. The continuing soft economy, however, has resulted in relatively flat orders for new equipment in the U.S. in 2010.

International demand for equipment used for coal and mineral mining, steel production and biomass energy generation was strong in 2010, particularly as China and India bring new coal-fired energy plants online at a rapid pace. We expect this trend to continue in 2011.

SIZE REDUCTION GROUP YEAR AHEAD

Well-known domestically, the Size Reduction Group plans to export its capabilities to a wider world marketplace in 2011. Although it often exports products to other countries, the design, installation and maintenance of this equipment is often a high-touch process. By having a local presence in key geographies, we can be viewed as a domestic supplier of equipment and spare parts in a number of developing markets, including:

- Energy generation and fertilizer production, which are fairly mature industries in the U.S., but are rapidly growing elsewhere. Bookings for coal mines and utilities in China have grown over the past four years, and we plan to increase our penetration there.
- Biomass energy production in Europe, where Jeffrey Rader's expertise in wood processing is a competitive advantage.
- Mined minerals in Europe, where there's a growing demand for components used in fertilizer production.

SUMMARY

Hillenbrand is pleased with K-Tron's results as a member of the Hillenbrand family and we're excited about the company's potential to generate additional revenue and margin growth both domestically and globally in 2011 and beyond.

State the aggregate market value of the voting and nonvoting common equity held by non-affiliates of the registrant.

Aggregate market value of the voting stock (which consists solely of shares of common stock) held by non-affiliates of the registrant as of March 31, 2010: — \$1,369,013,552.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Common Stock, without par value — 62,284,165 shares outstanding as of November 15, 2010.

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents if incorporated by reference and the Part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated: Portions of our definitive proxy statement for the 2010 Annual Meeting of Stockholders are incorporated by reference into Part III of this report. These will be filed no later than January 15, 2011.

PART I

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

Throughout this Form 10-K, we make a number of “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. As the words imply, forward-looking statements are statements about our future plans, objectives, beliefs, and expectations that might or might not happen in the future, as contrasted with historical information. Our forward-looking statements are based on assumptions that we believe are reasonable, but by their very nature they are subject to a wide range of risks.

Accordingly, in this Form 10-K, we may say something like,

“We anticipate that the burial rate will be flat to slightly declining in future years.”

That is a forward-looking statement, as indicated by the word “anticipate” and by the clear meaning of the sentence.

Other words that could indicate we’re making forward-looking statements include the following:

intend	believe	plan	expect	may	goal	would
become	pursue	estimate	will	forecast	continue	should
targeted	encourage	promise	improve	progress	potential	could

This isn’t an exhaustive list but is simply intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words, however, does not mean that the statement is not forward-looking.

Here’s the key point: *Forward-looking statements are not guarantees of future performance, and our actual results could differ materially from those set forth in any forward-looking statements.* Any number of factors — many of which are beyond our control — could cause our performance to differ significantly from those described in the forward-looking statements.

For a discussion of factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading “Risk Factors” in Item 1A of this Form 10-K. We assume no obligation to update or revise any forward-looking statements.

ITEM 1. BUSINESS

In this section of the Form 10-K, entitled “Business,” we provide you a basic understanding of our company, our reportable segments, the products we manufacture and sell, how we distribute our products, with whom we compete, and the key inputs to production (in the form of raw materials, labor, and manufacturing

locations). We also provide you background on industry trends, regulatory matters, and key patents and trademarks important to our business. We also provide an explanation of our business strategies. Finally, we provide you a brief background on our executive officers so that you can understand their experience and qualifications.

General Information

Hillenbrand, Inc. (“Hillenbrand”) was formed on November 1, 2007, and became a publicly traded company as the result of the separation of Hillenbrand Industries, Inc. (our “Former Parent”, “Hill-Rom Holdings, Inc.”, or “Hill-Rom”) into two separate publicly traded companies, Hillenbrand and Hill-Rom, through a tax-free distribution (the “Distribution”) of Hillenbrand shares to Hill-Rom’s shareholders. This distribution took place following the close of business on March 31, 2008. Unless the context otherwise requires, the terms “Hillenbrand,” the “Company,” “we,” “our,” or “us” refer to Hillenbrand, Inc. and one or all of its consolidated subsidiaries.

Hillenbrand, Inc. is an Indiana corporation with our principal executive offices located at One Batesville Boulevard, Batesville, Indiana, 47006. Our telephone number at this address is (812) 934-7500. Our website is www.hillenbrandinc.com. We make available on this website, free of charge, access to press releases; conference calls; our annual, quarterly, and current reports; and other documents filed with or furnished to the Securities and Exchange Commission (“SEC”) as soon as practicable after such reports are filed or furnished. We also make available through this website position specifications for the Chairman, Vice Chairman, members of the Board of Directors and the Chief Executive Officer; our Code of Ethical Business Conduct; the Corporate Governance Standards of our Board of Directors; and the charters of each of the standing committees of the Board of Directors. All of these documents are also available to shareholders in print upon request.

All reports and documents filed with the SEC are also available via the SEC website, www.sec.gov, or may be read and copied at the SEC Public Reference Room at 100 F Street, NE, Washington, DC 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

Hillenbrand Corporate Operations

Background. Hillenbrand, Inc. is the parent holding company of our wholly owned subsidiaries, Batesville Services, Inc. (“Batesville”) and K-Tron International, Inc. (“K-Tron”), including their wholly owned subsidiaries. In addition to implementing our business strategy discussed below as a holding company, we generally oversee the operations of our subsidiaries, allocate

resources among them, and manage their capital structures. Additionally, we provide our subsidiaries with certain centralized functions such as reporting, treasury, taxes, internal audit, and risk management. We also centrally coordinate our business acquisition and lean business strategy initiatives. As of September 30, 2010, we employed 43 people in our corporate operations, all of whom are located at our principal offices in Batesville, Indiana.

Strategy. We believe we can most effectively continue to increase shareholder value by building a diversified enterprise with strong positions in multiple industries. Our long-term value creation strategy consists of:

- ***Growing revenue and Income Before Taxes via organic growth within our existing platforms and through targeted acquisitions.*** Each operating company has specific, targeted business plans to achieve organic growth, which may also include select “add-on” acquisitions that are complementary to their growth strategies. The operating companies also plan to increase profit margins by employing Hillenbrand’s core competencies of:
- **Lean business**, continuously looking for ways to improve quality and customer satisfaction, increase effectiveness and operational efficiency, drive costs down, and develop lean leaders;
- **Talent development**, providing opportunities to successfully recruit, develop, and deploy talent; and
- **Strategy management**, which serves as the basis for annual and long-term business planning, while strengthening technical capabilities and product and service strategies.
- ***Using our cash flow and debt capacity to invest in additional growth platforms.*** We will focus on companies that can take advantage of our core competencies and that meet our financial and cultural criteria. In support of this effort, we will continue to develop our public company capabilities to ensure that we remain compliant, efficient, well-controlled, and capable of supporting future acquisitions.

Batesville

Background. Batesville is the leader in the North American death care products industry, where it has been designing, manufacturing, distributing, and selling funeral service products to licensed funeral directors operating licensed funeral homes for more than 100 years. Batesville-branded products consist primarily of burial caskets, but also include cremation caskets, containers and urns, selection room display fixturing for funeral homes, and other personalization and memorialization products and services, including web-based applications and the creation and hosting of websites for licensed funeral homes.

Products and Services. Batesville designs, manufactures, and sells gasketed caskets made of carbon steel, stainless steel, copper, and bronze. It also produces and markets non-gasketed steel, hardwood, and veneer hardwood caskets. In addition, Batesville manufactures and sells cloth-covered caskets, all-wood construction caskets suitable for green burials, and a line of urns, containers, and other memorialization products used in cremations. To assist with displaying these products, Batesville supplies selection room fixturing through our System Solutions® by Batesville. Batesville has recently been evaluating the possibility of expanding its product line into lightweight polyresin burial vaults, a line that would be complementary to its casket products.

Most Batesville® brand metal caskets are gasketed caskets that are electronically welded and utilize rubber gaskets and a locking bar mechanism. Batesville premium steel caskets also employ an alloy bar to help protect the casket cathodically from rust and corrosion. We believe that this system of cathodic protection is a feature found only on Batesville-produced caskets.

Batesville solid and veneer hardwood caskets are made from a variety of woods, and are offered in more than eight different species. The Batesville veneer caskets are manufactured using a proprietary process for veneering that allows for rounded corners and a furniture-grade finished appearance. Batesville also manufactures and provides select lines of Marsellus® premium solid wood caskets to its funeral home customers.

The Options® by Batesville cremation line offers a complete cremation marketing system for funeral service professionals. In addition to a broad line of cremation caskets, containers, urns, jewelry, and keepsakes, the system includes training, merchandising support, and marketing support materials. Cremation caskets and containers are manufactured primarily of hardwoods and fiberboard. Batesville’s wide assortments of memorial urns are made from a variety of materials, including bronze, acrylic, wood, cloisonné, and marble.

Integrated online technology products and services are available through the Batesville Interactive suite of products. WebLink™ funeral home websites, TributeLink™ online videos, and ObitLink™ online obituary content form an integrated solution that provides funeral directors additional ways to generate revenue streams and connect with consumers for information and education needs. Batesville’s alliance with Legacy.com® gives funeral directors access to the largest networked obituary system in the nation. Batesville’s technology products help to improve the visibility of the local funeral home to the families they serve.

Sales, Distribution and Operations. Batesville offers several marketing and merchandising programs to funeral professionals for both casket and cremation products. Batesville-branded caskets are marketed by Batesville's direct sales force only to licensed funeral professionals operating licensed funeral establishments (or, in the absence of state licensing requirements, to full-service funeral establishments offering both funeral goods and funeral services in conformance with state law) throughout the United States ("U.S."), Puerto Rico, Canada, Mexico, the United Kingdom, and Australia. A significant portion of Batesville's sales are made to large national funeral service providers under contracts. One customer, Service Corporation International, accounted for approximately 13% of Batesville's consolidated net sales during the year ended September 30, 2010. In contrast to our large national accounts, we also serve more than 12,000 independent, privately-owned customers across North America.

Over the past decade, funeral home customers have sought to minimize their inventory costs by shifting the inventory burden to their suppliers. Today, many funeral homes maintain minimal casket inventory and expect their casket suppliers to provide same-day or next-day delivery to satisfy their funeral requirements. The Batesville distribution network maintains inventory at 85 company-operated Customer Service Centers ("CSCs") and 6 Rapid Deployment Centers ("RDCs") in North America. Batesville caskets are generally delivered in specially equipped vehicles owned by Batesville. This system enables Batesville to deliver the majority of its product, including uniquely personalized caskets, within 24 hours of receiving the customer's order. Over the last three years, Batesville delivered the "right casket at the right time" in excess of 99% of the time. We believe this highly effective distribution network is aligned with the increasing time demands of families and the inventory reduction expectations of Batesville's customers.

Batesville primarily manufactures and distributes its products in the U.S. It also has 2 manufacturing facilities in Mexico and distribution facilities in Puerto Rico, Canada, Mexico, the United Kingdom, and Australia. Its export revenues constituted less than 10% of its consolidated revenues in fiscal 2010 and prior years.

Batesville's foreign operations are subject to risks inherent in doing business in foreign countries (which include political, social, and economic instability, expropriation, and changing government regulations), but are substantially limited to sales activities in Canada and manufacturing activities in Mexico.

Quantitative information about foreign operations is set forth in tables relating to geographic information in Note 15 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Demographics and Customer Preferences. The death of a family member or loved one causes most people to seek the services of a state-licensed funeral director to provide specific services regarding handling and preparing the deceased. Most consumers have only limited familiarity with funeral-related products and usually expect funeral directors to provide information on product and service alternatives. Although caskets and urns can be purchased from a variety of sources, including directly from internet sellers and casket stores, the overwhelming majority of those who arrange a funeral purchase these products directly from the funeral home as a matter of choice and convenience.

For the past several years, the total number of deaths in North America (where most of Batesville's products are sold) has been decreasing. During the same period, the rate of cremation selection has been slowly but steadily increasing to the point where cremations as a percentage of total deaths now represent more than one-third in the U.S. and more than one-half in Canada. These factors have yielded a slow but steady decline in the total number of burials in North America. The current trends are expected to continue for the foreseeable future until the post-World War II spike in births causes an increase in deaths. While the primary drivers of market size are population and age, the actual number of deaths (and, therefore, the actual number of caskets sold) is affected by a variety of additional factors, including improving healthcare and the varying timing and severity of seasonal pneumonia and influenza outbreaks. The unpredictability of these factors can cause periodic fluctuations in industry demand patterns and revenue generated in any given fiscal period. While it is difficult to accurately predict the number of deaths on a month-to-month or even a year-to-year basis, we anticipate that the number of deaths in North America will remain relatively flat and the cremation rate will continue to gradually increase, resulting in a modest, but steady decline in the demand for burial caskets for the foreseeable future.

Along with the declining number of burials, the death care products industry has experienced a long-term gradual decline in the product mix of burial caskets sold, a trend that has also affected our financial results. One of the factors that has affected mix is the pricing practice of many funeral homes to place most of the margin expectation on the sale of products (principally caskets) instead of the services provided. We have observed changes in the pricing practices of many funeral homes, wherein they are recovering margin on their services and reducing the mark-up of products, primarily caskets, which now have more pricing visibility through online retailers. Additionally, more consumers are expecting higher levels of personalization, both in products and services.

Competition. We believe Batesville is the recognized North American industry leader in the sale of death care products. Competition in the death care products industry is based on product quality, design features, personalization, price, and delivery service. Batesville competes in the sale of burial and cremation containers with several national casket manufacturers/distributors, regional manufacturers/distributors, and more than 100 independent casket distributors, most of whom serve fairly narrow geographic segments. The industry also has seen a few foreign manufacturers, mostly from China, import caskets into the U.S., and Canada. Additionally, some retail stores and internet retailers sell caskets directly to consumers, although we believe that total sales among this latter group represent approximately 3% of annual burial casket volume.

The effect of gradually declining casket demand continues to result in economic pressures on casket manufacturers and distributors as they seek to maintain volume. Existing domestic over-capacity and the added burden from commodity price increases, which began increasing in early 2010, further increases these pressures, resulting in higher per unit costs.

Raw Materials. Batesville uses carbon and stainless steel, copper and bronze sheets, wood, fabrics, finishing materials, rubber gaskets, zinc, and magnesium alloy in the manufacture of its caskets. Although most of these raw materials are generally available from several sources, some are currently procured from a single source.

Volatility in the prices Batesville pays for raw materials used in its products, including steel, fuel, petroleum-based products, and fuel-related delivery costs, has a direct effect on profitability. Batesville generally does not engage in hedging transactions with respect to these purchases, but does enter into fixed-price supply contracts at times. Batesville regularly takes steps and actions to offset the impact of volatility in raw material and fuel prices, including lean business initiatives, various sourcing actions, and rebalancing of production capacity.

Most of Batesville's sales are made pursuant to supply agreements with its customers, and historically it has instituted annual price adjustments to help offset some, but not necessarily all, raw material costs.

Patents and Trademarks. Batesville owns a number of patents on its products and manufacturing processes that are of importance, but we do not believe any single patent or related group of patents is of material significance to its business as a whole. It also owns a number of trademarks and service marks relating to products and product services which are of importance, but, except for the mark "Batesville®," we do not believe any single trademark or service mark is of material significance to its business as a whole.

Batesville's ability to compete effectively depends, to an extent, on its ability to maintain the proprietary nature of its intellectual property. However, it may not be sufficiently protected by its various patents, trademarks, and service marks. Additionally, certain of its existing patents, trademarks or service marks may be challenged, invalidated, cancelled, narrowed, or circumvented. Beyond that, it may not receive the pending or contemplated patents, trademarks, or service marks for which it has applied or filed.

In the past, certain of its products have been copied and sold by others. Batesville vigorously seeks to enforce its intellectual property rights. However, we cannot ensure that the reproduction and sale of its products by others would not materially affect the sale of its products.

Employees. As of September 30, 2010, Batesville employed approximately 3,200 people in its operations. Approximately 1,100 of these individuals within its logistics and manufacturing operations in the U.S. and Mexico work under collective bargaining agreements. In the U.S. and Mexico, the collective bargaining agreements have expiration dates ranging from January 2011 to June 2015.

Batesville strives to maintain satisfactory relationships with all its employees, including the unions representing those employees. As a result, Batesville has not experienced a significant work stoppage due to labor relations in more than 20 years. Although it cannot ensure that such a stoppage might not occur in the future, there is no reason to believe that this trend will not continue for the foreseeable future.

Strategy. While volume growth in the burial casket space continues to be limited, there are opportunities to generate additional business within a wider range of funeral services. Leadership of Batesville is focusing on three categories of strategic initiatives to drive growth:

Profitably Grow the Core Burial Business

- The Batesville® brand is widely recognized as the premier brand in the industry among funeral professionals, offering the broadest range of metal and wood caskets. Its legacy of innovation and leadership in the funeral industry has allowed customers and the families they serve to commemorate the lives of those they love through quality construction and compelling designs that provide personal expressions of a life well-lived. To enhance its leadership position, Batesville will continue to invest in its marketing capabilities, specifically in research, new product development, and brand promotion. Batesville will utilize its capabilities to continue launching products with consumer-oriented features and expand its personalization platforms throughout the product line.

- Batesville will continue to demonstrate the value its Batesville-branded products and services bring to the operations and families of funeral home customers of all sizes across North America. Batesville is focused on improving the quality of all of its customer interactions through better call management and compensation alignment. Its actions are focused on ensuring the success of funeral home customers, which in turn will position Batesville to be successful in the future.
- Batesville's ability to apply proven merchandising principles and proprietary database tools enables it to help customers increase their average mix and drive greater profitability, all while increasing the satisfaction of their clients. Batesville will continue to differentiate itself as a solutions provider. In 2011, it will continue to focus on moving customers up the merchandising ladder, emphasizing the value of using its full system. Fully merchandised accounts continue to have a higher rate of revenue growth, and a higher retention rate.
- The number of casket manufacturers has dwindled over the years, but there are opportunities to capitalize on acquisitions and alliances in other parts of the death care products industry. Batesville will continue to remain alert to these opportunities and capitalize on them when it's prudent to do so.

Grow Profitable New Revenue Streams Within the Death Care Products Industry

- The Options® by Batesville brand has a long history of providing business solutions to our customers and assisting them with meeting the needs of the cremation consumer. In addition to these solutions, which include business analysis merchandising, and training, Options also has the broadest product line in the industry, consisting of cremation caskets, containers, urns, and other cremation memorialization products. We expect continued growth in these product lines as more consumers choose cremation over burial. In fiscal 2011, Batesville plans to implement key actions aimed at improving revenue performance by further implementation of its system, which is designed to improve the frequency of families selecting products and services over direct cremation, additional development of new products, and implementing after-market programs for our funeral home customers to market to consumers.
- Batesville has expanded its position as the largest provider of funeral home websites in North America, a service we believe provides many small, family-owned funeral homes access to resources and capabilities they may not otherwise have or develop on their own. In 2011, Batesville will continue to provide funeral directors with additional ways to generate revenue and connect with consumers for information and

education needs. Batesville Interactive offers integrated online products that include WebLink™, TributeLink™ online videos, and ObitLink™ through its alliance with Legacy.com that gives funeral directors access to the largest networked obituary system in North America. As additional consumers use the internet as their first point of contact when making a purchase decision, Batesville technology offerings help to improve the visibility of the local funeral home to the families they serve.

- Fiscal 2010 was Batesville's fourth full year offering the NorthStar® product line to independent casket distributors. These are private-label burial caskets and because these products do not contain any of the Batesville proprietary features, designs, or specifications, they are differentiated from the premium Batesville brand.
- Batesville will leverage its strong brand and deep sales and service relationships to continue to expand new product and service offerings that complement its core product line. Additional product and service offerings within the death care products industry will enable Batesville to provide an integrated solution to funeral homes, helping them provide quality funerals to consumers and drive improved profitability for their businesses.

Utilize Lean Business Principles As An Integrated Business System To Deliver Operational Efficiencies

- Batesville's highly integrated manufacturing facilities in the U.S. and Mexico utilize "one-piece flow" to manufacture caskets and "pull production" from their stamping and wood processing facilities that feed its high-velocity distribution network with products quickly and efficiently. These processes allow Batesville to carry lower inventory in its distribution network while still meeting the growing demand of its customers. Batesville intends to continue to leverage its processes to allow it to carry lower inventory per sales dollar than its competitors, enabling customers to carry few or no products in their funeral homes, and on average over the past three years, still achieve on-time delivery more than 99% of the time.
- Batesville's effective execution of Hillenbrand Lean Business (derived from the Toyota Production System) improves product quality and customer satisfaction while enabling annual lead time and cost reductions in its operations, distribution and administrative functions.
- Batesville's leadership position as the largest manufacturer and distributor of caskets and containers in North America provides scale and scope that enables it to capitalize on efficiencies and compete with a low cost structure.

K-Tron

Background. K-Tron was acquired by us in April 2010. K-Tron designs, produces, markets, and services material handling equipment and systems for a wide variety of industrial markets, particularly in the plastics, food, chemical, pharmaceutical, power generation, coal mining, pulp and paper, wood and forest products, and biomass energy generation industries. K-Tron serves the bulk solids material handling market, which focuses primarily on feeding, size reduction, conveying, and screening equipment.

Products and Services. K-Tron's products and services for the bulk solids material handling markets are generated within two main business lines: the Process Group and the Size Reduction Group.

Process Group ("PG"). PG designs, produces, markets, sells, and services feeders and pneumatic conveying equipment under two main brands: K-Tron Feeders® and K-Tron Premier®. These can be sold as stand-alone products or as part of engineered systems where one or more feeders are combined with pneumatic conveying and other complementary materials handling equipment. It also designs, produces, markets, and sells a separate line of volumetric and gravimetric feeders, pelletizers, screen changers, pneumatic conveying equipment, and other equipment under the K-Tron Colormax® brand name, specifically targeted at domestic Chinese compounding and injection molding manufacturers.

Feeding equipment controls the flow of materials into a manufacturing process by weight (known as gravimetric feeding) or by volume (known as volumetric feeding) and is used in many different industries, including plastics compounding, base resin production, and food, chemical, and pharmaceutical production.

PG's pneumatic conveying equipment and related systems are used in many of the same industries as the feeders to transport bulk solids from point to point using either negative pressure (known as vacuum conveying) or positive pressure (known as pressure conveying).

Size Reduction Group ("SRG"). SRG designs, manufactures, markets, and sells size reduction equipment that is used to reduce various materials to a smaller size. It has three primary brands that serve a variety of industries. The Pennsylvania Crusher® and Gundlach® brands are used in the power generation industry to crush coal before it is used as fuel in the steam furnaces of coal-fired power plants. These products also serve mining, quarrying, glass making, salt processing, fertilizer manufacturing facilities, and other industrial applications. The Jeffrey Rader® brand includes equipment used in the pulp and paper, wood and forest, and biomass industries.

Several key products include hammer mills, which crush materials by impact from hammers and then scrub the materials against a screen for desired size; double roll crushers, which break material by compression; a variety of wood and bark hogs, chip sizers, screening equipment, pneumatic and mechanical conveying systems; and storage/reclaim systems. SRG also offers specialty crushers and other equipment, such as the Accu-Grind®, a small crusher designed for sampling applications and the Nanosiz-R®, which provides fine grinding for the mineral industry.

A significant portion of K-Tron's revenue is derived from the sale of replacement parts. SRG has a large installed base of long-lived equipment, and every machine and part sold, including specifications and drawings, is registered in a digital database to provide customers with fast and efficient support.

We aggregate the financial results of PG and SRG into a single reportable segment due to the similarities of these business lines.

Sales, Distribution and Operations. K-Tron sells its material handling equipment and systems throughout the world to a wide variety of industrial and engineering customers using a combination of a direct sales force and a global network of independent sales representatives and distributors.

K-Tron has contracts with its independent sales representatives and distributors that provide for specific commissions or in situations where a representative is acting as a distributor, net transaction prices, depending on the type of product sold. Discounting below its target margins is uncommon, but when it occurs, K-Tron's representative may be asked to share the cost and the distributor may receive a lower transaction price from K-Tron.

Due to the nature of K-Tron's business, orders are often unique, built-to-order items. Therefore, K-Tron does not typically maintain significant amounts of raw material and component stock inventory on hand at any one time, except to cover replacement parts orders. Products are generally assembled and tested at K-Tron facilities and then shipped to a customer's desired location.

K-Tron conducts its manufacturing operations in seven manufacturing facilities located in the U.S., Switzerland, and the People's Republic of China ("China") and also maintains foreign sales offices and service centers in the United Kingdom, Sweden, France, Germany, Canada, and Singapore. Over the past three years, K-Tron's export revenues have accounted for approximately one-third of its net revenues.

Similar to Batesville, K-Tron foreign operations are subject to risks inherent in doing business in foreign countries. For K-Tron, its risks are primarily related to euro-denominated sales and manufacturing activities in Switzerland and manufacturing activities in China. To the extent it receives revenue from U.S. or Swiss export sales in currencies other than U.S. dollars or Swiss francs, the value of assets and income could be, and in the past have been, adversely affected by fluctuations in the value of local currencies.

Quantitative information about foreign operations is set forth in tables relating to geographic information in Note 15 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Demographics and Customer Preferences. K-Tron's customers exist in multiple industries, including the plastics, food, chemical, pharmaceutical, power generation, coal mining, pulp and paper, wood and forest products, and biomass energy generation industries. These customers range from large, global companies to regional and local businesses, none of which accounted for more than 10% of K-Tron's consolidated net revenues during the six months ended September 30, 2010.

As an industrial capital goods supplier, many of the markets for K-Tron's products are cyclical, and for the past several years domestic capital equipment purchases have been in decline due in part to lower demand for power and a weak economy. However, capital equipment orders for export (particularly to China and Asia) have been strong due to demand for increased power production and economic growth. During periods of economic expansion, when capital spending normally increases, K-Tron generally benefits from greater demand for its products. During periods of economic contraction, such as the recent global recession, when capital spending normally decreases, K-Tron generally is adversely affected by declining demand for its products. More recently, we are seeing modest signs of increased economic activity.

Competition. We believe K-Tron has a superior reputation and holds leading positions in key industries because of the design and quality of its products, years of experience, and its commitment to serving the needs of its customers. In other areas of the business, such as digital control and digital weighing technologies, we believe K-Tron's engineering capability and integration of technology allows it to maintain an advantage over the competition in these areas.

In the bulk solids market, strong competition exists in every market K-Tron serves, and its competitors range in size from small, privately held companies serving narrow markets or geographical areas to large, well-known companies, such as Schenck Process GmbH, serving national and international markets with multiple product lines. As a capital goods supplier, we believe K-Tron's

strong base of replacement parts business and K-Tron's worldwide network of suppliers and dealers allows K-Tron to maintain strong margins even during economic downturns.

Raw and Component Materials. The manufacturing of K-Tron products involves the machining and welding of raw materials (primarily sheet metals and steel) and castings into machined parts. These parts are then combined and assembled with other component parts purchased from its third-party vendors into finished goods. Although most of these raw materials and components are generally available from several sources, some of these items are currently purchased from sole sources. K-Tron has not experienced any significant production delay that was primarily attributable to an outside supplier.

Patents and Trademarks. K-Tron, like Batesville, owns a number of patents on its products and manufacturing processes that are deemed to be important, but not materially significant to its business as a whole. In addition, K-Tron owns a number of trademarks that are important to its business, most notably the Pennsylvania Crusher®, Gundlach®, Jeffrey Rader®, and the K-Tron Premier®, Feeder®, Electronics®, and Colormax® brands. Depending on the jurisdiction, trademarks are generally valid as long as they are in use and/or their registrations are properly maintained.

K-Tron's patents, trademarks and intellectual property are subject to the same business risks as described earlier for Batesville.

Employees. At the end of fiscal 2010, K-Tron had approximately 650 employees, of which approximately 430 were located in the U.S., 150 in Europe, and 70 in China and other foreign locations. None of its employees are represented by labor unions, and we consider relations with these employees to be good.

Strategy. As the capital equipment markets are recovering from the global recession of the past two years, there continues to be significant opportunities for K-Tron's products and services both domestically and internationally. Leadership of K-Tron is focusing on the following strategic initiatives to drive organic growth as well as growth through acquisitions:

Profitably Grow Top Line Revenues In Our Core K-Tron Business Lines

- K-Tron is widely recognized as a leader for material handling equipment, systems, and services in a wide range of process industries. To enhance that leadership position K-Tron will continue to invest in key areas, particularly new product development, systems engineering, and human resources to maintain and extend its technological leadership. K-Tron plans to promote its capabilities as a total solutions provider to capture a larger share of existing customers' capital investments in material handling systems.

- K-Tron provides niche products and services that have significant market presence in the North American coal-fired power, coal mining, fertilizer and mineral extraction, and biomass energy industries. These products have significant sales potential in other areas of the world, and as such, K-Tron will initiate more aggressive sales and marketing initiatives for these products and services in targeted markets outside its current base of business.
- K-Tron serves its existing customers through a well-established distribution and service organization that spans the globe. It will continue to expand its global leadership by dedicating resources to the expansion of its distribution network into new and developing high-growth potential geographic markets and industries that are less prone to cyclical swings.
- The strategy of increasing its worldwide capabilities requires K-Tron to evaluate its current branding strategy as part of a goal to present a unified and consistent message to global target markets in the new fiscal year. K-Tron's commitment to efficient delivery of technological capabilities around the world will be supported by ongoing and new investment in strategically placed manufacturing, sales and service support capabilities, and testing facilities.
- K-Tron is dedicating human resources to the development of centralized market intelligence systems. Management believes that gathering, analyzing, and reporting market information and leading economic indicators will facilitate early detection of technology and market trends, which in turn will help K-Tron to maintain and expand its leadership position in the industries it serves across the globe.

Continue Growth Through Acquisitions

- The material handling equipment manufacturing industry is very fragmented both in terms of product offering and geographic reach, whereas many customers operate on a global basis. K-Tron will continue to search for add-on acquisition opportunities that will allow it to expand its product offering with complementary products and to sell these products through its global distribution network. This will position K-Tron to offer its global customers standardized solutions for use in their worldwide facilities and will also position it as the local supplier of choice for national and regional customers.
- Consistent with the strategy of globalization, K-Tron will continue to look for acquisitions that either expand its international footprint outside the U.S. or accelerate the execution of its strategy to build a leadership position in material handling systems to targeted industries.

Utilize Lean Business Principles to Increase Profit Margins

- K-Tron has started to implement the Hillenbrand Lean Business Principles at select engineering and manufacturing facilities in order to improve efficiencies and reduce costs in operations, distributions, and administrative functions.
- K-Tron is dedicating financial and human resources to create a globally standardized and integrated business processes which maximize efficiencies in its product design, manufacturing, sales, and services functions.

Other

Regulatory Matters. Both Batesville and K-Tron are subject to a variety of federal, state, local, and foreign laws and regulations relating to environmental, health, and safety concerns, including the handling, storage, discharge, and disposal of hazardous materials used in or derived from our manufacturing processes. We are committed to operating all of our businesses in a manner that protects the environment. In the past, we have voluntarily entered into remediation agreements with various environmental authorities to address onsite and offsite environmental impacts. From time to time we provide for reserves in our financial statements for environmental matters. We believe we have appropriately satisfied the financial responsibilities for all currently known offsite issues. Based on the nature and volume of materials involved regarding onsite impacts, we do not expect our cost for the onsite remediation activities in which we are currently involved to exceed \$0.5 million in the future. Future events or changes in existing laws and regulations or their interpretation may require us to make additional expenditures in the future. The cost or need for any such additional expenditure is not known.

Executive Officers of the Registrant

Our Board of Directors is responsible for electing the Company's executive officers annually and from time to time as necessary. Executive officers serve in the ensuing year and until their respective successors are elected and qualified. Except for Board members Gus Hillenbrand and Tom Johnson, who are first cousins to Ray Hillenbrand, there are no other family relationships between any of our executive officers or between any of them and any members of the Board of Directors. The following is a list of our executive officers as of November 15, 2010.

Kenneth A. Camp, 65, was elected President and Chief Executive Officer of Hillenbrand effective February 8, 2008. Mr. Camp was also elected as a board member on that same date. Prior to his appointment as President and Chief Executive Officer of Hillenbrand, Mr. Camp had served as President and Chief

Executive Officer of Batesville since May 1, 2001. Mr. Camp currently serves as Chairman and Chief Executive Officer of K-Tron International following the acquisition on April 1, 2010. He was elected Senior Vice President of our Former Parent on October 1, 2006, having been a Vice President of that company since October 8, 2001. He was employed by our Former Parent from 1981 until the separation on March 31, 2008. Mr. Camp previously held the position of Vice President of Administration of our Former Parent from 2000 to 2001. Prior to that assignment, he held various positions at Batesville, including Vice President/General Manager of Operations from 1995 to 2000; Vice President, Sales and Service; Vice President, Marketing; and Vice President, Strategic Planning.

Cynthia L. Lucchese, 50, was elected Senior Vice President and Chief Financial Officer of Hillenbrand effective February 8, 2008. From 2005 to 2007, she served as Senior Vice President and Chief Financial Officer for Thoratec Corporation. Prior to that, she worked 10 years for Guidant Corporation, now a part of Boston Scientific Corporation, in a variety of senior finance roles, including Vice President and Treasurer, Corporate Controller and Chief Accounting Officer, and Vice President of Finance and Administration of the Guidant Sales Corporation. Ms. Lucchese was also previously employed by Eli Lilly and Company and Ernst & Young LLP.

Joe A. Raver, 44, was elected President and Chief Operating Officer of Batesville, effective June 16, 2008, and Senior Vice President of Hillenbrand on July 15, 2008. Prior to his appointment as an officer of Batesville and Hillenbrand, Mr. Raver served as Vice President and General Manager of the Respiratory Care Division of Hill-Rom, a leading global provider of medical equipment and services. He joined Hill-Rom in 2004 as Vice President of Strategy and Shared Services. Prior to joining Hill-Rom, Mr. Raver spent 10 years in a variety of leadership positions at Batesville and Hill-Rom, including being appointed Vice President of Strategy in 2001 and Vice President of Logistics at Batesville in 2002.

Kevin C. Bowen, 59, was appointed President of the K-Tron Process Group, following K-Tron's acquisition on April 1, 2010. Prior to the acquisition of K-Tron, Mr. Bowen had served as Senior Vice President, Process Group, since July 2005 and as President and Chief Executive Officer of K-Tron America, Inc. (a subsidiary of K-Tron International, Inc.) since March 1995. Mr. Bowen began his career with K-Tron in 1979, and has held a variety of other senior leadership positions with the Company.

Donald W. Melchiorre, 62, was appointed President of the K-Tron Size Reduction Group, following K-Tron's acquisition on April 1, 2010. Prior to the acquisition of K-Tron, Mr. Melchiorre had served as Senior Vice President, Size Reduction Group, since May 2006 and as President and Chief Executive Officer of Pennsylvania Crusher Corporation (a subsidiary of K-Tron International, Inc.)

since October 2004. Mr. Melchiorre has approximately 24 years with K-Tron serving in a variety of senior management positions and roles.

John R. Zerkle, 56, was elected Senior Vice President, General Counsel, and Secretary of Hillenbrand effective February 8, 2008. Most recently, Mr. Zerkle had served as Vice President and General Counsel of Batesville since March 2004. From September 2002 to February 2004, Mr. Zerkle served as Vice President and General Counsel of Forethought Financial Services, Inc., then a subsidiary of Hill-Rom. He also served as Compliance Officer for Forethought Investment Management, Inc. Prior to joining Forethought, Mr. Zerkle was in private practice for 20 years, where he focused his practice on corporate, securities, regulatory, and banking law matters.

Paul Douglas Wilson, 58, was elected Senior Vice President, Human Resources, of Hillenbrand effective March 14, 2008. Most recently, Mr. Wilson served as Vice President, Worldwide Merger Integration, for Boston Scientific Corporation, following the close of the merger between Boston Scientific and Guidant Corporation in 2006. Mr. Wilson joined Guidant Corporation in 2002 and served as Vice President of Human Resources. Prior to Guidant, Mr. Wilson was President and a Principal of Ronald Blue & Co., a privately held firm providing financial planning, investment management, tax planning, and philanthropic counsel. Mr. Wilson began his career with Eli Lilly and Company, where he spent 20 years in a variety of increasingly senior executive human resource roles.

Hinesh B. Patel, 42, was elected Vice President, Strategy and Business Development, of Hillenbrand effective August 18, 2008. Prior to accepting his current position with Hillenbrand, Mr. Patel served as Director of Strategy and Business Development for Honeywell International Inc., a position he had held since April 2007. Prior to joining Honeywell International Inc., Mr. Patel held other management roles in business development, strategy, and operations with Milliken & Company, Caspian Networks Inc., Eaton Corporation, and Arthur D. Little.

Lukas Guenthardt, 52, was appointed Senior Vice President, Corporate Development and Secretary, of K-Tron International, Inc., following K-Tron's acquisition on April 1, 2010. Prior to the acquisition of K-Tron, Mr. Guenthardt had served as Senior Vice President, Corporate Development, of K-Tron International, Inc. since July 2005. Prior to that, he was Senior Vice President, Pneumatic Conveying Group, and Chief Strategy Officer of K-Tron from February 2002 to July 2005; Senior Vice President, New Businesses, and Chief Strategy Officer from June 2000 to February 2002. Mr. Guenthardt has approximately 18 years with K-Tron serving in other management roles, including Director of International Research and Development.

Jan M. Santerre, 49, was elected Vice President, Lean Business, of Hillenbrand effective December 1, 2008. Prior to accepting her position with Hillenbrand, Ms. Santerre served as Vice President of Operations, Hydraulics Group, for Parker Hannifin Corporation, a position she had held since April 2005. From 2003 to 2005, Ms. Santerre served as Parker Hannifin's Vice President of Lean Enterprise and Quality, where she developed and deployed the Parker Lean System. Prior to that, Ms. Santerre was with Delphi Automotive Systems and General Motors for 18 years with responsibilities in engineering, quality, and manufacturing, culminating in executive operations roles.

Theodore S. Haddad, Jr., 46, was elected Vice President, Controller and Chief Accounting Officer of Hillenbrand on February 8, 2008. Prior to joining Hillenbrand, Mr. Haddad had served as Senior Manager in the Audit and Business Advisory Services Group of PricewaterhouseCoopers LLP since July 2002. Prior to that, Mr. Haddad served as a Senior Manager in the audit group of Arthur Andersen LLP, having been with that firm since July 1991. Mr. Haddad is a Certified Public Accountant and Certified Management Accountant.

ITEM 1A. RISK FACTORS

In this section of the Form 10-K, we describe the risks we believe are most important for you to think about when you consider investing in, selling, or owning our stock or publicly traded debt. This information should be assessed along with the other information we provide you in this Form 10-K. Like most companies, our business involves risks. The risks described below are not the only risks we face, but these are the ones we currently think have the potential to significantly affect stakeholders in our Company if they were to develop adversely (due to size, volatility, or both). We exclude risks that we believe are inherent in all businesses broadly as a function of simply being "in business." Additional risks not currently known or considered immaterial by us at this time and thus not listed below could also result in adverse effects on our business. In the risk descriptions below, we have assigned the risks into categories to help you understand where they emanate from (e.g. the overall company or a specific segment).

RISK RELATED TO OUR OVERALL COMPANY

Our growth strategy involves the potential for significant acquisitions, some of which may be outside our current industry. We may not be able to achieve some or all of the benefits that we expect to achieve from these acquisitions. If an acquisition were to perform unfavorably, it could have an adverse impact on our value.

One component of our strategy contemplates our making acquisitions. All acquisitions involve inherent uncertainties, some of which include, among other things, our ability to:

- successfully identify targets for acquisition,

- negotiate reasonable terms for any particular deal,
- properly perform due diligence and determine all the significant risks associated with a particular acquisition,
- properly evaluate target company management capabilities, and
- successfully transition the acquired company into our business and achieve the desired performance.

We also may acquire businesses with unknown or contingent liabilities, including liabilities for failure to comply with potential industry or environmental regulations or tax contingencies. We have plans and procedures to conduct reviews of potential acquisition candidates for compliance with applicable regulations and laws prior to the acquisition and will also generally seek indemnification from sellers covering these matters. Despite these efforts, we may incur material liabilities for past activities of acquired businesses.

In the event that we acquire a business that operates outside of our current industries, we may not achieve the intended benefits of the acquisition and our business could be materially impacted. Under such circumstances, management could be required to spend significant amounts of time and resources in the transition of the business of the acquired entity due to the lack of experience in the industry of the acquired business. In addition, any benefits we anticipate from application of our lean manufacturing and lean business expertise may not be fully realized. Also, if we acquire a company that operates in an industry that is different from the ones in which we operate, our lack of experience with that company's industry could have a material adverse impact on our ability to manage that business and realize the benefits of that acquisition.

Global market and economic conditions, including those related to the credit markets, could have a material adverse effect on our business, financial condition, and results of operations.

The severity of the recent economic recession caused by the ongoing worldwide financial and credit market disruptions have reduced the availability of credit generally necessary to fund economic growth and activity, and there is not yet clear evidence to suggest that efforts undertaken by the various government entities to mitigate this recession will be successful.

A prolonged or double-dip recession could adversely affect our business in several ways. A continuation or worsening of the current credit markets and economic conditions could adversely affect our customers' ability to obtain sufficient credit or pay for our products within the terms of sale and, as a result, our reserves for doubtful accounts and receivable write-offs could increase. A prolonged recession could further intensify the competition among the manufacturers and distributors with whom we compete for volume and market share, resulting in lower net revenues

due to steeper discounts and further product mix-down. If certain key or sole suppliers were to become capacity constrained or insolvent as a result of the global economic conditions, it could result in a reduction or interruption in supplies or a significant increase in the price of supplies. In addition, the substantial losses in the equity markets as a result of the recent recession can have an adverse effect on the assets of the Company's pension plans. A continuation of the volatility of interest rates and negative equity returns under current market conditions could require greater contributions to the defined benefit plans in the future.

Our sales abroad subject us to the risk of adverse foreign currency fluctuations which could negatively impact our results of operations.

We derived approximately 11.6%, 6.6% and 7.2% of our revenues from outside the U.S. for the years ended September 30, 2010, 2009, and 2008, respectively. Historically, these revenues have primarily been in Canada. With our recent acquisition of K-Tron in April 2010, significant international sales are now coming from Europe, the Middle East, and Asia. As a result, we believe our exposure to fluctuations in exchange rates will increase proportionately and can have an unfavorable effect on our operating results, depending on the extent of that volatility. This exposure is most acute where we enter into sales contracts in currencies different from the currency in which we incur our costs (particularly the euro, where our costs are incurred in Swiss francs). Also, since the results of operations of our foreign subsidiaries are translated into U.S. dollars, fluctuations in the exchange rate of the U.S. dollar versus each of the Swiss franc, the euro, the British pound sterling, the Canadian dollar, and the Swedish krona will affect the U.S. dollar amount of their operating results. Finally, we are exposed to foreign currency transactional gains and losses caused by the "marking to market" of balance sheet items of our foreign subsidiaries, which are measured in other currencies, particularly the euro on the balance sheet of our Swiss subsidiary.

Increased prices for, or unavailability of, raw materials used in our products could adversely affect profitability. In particular, our results of operations continue to be adversely affected by volatile prices for steel, red metals (i.e. copper and bronze), and fuel.

Our profitability is affected by the prices of the raw materials used in the manufacture of our products. These prices fluctuate based on a number of factors beyond our control, including changes in supply and demand, general economic conditions, labor costs, fuel-related delivery costs, competition, import duties, tariffs, currency exchange rates, and, in some cases, government regulation. Significant increases in the prices of raw materials that cannot be recovered through increases in the price of our products could adversely affect our results of operations and cash flows.

We cannot guarantee that the prices we are paying for commodities today will continue in the future or that the marketplace will continue to support current prices for our products or that such prices can be adjusted to fully offset such commodity price increases in the future. Any increases in prices resulting from a tightening supply of these or other commodities or fuel could adversely affect our profitability. We generally do not engage in hedging transactions with respect to raw material purchases, but we do enter into some fixed price supply contracts.

Our dependency upon regular deliveries of supplies from particular suppliers means that interruptions or stoppages in such deliveries could adversely affect our operations until arrangements with alternate suppliers could be made. Several of the raw materials used in the manufacture of our products currently are procured from only a single source. If any of these sole-source suppliers were unable to deliver these materials for an extended period of time as a result of financial difficulties, catastrophic events affecting their facilities, or other factors, or if we were unable to negotiate acceptable terms for the supply of materials with these sole-source suppliers, our business could suffer. We may not be able to find acceptable alternatives, and any such alternatives could result in increased costs. Extended unavailability of a necessary raw material could cause us to cease manufacturing one or more products for a period of time.

Collection risk associated with our note receivable from Forethought Financial Group, Inc. ("Forethought") could have a material adverse impact on our earnings.

We hold a significant non-operating asset in the form of a note receivable (and related interest receivable) from Forethought. This asset was transferred to us at the time of separation of Hillenbrand Industries, Inc. into two separate publicly traded companies, Hillenbrand and Hill-Rom. As of September 30, 2010, this note receivable had an aggregate carrying value of \$144.8 million. This note receivable primarily represents seller-provided financing to Forethought, the entity that purchased Hill-Rom's former Forethought Financial Services, Inc. subsidiary. Forethought, through its subsidiaries, provides insurance and financial solutions for families managing retirement and end-of-life needs.

Should Forethought fail to perform consistently with the original expectations set forth by Forethought or underperform to an extent that it cannot meet its financial obligations, the note could become impaired, causing an impairment charge that could result in a material adverse impact on our financial condition and results of operations. Payments under the note are due in annual \$10 million installments beginning on July 1, 2010, through July 1, 2014, at which time the balance of the note is due and payable (unless otherwise deferred in accordance with its terms).

Volatility in our investment portfolio could negatively impact earnings as their performance is tied to market swings. Also, if we are unable to convert our portfolio of auction rate securities to cash at reasonable terms, our earnings could be adversely affected.

In connection with our separation from Hill-Rom, ownership in certain investments in private partnerships were transferred to us that had an aggregate carrying value of \$15.2 million as of September 30, 2010. Volatility in that investment portfolio negatively or positively impacts earnings. These investments could be adversely affected by general economic conditions, changes in interest rates, equity market swings, and other factors, resulting in an adverse impact on our results from operations.

In addition, we received a portfolio of auction rate securities (“ARS”) (consisting of highly rated tax-exempt state and municipal securities, the majority of which are collateralized by student loans guaranteed by the U.S. government under the Federal Family Education Loan Program) that Hill-Rom was not able to liquidate prior to the separation due to the market conditions and auction failures. The ARS had an aggregate carrying value of \$11.9 million as of September 30, 2010. If conditions do not improve or worsen, we may not be able to convert these securities to cash for the foreseeable future and these assets could become impaired and could adversely affect our earnings.

We are involved on an ongoing basis in claims, lawsuits, and governmental proceedings relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters.

The ultimate outcome of these claims, lawsuits, and governmental proceedings cannot be predicted with certainty, but could have a material adverse effect on our financial condition, results of operations, and cash flow. We are also involved in other possible claims, including product and general liability, workers compensation, auto liability, and employment-related matters. While we maintain insurance for certain of these exposures, the policies in place are high-deductible policies resulting in our assuming exposure for a layer of coverage with respect to such claims. For a more detailed discussion of our asserted claims, see Note 12 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Upon closing of the K-Tron acquisition, we increased our debt obligations significantly. This could adversely affect our Company and limit our ability to respond to changes in our businesses.

As of September 30, 2010, our outstanding debt was \$403.4 million. This level of debt could have important consequences to our businesses. For example:

- we may be more vulnerable to general adverse economic and industry conditions because we have significantly lower borrowing capacity;

- we will be required to dedicate a larger portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow for other purposes, including business development efforts and acquisitions;
- we will continue to be exposed to the risk of increased interest rates because a portion of our borrowings is at variable rates of interest; and
- our flexibility in planning for, or reacting to, changes in our businesses and the industries in which they operate may be more limited, thereby placing us at a competitive disadvantage compared to competitors that have less indebtedness.

Risk Related to Batesville

Continued fluctuations in mortality rates and increased cremations may adversely affect, as they have in recent years, the sales volume of our burial caskets.

The life expectancy of U.S. citizens has increased steadily since the 1950s and is expected to continue to do so for the foreseeable future. As the population of the U.S. continues to age, we anticipate the number of deaths in the U.S. will be relatively flat until the number of deaths increase due to aging baby boomers.

Cremations as a percentage of total U.S. deaths have increased steadily since the 1960s and are also expected to continue to increase for the foreseeable future. Therefore, the number of cremations in the U.S. is gradually and steadily increasing, resulting in a contraction in the demand for burial caskets. This was a contributing factor to lower burial casket sales volumes for Batesville in each of the last three fiscal years. We expect these trends to continue into the foreseeable future, and its burial casket volumes will likely continue to be negatively impacted by these market conditions.

Finally, the number of deaths can vary over short periods of time and among different geographical areas, due to a variety of other factors, including the timing and severity of seasonal outbreaks of illnesses such as pneumonia and influenza. Such variations could cause the sale of burial caskets to fluctuate from quarter to quarter and year to year.

Batesville's business is significantly dependent on several major contracts with large national funeral providers. The relationships with these customers pose several risks.

Batesville has contracts with a number of large national funeral home customers that comprise a sizeable portion of its overall sales volume. The largest contract is with Service Corporation International, which accounted for approximately 13% of Batesville's 2010 consolidated net revenues (and was their only customer over 10%). Any decision by large national funeral home customers to discontinue purchases from Batesville could have

a material adverse effect on our financial condition, results of operations, and cash flows. Also, while contracts with large national funeral service providers give Batesville important access to many of the largest purchasers of funeral service products, they may obligate Batesville to sell products at contracted prices for extended periods of time, therefore limiting Batesville's ability, in the short term, to raise prices in response to significant increases in raw material prices or other factors.

Batesville is facing competition from a number of non-traditional sources and caskets manufactured abroad and imported into North America.

Non-traditional funeral product providers could present more of a competitive threat to Batesville and its sales channel than is currently anticipated. Large discount retailers (such as Wal-Mart and Costco), casket stores, and internet casket retailers represent these types of competitors. Also, there are several manufacturers located in China producing caskets for sale into the U.S. While sales from these providers are currently a small percentage of total casket sales in the U.S. (we believe approximately 3%), it is not possible to quantify the financial impact that these competitors will have on Batesville in the future. These competitors and any new entrants into the market may drive pricing and other competitive actions in an industry that already has nearly twice the necessary domestic production capacity. Such competitive actions could have a negative impact on our results of operations and cash flows.

Despite our recent successes in court, the antitrust litigation in which we are a defendant has not yet been resolved, and an adverse outcome in that matter could have a material adverse effect on our results of operations, financial position, and liquidity.

As discussed in Note 12 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K, we are a defendant in a purported antitrust class action lawsuit. The Federal District Court denied class certification in that matter, and the Fifth Circuit denied the plaintiffs' appeal petition. Further requests for reconsideration by the plaintiffs have also been denied. Despite these favorable rulings, the plaintiffs pursued their individual injunctive and damage claims. The District Court issued a final judgment dismissing the case, but the plaintiffs have filed an appeal, which could include an appeal of the District Court's order denying class certification. If they succeed in reversing the District Court order denying class certification and a class is certified in the action filed against Hill-Rom and Batesville and if the plaintiffs prevail at a trial of the class action, the damages awarded to the plaintiffs, which would be trebled as a matter of law, could have a significant material adverse effect on our results of operations, financial condition, and/or liquidity. In antitrust

actions, the plaintiffs may elect to enforce any judgment against any or all of the codefendants, who have no statutory contribution rights against each other.

A substantial portion of Batesville's workforce is unionized, and it could face labor disruptions that would interfere with operations.

Approximately 33% of Batesville's employees as part of our logistics and manufacturing operations work under collective bargaining agreements. Although Batesville has not experienced any significant work stoppages in the past 20 years as a result of labor disagreements, we cannot ensure that such a stoppage will not occur in the future. Inability to negotiate satisfactory new agreements or a labor disturbance at one of the principal facilities could have a material adverse effect on our operations.

Risk Related to K-Tron

A significant portion of our investment in K-Tron includes goodwill and intangible assets that are subject to periodic impairment evaluations. An impairment loss on these could have a material adverse impact on our financial condition and results of operations.

We acquired \$404.5 million of intangible assets with the acquisition of K-Tron, of which \$236.4 million was identified as either goodwill or indefinite-lived assets. As required by current accounting standards, we review intangible assets for impairment either annually or whenever changes in circumstances indicate that the carrying value may not be recoverable.

During the early years of an acquisition, the risk of impairment to goodwill and non-amortizing intangible assets is naturally higher. This is because the fair values of these assets align very closely with what we recently paid to acquire the reporting units to which these assets are assigned. This means the difference between the carrying value of the reporting unit and its fair value (typically referred to as "headroom") is naturally smaller at the time of acquisition. Until this headroom grows over time (due to business growth or lower carrying value of the reporting unit due to natural amortization, etc.), a relatively small decrease in reporting unit fair value can trigger an impairment. That fair value is affected by actual business performance but is also determined by the market (usually reflected in the value of our common stock). As a consequence, even with favorable business performance, the market alone can drive an impairment condition if general business valuations decline enough. When impairment charges are triggered, they tend to be material due to the sheer size of the assets involved. Our next annual test of these assets for K-Tron is scheduled for April 1, 2011.

K-Tron operates in cyclical industries.

As an industrial capital goods supplier, many of the markets for K-Tron's products are cyclical. During periods of economic expansion, when capital spending normally increases, K-Tron generally benefits from greater demand for its products. During periods of economic contraction, when capital spending normally decreases, K-Tron generally is adversely affected by declining demand for its products, and it may be subject to uncollectible receivables from customers who become insolvent. Also, even when there is economic expansion or increased demand for our equipment, there can be no assurance that this economic expansion or increased demand will be sustained in the markets in which we sell its products.

K-Tron derives a substantial portion of its sales from the electric generating and coal mining industries. Any downturn in the demand for electricity or downturn in or disruption to the coal industry as a result of increased environmental laws and regulations could have a material adverse effect on our business, financial condition, and results of operations.

K-Tron sells size reduction equipment to the electric generating and coal mining industries, and consequently a significant portion of its sales are tied to the use of coal as a means of generating electricity. The demand by electric generating utilities for coal is dependent upon the availability and cost in any given location of alternative sources of energy, such as natural gas, oil, or nuclear power. As a result, any downturn in the demand for electricity, or downturn in or disruption to the coal industry (upon which electric utilities are dependent), could have a material adverse effect on our business, financial condition, and results of operation.

Federal, state, and local laws and regulations extensively regulate the amount of sulfur dioxide, particulate matter, nitrogen oxides, mercury, and other compounds emitted into the air from electric power plants, whose owners are principal customers of our size reduction business. These laws and regulations can require significant emission control expenditures for many coal-fired power plants, and various new and proposed laws and regulations may require further emission reductions and associated emission control expenditures. There is also continuing pressure on state and federal regulators to impose limits on carbon dioxide emissions from coal-fired power plants. As a result, the cost of compliance could cause electric utilities to abandon the process of using coal to generate electricity altogether due to commercial impracticability and decreasing the demand for our products.

Risk Related to Our Common Stock

Provisions in our Articles of Incorporation and By-laws and of Indiana law may prevent or delay an acquisition of our company, which could decrease the trading price of our common stock.

Our Articles of Incorporation, By-laws, and Indiana law contain provisions that could delay or prevent changes in control if our Board of Directors determines that such changes in control are not in the best interests of our shareholders. While these provisions have the effect of encouraging persons seeking to acquire control of our company to negotiate with our Board of Directors, they could enable our Board of Directors to hinder or frustrate a transaction that some, or a majority, of our shareholders might believe to be in their best interests.

These provisions include, among others:

- the division of our Board of Directors into three classes with staggered terms;
- the inability of our shareholders to act by less than unanimous written consent;
- rules regarding how shareholders may present proposals or nominate directors for election at shareholder meetings;
- the right of our Board of Directors to issue preferred stock without shareholder approval; and
- limitations on the right of shareholders to remove directors.

Indiana law also imposes some restrictions on mergers and other business combinations between us and any holder of 10% or more of our outstanding common stock, as well as on certain "control share" acquisitions.

We believe these provisions are important for a public company and protect our shareholders from coercive or otherwise potentially unfair takeover tactics by requiring potential acquirers to negotiate with our Board of Directors and by providing our Board of Directors with more time to assess any acquisition proposal. These provisions are not intended to make our company immune from takeovers. However, these provisions apply even if the offer may be considered beneficial by some shareholders and could delay or prevent an acquisition that our Board of Directors determines is not in the best interests of our shareholders.

ITEM 1B. UNRESOLVED STAFF COMMENTS

We have not received any comments from the staff of the SEC regarding our periodic or current reports that remain unresolved.

ITEM 2. PROPERTIES

The principal properties used in our operations are listed below. All facilities are suitable for their intended purpose, are being efficiently utilized, and are believed to provide adequate capacity to meet demand for the next several years.

Location	Owned/Leased	Entity	Description	Primary use
Batesville, Indiana	Owned	Hillenbrand and Batesville	Office facilities Manufacturing plants	Administration Manufacturing metal caskets
Manchester, Tennessee	Owned	Batesville	Manufacturing plant	Manufacturing metal caskets
Vicksburg, Mississippi	Owned	Batesville	Kiln drying and lumber cutting plant	Drying and dimensioning of lumber
Batesville, Mississippi	Owned	Batesville	Manufacturing plant	Manufacturing of hardwood caskets
Chihuahua, Mexico	Leased	Batesville	Manufacturing plant	Manufacturing of veneer hardwood and hardwood caskets

In addition to the foregoing, we lease or own a number of other warehouse distribution centers, service centers, and sales offices throughout the U.S., United Kingdom, Mexico, Canada, Sweden, France, Germany, and Singapore.

ITEM 3. LEGAL PROCEEDINGS

Antitrust Litigation

In 2005 the Funeral Consumers Alliance, Inc. (“FCA”) and a number of individual consumer casket purchasers filed a purported class action antitrust lawsuit on behalf of certain consumer purchasers of Batesville® caskets against the Company and our former parent company, Hillenbrand Industries, Inc., now Hill-Rom Holdings, Inc. (“Hill-Rom”), and three national funeral home businesses (the “FCA Action”). A similar purported antitrust class action lawsuit was later filed by Pioneer Valley Casket Co. and several so-called “independent casket distributors” on behalf of casket sellers who were unaffiliated with any licensed

funeral home (the “Pioneer Valley Action”). Class certification hearings in the FCA Action and the Pioneer Valley Action were held before a Magistrate Judge in early December 2006. On November 24, 2008, the Magistrate Judge recommended that the plaintiffs’ motions for class certification in both cases be denied. On March 26, 2009, the District Judge adopted the memoranda and recommendations of the Magistrate Judge and denied class certification in both cases. On April 9, 2009, the plaintiffs in the FCA case filed a petition with the U.S. Court of Appeals for the Fifth Circuit for leave to file an appeal of the Court’s order denying class certification. On June 19, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs’ petition. On July 9, 2009, the FCA plaintiffs filed a request for reconsideration of the denial of their petition. On July 29, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs’ motion for reconsideration and their alternative motion for leave to file a petition for rehearing en banc (by all of the judges sitting on the Fifth Circuit Court of Appeals).

The Pioneer Valley plaintiffs did not appeal the District Court's order denying class certification, and on April 29, 2009, pursuant to a stipulation among the parties, the District Court dismissed the Pioneer Valley Action with prejudice (i.e., Pioneer Valley cannot appeal or otherwise reinstitute the case). Neither the Company nor Hill-Rom provided any payment or consideration for the plaintiffs to dismiss this case, other than agreeing to bear their own costs, rather than pursuing plaintiffs for costs.

Plaintiffs in the FCA Action have generally sought monetary damages on behalf of a class, trebling of any such damages that may be awarded, recovery of attorneys' fees and costs, and injunctive relief. The plaintiffs in the FCA Action filed a report indicating that they were seeking damages ranging from approximately \$947.0 million to approximately \$1.46 billion before trebling on behalf of the purported class of consumers they seek to represent, based on approximately one million casket purchases by the purported class members.

Because Batesville continues to adhere to its long-standing policy of selling Batesville caskets only to licensed funeral homes, a policy that it continues to believe is appropriate and lawful, if the case goes to trial the plaintiffs are likely to claim additional alleged damages for periods between their reports and the time of trial. At this point, it is not possible to estimate the amount of any additional alleged damage claims that they may make. The defendants are vigorously contesting both liability and the plaintiffs' damages theories.

Despite the July 29, 2009 ruling denying class certification, the FCA plaintiffs continued to pursue their individual injunctive and damages claims. Their individual damages claims are limited to the alleged overcharges on the plaintiffs' individual casket purchases (the complaint currently alleges a total of eight casket purchases by the individual plaintiffs), which would be trebled, plus reasonable attorneys fees and costs.

In June 2010, co-defendant Stewart Enterprises, Inc. announced a settlement with the plaintiffs. On July 16, 2010, the District Court granted the defendants' remaining motion for leave to file a motion to dismiss for lack of subject matter jurisdiction. On August 2, 2010, the District Court heard argument on the defendants' motion to dismiss for lack of subject matter jurisdiction. The Court ordered full dismissal of the lawsuit on September 24, 2010, concluding that "plaintiffs shall take nothing by their suit." In light of this decision, defendants filed a motion requesting that the Court order plaintiffs to pay costs incurred by Batesville and SCI in the approximate amount of \$0.7 million. The Court denied this motion on October 22, 2010.

Plaintiffs had 30 days to declare their intent to appeal the dismissal of their lawsuit, and they did so by way of a Notice of Appeal filed on October 19, 2010. Plaintiffs' Notice indicates that they intend to appeal both the Court's final judgment of dismissal

entered on September 24, 2010 and the Court's order denying class certification entered on March 26, 2009. The appeal will be to the U.S. Court of Appeals for the Fifth Circuit.

Over the next several months, the record will be compiled for appeal and extensive briefing will occur. Plaintiffs' brief appealing the denial of the two orders must be filed within 40 days after the District Court record is certified. Although firm dates are not yet known, the plaintiffs' brief will likely be due sometime in January 2011, with defendants' brief due in February 2011, and a reply brief from plaintiffs due in March 2011. Once all briefs are submitted, the Court of Appeals may hear oral argument by the parties' attorneys and then issue its ruling as to whether or not the District Court's decisions should be reversed or affirmed. It should be noted, however, that the above appellate schedule is only approximate and is subject to change dependent upon a number of factors, including the granting of any extensions of time and the relative congestion of the docket of the Court of Appeals.

If plaintiffs succeed in overturning the judgment, reversing the District Court order denying class certification, and a class is subsequently certified in the FCA Action filed against Hill-Rom and Batesville, and if the plaintiffs prevail at a trial of the class action, the damages awarded to the plaintiffs, which would be trebled as a matter of law, could have a significant material adverse effect on our results of operations, financial condition and/or liquidity. In antitrust actions such as the FCA Action the plaintiffs may elect to enforce any judgment against any or all of the codefendants, who have no statutory contribution rights against each other. We and Hill-Rom have entered into a judgment sharing agreement that apportions the costs and any potential liabilities associated with this litigation between us and Hill-Rom. See Note 6 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2010.

As of October, 2010, we have incurred approximately \$27.5 million in cumulative legal and related costs associated with the FCA matter, since its inception.

General

We are involved on an ongoing basis in claims and lawsuits relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters. The ultimate outcome of these lawsuits cannot be predicted with certainty. An estimated loss from these contingencies is recognized when we believe it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. However, it is difficult to measure the actual loss that might be incurred related to litigation. The ultimate outcome of these lawsuits could have a material adverse effect on our financial condition, results of operations, and cash flow.

Legal fees associated with claims and lawsuits are generally expensed as incurred. Upon recognition of an estimated loss resulting from a settlement, an estimate of legal fees to complete the settlement is also included in the amount of the loss recognized.

We are also involved in other possible claims, including product and general liability, workers compensation, auto liability, and employment related matters. Claims other than employment and related matters have deductibles and self-insured retentions ranging from \$0.5 million to \$1.0 million per occurrence or per claim, depending upon the type of coverage and policy period. Outside insurance companies and third-party claims administrators establish individual claim reserves, and an independent outside actuary provides estimates of ultimate projected losses, including incurred but not reported claims, which are used to establish reserves for losses. Claim reserves for employment related matters are established based upon advice from internal and external counsel and historical settlement information for claims and related fees, when such amounts are considered probable of payment.

The recorded amounts represent our best estimate of the costs we will incur in relation to such exposures, but it is virtually certain that actual costs will differ from those estimates.

ITEM 4. [REMOVED AND RESERVED]

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Hillenbrand, Inc.'s common stock is traded on the New York Stock Exchange under the ticker symbol "HI." The closing price of our common stock on the New York Stock Exchange on November 15, 2010, was \$20.00. The following table reflects the quarterly range of high and low selling prices of our common stock for fiscal 2010 and 2009.

	2010		2009	
	High	Low	High	Low
First quarter	\$21.04	\$18.25	\$20.88	\$13.96
Second quarter	\$22.27	\$17.85	\$19.39	\$14.68
Third quarter	\$25.77	\$20.85	\$18.18	\$15.24
Fourth quarter	\$22.57	\$19.03	\$20.97	\$16.70

Holders

On November 15, 2010, we had approximately 2,900 shareholders of record.

Dividends

The following table reflects historical dividend information for the periods presented.

	2010	2009	2008
First quarter	\$0.1875	\$0.1850	\$ N/A*
Second quarter	\$0.1875	\$0.1850	\$ N/A*
Third quarter	\$0.1875	\$0.1850	\$0.1825
Fourth quarter	\$0.1875	\$0.1850	\$0.1825

*On April 30, 2008, our Board of Directors declared our first dividend payment of \$0.1825 per share, which was paid on June 30, 2008.

Although we have paid cash dividends since our inception on April 1, 2008, the declaration and payment of cash dividends is at the sole discretion of our Board of Directors and depends upon many factors, including our financial condition, earnings potential, capital requirements, alternative uses of cash, covenants associated with debt obligations, legal requirements, and other factors deemed relevant by the Board of Directors.

In accordance with the covenants contained in our Distribution Agreement with Hill-Rom, as amended, we are restricted from paying regular quarterly dividends in excess of \$0.1875 per share or from incurring indebtedness to pay an extraordinary cash dividend without prior written approval of Hill-Rom until the occurrence of an Agreed Termination Event (as defined in the Distribution Agreement) with Hill-Rom has occurred. For a more detailed discussion, see the section entitled "Distribution Agreement" within Note 6 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K. We currently expect that comparable quarterly cash dividends will continue to be paid in the future.

Issuer Purchases of Equity Securities

On July 24, 2008, our Board of Directors approved the repurchase of up to \$100 million of common stock. The program has no expiration date, but may be terminated by the Board of Directors at any time. As of September 30, 2010, we had repurchased approximately 1.0 million shares for \$18.7 million, which are being held as treasury stock until reissued. There were no repurchases of shares in fiscal 2010. During fiscal 2010, 0.1 million shares were issued from treasury under our various stock compensation programs. At September 30, 2010, \$81.3 million are available for repurchase under this plan. Additional information related to our equity compensation programs is included in Note 11 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Stock Performance Graph

The following graph compares the return on Hillenbrand common stock with that of Standard & Poor's 500 Stock Index ("S&P 500 Index") and the Standard & Poor's 600 Small Cap Stock Index ("S&P 600 Index") for the period from March 20, 2008, the date our common stock began trading on the New York Stock Exchange, to November 15, 2010. The graph assumes that the value of the investment in our common stock, the S&P 500 Index, and S&P 600 Index was \$100 on March 20, 2008 and that all dividends were reinvested.

STOCK PERFORMANCE

Hillenbrand, Inc. vs. S&P 500 Stock Index and S&P 600 Small Cap Stock Index

Company Name/Index	Base	2008	2009	2010	November 15, 2010
Hillenbrand, Inc.	\$100	\$112	\$114	\$122	\$113
S&P 500 Index	\$100	\$ 88	\$ 80	\$ 86	\$ 90
S&P 600 Small Cap Index*	\$100	\$100	\$ 88	\$ 99	\$106

*The S&P 600 Small Cap Index consists of companies with market capitalizations between \$250 million and \$1.2 billion. We are included within this index.

ITEM 6. SELECTED FINANCIAL DATA

Selected historical financial data as of and for the fiscal year ended September 30, 2006 to 2010, is derived from our audited consolidated financial statements for Hillenbrand, Inc. and its subsidiaries and is not necessarily indicative of results to be expected in the future. The historical financial information related to the periods prior to the separation on March 31, 2008, included herein, does not necessarily reflect the financial condition, results of operations, or cash flows that we would have achieved as a separate, publicly traded company during the periods presented or those that we will achieve in the future.

The selected financial data should be read together with Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and Part II, Item 8, Financial Statements and Supplemental Data included in this Form 10-K.

The following table presents comparative consolidated financial data of Hillenbrand, Inc. for each of the last five years ended September 30 (amounts in millions, except per share data):

	2010	2009	2008	2007	2006
Net revenues	\$ 749.2	\$649.1	\$678.1	\$ 667.2	\$ 674.6
Gross profit	\$ 313.3	\$274.4	\$280.5	\$ 278.6	\$ 282.7
Operating profit	\$ 137.9	\$155.0	\$149.6	\$ 155.6	\$ 177.4
Net income	\$ 92.3	\$102.3	\$ 93.2	\$ 99.5	\$ 113.2
Net income per common share	\$ 1.49	\$ 1.66	\$ 1.49	\$ 1.59	\$ 1.81
Cash dividends declared per share*	\$ 0.75	\$ 0.74	\$0.365	\$ —	\$ —
Total assets	\$1,052.1	\$561.1	\$545.3	\$ 316.6	\$ 329.4
Long-term obligations	\$ 562.2	\$122.2	\$ 70.9	\$ 59.9	\$ 59.9
Cash flow provided by operating activities	\$ 118.2	\$123.2	\$101.8	\$ 127.3	\$ 124.6
Cash flow used in investing activities	\$ (348.7)	\$ (5.3)	\$ (4.2)	\$ (20.1)	\$ (15.3)
Cash flow provided by (used in) financing activities	\$ 289.8	\$ (97.4)	\$ (94.4)	\$ (103.5)	\$ (107.0)
Capital expenditures	\$ 16.3	\$ 10.0	\$ 10.0	\$ 15.6	\$ 18.8
Depreciation and amortization	\$ 28.2	\$ 18.5	\$ 19.0	\$ 18.5	\$ 17.7

*Our first dividend as a stand-alone public company was paid on June 30, 2008. Accordingly, there are no dividends reported for the first two quarters of fiscal year 2008 or the prior fiscal years 2007 and 2006.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

In this section of the Form 10-K, entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations," we attempt to give you a look at our Company "through the eyes of management" so that you can assess the financial condition and results of operations of our Company. The discussion that follows should give you information that will help you understand our business and its performance. We intend for the discussion to be clear and to explain the drivers of our results so that you can assess the quality of our earnings and the predictability of our future results. Discussion and analysis of our

financial condition and operating results includes Hillenbrand, Inc. ("Hillenbrand") and those of its operating segments, Batesville Services, Inc. ("Batesville") and K-Tron International, Inc. ("K-Tron"), together with their wholly owned subsidiaries.

Results of Operations

The consolidated operating results of our Company are included in the selected financial data in Part II, Item 6 of this Form 10-K. We have disaggregated the relevant operating information into our two reporting segments, Batesville and K-Tron, along with our corporate operations. See Note 15 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K for a reconciliation of the financial information below to our consolidated financial results.

The sections that follow present comparative operating results for Batesville, K-Tron, and our corporate operations. We also discuss changes in non-operating expenses and income, along with our income tax provision, in further detail below.

Batesville Results	Fiscal Year Ended September 30,					
	2010		2009		2008	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
(amounts in millions)						
Revenue	\$640.3	100.0	\$649.1	100.0	\$678.1	100.0
Gross profit	277.7	43.4	274.4	42.3	280.5	41.4
Operating expenses	102.6	16.0	95.9	14.8	96.7	14.3
Operating income	175.1	27.3	178.5	27.5	183.8	27.1
Depreciation and amortization	17.6	2.7	17.6	2.7	18.6	2.7

Batesville — Fiscal Year Ended September 30, 2010, Compared to Fiscal Year Ended September 30, 2009

Revenue. Batesville's net revenues for the year were down from the same period last year, decreasing \$8.8 million or 1.4%. Burial unit volume decreased 2.5% or \$15.0 million compared to the same period last year and was the primary contributor to the reduction in net revenue, although improved volume on non-burial products helped limit the impact. We believe the volume decrease is attributable to a lower number of reported deaths year-over-year and increased cremation rates. Offsetting this impact was a modest increase in average selling price that contributed \$1.1 million to revenue. We believe that Batesville's merchandising initiatives and new product launches helped improve average selling prices and slow the downward trend in product mix, especially in customer locations that used the Batesville merchandising system. Finally, Batesville also experienced the favorable impact of currency fluctuations during the year as it benefited from a strengthening Canadian dollar. This resulted in increased revenue of \$5.1 million over the prior year. We can't predict how currency rates will move and they may either help or hurt our results in the future.

Gross Profit. Batesville's gross profit for the year was up from the same period last year, increasing \$3.3 million or 1.2%. In addition to the impacts noted above, cost of goods sold decreased \$12.1 million. In Batesville's manufacturing operations, costs decreased \$9.2 million, driven by a \$4.1 million decrease due to lower volume and an \$8.9 million decrease due to lower commodity costs. Although full year commodity prices have been favorable overall, more recently Batesville has been paying more for commodities as compared to levels at September 30, 2009. These favorable effects were partially offset by \$3.8 million of cost increases attributable to a number of other categories across manufacturing operations. Within its distribution operations, Batesville generated \$2.9 million in cost efficiencies associated with lower personnel, benefit costs, and outside carrier costs. The effects of higher fuel rates were evenly offset by \$1.4 million of lower costs across Batesville's remaining distribution related cost categories. We are continuing to optimize our cost structure utilizing lean business principles.

Operating Expenses. Batesville operating expenses increased \$6.7 million or 7.0% for the year as compared to the same period in the prior year. The primary drivers of the cost increases were \$5.5 million related to variable compensation and pension, \$2.8 million due to higher legal fees related to antitrust litigation, \$2.4 million of additional spending on new business initiatives, and \$0.7 million spread over to a number of other components of Batesville's operating expenses.

During the three months ended December 31, 2009, it was discovered that Batesville over-remitted sales tax in certain jurisdictions and, as a result, recorded a \$4.1 million sales tax receivable related to these overpayments. In the quarter ended September 30, 2010, Batesville recognized an additional recovery of \$0.6 million related to these over payments, the effect of which lowered operating expenses compared to the same three month period in the prior year.

Batesville — Fiscal Year Ended September 30, 2009, Compared to Fiscal Year Ended September 30, 2008

Revenue. Batesville's net revenues for fiscal 2009 were down from the same period in fiscal 2008, decreasing \$29.0 million or 4.3%. Burial unit volume decreased 6.5% or \$45.8 million compared to the same period in fiscal 2008 and was the primary contributor to the reduction in net revenue. We believe this volume decrease was attributable to a lower number of reported deaths year-over-year, increased cremation rates, and aggressive price competition. We suspect that higher cremation rates were fueled by the onset of the economic recession which in turn caused the aggressive price competition for the remaining volume. Offsetting this impact was an increase in average selling price that contributed \$24.5 million to revenue. Finally, during fiscal 2009, the unfavorable impact of currency fluctuations from a stronger U.S. dollar, mainly compared to the Canadian dollar resulted in decreased revenue of \$7.7 million from the prior year.

Gross Profit. Batesville's gross profit for the year was down from the same period last year, decreasing \$6.1 million or 2.2%. In addition to the revenue impacts noted above, cost of goods sold decreased \$22.9 million. In Batesville's manufacturing operations, \$14.5 million of lower costs were due to the unfavorable impact of lower volume. Additionally, higher commodity costs of \$1.2 million for steel and red metals offset cost savings of \$1.0 million attributable to a number of other categories across manufacturing operations. During fiscal 2009, Batesville's distribution operations benefited from a \$5.9 million reduction in fuel cost as compared to the prior year. It also experienced a \$2.7 million decrease in other distribution cost categories which were mainly related to lower employee benefit costs in similar fashion to its manufacturing operations.

Operating Expenses. Batesville's operating expenses decreased \$0.8 million or 0.8% for fiscal year 2009 as compared to the same period in the prior year. In fiscal 2008, Batesville realized a \$2.6 million decrease in its bad debt expense as a result of collecting a customer balance that had previously been nearly fully reserved (causing fiscal 2009 expense to be relatively higher). This increased expense was offset by a decrease in variable compensation of \$1.7 million (tied to lower fiscal 2009 revenues) and a decrease of \$1.1 million in legal fees related to antitrust litigation. The remaining decrease in core operating expenses of \$0.6 million was attributable to other components of Batesville's operating expense categories.

K-Tron Results	Fiscal Year Ended September 30, 2010 (representing six months of operations since date of acquisition on April 1, 2010)	
	Amount	% of Revenue
(amounts in millions)		
Revenue	\$108.9	100.0
Gross profit	35.6	32.7
Operating expenses	33.4	30.7
Operating income	2.2	2.0
Depreciation and amortization	9.7	8.9

Results for K-Tron. Since we have only recently acquired K-Tron, we do not present comparative period results for variance analysis. K-Tron's results for the last six months of fiscal 2010 were significantly impacted by the non-recurring effects of the "step ups" in value to inventories and backlog (e.g. the value of firm orders which are not yet complete for our customers) required by acquisition accounting. These "step ups" are being charged against income over the turnover period of the related inventories and acquired backlog. These "step ups" reduced gross profit and operating income by \$11.6 million and \$13.3 million, respectively, and increased operating expenses and amortization by \$1.7 million.

The future revenue associated with K-Tron's business lines is influenced by order backlog. This is typical for these business lines because of the lead time involved in manufacturing specialized equipment and parts for customers. Backlog can be an indicator of future revenue. However, it may not include many projects and parts orders that are booked and shipped within a quarter (e.g. it is substantially new equipment orders). The timing of order placement, size, and customer delivery dates can create unusual fluctuations in backlog. Backlog is also affected by foreign exchange fluctuations since a portion of the orders are denominated in currencies other than U.S. dollars.

When we acquired K-Tron, backlog was approximately \$60.8 million. Based upon new orders accepted, less orders completed and shipped during the last six months of fiscal 2010, K-Tron's backlog was approximately \$57.1 million as of September 30, 2010. Revenues in the last six months of fiscal 2010 exceeded the orders placed for future delivery, causing the reduction in backlog as of the end of the year. The backlog decrease was largely driven by the completion of a multi-million dollar order during the fourth quarter of fiscal 2010.

Corporate Results (amounts in millions)	Fiscal Year Ended September 30,		
	2010	2009	2008
Operating expenses*	\$26.2	\$23.4	\$18.6
Business acquisition costs	10.2	—	—
Restructuring costs	3.0	—	—
Separation costs	—	0.1	15.6
Depreciation and amortization	0.9	0.9	0.4

*Excluding business acquisition, restructuring, and separation costs.

Corporate — Fiscal Year Ended September 30, 2010, Compared to Fiscal Year Ended September 30, 2009

Operating Expenses.* We have excluded business acquisition, restructuring and separation costs because we believe this provides a clearer picture for analyzing our operating cost structure without the effects of these activities due to the significant and infrequent nature of these costs. Operating expenses increased \$2.8 million or 12.0% for the year as compared to the same period in the prior year. The increases were primarily related to employee compensation and benefits costs of \$2.6 million and variable compensation costs of \$0.9 million which were offset by aggregate cost decreases of \$0.7 million across other components of our corporate operations.

Business Acquisition Costs. During fiscal 2010, we incurred \$10.5 million of business acquisition related costs, of which \$10.2 million are included in our corporate costs for the fiscal year ended September 30, 2010. These non-recurring acquisition costs include advisory, legal, accounting, valuation, and other professional and consulting fees that are directly attributable to our acquisition of K-Tron.

Restructuring Costs. During fiscal 2010, we incurred restructuring charges of \$3.0 million related to our joint ownership interests in corporate aircraft that were distributed to us in connection with our separation from Hill-Rom. These restructuring charges resulted from our collective plans with Hill-Rom to sell or dispose of two (of four) of our jointly owned aircraft, and modifications to our aviation access and use agreements. The charges consist of \$2.9 million in asset impairments related to two aircraft and approximately \$0.1 million related to severance. This restructuring will optimize our future cost structure with our intended use of these aviation assets.

Corporate — Fiscal Year Ended September 30, 2009, Compared to Fiscal Year Ended September 30, 2008

Operating Expenses.* During fiscal 2009, we substantially completed building teams and processes to support ourselves as a stand-alone public company. We also initiated our acquisition strategy and put in place people, processes, and resources to enable successful execution of that strategy. As a result of these activities, we incurred an increase in corporate operating costs of \$12.2 million in fiscal 2009 as compared to the previous year. This increase was partially offset by the fact that we were no longer allocated corporate costs from Hill-Rom effective April 1, 2008. These allocated costs decreased by \$7.4 million in fiscal 2009 compared to the prior year.

Separation Costs. In fiscal year 2008, we incurred or were allocated \$15.6 million in separation costs associated with the separation of the Company from Hill-Rom. Included in these non-recurring costs were \$3.2 million tied to the acceleration of previously unvested stock grants, \$1.1 million in stock option modification charges, and \$4.4 million of investment banking and advisory fees. The balance of the costs were primarily legal and professional fees.

Other Income and Expense (amounts in millions)	Fiscal Year Ended September 30,		
	2010	2009	2008
Interest expense	\$ 4.2	\$2.1	\$2.2
Investment income and other	12.7	7.9	5.9

Interest Expense. Interest expense increased \$2.1 million for the year ended September 30, 2010, as compared to the same period in the prior year, due to increased borrowings on our revolving credit facilities (resulting from the acquisition of K-Tron) and issuance of 10 year, 5.5% fixed rate senior unsecured notes in the fourth quarter of fiscal 2010. Our revolving credit facility had an average weighted interest rate for fiscal 2010 of 0.8% as compared to 1.5% for fiscal 2009.

Fiscal 2009 marked our first full year as a stand-alone public company and our first full year of financing costs under our credit facility. Since our separation from Hill-Rom and generally throughout fiscal 2009, we had been paying down the credit facility. As a result of the lower average daily balances and the fact that we had lower weighted average interest rates, our costs decreased in fiscal 2009 over the same period in the prior year. The weighted average interest rate of the credit facility was 1.5% and 3.0% during the fiscal years 2009 and 2008, respectively.

Investment Income and Other. Investment income and other increased \$4.8 million for the year ended September 30, 2010 as compared to the same period in the prior year. The primary driver of the increase was higher earnings from investments in limited partnerships in the current year, as compared to losses in the prior year (which resulted primarily from decreased values on investments held by the limited partnerships). This increase in investment income was partially offset by decreased interest income and realized losses and impairments on the sale of auction rate securities and lower interest income on our note receivable from Forethought (“Forethought Note”). See Note 13 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K for more detailed information.

As was the case with interest expense described above, in fiscal 2009 we incurred our first full year of investment earnings or losses from assets that were transferred to us by Hill-Rom at the time of the separation. During fiscal year 2009, net losses from investments in affiliates (limited partnership investments) were \$5.4 million due to decreased values within the affiliates’ investment portfolios. In comparison, we had no net earnings or losses from these investments in fiscal 2008. However, in the last quarter of fiscal year 2008, we recorded a \$0.8 million other-than-temporary impairment loss on an investment in common stock. We earned higher interest income of \$6.5 million, in aggregate, on the ARS and Forethought Note as compared to the prior year due to the fact that we held them for only six months in the previous year. We also received a right (the “Put”) from UBS Financial Services that allowed us to sell a portion of our existing ARS in the future. Since that time, we have been recording changes in the fair value of the Put and applicable ARS through our income statement and as expected, they essentially offset. (See the information within the notes to our consolidated financial statements in Part II, Item 8 of this Form 10-K and “Other Liquidity Matters” included within Liquidity and Capital Resources discussed below.)

Income Tax Expense (amounts in millions)	Fiscal Year Ended September 30,		
	2010	2009	2008
Income tax expense	\$54.1	\$58.5	\$60.1
Effective tax rate	37.0%	36.4%	39.2%

Income Taxes. Our income tax rate was 37.0% for the year ended September 30, 2010, an increase of 0.6% over the same period in the prior year. The increase in the effective tax rate was primarily attributable to non-deductible business acquisition costs, higher state income tax rates, and adjustments resulting from periodic reconciliation of our tax accounts to subsequent tax filings. These effects were somewhat offset by favorable changes in our income tax reserves.

Our income tax rate for fiscal 2009 was 36.4%, which was 2.8% lower than the prior year. This reduction was primarily due to separation costs we incurred in fiscal 2008 that were not deductible for income tax purposes and a partial disallowance of the domestic production activities deduction in fiscal 2008 due to the separation.

Liquidity and Capital Resources

We believe the ability to generate cash is critical to the value of the Company. In this section, we tell you about our ability to generate and access cash to meet our business needs.

First, we will describe our actual results in generating and utilizing cash by comparing the last three years. We will also talk about any significant trends we are seeing to help you understand how this could impact us going forward.

Second, we will tell you about how we see operating, investing, and financing cash flows being impacted for the next 12 months. While it's not a certainty, we will tell you where we think cash will come from and how we intend to use it. We will also talk about significant risks or possible changes to our thinking that could change our expectations.

Third, we will tell you about other significant matters that could affect our liquidity on an ongoing basis.

A summary of our cash flows for the last three years is as follows:

(amounts in millions)	Fiscal Year Ended September 30,		
	2010	2009	2008
Cash flows provided by (used-in)			
Operating activities	\$ 118.2	\$123.2	\$101.8
Investing activities	(348.7)	(5.3)	(4.2)
Financing activities*	289.8	(97.4)	(94.4)
Effect of exchange rate changes on cash and cash equivalents	3.9	—	(0.4)
Increase in cash and cash equivalents	\$ 63.2	\$ 20.5	\$ 2.8

*Also includes net cash and cash equivalents provided to our parent company prior to separation on March 31, 2008.

Operating Activities

Our operating cash flow was \$5.0 million lower in fiscal year 2010 as compared to fiscal year 2009. The noteworthy changes in its components were as follows:

- We incurred \$10.5 million in business acquisition related costs in fiscal 2010, substantially all of which were paid by the end of the period. These costs reduced both our profitability and our operating cash flow in fiscal 2010.
- Cash payments for income taxes increased \$21.0 million from fiscal year 2009. This change was primarily related to a significant change in the cash (current) and non-cash (deferred) components of our income tax expense. With the acquisition of K-Tron, a higher portion of our tax expense was current (meaning higher cash payments) offset by non-cash deferred income tax benefits.
- We paid \$3.0 million less in defined benefit plan contributions in fiscal year 2010 as compared to the prior year primarily resulting from lower discretionary payments made in the current year as compared to the fiscal 2009.
- We made cash payments of \$5.5 million to fund a rabbi trust associated with our deferred compensation program in fiscal 2010.
- K-Tron's core pre-tax operating cash flows contributed approximately \$16.9 million to our consolidated operating cash flows for the last 6 months of fiscal 2010.
- In July 2010, we received from Forethought our first \$10.0 million interest payment on the Forethought Note.

Our operating cash flow was \$21.4 million higher in fiscal year 2009 as compared to fiscal year 2008. The noteworthy changes in its components were as follows:

- We incurred \$15.5 million more in separation costs in fiscal year 2008 compared to fiscal year 2009, substantially all of which were paid by the end of the period. This reduced both our profitability and our operating cash flow in fiscal 2008.
- Cash payments for income tax payments decreased \$8.7 million from fiscal year 2008, including amounts paid to or received from Hill-Rom to settle our pre-separation income tax obligations. This change was the result of the timing between when we had made these payments to Hill-Rom (prior to separation) and the timing of when we now make them directly to tax authorities as a separate company.
- We paid \$3.2 million more in defined benefit plan contributions in fiscal year 2009 as compared to fiscal 2008 resulting from a discretionary payment of \$7.8 million made this year. We made this payment in order to improve the funding level of our plans.

Investing Activities

The significant increase in our net investing activities in fiscal 2010 over fiscal 2009 was driven by a \$369.0 million net cash payout to acquire K-Tron and higher capital project spending of \$6.3 million, all of which was offset by the \$37.2 million liquidation of a portion of our ARS and investments.

Our net investing activities in fiscal year 2009 were essentially flat from fiscal 2008. The modest change was due to cash invested in and returned from investment assets we received in connection with the separation.

Financing Activities

Net cash receipts from financing activities for fiscal 2010 increased \$387.2 million, primarily related to \$375.0 million of borrowings under our revolving credit facilities to fund the acquisition of K-Tron, and \$148.4 million of proceeds from the issuance of 5.5% senior unsecured notes (the "Notes"). The proceeds from the Notes were subsequently used to pay-down \$100 million owed on our revolving credit facility and the remaining amount was used to fund working capital needs.

On July 24, 2008, our Board of Directors authorized the Company to repurchase up to \$100 million of our outstanding common stock. The amount of repurchase activity will depend on a variety of factors including the level of cash generated from operations, the market price of our stock, repayments we elect to make on the credit facility, and the use of cash from operations in support of other business growth opportunities. During fiscal year 2008, we elected to purchase 0.3 million shares of our common stock for \$6.2 million. In fiscal year 2009, we purchased an additional 0.7 million shares for \$12.5 million. There were no purchases of stock in fiscal 2010.

12 Month Outlook

At the present time, we expect the future profitability of Batesville, K-Tron and the cost structure of our corporate operations to drive our net operating cash flow. The specifics that follow are known factors that can introduce volatility to that general premise over the next twelve months.

Operating activities

We made a \$4.0 million discretionary contribution to one of our pension plans in June 2010. Although we are not required to do so, we may decide to make a contribution to our defined retirement plan in 2011. Any amount will be based on the performance of the assets within the plan, business developments, and overall

economic activity. We expect the maximum amount of any contribution to be \$30 million. We will continue to monitor plan funding levels in order to optimize our capital deployment and determine the final discretionary amount during fiscal 2011. Any contributions we make will reduce our net cash flow from operations.

As discussed in Note 5 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K, in July 2010, we issued \$150.0 million in principal amount 5.5% fixed rate senior unsecured notes, due July 2020. These Notes will require annual interest payments of approximately \$8.2 million which will reduce our operating cash flow.

Investing Activities

In addition to our traditional level of capital expenditures, we are now including the annual sustaining capital expenditures of K-Tron. Over the past three calendar years, those expenditures have been between \$1.8 million to \$3.7 million annually.

We can be called upon by our private equity limited partnership investments to provide additional investment funds, the maximum amount being \$3.1 million in the aggregate.

We expect to continue moving forward with our acquisition strategy in order to increase our growth rate for revenues and earnings. However, any additional acquisitions will depend on whether suitable opportunities are available. We expect to fund future acquisitions primarily with cash on hand and cash flows from operations.

Financing Activities

We currently expect that comparable quarterly cash dividends will continue to be paid in the future and will require approximately \$11.8 million each quarter based on our outstanding common stock at September 30, 2010. We may use additional cash generated by the business to pay down our revolving credit facility, depending on our working capital needs or as discussed under investing activities, we may utilize availability under the revolving credit facility to finance acquisitions. We may also resume purchasing additional shares of our common stock, depending on market conditions.

Summary of 12 Month Outlook

We believe that cash on hand, cash generated from operations, and cash available under our credit facility will be sufficient to fund operations, working capital needs, capital expenditure requirements, and financing obligations.

Other Liquidity Matters

At September 30, 2010, we held \$11.9 million in a portfolio of ARS (consisting of highly rated tax exempt state and municipal securities, the majority of which are collateralized by student loans guaranteed by the U.S. government under the Federal Family Education Loan Program) recorded at fair value. We have estimated the current fair value of the portfolio based upon observed pricing on similar assets as of September 30, 2010. Although the underlying securities in the portfolio consist of creditworthy borrowers with AAA or A3 debt ratings, market conditions and auction failures have adversely impacted the liquidity of these securities. If current market conditions do not improve, or worsen, we may not be able to readily convert these securities to cash, and our earnings could suffer as a result.

Although we are not dependent on any cash flows from the Forethought Note to fund our operating activities, we regularly evaluate the Forethought Note for impairment based upon collectability. If, based upon these evaluations, it is probable that the Forethought Note will not be paid in accordance with its terms, it will be deemed impaired. Based upon information available to us regarding conditions existing on or prior to September 30, 2010, the Forethought Note is not impaired. We estimate the fair value of the Forethought Note based upon a comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk, adjusted for liquidity considerations. We estimate that the fair value of the Forethought Note (and related interest receivable) has increased from \$109.0 million at September 30, 2009, to \$127.0 million at September 30, 2010. This increase in estimated fair value was caused by the natural decline in the period to maturity (closer to the collection date), offset by an increase in the required yield to maturity (discount rate) observed in the marketplace on comparable debt instruments (adjusted for a liquidity premium). The model used in estimating the fair value of the Forethought Note primarily utilizes market data and is not intended to imply that some or all of the future payments due under the Forethought Note will not be collected when due from Forethought.

In March 2008, we established a \$400 million five-year revolving credit facility (the "Facility") with a syndicate of banks. The term of the Facility expires in March 2013. Borrowings under the Facility bear interest at variable rates, as defined therein. The availability of borrowings under the Facility is subject to our

ability at the time of borrowing to meet certain specified conditions. These conditions include compliance with covenants contained in the credit agreement governing the Facility, absence of default under the Facility, and continued accuracy of certain representations and warranties contained in the credit agreement. The credit agreement contains covenants that, among other matters, require the Company to maintain a ratio of Consolidated Indebtedness to Consolidated EBITDA (each as defined in the credit agreement) of not more than 3.5:1.0 and a ratio of Consolidated EBITDA to interest expense of not less than 3.5:1.0. The proceeds of the Facility may be used: (i) for working capital and other lawful corporate purposes and (ii) to finance acquisitions.

As of September 30, 2010, we: (i) had \$6.7 million outstanding, undrawn letters of credit under the Facility, (ii) were in compliance with all covenants set forth in the credit agreement, and (iii) had complete access to the remaining \$138.3 million of borrowing capacity available under the Facility. In addition to the amounts above, we had \$6.0 million in outstanding letters of credit and bank guarantees to other financial institutions as of September 30, 2010. A portion of these arrangements is secured by our operating facility in Switzerland and \$0.3 million of restricted cash at September 30, 2010.

The covenants under the Distribution Agreement with Hill-Rom effectively prevent us from incurring any additional debt to finance an acquisition based upon our financial position as of September 30, 2010. However, we may utilize existing cash on hand and cash generated from future operations to fund future acquisitions. Our capacity to borrow for acquisitions may increase as cash on hand and our earnings (as defined under the Distribution Agreement) increase over time.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements.

Contractual Obligations and Contingent Liabilities and Commitments

In this section we will tell you about the things we have committed to pay. This will help give you an understanding of the significance of cash outlays that are fixed (beyond the normal accounts payable we have already incurred and have on our books), unless we took some action to delay or cancel the need to pay.

To provide visibility to matters potentially impacting our liquidity position, the following table outlines our contractual obligations as of September 30, 2010:

Contractual Obligations (amounts in millions)	Payment Due by Period				
	Total	Less Than 1 Year	1-3 Years	4-5 Years	After 5 Years
Operating lease obligations	\$ 15.9	\$ 7.1	\$ 8.0	\$ 0.8	\$ —
Purchase obligations (1)	45.5	40.0	5.3	0.2	—
Defined benefit plan funding (2)	87.8	7.1	28.7	31.4	20.6
Other long-term liabilities (3)	25.2	3.5	4.2	1.6	15.9
Capital call arrangements (4)	3.1	3.1	—	—	—
Revolving credit facility (5)	255.0	—	255.0	—	—
10 year, 5.5% fixed rate senior unsecured notes (6)	150.0	—	—	—	150.0
Total contractual obligations	\$582.5	\$60.8	\$301.2	\$34.0	\$186.5

- (1) Purchase obligations represent contractual obligations under various take-or-pay arrangements entered into as part of the normal course of business. These commitments represent future purchases in line with expected usage to obtain favorable pricing. Also included are obligations related to purchase orders for which we have firm commitments related to order releases under the purchase orders. The amounts do not include obligations related to other purchase obligations that are not considered take-or-pay arrangements or subject to firm commitments. Such purchase obligations are primarily reflected in purchase orders at fair value that are part of normal operations, which we do not believe represent firm purchase commitments. We expect to fund these commitments with operating cash flows.
- (2) The defined benefit plan funding represents payments to comply with non-discretionary requirements based upon plan funding at September 30, 2010, and excludes any 2011 discretionary contribution. In the event we choose to make a discretionary contribution, we expect the maximum amount to be \$30.0 million. The estimated discretionary contribution amount is highly volatile, depending on fiscal 2011 asset performance, business developments, and overall economic activity.
- (3) Other long-term liabilities include the forecasted liquidation of liabilities related to our casket pricing obligation, self-insurance reserves, and long-term severance payments.
- (4) We could be called upon by our private equity limited partnership investments to provide additional investment funds, the maximum amount being \$3.1 million in aggregate.
- (5) Our revolving credit facility expires in March 2013. Although we may make earlier principal payments at our discretion, we have reflected the principal balance due at expiration in the table above, because that is when we are required to repay.
- (6) During July 2010, we issued \$150.0 million of 10 year, 5.5% fixed rate senior unsecured notes, a portion of which we used to pay-down outstanding amounts on our revolving credit facility. Beginning January 2011, we will be required to make semi-annual interest payments on our debt, with the principal balance becoming due in July 2020.

In addition to the contractual obligations disclosed above, we also have a variety of other agreements related to the procurement of materials and services and other commitments. We are not subject to any contracts that obligate us to material non-cancelable commitments. While many of these agreements are long-term supply agreements, some of which are exclusive supply or complete requirements-based contracts, we are not committed under these agreements to accept or pay for requirements which are not needed to meet near term production requirements.

In connection with past acquisition activities, we have entered into certain guarantees and indemnifications of performance with respect to the fulfillment of our commitments under the respective purchase agreements. The arrangements generally indemnify the seller for damages associated with breach of contract, inaccuracies in representations and warranties surviving the closing date, and satisfaction of liabilities and commitments retained under the applicable contract. Those representations and warranties which survive closing generally survive for periods up to the maximum period allowed by the applicable statutes of limitations. Guarantees and indemnifications with respect to acquisition activities, if triggered, would not have a materially adverse impact on our financial condition and results of operations.

Critical Accounting Estimates

In this section we tell you about accounting estimates that inherently involve significant judgment on our part.

Our accounting policies require management to make significant estimates and assumptions using information available at the time the estimates are made. Such estimates and assumptions significantly affect various reported amounts of assets, liabilities, revenues, and expenses. If future experience differs materially from these estimates and assumptions, our results of operations and financial condition could be affected. A detailed description of our accounting policies is included in the notes to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

Revenue Recognition

Revenue for our products is most often recognized upon delivery of the products to the customer, but in no case prior to when the risk of loss and other risks and rewards of ownership are transferred. Net revenues reflect gross revenues less sales discounts, customer rebates, sales incentives, and product returns, all of which require us to make estimates for the portion of these allowances that have yet to be credited or paid to our customers. We estimate these allowances based both upon historical rates and projections of customer purchases toward contractual rebate thresholds.

Some of our revenues associated with K-Tron involve multiple elements (i.e. various components to an overall larger order being manufactured for the customer.) Periodically these elements are transferred to the customer at different times pursuant to the customer's requirements. In these circumstances we may estimate the sales value of the individual elements in order to determine the appropriate amount of revenue to recognize on the transferred elements.

Allowance for Doubtful Accounts

The accounting for our trade receivables requires us to estimate the net realizable value of these assets. Our allowance for doubtful accounts is our best estimate of the amount of probable credit losses and collection risk in our existing trade accounts receivable portfolio. Performing our evaluation of the allowance for doubtful accounts requires us to exercise significant judgment based on historical write-off and individual customer collection experience. As a result, our historical experience and current trends we are using in our estimates at any point in time may not be indicative of the collectability of these balances in the future.

Auction Rate Securities

The accounting for our auction rate securities requires us to estimate the fair value of these assets in a current environment where there is not an active market to easily establish that value. Prior to July 1, 2010, we utilized a valuation model based upon a discounted cash flow approach. The assumptions used in preparing the discounted cash flow model included estimates of, based on available data, interest rates, timing and amount of cash flows, credit spread related yield and illiquidity premiums, and expected holding periods of the ARS. In the fourth quarter of fiscal 2010, we began to value the ARS based upon secondary market pricing on observed transactions. We moved to this approach as we believe the pricing now occurring in the secondary market represents the "highest and best use" valuation of the ARS. The risk exists that the volatile nature of secondary market pricing may not be reflective of actual realizable value in the future.

Note Receivable from Forethought

We evaluate the note receivable from Forethought for impairment based upon collectability. If, based upon this evaluation, it is probable that the note will not be paid in accordance with its terms, the note will be deemed impaired. Performing an impairment evaluation of the note requires us to exercise significant judgments as to whether Forethought has the financial wherewithal to make the scheduled payments based upon events or

conditions that we are aware of existing on or prior to the balance sheet date. The note agreement provides us access to various kinds of financial information from Forethought including:

- Available capital and surplus within Forethought's primary insurance operations, an indicator of liquidity of the entity;
- Embedded Value, an indicator of enterprise value and an indicator of the ability of the entity to raise capital;
- Forethought's recent investment portfolio results and the quality of the related investments;
- GAAP equity, an indicator of financial strength; and
- Recent GAAP and Statutory financial results (income, loss and related cash flow effects).

We utilize this information to assess the financial strength of Forethought and our prospects for getting paid. The principal under the note is not scheduled to be repaid until 2014.

As a result, the indicators or trends we consider at any point in time when making an impairment assessment may not be indicative of Forethought's ultimate financial strength at the time of scheduled payment.

If we determine an impairment exists, an impairment reserve would be established based upon the then carrying value of the note and the estimated discounted cash flows we would expect to receive on an impaired basis. Making such an estimate would require us to exercise significant judgment about the expected timing and size of the payments under the note in what could be distressed financial conditions at Forethought. Even though we might be legally entitled, we would likely cease recording interest income under the note, due to the uncertainty of being paid under these types of conditions.

Liabilities for Loss Contingencies Related to Claims and Lawsuits

The ultimate outcome of claims and lawsuits cannot be predicted with certainty. An estimated loss from these contingencies is recognized when we believe it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. Making such an estimate requires us to exercise significant judgment. However, it is difficult to measure the actual loss that might be incurred related to litigation. The ultimate outcome of these lawsuits could have a material adverse effect on our financial condition, results of operations and cash flow. For a more complete description of loss contingencies related to lawsuits, see Note 12 to our consolidated financial statements included in Part II, Item 8, of this Form 10-K.

Legal fees associated with claims and lawsuits are generally expensed as incurred. Upon recognition of an estimated loss resulting from a settlement, an estimate of legal fees to complete the settlement is also included in the amount of the loss recognized.

We are also involved in other possible claims, including product and general liability, workers compensation, auto liability and employment related matters. Outside insurance companies and third-party claims administrators establish individual claim reserves and an independent outside actuary provides estimates of ultimate projected losses, including incurred but not reported claims, which are used to establish reserves for losses. As our actuaries periodically provide us updated ultimate loss projections, we must “true up” (increasing or reducing) previously recorded claim reserves. Thus, any one period’s financial results could be significantly affected by the effect of the “true up.”

The recorded amounts represent our best estimate of the costs we will incur in relation to such exposures, but it is possible that actual costs could differ from those estimates.

Performance Stock-Based Compensation

The vesting of our performance-based restricted stock and units (collectively “PBUs”) is contingent upon the creation of shareholder value as measured by the cumulative cash returns and final period income in excess of our weighted average cost of capital over a three-year period and a corresponding service requirement. The value of an award is based upon the fair value of our common stock at the date of grant. Based on the extent to which the performance criteria are achieved, it is possible for none of the awards to vest or for a range up to the maximum to vest, which is reflected in the PBU table in Note 11 to our consolidated financial statements included in Part II, Item 8, of this Form 10-K. We record expense associated with the awards on a straight-line basis over the vesting period based upon an estimate of projected performance. The actual performance of the Company is evaluated quarterly, and the expense is adjusted according to the new projection if it has changed significantly. As a result, depending on the degree to which we achieve the performance criteria or our projection changes, our expenses related to the PBUs may become more volatile as we approach the final performance measurement date at the end of the three years. This increase in volatility is due to the fact that we must “true up” (increasing or reducing) previously recorded compensation expense as the projection of performance changes. Thus any one period’s financial results could be significantly affected by the cumulative effect of the “true up.” Preparing the projection of performance requires us to exercise significant judgments as to the expected outcome of final performance up to three years in the future. In making the projection, we consider

both actual results and probable business plans for the future. At September 30, 2010, we have recorded cumulative compensation expense associated with unvested PBUs of \$5.9 million, which continues to be subject to periodic “true ups” as the related PBUs approach the final performance measurement date.

Retirement and Postretirement Plans

We sponsor retirement and postretirement benefit plans covering a majority of our employees. Expense recognized in relation to such plans is based upon actuarial valuations. Inherent in those valuations are key assumptions including discount rates, expected returns on assets, and projected future salary rates. The discount rates used in the valuation of our defined benefit pension and postretirement benefit plans are evaluated annually based on current market conditions. In setting the discount rate, we use a yield curve approach to discount each expected cash flow of the liability stream at an interest rate applicable to the timing of each cash flow based on corporate bond rates. These present values are then converted into an equivalent weighted-average discount rate. Our overall expected long-term rate of return on pension assets is based on historical and expected future returns, which are inflation adjusted and weighted for the expected return for each component of the investment portfolio. Our rate of assumed compensation increase for pension benefits is also based on our specific historical trends of past wage adjustments in recent years and expectations for the future.

Changes in retirement and postretirement benefit expense and the recognized obligations may occur in the future as a result of a number of factors, including changes to any of these assumptions. Our weighted average expected rate of return on pension assets is 7.6%, 7.75%, and 8.0% at the end of fiscal 2010, 2009 and 2008 respectively. A 25 basis point increase in the expected rate of return on domestic pension assets of \$169.2 million reduces annual pension expense by approximately \$0.5 million. The weighted average discount rate decreased to 4.8% and 4.5% at the end of fiscal 2010 for the pension and postretirement healthcare plan expense, respectively. A 50 basis point decrease in the discount rate increases the annual domestic pension expense by approximately \$1.4 million. The impact of this decrease to our postretirement healthcare plan expense would be less than \$0.1 million. Impacts from assumption changes could be positive or negative depending on the direction of the change in rates. Based upon the new rates and assumptions, we expect the aggregate expense associated with our defined benefit plans to decrease from \$9.5 million in fiscal 2010 to \$9.0 million in fiscal 2011. See Note 7 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K, for key assumptions and other information regarding our retirement and postretirement benefit plans.

Uncertain Income Tax Positions

On October 1, 2007, we adopted the accounting standard that prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. In assessing the need for reserves for uncertain tax positions, we have to make judgments regarding the technical merit of a tax position, and when necessary, an estimate of the settlement amount based upon what we think is the probability of the outcome. At September 30, 2010, we had reserves of \$7.2 million established for uncertain tax positions based upon our estimates. Our ability to make and update these estimates is limited to the information we have at any given point in time. This information can include how taxing authorities have treated the position in the past, how similar cases have settled, or where we are in discussions or negotiations with taxing authorities on a particular issue, among others. As information available to us evolves, we update our reserves quarterly. These updates can result in volatility to our income tax rate (particularly to a given quarter) if new information or developments result in a significant change in our estimate.

Business Combinations

On October 1, 2009, we adopted a new accounting standard that governs how to account for and disclose business combinations (e.g., when we buy a business). With a few exceptions, the standard requires that we record the assets and liabilities of the acquired business at estimated fair value at the date of acquisition. Estimating fair value for acquired assets and liabilities as part of a business combination typically requires us to exercise judgment, particularly for those assets and liabilities that may be unique or not easily determined by reference to market data. Often estimates for these types of acquired assets and liabilities will be developed using valuation models that require both historical and forecasted inputs, as well as “market participant” expectations. Thus the valuation is directly affected by the inputs we judge as best under the given circumstances. When material, we expect to seek assistance of competent valuation professionals when the underlying valuation is more complex or unique.

We anticipate that in most cases, we will exercise significant judgment in estimating the fair value of intangible assets (customer lists or relationships, trademarks, etc., for example), contingent liabilities (loss reserves, for example), and contingent consideration (“earn-outs,” for example). This list is not exhaustive, but is designed to give you a better understanding of where we think a larger degree of judgment will be required due to the nature of the item and the way it is typically valued.

Depreciable and Amortizable Lives of Long-Lived Assets

The recording of depreciation and amortization expense requires management to exercise significant judgment in estimating the economic useful lives of long-lived assets, particularly intangible assets. With the acquisition of K-Tron, the amortization associated with these estimates is much more significant to our financial statements than in the past.

Management’s assumptions regarding the following factors, among others, affect the determination of estimated economic useful life: management’s experience with similar assets; changes in technology, utilization, wear and tear; estimated cash flows expected to be generated by the asset; and changes in market demand. As our assessment is performed on a periodic basis, changes in any management assumptions may result in a shorter or longer estimated useful life for an asset than originally anticipated. In such a case, we would depreciate or amortize the remaining net book value of the asset over the new estimated remaining life, thereby increasing or decreasing depreciation or amortization expense per year on a prospective basis. As a result, our estimates at any point in time may not be indicative of future circumstances.

Asset Impairment Determinations

Accounting standards require that goodwill and indefinite-lived intangible assets be tested for impairment at least annually or when circumstances would suggest that an impairment may have occurred. Testing of either goodwill or indefinite-lived assets requires that we estimate the fair value of the asset in question.

Estimating fair value for these assets typically requires us to exercise significant judgment, particularly for asset values that are not easily determined by reference to market data. Often estimates for these types of assets are developed using valuation models that require both historical and forecasted inputs, as well as “market participant” expectations. Thus the valuation is directly affected by the inputs we judge as best under the given circumstances. In analyzing the future cash flows of various assets, critical assumptions we make may include some of the following:

- The intended use of assets and the expected cash flows resulting directly from such use;
- Industry-specific economic conditions;
- Customer preferences and behavior patterns; and
- The impact of applicable regulatory initiatives, if any.

Our assumptions are sometimes subjective and can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. Although we believe the assumptions and estimates we make are reasonable and appropriate, different assumptions and estimates could result in an impairment charge which could materially impact our reported financial results by decreasing operating income and lowering asset values on our consolidated balance sheet. When material, we expect to seek assistance of competent valuation professionals when the underlying valuation is more complex or unique.

Tangible and other intangible assets that are subject to depreciation and amortization are also evaluated when circumstances would suggest that an impairment may have occurred. Testing of these assets require that we estimate future cash flows associated with the asset(s) in question.

Recently Issued and Adopted Accounting Standards

For a summary of recently issued and adopted accounting standards applicable to us, see Note 2 to our consolidated financial statements included in Part II, Item 8 of this Form 10-K.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In this section, we tell you about “market risks” we think could have a significant impact on our bottom line or the financial strength of our company. “Market risks” here generally mean how results of operations and the value of assets and liabilities could be affected by market factors such as interest rates, currency exchange rates, the value of commodities, and debt and equity price risks. If those factors change significantly, it could help or hurt our bottom line, depending on how we react to them.

We are exposed to various market risks. We have established policies, procedures, and internal processes governing our management of market risks and the use of financial instruments to manage our exposure to such risks. Our primary exposures are to: collection risk (customer receivables and our Forethought note); fluctuations in market prices for certain purchases of commodities; variability in exchange rates in foreign locations; and volatility in the fair value of our investments. We also have some interest rate exposure. What follows are the specifics.

We have an outstanding note receivable (the “Forethought Note”) and related interest receivable from Forethought with an aggregate carrying value of \$144.8 million as of September 30, 2010. The primary risk with the Forethought Note is collection. Should

Forethought underperform to an extent that it cannot meet its financial obligations, our earnings could be negatively impacted, resulting in a material adverse impact on our financial condition and results of operations. We currently do not expect this to be the case. We estimate the fair value of the note receivable from Forethought based upon comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk adjusted for liquidity considerations. Based upon market data available to us, we estimate that the fair value of the note and accrued interest is approximately \$127.0 million, based upon an estimated yield to maturity of approximately 14% as of September 30, 2010. This is approximately \$17.8 million below its carrying value at September 30, 2010. An increase or decrease of 1% in the discount rate utilized to estimate the fair value of the note (including interest receivable) would indicate a change in fair value of approximately \$4.0 million.

We are subject to market risk from fluctuating market prices of certain purchased commodity raw materials including steel, wood, red metals, and fuel. While these materials are typically available from multiple suppliers, commodity raw materials are subject to market price fluctuations. We generally buy these commodities based upon market prices that are established with the supplier as part of the purchasing process. We generally attempt to obtain firm pricing from our larger suppliers for volumes consistent with planned production. To the extent that commodity prices increase and we do not have firm pricing from our suppliers, or if our suppliers are not able to honor such prices, we may experience a decline in our gross margins to the extent we are not able to increase selling prices of our products or obtain supply chain efficiencies to offset increases in commodity costs.

We have a portfolio of ARS (with an estimated fair value of \$11.9 million as of September 30, 2010). The primary risk here is the lack of a liquid market to sell these investments. If current market conditions do not improve, we may not be able to readily convert the ARS to cash, exposing us to a longer-term risk of impairment, and our earnings could be adversely affected.

We are subject to volatility in our investment portfolio. The investment portfolio includes private equity limited partnerships (“LPs”) and common stock with an aggregate carrying value of \$18.2 million at September 30, 2010. These investments could be adversely affected by general economic conditions, changes in interest rates, default on debt instruments, and other factors, resulting in an adverse impact. The changes in the fair value of the LPs’ underlying investment portfolios can impact us significantly because we record our share of the change in our income statement under the equity method of accounting.

Our pension plans' assets are also subject to volatility that can be caused by fluctuation in general economic conditions. Plan assets are invested by the plans' fiduciaries, which direct investments according to specific policies. Those policies subject investments to the following restrictions in our domestic plan: short-term securities must be rated A2/P2 or higher, fixed income securities must have a quality credit rating of "BBB" or higher, and investments in equities in any one company may not exceed 10% of the equity portfolio. Our income statement is currently shielded from volatility in plan assets due to the way accounting standards are applied for pension plans, although favorable or unfavorable investment performance over the long term will impact our pension expense if it deviates from our assumption related to future rate of return.

With the addition of K-Tron, our exposure to exchange rates are primarily (i) the U.S. dollar versus each of the Swiss franc, the euro, the British pound sterling, the Canadian dollar, and the Swedish krona; and (ii) the Swiss franc versus the euro and the British pound sterling. From time to time we may enter into currency exchange agreements to manage our exposure arising from fluctuating exchange rates related to specific transactions, primarily forecasted intercompany purchasing. Foreign cash balances in currencies other than the Swiss franc are limited in order to manage the transaction exposure caused by the marking to market of non-Swiss franc balances to Swiss franc values on the balance sheet of our Swiss operations. As of September 30, 2010, a 10% change in the foreign exchange rates affecting balance sheet transactional exposures would have resulted in a change in pre-tax earnings of approximately \$0.6 million. This hypothetical change on transactional exposures is based on the difference between the September 30, 2010, actual foreign exchange rates and hypothetical rates assuming a 10% change in foreign exchange rates on that date. We expect to expand our hedging program in fiscal 2011 to help reduce earnings volatility that could occur associated with the non-Swiss franc balances of our Swiss operations.

The translation of the balance sheets of our non-U.S. operations from local currencies into U.S. dollars is also sensitive to changes in foreign exchange rates. These translation gains or losses are recorded as cumulative translation adjustments ("CTA") within accumulated other comprehensive loss on our balance sheet. Using the example above, the hypothetical change in CTA would be calculated by multiplying the net assets of our non-U.S. operations by a 10% change in the applicable foreign exchange rates. The result of this calculation would be to change shareholders' equity by approximately \$21.1 million as of September 30, 2010.

At September 30, 2010, we had \$255.0 million outstanding under our \$400 million revolving credit facility. We are subject to interest rate risk associated with our revolving credit facility which bears a variable rate of interest that is based upon the lender's base rate or the LIBOR rate. The interest we pay on our borrowings is dependent on interest rate conditions and the timing of our financing needs. Assuming our borrowings were to remain at \$255.0 million for 12 months; a 1% move in the related interest rates would increase or decrease our annual interest expense by approximately \$2.6 million.

Schedule II — Valuation and Qualifying Accounts	68

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. In order to evaluate the effectiveness of internal control over financial reporting, management has conducted an assessment, including testing, using the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's internal control over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934 ("Exchange Act"), is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

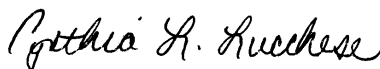

We have excluded K-Tron International, Inc. ("K-Tron") from our assessment of the effectiveness of our internal controls over financial reporting as of September 30, 2010 because it was acquired by us in a purchase business combination on April 1, 2010. The total assets and total revenues acquired in the acquisition of K-Tron represent approximately 14.8% and 14.5%, respectively, of the related consolidated financial statement amounts as of and for the fiscal year ended September 30, 2010.

Based on our assessment, under the criteria established in *Internal Control—Integrated Framework*, issued by the COSO, management has concluded that the company maintained effective internal control over financial reporting as of September 30, 2010.

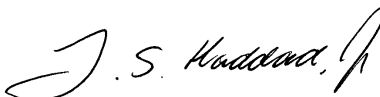

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of September 30, 2010, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Hillenbrand, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Hillenbrand, Inc. and its subsidiaries (the "Company") at September 30, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2010, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As described in Management's Report on Internal Control Over Financial Reporting, management has excluded K-Tron from its assessment of internal control over financial reporting as of September 30, 2010 because it was acquired by the Company in a purchase business combination during 2010. We have also excluded K-Tron from our audit of internal control over financial reporting. K-Tron is a wholly-owned subsidiary whose total assets and total revenues represent 14.8% and 14.5%, respectively, of the related consolidated financial statement amounts as of and for the year ended September 30, 2010.

HILLENBRAND, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(dollars in millions, except per share data)

1. DISTRIBUTION AND DESCRIPTION OF THE BUSINESS

Until the close of business on March 31, 2008, Hillenbrand, Inc. ("Hillenbrand"), formerly known as Batesville Holdings, Inc., was a wholly-owned subsidiary of Hillenbrand Industries, Inc. After the close of business on March 31, 2008, Hillenbrand Industries, Inc., at the approval of its Board of Directors, completed a tax free pro-rata distribution to its shareholders of 100% of the common shares of Hillenbrand (the "Distribution"). Effective April 1, 2008, Hillenbrand began trading on the New York Stock Exchange ("NYSE") under the symbol "HI" as an independent public company. Contemporaneously, Hillenbrand Industries, Inc. changed its name to Hill-Rom Holdings, Inc. ("Hill-Rom"). The Distribution is described in detail in our information statement dated March 17, 2008, filed as Exhibit 99.1 to our Current Report on Form 8-K filed with the U.S. Securities and Exchange Commission ("SEC") on March 18, 2008. Unless the context otherwise requires, the terms "the Company," "we," "our" and "us" refers to Hillenbrand. The term "Hill-Rom" or "parent" refers to Hill-Rom Holdings, Inc. as well as its predecessor, Hillenbrand Industries, Inc.

Significant Components of the Distribution

In connection with the Distribution, we executed the following transactions:

- Hill-Rom transferred to us on March 31, 2008:
 - Investments in private equity limited partnerships and common stock (carrying value of \$27.9) and a note receivable from Forethought Financial Group, Inc. (carrying value of \$124.6).
 - Auction rate securities (carrying value of \$55.3 plus interest receivable of \$0.8).
 - Net unrealized gains on available for sale securities (net of taxes), of \$3.3 as a component of accumulated other comprehensive loss.
 - A joint ownership interest in the corporate conference center facilities (carrying value of \$1.2) and the corporate aircraft (carrying value of \$6.3), in addition to other fixed assets (carrying value of \$0.6).
 - Various deferred income tax assets and liabilities associated with the assets described above (net asset carrying value of \$0.4), our share of prepaid income taxes (carrying value of \$14.6), and income taxes payable to Hill-Rom generated by our operations through the date of separation (carrying value of \$19.2).
 - Cash of \$110.0 and a \$15.4 receivable, which we collected from Hill-Rom in April 2008.
- Hill-Rom distributed approximately 62.3 million shares of our common stock to holders of Hill-Rom common stock. Approximately 0.1 million additional shares of our common stock were issued in connection with certain Hill-Rom restricted stock units that vested in connection with the Distribution. Additionally, certain stock based awards previously issued in Hill-Rom common stock outlined in Note 11 were converted into awards based in our common stock.
- The parent company investment account of \$283.3 immediately prior to the separation was reclassified to additional paid-in capital.
- Subsequent to the Distribution, we finalized the split of our pension plan obligations and certain income tax balances with Hill-Rom. These activities resulted in subsequent adjustments that increased additional paid-in capital by \$1.0 and reduced accumulated other comprehensive loss by an additional \$0.2 as of September 30, 2008.
- Subsequent to the Distribution, we finalized the amounts related to accumulated other comprehensive loss transferred to us by Hill-Rom. This resulted in a subsequent reclassification adjustment that increased other comprehensive loss and increased additional paid in capital by \$4.6 as of September 30, 2009.

Nature of Operations

Hillenbrand, Inc. is the parent holding company of its wholly-owned subsidiaries, Batesville Services, Inc. ("Batesville") and K-Tron International, Inc. ("K-Tron") which are more fully described below. Hillenbrand oversees the operations of its subsidiaries, allocates resources among them, and manages their capital structures.

Through Batesville, we are the leader in the North American death care products industry where we manufacture, distribute, and sell funeral service products to licensed funeral directors who operate licensed funeral homes. Our Batesville branded products consist primarily of burial caskets but also include cremation caskets, burial vaults, containers and urns, selection room display fixturing for funeral homes, and other personalization and memorialization products and services, including web based applications and the creation and hosting of websites for licensed funeral homes.

Through the acquisition of K-Tron, we design, produce, market, and service material handling equipment and systems for a wide variety of industrial markets, particularly in the plastics, food, chemical, pharmaceutical, power generation, coal mining, pulp and paper, wood and forest products, and biomass energy generation industries. K-Tron serves the bulk solids material handling market, which focuses primarily on feeding and pneumatic conveying equipment, size reduction equipment, conveying systems, and screening equipment.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements reflect the consolidated historical results of operations, financial position, and cash flows of the Company (including K-Tron subsequent to its acquisition on April 1, 2010, and those of the former funeral services business of Hill-Rom). Management believes the assumptions underlying the consolidated financial statements, including the assumptions utilized to allocate general corporate overhead costs from Hill-Rom, are reasonable. However, these consolidated financial statements do not include all of the actual expenses that would have been incurred had the Company been a stand-alone entity during the periods prior to the Distribution on March 31, 2008, and do not reflect the consolidated results of operations, financial position, and cash flows as if the Company had been a stand-alone company during those earlier periods. See Note 6 for further information regarding allocated expenses.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Significant inter-company accounts and transactions have been eliminated in consolidation. Prior to the close of business on March 31, 2008, our financial statements were considered “combined” (rather than consolidated) because of the nature of our legal structure prior to the Distribution. We refer to these earlier periods as “consolidated” for comparative and discussion purposes in this Form 10-K.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Accordingly, management exercises judgment in making these estimates. Actual results could differ from those estimates. Examples of such estimates include, but are not limited to, the collectability of our note receivable from Forethought Financial Group, Inc. (“Forethought”), the establishment of reserves related to our customer rebates, allowance for doubtful accounts and early pay discounts, inventories, income taxes, accrued litigation, self insurance reserves, and the estimation of fair value associated with our auction rate securities.

Cash and Cash Equivalents

Subsequent to the Distribution, we instituted our own cash management program, including the overnight transfer of account balances into money market funds. Cash and cash equivalents are stated at cost, which approximates fair value, and include short-term, highly liquid investments with original maturities of three months or less.

Trade Receivables

Trade accounts receivable are recorded at the invoiced amount and generally do not bear interest, unless they become past due. The allowance for doubtful accounts is our best estimate of the amount of probable credit losses and collection risk in our existing accounts receivable portfolio. The allowance for cash discounts and sales returns reserve are based upon historical experience and trends. Account balances are charged against the allowance when we believe it is probable the receivable will not be recovered. We do not have any off-balance sheet credit exposure related to our customers. We generally hold our trade accounts receivable until they are paid. At September 30, 2010 and 2009, we had reserves against our trade receivables of approximately \$20.1 and \$17.3, respectively.

Inventories

Inventories are valued at the lower of cost or market. Inventory costs are determined by the last-in, first-out (LIFO) method for approximately 57% and 83% of our inventories at September 30, 2010 and 2009, respectively. Costs of remaining inventories have been determined principally by the first-in, first-out (FIFO) method. Inventories consisted of the following:

	September 30,	
	2010	2009
Raw materials and components	\$26.6	\$11.5
Work in process	6.7	0.5
Finished goods	34.8	31.6
Reserves for excess or obsolescence	(3.2)	(1.1)
Total inventories	\$64.9	\$42.5

If the FIFO method of inventory accounting, which approximates current cost, had been used for all inventories, they would have been approximately \$12.3 and \$13.2 higher than reported at September 30, 2010 and 2009, respectively.

Properties

Property is recorded at cost and depreciated over the estimated useful lives of the assets using principally the straight-line method. Ranges of estimated useful lives are generally as follows:

Land and land improvements	6 years
Buildings and building improvements	10–40 years
Machinery and equipment	3–10 years

When property is retired from service or otherwise disposed of, the cost and related amount of accumulated depreciation are eliminated. The difference, if any, between the net asset value and the proceeds on sale are charged or credited to income. Total depreciation expense for fiscal years 2010, 2009 and 2008 was \$17.2, \$14.9 and \$15.3 respectively. The major components of property and the related accumulated depreciation were as follows:

	September 30, 2010		September 30, 2009	
	Cost	Accumulated Depreciation	Cost	Accumulated Depreciation
Land and land improvements	\$ 14.2	\$ (3.6)	\$ 7.4	\$ (3.4)
Buildings and building equipment	89.0	(49.6)	73.8	(46.9)
Machinery and equipment	246.1	(186.5)	236.4	(182.0)
Total	\$349.3	\$(239.7)	\$317.6	\$(232.3)

Intangible Assets

Intangible assets are stated at cost and consist predominantly of goodwill, trade names and customer relationships. With the exception of goodwill and trade names (which have indefinite lives), our intangible assets are amortized on a straight-line basis over periods ranging from 5 to 22 years (see Note 3 for K-Tron specific intangible assets). We review intangible assets for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. For intangible assets that amortize, an impairment loss would be recognized when the estimated future undiscounted cash flows expected to result from the use of the asset and its eventual disposition are less than the carrying amount.

We assess the carrying value of goodwill and non-amortizing trade names annually, during the third quarter of each fiscal year, or sooner if events or changes in circumstances indicate that the carrying value of a reporting unit may not be recoverable. For the purposes of that assessment, we have determined that we currently have four reporting units. Based upon our assessment during the quarter ended June 30, 2010, no impairments existed.

A summary of intangible assets and the related accumulated amortization is as follows:

	September 30, 2010		September 30, 2009	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Goodwill	\$196.4	\$ N/A	\$ 5.7	\$ N/A
Trade names, indefinite lives	50.6	N/A	—	N/A
Trade names, amortizing	5.9	(4.4)	5.9	(3.8)
Customer relationships	156.7	(5.0)	1.9	(0.8)
Technology, including patents	16.5	(1.7)	0.1	—
Software	30.9	(23.1)	27.4	(20.3)
Other	2.0	(1.8)	0.3	(0.1)
Total	\$459.0	\$(36.0)	\$41.3	\$(25.0)

Total amortization expense for fiscal years 2010, 2009 and 2008 was \$11.0, \$3.6 and \$3.7, respectively. Based upon intangible assets in service at September 30, 2010, amortization expense is expected to approximate the following for each of the next five fiscal years and thereafter: \$15.3 in 2011, \$13.8 in 2012, \$12.6 in 2013, \$11.6 in 2014, \$9.7 in 2015, and \$113.0 thereafter.

Auction Rate Securities

At September 30, 2010 and 2009, we held a portfolio of auction rate securities (“ARS”) (consisting of highly rated tax exempt state and municipal securities, the majority of which are collateralized by student loans guaranteed by the U.S. government under the Federal Family Education Loan Program). As of September 30, 2010, the underlying securities in the portfolio consist of creditworthy borrowers with AAA or A3 debt ratings. These investments are recorded at fair value in accordance with accounting standards of accounting for investments in debt and equity securities.

In November 2008, we received an enforceable, non-transferable right (the “Put”) from UBS Financial Services (“UBS”) that allowed us to sell to UBS (\$28.4 fair value at September 30, 2009) our then existing UBS ARS at par value (\$30.1 at September 30, 2009) plus accrued interest.

Because the Put had value, we were required to record it on our books as an asset. Therefore, in accordance with accounting standards for the fair value option for financial assets and financial liabilities, we elected to report the Put at its then estimated fair value and record subsequent changes in fair value as a component of “Investment income and other” within the consolidated statements of income. Also, because we intended to sell these securities

to UBS at par value, in accordance with accounting standards for certain investments in debt and equity securities, we reclassified the ARS related to the Put from “available-for-sale” to “trading” securities. As trading securities, the changes in fair value corresponding to the UBS related ARS (previously recorded as a component of accumulated other comprehensive loss) were recorded as a component of “Investment income and other” within our consolidated statements of income. We made these elections so that the effects of changes in the fair value of the UBS related ARS and the related Put would substantially offset within our statement of income, thereby limiting the volatility we might

otherwise have experienced. On June 30, 2010, we exercised the Put, and all remaining UBS ARS were redeemed at par.

During the fourth quarter of fiscal 2010, we determined that we no longer intend to hold the remaining ARS a sufficient period to obtain a full recovery and an other than temporary impairment exists. Accordingly, an impairment charge of \$2.9 was recorded based upon the estimated fair value of the portfolio. Since these ARS were transferred to us in connection with the Distribution, no income from these assets was earned by us in any period prior to April 1, 2008.

The following table presents the activity related to our ARS and the Put right:

	ARS		Put Right ^C	AOCL ^D	(Gain) Loss ^E
	A	B			
Balance at September 30, 2008	\$ 51.1	\$ —	\$ —	\$ 1.6	
Change in fair value prior to Put right	(4.5)	—	—	4.5	\$ —
Gain on receipt of Put right	—	—	3.7	—	(3.7)
Transfer to trading securities	(26.8)	26.8	—	(3.8)	3.8
Change in fair value after Put right	0.8	2.1	(2.0)	(0.8)	(0.1)
Sales or redemptions	(1.8)	(0.5)	—	—	—
Balance at September 30, 2009	18.8	28.4	1.7	1.5	\$ —
Change in fair value	(1.6)	1.7	(1.7)	(1.5)	\$ 3.1
Sales or redemptions	(5.3)	(30.1)	—	—	—
Balance at September 30, 2010	\$ 11.9	\$ —	\$ —	\$ —	\$ 3.1

A — Auction rate securities; available-for-sale, at fair value

B — Auction rate securities; trading, at fair value

C — Put right; at fair value

D — AOCL; amount included within accumulated other comprehensive loss (pre-tax)

E — (Gain) loss; amount included within “Investment income (loss) and other” (pre-tax)

See Note 14 for information related to the determination of fair value related to our ARS.

Note Receivable from Forethought Financial Group, Inc. (the “Forethought Note”)

The Forethought Note primarily represents seller provided financing to Forethought, the entity that purchased Hill-Rom’s former Forethought Financial Services, Inc. subsidiary. The Forethought Note was transferred to us by Hill-Rom in connection with the Distribution. As of September 30, 2010, the carrying value of the Forethought Note consists of the Forethought Note’s face value of \$107.7 and interest receivable of \$37.1. The Forethought Note carries an increasing rate of interest over its original ten-year term beginning June 2004, with interest accruing at 6.0% for the first five years and compounding semi-annually. The stated interest rate increases to 8.0% in June 2009, and to 10.0% in June 2011. The stated interest rates when taken together with amortization of the discount results in an effective interest rate of 9.5% over the

life of the Forethought Note. No payments of interest or principal were due under the Forethought Note until fiscal 2010, at which time annual payments of \$10.0 are required, unless deferred under terms of the Forethought Note. On July 1, 2010, Forethought remitted its first annual interest installment of \$10.0. All outstanding amounts are due at maturity, which is scheduled to be July 2014 unless extended by Forethought for a period of up to two additional years at an interest rate of 12.0%.

We evaluate the Forethought Note for impairment based upon collectability considering current economic conditions, credit loss experience, and other criteria. Performing an impairment evaluation of the Forethought Note requires us to exercise significant judgments as to whether Forethought has the financial wherewithal to make the scheduled payments based upon events or conditions that we are aware of existing on or prior to the balance

sheet date. The Forethought Note agreement provides us access to various kinds of financial information from Forethought including:

- Available capital and surplus within Forethought's primary insurance operations, an indicator of liquidity of the entity;
- Embedded Value, an indicator of enterprise value and an indicator of the ability of the entity to raise capital;
- Forethought's recent investment portfolio results and the quality of the related investments;
- GAAP equity, an indicator of financial strength; and
- Recent GAAP and Statutory financial results (income, loss and related cash flow effects).

We utilize this information to assess the financial strength of Forethought and our prospects for getting paid. If, based upon this evaluation, it is probable that the Forethought Note will not be paid in accordance with its terms, it is deemed impaired. Upon the determination of impairment, if any, an impairment reserve is established based upon the then carrying value of the Forethought Note and the estimated discounted cash flows we expect to receive on an impaired basis.

Because the Forethought Note was transferred to us in connection with the Distribution, no income from this asset was earned by us in any period prior to April 1, 2008.

Investments

Our investment portfolio consists primarily of investments in private equity limited partnerships and common stock (carrying value of \$18.2 and \$18.8 at September 30, 2010 and 2009, respectively).

We use the equity method of accounting for substantially all our private equity limited partnerships, with earnings or losses reported within the line item "Investment income and other" in our consolidated statements of income, including our portion of any unrealized gains or losses experienced by these affiliates. Earnings and carrying values for investments accounted for under the equity method are determined based upon financial statements provided by the investment companies. Certain of these investments require commitments by us to provide additional funding of up to \$3.1. The timing of this funding is uncertain but is expected to occur over the next three to five years.

When an investment is sold, we report the difference between the sales proceeds and its carrying value (determined based on specific identification) as an investment gain or loss. We regularly evaluate all investments for possible impairment based on current economic conditions and other criteria. If there is a decline in an investment's net realizable value that is other-than-temporary, the

decline is recognized as a realized loss, and the cost basis of the investment is reduced to its estimated fair value. The evaluation of investments for impairment requires judgments to be made including (i) the identification of potentially impaired investments; (ii) the determination of their estimated fair value; and (iii) the assessment of whether any decline in estimated fair value is other-than-temporary.

Because the investments were transferred to us in connection with the Distribution, no income from these assets was earned by us in any period prior to April 1, 2008.

Environmental Liabilities

Expenditures that relate to an existing condition caused by past operations, and which do not contribute to current or future revenue generation, are expensed. A reserve is established when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These reserves are determined without consideration of possible loss recoveries from third parties. More specifically, financial management, in consultation with its environmental engineer, estimates the range of liability based on current interpretations of environmental laws and regulations. For each site in which a Company unit is involved, a determination is made of the specific measures that are believed to be required to remediate the site, the estimated total cost to carry out the remediation plan and the periods in which we will make payments toward the remediation plan. We do not make an estimate of general or specific inflation for environmental matters since the number of sites is small, the magnitude of costs to execute remediation plans is not significant, and the estimated time frames to remediate sites are not believed to be lengthy.

Specific costs included in environmental expense and reserves include site assessment, development of a remediation plan, clean-up costs, post-remediation expenditures, monitoring, fines, penalties, and legal fees. Reserve amounts represent the expected undiscounted future cash outflows associated with such plans and actions, and amounted to \$0.4 at both September 30, 2010 and 2009.

Expenditures that relate to current operations are charged to expense.

Judgment Sharing Agreement ("JSA")

As discussed in Note 6, in March 2008, we entered into a JSA with Hill-Rom related to antitrust litigation matters discussed in Note 12. We apply appropriate accounting standards for contingencies in evaluating and accounting for this JSA. The JSA apportions responsibility between us and Hill-Rom for any potential liabilities associated with that litigation.

Self-Insurance

We are generally self-insured up to certain limits for product/general liability, workers' compensation, auto liability, and professional liability insurance programs, as well as certain employee health benefits including medical, drug, and dental. These policies have deductibles and self-insured retentions ranging from \$0.5 to \$1.0 per occurrence, depending upon the type of coverage and policy period. Our policy is to estimate reserves based upon a number of factors including known claims, estimated incurred but not reported claims, and outside actuarial analysis, which are based on historical information along with certain assumptions about future events. Such estimated reserves are classified as other current liabilities and other long-term liabilities within the consolidated balance sheets.

Preferred Stock

The Company has authorized 1,000,000 shares of preferred stock (no par value), of which no shares were issued at September 30, 2010 and 2009.

Accumulated Other Comprehensive Loss

Reporting of comprehensive income requires the net-of-tax effect on foreign currency translation adjustments, unrealized gains or losses on derivative instruments and available for sale securities, along with pension or other defined benefit postretirement plans' actuarial gains/losses and prior service costs to be included as a component of accumulated other comprehensive loss.

The components of accumulated other comprehensive loss, each net of tax (corresponding to income tax rates from between 33.2% to 37.3%, excluding cumulative foreign currency translation adjustment), were as follows:

	September 30,	
	2010	2009
Cumulative foreign currency translation adjustments	\$ 9.1	\$ (3.1)
Items not recognized as a component of net pension and postretirement benefit costs	(52.0)	(51.0)
Net unrealized (loss) on derivative instruments	(0.1)	(0.8)
Net unrealized (loss) on available for sale securities	—	(0.5)
Total	\$(43.0)	\$(55.4)

Revenue Recognition

We recognize revenue in accordance with SEC Staff Accounting Bulletin (SAB) No. 104, "Revenue Recognition." Revenue for our products is most often recognized upon delivery of the products to the customer, but in no case prior to when the risk of loss and other risks and rewards of ownership are transferred. Net revenues reflect gross revenues less sales discounts, customer rebates, sales

incentives, and product returns. In accordance with accounting standards for consideration given by a vendor to a customer (including a reseller of the vendor's products), we record reserves for customer rebates, typically based upon projected customer volumes. In addition, in connection with obtaining long-term supply agreements from our funeral home customers, we may offer sales incentives in the form of custom showrooms and fixtures. Costs associated with these sales incentives are amortized over the term of the related agreement, typically 3 to 5 years. Our sales terms generally offer customers various rights of return. We record reserves for estimated product returns in accordance with the standards for revenue recognition when a right of return exists.

With the addition of K-Tron, we now periodically incur certain revenue transactions, where on occasion, revenue is recognized prior to shipment in accordance with accounting standards commonly referred to as "bill and hold" transactions. Revenue for bill and hold transactions is recorded prior to shipment only when all of the following conditions are met:

- Risk of ownership has passed to the buyer;
- The buyer has made a fixed commitment to purchase the goods in writing;
- The buyer requested the transaction to be on a bill and hold basis;
- There is a fixed and reasonable delivery date;
- No specific performance obligations by the seller remain;
- The goods are segregated from other inventory and not available to others; and
- The product is complete and ready for shipment.

In addition, we also consider the following factors in determining whether to recognize revenue:

- The date by which we expect payment and whether we have modified our normal billing and credit terms to the buyer;
- The business line's history with bill and hold transactions;
- Whether the buyer must bear risk of loss;
- Whether our custodial function is insurable and insured; and
- The business reasons for the bill and hold arrangement have not introduced a contingency to the buyer's fixed commitment to purchase the goods.

Additionally, some of our revenues associated with K-Tron involve multiple elements (i.e. various components to an overall larger order being manufactured for the customer). Periodically these elements are transferred to the customer at different times pursuant to the customer's requirements. In these circumstances we may estimate the stand-alone value of the individual elements in order to determine the appropriate amount of revenue to recognize on the transferred elements.

Cost of Goods Sold

Cost of goods sold consists primarily of purchased material costs, fixed manufacturing expense, variable direct labor, and overhead costs. It also includes costs associated with the distribution and delivery of products to our funeral home customers.

Research and Development Costs

Research and development costs are expensed as incurred as a component of operating expenses and were \$3.8, \$3.8 and \$3.6 for fiscal years 2010, 2009 and 2008, respectively.

Warranty Costs

We provide for the estimated warranty cost of a product at the time revenue is recognized. Warranty expense is normally accrued as a percentage of sales based upon historical information, but may include specific provisions for known conditions when identified. Warranty obligations are affected by actual product performance and by material usage and service costs incurred in making product corrections. Our warranty provision takes into account our best estimate of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. The K-Tron business generally offers a one-year warranty on a majority of its products, and engages in extensive product quality programs and processes, including the active monitoring and evaluation of the quality of its component suppliers, in an effort to minimize warranty obligations. Warranty costs were not material to our consolidated financial results for fiscal years 2010, 2009, and 2008.

Income Taxes

Our operating results had historically been included in Hill-Rom's consolidated U.S. income tax returns for periods prior to the Distribution. In periods subsequent to the Distribution, we filed our own U.S. consolidated income tax returns. Foreign operations file income tax returns in a number of jurisdictions. In periods prior to the Distribution, the provision for income taxes had been determined on a separate return basis as if we were a separate, stand-alone taxpayer rather than a member of Hill-Rom's consolidated income tax return group. Deferred income taxes are computed in accordance with rules under accounting standards for income taxes and reflect the net tax effects of temporary differences between the financial reporting carrying amounts of assets and liabilities and the corresponding income tax amounts. We have a variety of deferred income tax assets in numerous tax jurisdictions. These deferred income tax assets are subject to periodic assessment as to recoverability and if it is determined that it is more likely than not that the benefits will not be realized, valuation allowances are recognized. In evaluating whether it is more likely than not that we would recover these deferred income

tax assets, future taxable income, the reversal of existing temporary differences, and tax planning strategies are considered.

On October 1, 2007, we adopted the new standard for uncertainty in income taxes, which addresses the accounting and disclosure of uncertain income tax positions. This standard prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under this standard, the difference between the tax benefit recognized in the financial statements for a position and the tax benefit claimed in the tax return is referred to as an unrecognized tax benefit.

The adoption of this standard was reflected as a cumulative effect of a change in accounting principle and resulted in a decrease to beginning parent company equity at October 1, 2007, of \$1.8. The total amount of unrecognized tax benefits at that date was \$7.4, which included \$3.7 that, if recognized, would impact the effective tax rate in future periods. The remaining amount relates to items which if recognized, would not impact our effective tax rate. We account for accrued interest and penalties related to unrecognized tax benefits in income tax expense. As of the date of adoption accrued interest and penalties were \$0.2.

Stock-Based Compensation

Under the fair value provisions of the accounting standards, stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the vesting period. In order to determine the fair value of stock options on the date of grant, we utilize the Binomial model. Inherent in this model are assumptions related to a volatility factor, expected life, risk-free interest rate, dividend yield, and expected forfeitures. The risk-free interest rate is based on factual data derived from public sources. The volatility factor, expected life, dividend yield, and expected forfeiture assumptions require significant judgment utilizing historical information, peer data and future expectations.

Derivative Instruments and Hedging Activity

We use derivative financial instruments to manage the economic impact of fluctuations in currency exchange rates. Derivative financial instruments related to currency exchange rates include forward intercompany purchase and sale agreements which generally have terms no greater than fifteen months. We estimate the fair value of derivative financial instruments based on the amount that we would receive or pay to terminate the agreements at the reporting date. The aggregate notional amount of our cash flow currency derivative instruments outstanding was \$11.8 and \$11.2 at September 30, 2010 and 2009, respectively. The fair value of these contracts resulted in liabilities of (\$0.5) and (\$1.1) at September 30, 2010 and 2009, respectively.

To account for our derivative financial instruments, we follow accounting standards established for derivative instruments and hedging activities. Derivative financial instruments are recognized on the consolidated balance sheets as either assets or liabilities and are measured at fair value. Changes in the fair value of derivatives are recorded each period in earnings or accumulated other comprehensive loss, depending on whether a derivative is designed and effective as part of a hedge transaction, and if it is, the type of hedge transaction. Gains and losses on derivative instruments reported in accumulated other comprehensive loss are subsequently included in earnings in the periods in which earnings are affected by the hedged item. These activities have not had a material effect on our financial position or results of operations for the periods presented herein.

Foreign Currency

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars at current rates of exchange at the end of the reporting period, with translation gains and losses being recorded as a separate component of shareholders' equity. Revenue and expense are translated at average rates prevailing during the reporting period.

Business Acquisitions and Related Business Acquisition Costs

Assets and liabilities associated with business acquisitions are recorded at fair value, using the acquisition method of accounting. During the acquisition measurement period, we recognize additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if then known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period will generally not exceed one year from the acquisition date.

Business acquisition costs are recognized separately from business acquisitions, are expensed as incurred, and are reported as a component of operating expenses. We define these costs to include: finder's fees, advisory, legal, accounting, valuation, and other professional or consulting fees, as well as travel associated with the evaluation and effort to acquire specific businesses. They also include initial, non-recurring costs associated with acquisition tax planning, retention bonuses, and related integration costs. These costs exclude the on-going costs of our business development department and other target evaluation costs.

Segment Information

With the addition of K-Tron, we now conduct our operations through two reportable business segments: Batesville and K-Tron. These reporting segments are determined on the basis of how we internally report and evaluate financial information used to make

operating decisions and evaluate results. For external reporting purposes, we aggregate operating segments into reportable segments when they share or have similar economic characteristics and include similar products and services, production processes, classes of customers, and methods of distribution.

Generally in our management reporting, we record the direct costs of business operations to the applicable reporting segment, including stock-based compensation, asset impairments, restructuring activities, and business acquisition costs. Our corporate cost center provides management and administrative services to each of our reporting segments. These services primarily include treasury management, human resources, legal, business development, and other public company support functions such as internal audit, investor relations, reporting, and tax compliance. With limited exception for certain professional services and technology costs, we generally do not allocate these types of expenses among our reporting segments.

Restructuring Costs

Restructuring charges can occur when we take action to exit or significantly curtail a part of our operations or change the deployment of our assets or personnel. When applicable, a restructuring charge can consist of an impairment or accelerated depreciation of effected assets, severance costs associated with reductions to the work force, and charges for legal obligations for which no future benefit will be derived.

During the fourth fiscal quarter 2010, we approved a plan to restructure the use of our jointly owned aircraft with Hill-Rom and revised the cost structure of the agreement that provides us support services at the related airfield operations. As a result, we recorded an impairment charge of \$2.9 on our interest in two (of four) jointly owned aircraft (aggregate carrying value of \$4.6 as of September 30, 2010) and \$0.1 related to severance. The fair value of the impaired aircraft was determined based upon observed pricing for similar assets.

Recently Adopted Accounting Standards

In October 2009, the Financial Accounting Standards Board ("FASB") issued an accounting standards update titled *Multiple-Deliverable Revenue Arrangements (Topic 605, Revenue Recognition)*, a new standard related to the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. This standard establishes a selling price hierarchy for determining the selling price of a deliverable, which is based on: (a) vendor-specific objective evidence; (b) third-party evidence; or (c) estimates. This standard also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the

inception of the arrangement to all deliverables using the relative selling price method. In addition, this standard significantly expands required disclosures related to a vendor's multiple-deliverable revenue arrangements. This standard is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and early adoption is permitted. A company may elect, but will not be required, to adopt the amendments in this standard retroactively for all prior periods. Our adoption of this standard on April 1, 2010, had no material impact to our consolidated financial statements.

In February 2010, the FASB issued an accounting standards update titled *Amendments to Certain Recognition and Disclosure Requirements (Topic 855, Subsequent Events)* which among other things amended the accounting standards to remove the requirement for an SEC filer to disclose the date through which subsequent events have been evaluated. This change alleviates potential conflicts between the accounting standards and the SEC's requirements. All of the amendments in this update are effective upon issuance of this update.

Recently Issued Accounting Standards

In January 2010, the FASB issued an accounting standard titled *Improving Disclosures about Fair Value Measurements (Topic 820, Fair Value Measurements and Disclosures)*. This standard revises two disclosure requirements concerning fair value measurements and clarifies two others. It requires separate presentation of significant transfers into and out of Levels 1 and 2 of the fair value hierarchy and disclosure of the reasons for such transfers. It will also require the presentation of purchases, sales, issuances and settlements within Level 3 on a gross basis rather than a net basis. The amendments also clarify that disclosures should be disaggregated by class of asset or liability and that disclosures about inputs and valuation techniques should be provided for both recurring and non-recurring fair value measurements. Our disclosures about fair value measurements are presented in Note 14. These new disclosure requirements were first effective for our financial statements for the period ending December 31, 2009, except for the requirement concerning gross presentation of Level 3 activity, which is effective for fiscal years beginning after December 15, 2010.

In July 2010, the FASB issued an accounting standard titled *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses (Topic 310, Receivables)*. The new standard requires companies to provide more disclosures about the credit quality of their financing receivables, which include

loans, lease receivables, and other long-term receivables, and the credit reserves held against them. The disclosure requirements as of the end of a reporting period will be effective for us at the end of first quarter of fiscal 2011 (December 31, 2010).

3. ACQUISITIONS

K-Tron Acquisition

On April 1, 2010, we completed the acquisition of K-Tron. An aggregate purchase price of \$435.2 was paid to K-Tron shareholders for all of the outstanding stock of K-Tron. This resulted in a net cash purchase price of \$369.0 when adjusted for \$66.2 of K-Tron cash acquired (and an enterprise value purchase price of \$376.0 when further adjusted for \$7.0 of K-Tron debt assumed). To finance the purchase of K-Tron, we utilized \$375.0 of borrowings under our \$400 revolving credit facility and cash on hand at the date of close.

We believe the acquisition of K-Tron provides several compelling benefits to us, including: attractive product, industry and customer diversification; a sizable new global platform within the bulk solids material handling market; preservation of our high quality of earnings and cash flows; improvement of our growth potential; meaningful opportunities to improve K-Tron's financial performance through the application of lean business practices; and a strong cultural fit for us with a proven management team.

As of April 1, 2010, we had recognized goodwill related to this transaction for the excess of cash paid over the fair value of the assets acquired. Approximately \$18.0 of this goodwill will be deductible for income tax purposes.

The following table summarizes the allocation of the purchase price and the estimated fair values of the assets acquired and liabilities assumed at the date of the acquisition:

	April 1, 2010
Cash and cash equivalents	\$ 66.2
Current assets, excluding cash and cash equivalents	67.2
Property	30.0
Identifiable intangible assets	218.7
Goodwill	185.8
Other non-current assets	4.7
Total assets acquired	572.6
Current liabilities	48.1
Debt	7.0
Deferred income taxes	81.9
Other long-term liabilities	0.4
Total liabilities assumed	137.4
Aggregate purchase price	\$435.2

Amounts assigned to identifiable intangible assets are being amortized on a straight-line basis over their estimated useful lives. At April 1, 2010, the amounts assigned and useful lives were as follows:

	Fair Values	Weighted Average Period Over Which Asset Is Amortized (Years)
Trade names	\$ 50.6	Indefinite
Customer relationships	150.3	20.6
Technology, including patents	16.1	5.0
Backlog	1.7	<1.0
Total identifiable intangible assets	\$218.7	

The fair value of the intangible assets acquired with K-Tron were determined, in accordance with the accounting standards for business combinations, based on the estimated fair values using valuation techniques consistent with the market approach or income approach to measure fair value. The remaining useful lives were estimated based on the future economic benefit expected to be received from the assets.

Trade receivables acquired in connection with the acquisition were \$18.1, net of reserves of \$1.3. Identified contingent liabilities assumed in connection with the acquisition were not material to our consolidated financial statements.

During the twelve months ended September 30, 2010, we incurred \$10.5 of business acquisition costs associated with our acquisition of K-Tron. These costs have been recorded as a component of operating expenses. See Note 15 for K-Tron's financial contribution to our consolidated financial results since the date of acquisition.

The unaudited financial information in the table below summarizes the combined results of operations for the Company, including K-Tron, on a pro forma basis, as though the companies had been combined as of the beginning of the periods presented. The pro forma financial information is presented for informational purposes only and may not be indicative of the results of operations that would have been achieved if the acquisition had actually taken place at the beginning of the periods presented and should not be taken as being representative of our future consolidated results of operations. The pro forma financial information for the fiscal years ended September 30, 2010 and 2009, includes pro forma adjustments to include additional interest expense (assuming we would have been able to borrow \$375.0 at October 1, 2008, consisting of \$226.6 under our \$400 revolving credit facility and \$148.4 from our public debt offering discussed

in Note 5), additional depreciation and amortization expense (associated with fair value adjustments to property and intangible assets), and excludes business acquisition costs and the non-recurring effects of fair value adjustments to inventory and backlog, all net of estimated income tax effects.

	Fiscal Year Ended September 30,	
	2010	2009
Pro forma net revenues	\$830.9	\$861.9
Pro forma net income	107.0	110.7
Pro forma diluted earnings per share	1.73	1.79

Other Acquisitions

During the fiscal 2010, Batesville completed two acquisitions with an aggregate purchase price of \$3.0, of which \$2.5 had been paid. The acquisitions consisted of primarily intangible assets. If these acquisitions had occurred at the beginning of fiscal 2009, the impact to our consolidated financial statements would not have been material.

4. NOTES RECEIVABLE FROM CUSTOMERS

We have a number of notes with customers representing long-term payment plans that were negotiated to settle unpaid balances. These notes generally carry repayment terms up to five years, with interest rates varying from 0% to 12%. The notes that carry below market interest rates are discounted using current market interest rates. The current portion of these notes are included in trade receivables and the long-term portion in other assets in the consolidated balance sheets. Along with our trade receivables, we evaluate the recoverability of notes receivable and record allowances thereon, as appropriate.

Notes receivable consisted of the following:

	September 30,	
	2010	2009
Customer notes, net of discount of \$0.2 in 2010 and 2009	\$ 8.6	\$ 9.4
Less current portion	(4.4)	(4.8)
Notes receivable — long-term portion	\$ 4.2	\$ 4.6
Maturities in fiscal years		
2011	4.4	
2012	1.8	
2013	1.1	
2014	0.6	
2015	0.3	
2016 and beyond	0.4	
Total notes receivable	\$ 8.6	

5. FINANCING AGREEMENTS

The following table presents borrowings under our financing agreements:

	September 30,	
	2010	2009
\$400 revolving credit facility	\$255.0	\$ 60.0
\$150 senior unsecured notes, due July 15, 2020, net of discount	148.4	—
Total debt	403.4	60.0
Less current portion	—	(60.0)
Long-term debt, less current portion	\$403.4	\$ —

\$400 Revolving Credit Facility

In March 2008, we entered into a \$400 five-year senior revolving credit facility (the “Facility”) with a syndicate of banks (the “Banks”). The term of the Facility expires in March 2013. Borrowings under the Facility bear interest at variable rates, based upon the Banks’ base rate or LIBOR plus a margin amount based upon our public debt rating (all as provided in the credit agreement governing the Facility). For the fiscal years ended September 30, 2010 and 2009, the applicable weighted average interest rates were 0.8% and 1.5%, respectively. The availability of borrowings under the Facility is subject to our ability at the time of borrowing to meet certain specified conditions. These conditions include compliance with covenants contained in the credit agreement governing the Facility, absence of default under the Facility, and continued accuracy of certain representations and warranties contained in the credit agreement. The credit agreement contains covenants that, among other matters, require the Company to maintain a ratio of Consolidated Indebtedness to Consolidated EBITDA (each as defined in the credit agreement) of not more than 3.5:1.0 and a ratio of Consolidated EBITDA to interest expense of not less than 3.5:1.0. The proceeds of the Facility may be used: (i) for working capital and other lawful corporate purposes and (ii) to finance acquisitions. Subsequent to our acquisition of K-Tron, we have classified the Facility as long term based upon the contractual terms of the agreement, although we may pay a portion down over the next twelve months.

As of September 30, 2010, we (i) had \$6.7 outstanding, undrawn letters of credit under the Facility, (ii) were in compliance with all covenants set forth in the credit agreement, and (iii) had \$138.3 of remaining borrowing capacity available under the Facility. However, under our Distribution Agreement with Hill-Rom, our ability to borrow against the Facility for certain strategic transactions such as acquisitions may be limited. For more information, see Note 6 below.

In addition to the amounts above, we had \$6.0 in outstanding letters of credit and bank guarantees to other financial institutions as of September 30, 2010. A portion of these arrangements is secured by our operating facility in Switzerland and \$0.3 of restricted cash at September 30, 2010.

\$150 Senior Unsecured Notes

On July 9, 2010, we issued and sold \$150.0 in principal amount 5.5% fixed rate senior unsecured notes (the “Notes”). The Notes are due July 2020 and were issued in a public offering pursuant to our Registration Statement on Form S-3 filed with the SEC on July 6, 2010.

The Notes bear interest at a fixed rate of 5.5% per year, payable semi-annually in cash in arrears, commencing on January 15, 2011. The Notes were issued at an original issue discount (“OID”) of \$1.6, resulting in an initial carrying value of \$148.4 at the date of issuance. The OID is being amortized into interest expense over the term of the Notes using the effective interest rate method. The effective interest rate method results in an annual interest rate of 5.65%. Additionally, deferred financing costs associated with the Notes of \$2.1 are being amortized to interest expense on a straight-line basis over the term of the Notes.

The Notes are unsecured and unsubordinated obligations of Hillenbrand, Inc. and rank equally in right of payment with all of our other existing and future unsecured and unsubordinated obligations. The Notes are effectively junior subordinated to our existing and future secured debt to the extent of the value of the assets securing such debt. Additionally, as our subsidiaries are separate and distinct legal entities from us, they have no obligation to pay amounts due on the Notes or provide us with funds to meet our payment obligations on the Notes. As a result, the Notes are structurally subordinated to all existing and future debt and other obligations, including trade payables, of our subsidiaries.

The indenture governing the Notes does not limit our ability, or the ability of our subsidiaries, to incur additional indebtedness. However, it does contain certain covenants that restrict our ability, and our ability to permit our subsidiaries, to create or incur secured debt and to engage in certain sale and leaseback transactions. The indenture also defines events of defaults, such as failure to make payments of principal and interest on debt securities issued under the indenture, and provides holders of debt securities with remedies if we fail to perform specific obligations.

Additionally, in the event of a “Change of Control Triggering Event” (as defined in the Global Note governing the Notes), each holder of the Notes has the right to require us to purchase all or a portion of such holder’s Notes at a purchase price equal to 101%

of the principal amount of such Notes plus accrued and unpaid interest, if any, to the date of purchase. At our option, at any time and from time to time, we may also redeem the Notes, in whole or in part, on not less than 30 nor more than 60 days prior notice mailed to the holders of the Notes. The Notes will be redeemable at a redemption price, plus accrued and unpaid interest to the date of redemption, equal to the greater of (i) 100% of the principal amount of the Notes to be redeemed or (ii) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes to be redeemed that would be due after the related redemption date, but for such redemption, discounted to the redemption date on a semi-annual basis at the Treasury Rate (as defined in the Global Note governing the Notes) plus 40 basis points.

6. TRANSACTIONS WITH HILL-ROM

Allocation of Corporate Expenses

Through March 31, 2008, our operating expenses within our consolidated statements of income include allocations from Hill-Rom for certain Hill-Rom retained corporate expenses, including treasury, accounting, tax, legal, internal audit, human resources, investor relations, general management, board of directors, information technology, other shared services, and certain severance costs. These allocations were determined on bases that management considered to be reasonable reflections of the utilization of services provided to, or the benefits received by, us. The allocation methods included revenues, headcount, square footage, actual utilization applied to variable operating costs, and specific identification based upon actual costs incurred when the nature of the item or charge was specific to us. See Note 7 for further discussion of retirement benefit and other postretirement healthcare costs. Hill-Rom allocated corporate costs, included within our fiscal 2008 operating expenses were \$7.4.

Separation Costs

In addition to the allocated corporate expenses described above, we incurred or were allocated costs related to the separation from Hill-Rom of \$0.1 and \$15.6 for fiscal years 2009 and 2008, respectively. These costs consist primarily of investment banking and advisory fees, legal, accounting, recruiting, and consulting fees allocated based upon revenue or specific identification. It also includes the modification and acceleration charges related to stock-based compensation described below.

On March 14, 2008, the Board of Directors of Hill-Rom approved a modification to Hill-Rom's stock incentive plan that would automatically ensure that participants neither gained nor lost value purely as a result of the separation. As a result of the modification, we recorded \$1.1 of stock-based compensation expense related to our employees as of that date. In addition, the separation caused the acceleration of \$3.2 of stock-based compensation expense on previously unvested restricted stock units which are now fully vested. See Note 11 for further information on our stock-based compensation programs.

Agreements with Hill-Rom

We entered into a Distribution Agreement as well as a number of other agreements with Hill-Rom to accomplish the separation of our business from Hill-Rom and the distribution of our common stock to Hill-Rom's shareholders and to govern the relationship between us and Hill-Rom subsequent to the Distribution. These agreements included:

- Distribution Agreement
- Judgment Sharing Agreement
- Employee Matters Agreement
- Tax Sharing Agreement

In addition, we and Hill-Rom entered into shared services and transition services agreements to outline certain services to be provided by each company to the other following the separation, as well as leases and subleases for locations that are being shared after the Distribution. We also entered into agreements providing for the joint ownership by us and Hill-Rom of certain assets, including certain aircraft and corporate conference facilities used by both companies. We also entered into a limited, mutual right of first offer or right of first refusal agreement with Hill-Rom with respect to various real estate and improvements thereon owned by us or Hill-Rom in the Batesville, Indiana area.

The Distribution Agreement, Judgment Sharing Agreement, Employee Matters Agreement and Tax Sharing Agreement were each filed as exhibits to the Company's Current Report on Form 8-K filed with the SEC on March 18, 2008. The following presents a summary of these agreements between Hill-Rom and us.

Distribution Agreement. The Distribution Agreement sets forth the agreements between Hill-Rom and us with respect to the principal corporate transactions that were required to effect the separation and the distribution of our shares to Hill-Rom shareholders, the allocation of certain corporate assets and liabilities, and other agreements governing the relationship between Hill-Rom and us.

The Distribution Agreement provides that we and our subsidiaries will release and discharge Hill-Rom and its subsidiaries from all liabilities to us and our subsidiaries of any sort, including liabilities in connection with the transactions contemplated by the Distribution Agreement, except as expressly set forth in the agreement. Conversely, Hill-Rom and its subsidiaries will release and discharge us and our subsidiaries from all liabilities to Hill-Rom and its subsidiaries of any sort, including liabilities in connection with the transactions contemplated by the Distribution Agreement, except as expressly set forth in the agreement. The releases will not release any party from, among other matters, liabilities assumed by or allocated to the party pursuant to the Distribution Agreement or the other agreements entered into in connection with the separation or from the indemnification and contribution obligations under the Distribution Agreement or such other agreements. In addition, the Distribution Agreement provides that both Hill-Rom and we will indemnify each other against certain liabilities related to our respective business operations.

The Distribution Agreement also establishes procedures with respect to claims subject to indemnification and related matters.

In order to preserve the credit capacity of each of Hill-Rom and us to perform our respective obligations under the judgment sharing agreement described below, the Distribution Agreement imposes certain restrictive covenants on Hill-Rom and us. Specifically, the Distribution Agreement provides that, until the occurrence of an Agreed Termination Event (as described below), we and our subsidiaries will not:

- incur indebtedness to finance the payment of any extraordinary cash dividend on our outstanding capital stock or the repurchase of any outstanding shares of our capital stock (the parties have agreed that either of them can apply available cash to reduce indebtedness outstanding at the time of the Distribution, or generated by its ongoing operations after the Distribution, and subsequently incur a comparable amount of indebtedness for the purpose of paying an extraordinary cash dividend or repurchasing shares of capital stock without contravening the prohibitions set forth in this covenant);
- declare and pay regular quarterly cash dividends on our shares of common stock in excess of \$0.1825 per share quarterly dividend (increased by amendments of the Distribution Agreement to \$0.185 and \$0.1875 per share per quarter in fiscal 2009 and 2010, respectively — see below);
- make any acquisition outside our core area of business, defined to mean the manufacture or sale of funeral service products, or any of our existing business lines, or any other basic manufacturing or distribution business where it is reasonable to assume that our core competencies could add enterprise value;

- incur indebtedness in excess of \$100 to finance any acquisition in our core area of business without the receipt of an opinion from a qualified investment banker that the transaction is fair to our shareholders from a financial point of view; or
- incur indebtedness to make an acquisition in our core area of business that either (i) causes our ratio, calculated as provided in the Distribution Agreement, of Pro Forma Consolidated Total Debt to Consolidated EBITDA (each as defined in the Distribution Agreement) to exceed 1.8x or (ii) causes our credit rating by either Standard & Poor's Ratings Services or Moody's Investor Services to fall more than one category below its initial rating after giving effect to the Distribution.

As used in the Distribution Agreement, "Agreed Termination Event" means the first to occur of (i) the full and complete satisfaction of a trial court judgment in the last pending antitrust litigation matter described in Note 12, Commitments and Contingencies (including any other matter that is consolidated with any such matter) or the suspension of the execution of such judgment by the posting of a superseded bond or (ii) the settlement or voluntary dismissal of such last pending matter as to us and Hill-Rom. These restrictive covenants will terminate in the event that either Hill-Rom's or our funding obligations under the Judgment Sharing Agreement terminate in accordance with the terms of that agreement. The Distribution Agreement imposes similar restrictions on Hill-Rom and its subsidiaries, except that the definition of core business is appropriate for Hill-Rom.

Effective December 4, 2008, we entered into a letter agreement with Hill-Rom that amended the Distribution Agreement. The Letter Agreement permitted us to increase our regular cash dividends from \$0.73 per fiscal year to \$0.74 per share in fiscal 2009. Subsequently, in September 2009, we entered into a second letter agreement with Hill-Rom that further amended the Distribution Agreement. The second letter agreement permitted us to increase our regular cash dividends from \$0.74 per fiscal year to \$0.75 per share in fiscal 2010 and in subsequent fiscal years.

Judgment Sharing Agreement ("JSA"). Because we, Hill-Rom and the other co-defendants in the antitrust litigation matters described in Note 12 are jointly and severally liable for any damages that may be assessed at trial with no statutory contribution rights among the defendants, we and Hill-Rom entered into a JSA to allocate any potential liability under these cases and any other case that is consolidated with any such case. We believe that we have committed no wrongdoing as alleged by the plaintiffs and that we have meritorious defenses to class certification and to plaintiffs' underlying allegations and damage theories.

Under the JSA, the aggregate amount that we and Hill-Rom will be required to pay or post in cash (i) to satisfy in its entirety any claim (including upon settlement) once the action has been finally judicially determined or (ii) to post a bond, in the event we or Hill-Rom elect to do so, to stay the execution of any adverse judgment pending its final determination, will be funded in the following order of priority:

- First, we will be required to contribute an amount equal to:
 - the maximum amount of cash and cash proceeds that we have on hand or are able to raise using our best efforts, without any obligation to sell assets other than cash equivalents, and subject to limitations on the amount of equity securities we are required to issue, and the ability to retain cash sufficient to operate our business in the normal course, which we refer to as “maximum funding proceeds,” minus
 - the difference between \$50 and the amount of cash retained to operate the business if the amount of such retained cash is less than \$50;
- Second, Hill-Rom and its subsidiaries will be required to contribute their maximum funding proceeds; and
- Third, we will be required to contribute the remainder of our maximum funding proceeds.

Neither we nor Hill-Rom will be required to raise or provide funds if the total amount of funds available to both us and Hill-Rom would not be sufficient to cover a judgment or settlement amount or the cost of the appeal bond. The funding obligations of each company also are subject to a limitation relating to that company’s continued solvency. The JSA provides that if the foregoing allocation is held to be unenforceable, we and Hill-Rom will be required to contribute to satisfy any funding obligation based upon a mutually satisfactory agreement as to our and Hill-Rom’s relative culpability (if any) or, failing such an agreement, pursuant to arbitration under the arbitration provisions contained in the JSA.

The JSA provides that we are responsible for bearing all fees and costs incurred in the defense of the antitrust litigation matters on behalf of ourselves and Hill-Rom.

The Distribution Agreement contains provisions governing the joint defense of the antitrust litigation and other claims.

In the event that Hill-Rom or we are dismissed as a defendant in the antitrust litigation matters (except where the dismissal results from a settlement agreement other than a settlement not including both us and Hill-Rom) or are found upon conclusion of trial not to be liable for payment of any damages to the plaintiffs, any funding obligations under the JSA of the party so dismissed or found not liable will terminate once such dismissal or finding of no liability is finally judicially determined.

Employee Matters Agreement. We entered into an Employee Matters Agreement with Hill-Rom prior to the Distribution that governs our compensation and employee benefit obligations with respect to our directors and our current and former employees, along with the assumption of liabilities for certain former Hill-Rom directors and employees and former employees of other non-medical technology businesses. The Employee Matters Agreement allocates liabilities and responsibilities relating to employee compensation and benefits plans and programs and other related matters in connection with the Distribution including, without limitation, the treatment of outstanding Hill-Rom equity-based awards, certain outstanding annual and long-term incentive awards, existing deferred compensation obligations and certain retirement, postretirement, and welfare benefit obligations. In connection with the Distribution, we adopted, for the benefit of our employees and directors, a variety of compensation and employee benefits plans that are generally comparable in the aggregate to those provided previously by Hill-Rom immediately prior to the Distribution. We reserve the right to amend, modify, or terminate each such plan in accordance with the terms of that plan. With certain possible exceptions, the Employee Matters Agreement provided that as of the date of the Distribution, our employees and directors ceased to be active participants in, and we generally ceased to be a participating employer in, the benefit plans and programs maintained by Hill-Rom. At the time of the Distribution, our employees and directors became eligible to participate in all of our applicable plans. In general, we credited each of our employees with his or her service with Hill-Rom prior to the Distribution for all purposes under plans maintained by us, to the extent the corresponding Hill-Rom plans gave credit for such service and such crediting did not result in a duplication of benefits.

The Employee Matters Agreement provides that as of the Distribution date, except as specifically provided therein, we assumed, retained, and are liable for all wages, salaries, welfare, incentive compensation, and employee-related obligations and liabilities for our directors and all current and former employees of our business, along with those for certain former Hill-Rom directors and corporate employees and former employees of other non-medical technology businesses. Accordingly, such liabilities have been included in our consolidated financial statements for all periods presented herein. The Distribution Agreement provides that if neither we nor Hill-Rom is entitled to receive a full deduction for any liabilities discharged by us with respect to these Hill-Rom directors and former employees, we would reassign those liabilities back to Hill-Rom and pay Hill-Rom an amount equal to the then carrying value of these liabilities on our books and records, net of taxes. Additionally, Hill-Rom and we agreed that with the assumption of liabilities for these Hill-Rom directors and former

employees, we are entitled to the tax benefit from the satisfaction of such liabilities. Accordingly, we originally reflected this tax benefit as an amount due from Hill-Rom in the amount of \$9.1 at March 31, 2008. Subsequent to the Distribution date, we and Hill-Rom have determined that we are entitled to receive a full deduction for the discharge of these liabilities. Accordingly, we have reclassified the amount due from Hill-Rom as a component of deferred income tax assets as of September 30, 2008.

The Employee Matters Agreement also provided for the transfer of assets and liabilities relating to the predistribution participation of all employees and directors for which we have assumed responsibility in various Hill-Rom retirement, postretirement, welfare, incentive compensation, and employee benefit plans from such plans to the applicable plans we adopt for the benefit of our employees and directors. The Employee Matters Agreement provides that we and Hill-Rom may arrange with current service providers with respect to Hill-Rom's employee benefit plans to continue such services on a shared basis for a period of time following the Distribution and that we will reimburse Hill-Rom for our share of the cost of such shared services.

Tax Sharing Agreement. We entered into a Tax Sharing Agreement with Hill-Rom that generally governs Hill-Rom's and our respective rights, responsibilities, and obligations with respect to taxes, including ordinary course of business taxes and taxes, if any, incurred as a result of any failure of the Distribution to qualify as a tax-free distribution. Under the Tax Sharing Agreement, with certain exceptions, we are generally responsible for the payment of all income and non-income taxes attributable to our operations and the operations of our direct and indirect subsidiaries, whether or not such tax liability is reflected on a consolidated or combined tax return filed by Hill-Rom. The Tax Sharing Agreement also imposes restrictions on our and Hill-Rom's ability to engage in certain actions following our separation from Hill-Rom and sets forth the respective obligations among us and Hill-Rom with respect to the filing of tax returns, the administration of tax contests, assistance and cooperation, and other matters. The Company generally will be responsible for 43.7% of any taxes that arise from the failure of the Distribution to qualify as a tax-free Distribution for U.S. federal income tax purposes, if such failure is for any reason for which neither the Company nor Hill-Rom is responsible.

Shared Services and Transitional Services Agreements. We entered into shared services agreements and transitional services agreements with Hill-Rom in connection with the separation. The shared services agreements address services that may be provided for an extended period, while the transitional services agreements

covers services that are intended to be provided for a limited period while the recipient of the services makes other arrangements for these services. Under the shared services agreements, we and Hill-Rom agree to provide certain services to each other following the separation for an initial term of two years, with automatic two-year extensions if commercially viable alternatives for the services are not available, except as noted below. After the initial two-year term, either party may terminate an agreement by notice to the other party, and the recipient of the services must terminate if commercially viable alternatives for the services are available. For purposes of the foregoing, the determination of whether commercially viable alternatives are available is in the discretion of the recipient of the services. These services include aviation services related to the airfield that Hill-Rom owns and operates and certain aircraft that Hill-Rom and we jointly own and operate following the separation, as well as certain ground transportation and fleet maintenance services. In addition, due to the interrelated nature of certain facilities that are owned by Hill-Rom and us, we entered into agreements requiring Hill-Rom and us to maintain our respective parts of such facilities, including, for example, maintaining fire protection systems for the facilities. In general, the recipient of services is billed for the services at the fair value of the services, except that we will be billed at cost for aviation services provided to us by Hill-Rom, and we and Hill-Rom are independently responsible for our respective obligations to maintain our portions of the interrelated facilities. Hill-Rom continues to provide us aviation services related to the airfield for as long as we continue to own an interest in certain jointly owned or other private aircraft. Ground transportation services can continue as long as Hill-Rom and we continue jointly to own corporate conference facilities used by both companies. Obligations under the agreements relating to the maintenance of interrelated facilities can continue for so long as required for the proper maintenance, operation, and use of such facilities or until such interrelated facilities are segregated. Under the transitional services agreements, Hill-Rom provides certain services to us for a specified period following the separation. The services to be provided may include services regarding certain public company staffing needs, legal services, human resources services, medical services, and certain information technology services. We are generally billed at cost for these services, including information technology services provided through a third party under a contract to which Hill-Rom is a party. The transitional services agreements generally provide that the services will continue for a period of up to two years following the separation, subject to earlier termination by the recipient of the services and to extension if parties agree.

7. RETIREMENT AND POSTRETIREMENT BENEFITS

We sponsor retirement and postretirement plans covering a majority of our employees. Expense recognized in relation to these defined benefit retirement plans and the postretirement healthcare plan is based upon actuarial valuations and inherent in those valuations are key assumptions including discount rates, and where applicable, expected returns on assets, projected future salary rates, and projected healthcare cost trends. The discount rates used in the valuation of our defined benefit pension and postretirement plans are evaluated annually based on current market conditions. In setting these rates we utilize long-term bond indices and yield curves as a preliminary indication of interest rate movements, and then make adjustments to the respective indices to reflect differences in the terms of the bonds covered under the indices in comparison to the projected outflow of our pension obligations. Our overall expected long-term rate of return on pension assets is based on historical and expected future returns, which are inflation adjusted and weighted for the expected return for each component of the investment portfolio. Our rate of assumed compensation increase is also based on our specific historical trends of past wage adjustments in recent years.

Defined Benefit Retirement Plans

Approximately 59% of our employees participate in one of three retirement programs, including the master defined benefit retirement plan, the defined benefit plan of our Swiss subsidiary, and the supplemental executive defined benefit retirement plan. We fund the pension trusts in compliance with ERISA or local funding requirements and as necessary to provide for current service and for any unfunded projected future benefit obligation over a reasonable period. The benefits for these plans are based primarily on years of service and the employee's level of compensation during specific periods of employment. All our pension plans have a September 30 measurement date.

Effect on Operations. The components of net pension costs under defined benefit retirement plans were as follows:

	Fiscal Year Ended September 30,		
	2010	2009	2008
Service cost	\$ 5.6	\$ 3.3	\$ 4.0
Interest cost	12.7	12.6	11.3
Expected return on plan assets	(13.9)	(13.1)	(12.4)
Amortization of unrecognized prior service cost, net	0.9	0.8	0.7
Amortization of actuarial loss	3.0	—	—
Net pension costs	\$ 8.3	\$ 3.6	\$ 3.6

Obligations and Funded Status. The changes in the projected benefit obligations, plan assets, and funded status, along with amounts recognized in the consolidated balance sheets for defined benefit retirement plans were as follows:

	September 30,	
	2010	2009
Change in benefit obligation:		
Projected benefit obligation at beginning of year	\$230.2	\$172.5
Projected benefit obligation attributable to acquisition of K-Tron	21.4	—
Service cost	5.6	3.3
Interest cost	12.7	12.6
Actuarial loss	7.3	49.2
Benefits paid	(9.4)	(8.0)
Plan amendments	—	0.6
Effect of exchange rates on projected benefit obligation	1.5	—
Projected benefit obligation at end of year	269.3	230.2
Change in plan assets:		
Fair value of plan assets at beginning of year	155.5	146.7
Fair value of pension assets attributable to acquisition of K-Tron	24.7	—
Actual return on plan assets	17.3	7.8
Employer contributions	6.1	9.2
Benefits paid	(9.4)	(8.0)
Administrative expenses paid	(0.3)	(0.2)
Effect of exchange rates on plan assets	1.8	—
Fair value of plan assets at end of year	195.7	155.5
Funded status:		
Plan assets less than benefit obligations	\$ (73.6)	\$ (74.7)
Amounts recorded in the consolidated balance sheets:		
Other assets	\$ 3.3	\$ —
Accrued pension costs, current portion	(1.6)	(1.5)
Accrued pension costs, long-term portion	(75.3)	(73.2)
Plan assets less than benefit obligations	\$ (73.6)	\$ (74.7)

Net actuarial losses of \$76.7 and prior service costs of \$5.3, less an applicable aggregate tax effect of \$30.6, are included as components of accumulated other comprehensive loss at September 30, 2010. Net actuarial losses of \$75.6 and prior service costs of \$6.1, less an applicable aggregate tax effect of \$30.5, are included as components of accumulated other comprehensive loss at September 30, 2009. The estimated amount that will be amortized from accumulated other comprehensive loss into net pension costs in fiscal 2011 is \$4.9.

Accumulated Benefit Obligation. The accumulated benefit obligation for all defined benefit retirement plans was \$259.4 and \$213.8 at September 30, 2010 and 2009, respectively. Selected information for our plans with accumulated benefit obligations in excess of plan assets was as follows:

	September 30,	
	2010	2009
Projected benefit obligation	\$246.2	\$230.2
Accumulated benefit obligation	237.4	213.8
Fair value of plan assets	169.2	155.5

Actuarial Assumptions. The weighted average assumptions used in accounting for our defined benefit retirement plans were as follows:

	Fiscal Year Ended September 30,		
	2010	2009	2008
Discount rate for obligation, end of year	4.8%	5.5%	7.5%
Discount rate for expense, during the year	5.3%	7.5%	6.6%
Expected rate of return on plan assets	7.6%	7.75%	8.0%
Rate of compensation increase	2.4%	4.0%	4.0%

The discount rates presented above and used in the valuation of our defined benefit retirement plans are evaluated annually based on current market conditions. In setting these rates we utilize long-term bond indices and yield curves as a preliminary indication of interest rate movements, and then make adjustments to the respective indices to reflect differences in the terms of the bonds covered under the indices in comparison to the projected outflow of our pension obligations. The overall expected long-term rate of return is based on historical and expected future returns, which are inflation adjusted and weighted for the expected return for

each component of the investment portfolio. The rate of assumed compensation increase is also based on our specific historical trends of past wage adjustments in recent years.

Plan Assets. The investment strategies and policies are set by the plans' fiduciaries. Long-term strategic investment objectives utilize a diversified mix of equity and fixed income securities to preserve the funded status of the trusts, and balance risk and return. The plan fiduciaries oversee the investment allocation process, which includes selecting investment managers, setting long-term strategic targets, and monitoring asset allocations. Target allocation ranges are guidelines, not limitations, and plan fiduciaries may occasionally approve allocations above or below a target range or elect to rebalance the portfolio within the targeted range. The primary investment strategy currently employed is a dynamic target allocation method that periodically rebalances among various investment categories depending on the current funded position. This program is designed to actively move from return seeking investments (such as equities) toward liability-hedging investments (such as long duration fixed income) as funding levels improve. The reverse effect occurs when funding levels decrease. The investment in return seeking assets is not to exceed 60% of total domestic plan assets.

Trust assets in our domestic plan are invested subject to the following policy restrictions: short-term securities must be rated A2/P2 or higher; all fixed-income securities shall have a credit quality rating "BBB" or higher; investments in equities in any one company may not exceed 10% of the equity portfolio. Our common stock represented approximately 1.6% of trust assets at September 30, 2010, and is subject to a statutory limit when it reaches 10% of total trust assets.

The tables below provide the fair value of our pension plan assets by asset category at September 30, 2010 and 2009. (See Note 14 for a definition of level 1, 2, and 3 categories.):

Plan Asset Category	Fair Value Measurements at September 30, 2010			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash equivalents	\$ 8.0	\$ 5.1	\$ 2.9	\$ —
Equity securities	22.5	22.5	—	—
Fixed maturity securities:				
Corporate bonds	67.6	11.7	55.9	—
Municipal bonds	2.4	—	2.4	—
Asset backed debt securities in trust	1.6	—	1.6	—
U.S. Government securities	1.9	—	1.9	—
Other types of investments:				
Government index funds	3.3	3.3	—	—
Equity mutual funds	86.0	86.0	—	—
Real estate	2.4	—	—	2.4
Total	\$195.7	\$128.6	\$64.7	\$2.4

Fair Value Measurements at September 30, 2009				
Plan Asset Category	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash equivalents	\$ 1.5	\$ —	\$ 1.5	\$ —
Equity securities	15.0	15.0	—	—
Fixed maturity securities:				
Corporate bonds	63.2	17.1	46.1	—
Other types of investment:				
Government index funds	0.9	—	0.9	—
Equity mutual funds	74.8	73.5	1.3	—
LP investment	0.1	—	—	0.1
Total	\$155.5	\$105.6	\$49.8	\$0.1

Cash Flows. During fiscal 2010, 2009, and 2008 we contributed cash of \$6.1, \$9.2 and \$6.0, respectively, to our defined benefit retirement plans. We estimate minimum contributions to be \$4.0 in fiscal 2011, although we may make discretionary contributions. We are not required to make a discretionary contribution in 2011, but will evaluate business conditions and capital and equity market volatility to determine if we wish to make a contribution, and if so, in what amount. We expect the maximum amount of any discretionary contribution to be \$30.0.

Estimated Future Benefit Payments. Following are the benefit payments, which reflect expected future service and are expected to be paid from plan assets or Company contributions as necessary:

	Projected Pension Benefits Payout
2011	\$11.0
2012	11.8
2013	12.6
2014	13.4
2015	14.2
2016–2020	82.1

Defined Contribution Plans

In addition to these defined benefit plans, we also sponsor a number of defined contribution plans. Depending on the applicable plan, we may make contributions up to 4% of an employee's compensation and may make additional matching contributions up to 3% of compensation. Under the various plans, Company contributions generally vest over a period of 0 to 5 years. Our expenses related to our various defined contribution programs were \$5.8, \$5.1 and \$4.8 for fiscal years 2010, 2009, and 2008, respectively.

Postretirement Healthcare Plan

In addition to our retirement plans, we also offer a domestic postretirement healthcare plan that provides healthcare benefits to qualified retirees and their dependents and in which employees are eligible to participate. The plan includes retiree cost sharing

provisions and generally extends retiree coverage for medical, prescription, and dental benefits beyond the COBRA continuation period to the date of Medicare eligibility. We use a measurement date of September 30 for this plan.

The net postretirement benefit cost recorded during fiscal years 2010, 2009 and 2008 was \$1.2, \$1.1 and \$1.3, respectively. The change in the accumulated postretirement benefit obligation was as follows:

	September 30,	
	2010	2009
Benefit obligation at beginning of year	\$12.1	\$ 9.8
Service cost	0.6	0.5
Interest cost	0.6	0.7
Actuarial loss	1.3	1.4
Net benefits paid	(0.4)	(0.3)
Benefit obligation at end of year	\$14.2	\$12.1
Amounts recorded in the consolidated balance sheets:		
Accrued postretirement benefits, current portion	\$ 0.8	\$ 0.8
Accrued postretirement benefits, long-term portion	13.4	11.3
Net amount recognized	\$14.2	\$12.1

Actuarial Assumptions. The weighted average assumptions used in revaluing our obligation under our postretirement healthcare plan were as follows:

	Fiscal Year Ended September 30,		
	2010	2009	2008
Discount rate for obligation	4.50%	5.25%	7.50%
Healthcare cost rate assumed for next year	7.75%	8.50%	8.50%
Ultimate trend rate	5.00%	5.00%	5.00%
Fiscal year that the rate reaches the ultimate trend rate	2023	2016	2015

Net actuarial (losses)/gains of \$(1.0) and \$0.3, less applicable tax effects of \$(0.4) and \$0.1 are included as a component of accumulated other comprehensive loss at September 30, 2010 and 2009, respectively. The estimated amount that will be amortized from accumulated other comprehensive loss as a reduction to

postretirement healthcare costs in 2011 is less than \$0.1. A one-percentage-point increase/decrease in the assumed healthcare cost trend rates as of September 30, 2010 would cause an increase/decrease in service and interest costs of approximately \$0.1, along with an increase/decrease in the benefit obligation of \$1.0.

We fund the postretirement healthcare plan as benefits are paid, and current plan benefits are expected to require net Company contributions for retirees of approximately \$0.8 per year for the foreseeable future.

8. OTHER LONG-TERM LIABILITIES

Other long-term liabilities at the end of each period consist of the following:

	September 30,	
	2010	2009
Casket pricing obligation	\$ 9.5	\$10.5
Self-insurance loss reserves	14.1	16.2
Other	16.6	17.6
	40.2	44.3
Less-current portion	(5.8)	(6.6)
Total long-term portion	\$34.4	\$37.7

In connection with Hill-Rom's sale of a subsidiary in 2004, we assumed a liability of approximately \$17.0 associated with a long-term pricing program for the future sale of caskets made in connection with prearranged funerals. The program was subsequently discontinued for arrangements made after December 31, 2004.

The remaining liability under the program is being recognized as a component of revenue as the related casket sales subject to the program are delivered and the related obligation is paid.

9. INCOME TAXES

The significant components of income before income taxes and the consolidated income tax provision were as follows:

	Fiscal Year Ended September 30,		
	2010	2009	2008
Income before income taxes:			
Domestic	\$141.2	\$159.4	\$152.5
Foreign	5.2	1.4	0.8
Total	\$146.4	\$160.8	\$153.3
Income tax expense:			
Current provision:			
Federal	\$ 62.6	\$ 47.5	\$ 56.4
State	8.9	7.2	6.0
Foreign	1.1	0.6	0.8
Total current provision	72.6	55.3	63.2
Deferred provision (benefit):			
Federal	(15.5)	3.0	(2.7)
State	(3.3)	0.3	(0.4)
Foreign	0.3	(0.1)	—
Total deferred provision (benefit)	(18.5)	3.2	(3.1)
Income tax expense	\$ 54.1	\$ 58.5	\$ 60.1

Differences between income tax expense reported for financial reporting purposes and that computed based upon the application of the statutory U.S. Federal tax rate to the reported income before income taxes were as follows:

	Fiscal Year Ended September 30,					
	2010		2009		2008	
	Amount	% of Pretax Income	Amount	% of Pretax Income	Amount	% of Pretax Income
Federal income tax (a)	\$51.2	35.0	\$56.3	35.0	\$53.7	35.0
State income tax (b)	4.5	3.1	4.2	2.6	3.6	2.4
Foreign income tax (c)	(0.3)	(0.3)	(0.1)	(0.1)	0.3	0.2
Domestic production activities deduction	(3.0)	(2.0)	(3.1)	(1.9)	(1.8)	(1.2)
Non-deductible separation costs	—	—	—	—	3.1	2.0
Non-deductible acquisition costs	0.7	0.5	—	—	—	—
Valuation allowance	(1.2)	(0.8)	0.2	0.1	0.7	0.5
Other, net	2.2	1.5	1.0	0.7	0.5	0.3
Income tax expense	\$54.1	37.0	\$58.5	36.4	\$60.1	39.2

(a) At statutory rate

(b) Net of Federal benefit

(c) Federal tax rate differential

The tax effect of temporary differences that gave rise to the deferred income tax balance sheet accounts were as follows:

	September 30,	
	2010	2009
Deferred income tax assets:		
Employee benefit accruals	\$ 64.2	\$ 45.8
Rebates and other discount reserves	6.8	6.2
Self-insurance reserves	5.6	7.3
Original issue discount on the Forethought Note	4.0	4.1
Casket pricing obligation	3.7	4.1
Allowance for doubtful accounts	2.4	2.3
Inventory	2.0	1.6
Other, net	10.9	8.0
Total deferred income tax assets before valuation allowance	99.6	79.4
Less valuation allowance	(2.0)	(2.6)
Total deferred income tax assets, net	97.6	76.8
Deferred income tax liabilities:		
Depreciation	(9.0)	(10.3)
Amortization	(75.3)	(2.4)
Unremitted earnings of foreign operations	(8.2)	—
Other, net	(15.7)	(7.6)
Total deferred income tax liabilities	(108.2)	(20.3)
Deferred income tax assets and liabilities, net	\$ (10.6)	\$ 56.5
Amounts recorded in the consolidated balance sheets:		
Deferred income taxes, current	\$ 25.1	\$ 21.5
Deferred income taxes, long-term	(35.7)	35.0
Deferred income tax assets and liabilities, net	\$ (10.6)	\$ 56.5

At September 30, 2010, we had \$1.8 of deferred income tax assets related to state tax credit carryforwards which expire between 2011 and 2013. The gross deferred income tax assets of \$99.6 as of September 30, 2010 were reduced by a valuation allowance of \$2.0 relating to the state tax credit carryforwards and state NOL carryforwards. The valuation allowance was recorded as it is more likely than not that these deferred income tax assets will not be realized.

For periods prior to the Distribution, Hill-Rom has filed consolidated federal income tax returns, as well as multiple state and local tax returns that included our operating results. Our foreign operations file income tax returns in a number of jurisdictions. As discussed in Note 6, we entered into a tax sharing agreement with Hill-Rom in connection with the Distribution.

In the normal course of business, we (and Hill-Rom for the periods prior to separation) are subject to examination by the taxing authorities in each of the jurisdictions where we file tax returns, with open tax years generally ranging from 2006 and forward. During fiscal year 2010, Hill-Rom reached a resolution with the IRS on two matters unrelated to our operations. The resolution of these issues resolved all open tax matters for fiscal 2002 through 2008. We are currently under examination by the IRS for fiscal years 2009 and 2010 under the IRS Compliance Assurance Program.

In connection with the acquisition of K-Tron, Federal and state income taxes of \$8.2 were provided on the historical earnings and profits of the K-Tron Switzerland operations. Federal and state income taxes have not been provided on accumulated but undistributed earnings of all other foreign subsidiaries, along with the post acquisition earnings and profits of the K-Tron Switzerland operations, aggregating approximately \$12.3, as such earnings have been or are expected to be permanently reinvested. The determination of the unrecognized deferred income tax liability related to the undistributed earnings is not practicable.

There are other ongoing audits in various stages of completion in several state and foreign jurisdictions, one or more of which may conclude within the next 12 months. The resolution of these audits could involve some or all of the following: the payment of additional taxes, the adjustment of certain deferred income taxes, and/or the recognition of unrecognized tax benefits. We do not expect that the outcome of these audits will significantly impact our consolidated financial statements.

The activity within our reserve for unrecognized tax benefits was as follows:

	September 30,	
	2010	2009
Balance at beginning of year	\$ 8.3	\$ 6.0
Additions for tax positions related to the current year	0.8	1.4
Additions for tax positions of prior years	—	1.2
Reductions for tax positions of prior years	(1.7)	(0.3)
Settlements	(0.2)	—
Balance at end of year	\$ 7.2	\$ 8.3

During the year ended September 30, 2010 and 2009, we recognized (released) approximately (\$0.2) and \$0.5, respectively in additional interest and penalties. We had approximately \$1.4 and \$1.6 for the payment of interest and penalties accrued at September 30, 2010 and 2009, respectively, excluded from the table above.

The total amount of gross unrecognized tax benefits as of September 30, 2010 and 2009, was \$7.2 and \$8.3, respectively. The gross unrecognized tax benefits includes approximately \$3.1 and \$3.7 at September 30, 2010 and 2009, respectively, that if recognized, would impact the effective tax rate in future periods. The remaining amount relates to items which, if recognized, would not impact our effective tax rate.

We estimate that the total unrecognized tax benefit could decline by \$2.1 over the next 12 months. The decline would result from the settlement of examinations by taxing authorities and the expiration of applicable statutes of limitation.

10. INCOME PER COMMON SHARE

The calculation of basic and diluted net income per common share and shares outstanding for the periods presented prior to April 1, 2008, is based on the number of shares outstanding at March 31, 2008 (plus unissued fully vested common shares). There is no dilutive impact from common stock equivalents for periods prior to April 1, 2008, as we had no dilutive equity awards outstanding. The dilutive effects of our time based restricted stock units and stock option awards are included in the computation of diluted net income per share in periods subsequent to March 31, 2008. At September 30, 2010, potential dilutive effects of these securities representing approximately 1.8 million common shares were excluded from the computation of income per common share as their effects were anti-dilutive. The dilutive effects of our performance-based stock awards more fully described in Note 11 are included in the computation of diluted net income per share when the related performance criteria are met. At September 30, 2010, potential dilutive effects of these securities representing approximately 1.1 million common shares were excluded from the computation of income per common share as the related performance criteria had not been met, although they may be met in future periods. There is no significant difference in basic and diluted net income per share and average common shares outstanding as a result of dilutive equity awards for the year ended September 30, 2010, 2009 and 2008.

11. STOCK-BASED COMPENSATION

We have stock-based compensation plans (including the Stock Incentive Plan and our Supplemental Retirement Plan that was adopted effective July 1, 2010, into which our former deferred compensation plans for directors and executives were transferred) under which 8,785,436 common shares are registered and available for issuance. These programs are administered by our Board of Directors and its Compensation and Management Development Committee. As of September 30, 2010, options with respect to 2,374,286 shares were outstanding under these plans. In addition, a total of 1,443,577 RSUs and PBUs (both defined below) were outstanding, and a total of 474,617 common shares had been either issued or utilized under these plans as of September 30, 2010.

Our primary program is the Hillenbrand, Inc. Stock Incentive Plan, which provides for long-term performance compensation for key employees and members of the Board of Directors. A variety of discretionary awards for employees and non-employee directors are authorized under the plan, including incentive or non-qualified stock options, stock appreciation rights, restricted stock, deferred stock, and bonus stock. The vesting of such awards may be conditioned upon either a specified period of time or the attainment of specific performance goals as determined by the administrator of the plan. The option price and term are also subject to determination by the administrator with respect to each grant. Option prices are generally expected to be set at the fair market price of our common stock at the date of grant, and option terms are not expected to exceed ten years.

Compensation cost and related income tax benefits charged against income for the following fiscal years (including the modification and acceleration charges recorded in connection with the separation during fiscal 2008 previously discussed in Note 6) were as follows:

	Fiscal Year Ended September 30,		
	2010	2009	2008
Stock-based compensation cost	\$7.5	\$6.6	\$7.5
Income tax benefit	2.8	2.5	2.7
Stock-based compensation cost, net-of-tax	\$4.7	\$4.1	\$4.8

The Company realized current tax benefits of \$0.4 from the exercise of stock options and the payment of restricted stock units during fiscal year 2010.

Stock Options

The fair value of option grants under the Hillenbrand, Inc. Stock Incentive Plan are estimated on the date of grant using the binomial option-pricing model which incorporates the possibility of early exercise of options into the valuation as well as our historical exercise and termination experience to determine the option value. The grants are contingent upon continued employment and generally vest over periods ranging from one to three years. The weighted average fair value of options granted was \$5.71, \$3.97, and \$4.04 per share for fiscal years 2010, 2009, and 2008, respectively (using converted values for grants prior to separation). The following assumptions were used in the determination of fair value in each period:

	Fiscal Year Ended September 30,			
	2010	2009	Post-Distribution 2008	Pre-Distribution 2008
Risk-free interest rate	0.3–4.0%	0.4–2.9%	1.6–4.3%	2.9–3.9%
Weighted average dividend yield	4.0%	5.0%	3.5%	2.0%
Weighted average volatility factor	42.2%	41.5%	18.6%	21.0%
Exercise factor	35.7%	36.3%	37.1%	31.8%
Post-vesting termination rate	5.0%	5.0%	2.1%	5.9%

The risk free interest rate assumption is based upon observed interest rates appropriate for the term of the employee stock options. The dividend yield assumption is based on the history of dividend payouts, and the computation of expected volatility is based on historical stock volatility. The expected life of employee stock options represents the weighted average period the stock options are expected to remain outstanding and is a derived output of the binomial model. The expected life of employee stock options is impacted by the above assumptions as well as the post-vesting termination rate and the exercise factor used in the binomial model. These two variables are based on the history of exercises and forfeitures for previous stock options.

The following tables provide a summary of outstanding stock option awards:

	Number of Shares	Weighted Average Exercise Price
Outstanding at September 30, 2009	2,182,705	\$21.76
Granted	473,617	18.99
Exercised	(114,616)	16.80
Forfeited	(58,529)	18.60
Expired	(108,891)	24.94
Outstanding at September 30, 2010	2,374,286	\$21.38
Exercisable at September 30, 2010	1,457,039	\$23.29

As of September 30, 2010, there was approximately \$2.1 of unrecognized stock-based compensation associated with our unvested stock options expected to be recognized over a weighted average period of 1.7 years. This unrecognized compensation expense includes a reduction for our estimate of potential forfeitures. As of September 30, 2010, the average remaining life of the outstanding stock options was 6.3 years with an aggregate intrinsic value of \$4.3. As of September 30, 2010, the average remaining life of the exercisable stock options was 4.8 years with an aggregate intrinsic value of \$1.1. The total intrinsic value of options exercised by our employees and directors during the fiscal years 2010, 2009, and 2008 was \$0.4, \$0.2, and \$0.1, respectively.

Restricted Stock Units (RSUs) and Performance-Based Restricted Stock Units (PBUs)

During the first quarter of fiscal year 2009, we began granting performance-based restricted stock and units (collectively “PBUs”) as part of our annual grant instead of restricted stock units (“RSUs”), which were historically contingent upon continued employment and generally vest over a period of five years. These PBUs are consistent with our compensation program’s guiding principles and are designed to (i) align management’s interests with those of shareholders, (ii) motivate and provide incentive to achieve superior results, (iii) maintain a significant portion of at-risk compensation, (iv) delineate clear accountabilities, and (v) ensure competitive compensation. We believe that this blend of compensation components provides the Company’s leadership team with the appropriate incentives to create long-term value for shareholders while taking thoughtful and prudent risks to grow the value of the Company. The vesting of PBUs is contingent upon the creation of shareholder value as measured by the cumulative cash returns and final period income in excess of the weighted average cost of capital over a three year period and a corresponding service requirement. The value of an award is based upon the fair value of our common stock at the date of grant. Based on the extent to which the performance criteria are achieved, it is possible for none of the awards to vest or for a range up to the maximum to vest. We record expense associated with the awards on a straight-line basis over the vesting period based upon an estimate of projected performance. The actual performance of the Company is evaluated quarterly, and the expense is adjusted according to the new projection. As a result, depending on the degree to which we achieve the performance criteria, our expenses related to the PBUs may become more volatile as we approach the final performance measurement date at the end of the three year period.

The value of RSUs and PBUs in our common stock is the fair value at the date of grant. The total vest date fair value of shares held by Hillenbrand employees and directors which vested during fiscal years, 2010, 2009, and 2008 was \$1.4, \$1.7, and \$6.1, respectively (including dividends). A summary of the unvested RSU and PBU activity presented below represents the maximum number of shares that could be earned or vested:

RSUs	Number of Share Units	Weighted Average Grant Date Fair Value
Non-vested RSUs at September 30, 2009	84,558	\$24.10
Granted	117,779	21.41
Vested	(66,503)	21.62
Forfeited	(9,848)	24.73
Non-vested RSUs at September 30, 2010	125,986	\$22.85

PBUs	Number of Share Units	Weighted Average Grant Date Fair Value
Non-vested PBUs at September 30, 2009	569,964	\$14.89
Granted	514,254	18.86
Vested	—	—
Forfeited	(63,619)	16.29
Non-vested PBUs at September 30, 2010	1,020,599	\$16.80

As of September 30, 2010, approximately \$2.1 and \$5.0 of unrecognized stock-based compensation was associated with our unvested RSUs and PBUs (based upon projected performance to date), respectively. These costs are expected to be recognized over a weighted average period of 2.4 years and 1.6 years, respectively. This unrecognized compensation expense includes a reduction for our estimate of potential forfeitures. As of September 30, 2010, the outstanding RSUs and PBUs had an aggregate intrinsic value of \$2.8 and \$23.0, respectively.

Dividends payable in stock accrue on both RSUs and PBUs and are subject to the same specified terms as the original grants. As of September 30, 2010, a total of 61,166 stock units had accumulated on unvested RSUs and PBUs due to dividend reinvestments and are excluded from the tables above. The aggregate intrinsic value of these shares at September 30, 2010 was \$1.3.

Vested Deferred Stock

Past stock-based compensation programs, like the current RSU and PBU programs, allowed deferrals after vesting to be set-up as deferred stock. As of September 30, 2010, 235,826 of our shares that had been deferred fully vested and payable in our common stock under our stock-based compensation programs and are

excluded from the tables above. The aggregate intrinsic value of these shares at September 30, 2010 was \$5.0.

12. COMMITMENTS AND CONTINGENCIES

Lease Commitments

Rental expense charged to income for fiscal years 2010, 2009, and 2008 was \$7.9, \$7.3 and \$7.4, respectively. The table below indicates the minimum annual rental commitments (excluding renewable periods) aggregating \$15.9, for manufacturing facilities, warehouse distribution centers, service centers, and sales offices, under noncancelable operating leases.

	Operating Rents
2011	\$7.1
2012	5.4
2013	2.6
2014	0.6
2015	0.2
Thereafter	—

Antitrust Litigation

In 2005 the Funeral Consumers Alliance, Inc. ("FCA") and a number of individual consumer casket purchasers filed a purported class action antitrust lawsuit on behalf of certain consumer purchasers of Batesville® caskets against the Company and our former parent company, Hillenbrand Industries, Inc., now Hill-Rom Holdings, Inc. ("Hill-Rom"), and three national funeral home businesses (the "FCA Action"). A similar purported antitrust class action lawsuit was later filed by Pioneer Valley Casket Co. and several so-called "independent casket distributors" on behalf of casket sellers who were unaffiliated with any licensed funeral home (the "Pioneer Valley Action"). Class certification hearings in the FCA Action and the Pioneer Valley Action were held before a Magistrate Judge in early December 2006. On November 24, 2008, the Magistrate Judge recommended that the plaintiffs' motions for class certification in both cases be denied. On March 26, 2009, the District Judge adopted the memoranda and recommendations of the Magistrate Judge and denied class certification in both cases. On April 9, 2009, the plaintiffs in the FCA case filed a petition with the United States Court of Appeals for the Fifth Circuit for leave to file an appeal of the Court's order denying class certification. On June 19, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs' petition. On July 9, 2009, the FCA plaintiffs filed a request for reconsideration of the denial of their petition. On July 29, 2009, a three-judge panel of the Fifth Circuit denied the FCA plaintiffs' motion for reconsideration and their alternative motion for leave to file a petition for rehearing en banc (by all of the judges sitting on the Fifth Circuit Court of Appeals).

The Pioneer Valley plaintiffs did not appeal the District Court's order denying class certification, and on April 29, 2009, pursuant to a stipulation among the parties, the District Court dismissed the Pioneer Valley Action with prejudice (i.e., Pioneer Valley cannot appeal or otherwise reinstitute the case). Neither the Company nor Hill-Rom provided any payment or consideration for the plaintiffs to dismiss this case, other than agreeing to bear their own costs, rather than pursuing plaintiffs for costs.

Plaintiffs in the FCA Action have generally sought monetary damages on behalf of a class, trebling of any such damages that may be awarded, recovery of attorneys' fees and costs, and injunctive relief. The plaintiffs in the FCA Action filed a report indicating that they were seeking damages ranging from approximately \$947.0 to approximately \$1.46 billion before trebling on behalf of the purported class of consumers they seek to represent, based on approximately one million casket purchases by the purported class members.

Because Batesville continues to adhere to its long-standing policy of selling Batesville caskets only to licensed funeral homes, a policy that it continues to believe is appropriate and lawful, if the case goes to trial the plaintiffs are likely to claim additional alleged damages for periods between their reports and the time of trial. At this point, it is not possible to estimate the amount of any additional alleged damage claims that they may make. The defendants are vigorously contesting both liability and the plaintiffs' damages theories.

In June 2010, co-defendant Stewart Enterprises, Inc. announced a settlement with the plaintiffs. On July 16, 2010, the District Court granted the defendants' remaining motion for leave to file a motion to dismiss for lack of subject matter jurisdiction. On August 2, 2010, the District Court heard argument on the defendants' motion to dismiss for lack of subject matter jurisdiction. The Court ordered full dismissal of the lawsuit on September 24, 2010, concluding that "plaintiffs shall take nothing by their suit." In light of this decision, defendants filed a motion requesting that the Court order plaintiffs to pay costs incurred by Batesville and SCI in the approximate amount of \$0.7. The Court denied this motion on October 22, 2010.

Plaintiffs had 30 days to declare their intent to appeal the dismissal of their lawsuit, and they did so by way of a Notice of Appeal filed on October 19, 2010. Plaintiffs' Notice indicates that they intend to appeal both the Court's final judgment of dismissal entered on September 24, 2010 and the Court's order denying class certification entered on March 26, 2009. The appeal will be to the United States Court of Appeals for the Fifth Circuit.

Over the next several months, the record will be compiled for appeal and extensive briefing will occur. Plaintiffs' brief appealing the denial of the two orders must be filed within 40 days after the District Court record is certified. Although firm dates are not yet

known, the plaintiffs' brief will likely be due sometime in January 2011, with defendants' brief due in February 2011, and a reply brief from plaintiffs due in March 2011. Once all briefs are submitted, the Court of Appeals may hear oral argument by the parties' attorneys and then issue its ruling as to whether or not the District Court's decisions should be reversed or affirmed. It should be noted, however, that the above appellate schedule is only approximate and is subject to change dependent upon a number of factors, including the granting of any extensions of time and the relative congestion of the docket of the Court of Appeals.

If plaintiffs succeed in overturning the judgment, reversing the District Court order denying class certification, and a class is subsequently certified in the FCA Action filed against Hill-Rom and Batesville, and if the plaintiffs prevail at a trial of the class action, the damages awarded to the plaintiffs, which would be trebled as a matter of law, could have a significant material adverse effect on our results of operations, financial condition and/or liquidity. In antitrust actions such as the FCA Action the plaintiffs may elect to enforce any judgment against any or all of the codefendants, who have no statutory contribution rights against each other. We and Hill-Rom have entered into a judgment sharing agreement that apportions the costs and any potential liabilities associated with this litigation between us and Hill-Rom. See Note 6 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2009.

As of October, 2010, we had incurred approximately \$27.5 in cumulative legal and related costs associated with the FCA matter, since its inception.

General

We are involved on an ongoing basis in claims and lawsuits relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters. The ultimate outcome of these lawsuits cannot be predicted with certainty. An estimated loss from these contingencies is recognized when we believe it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. However, it is difficult to measure the actual loss that might be incurred related to litigation. The ultimate outcome of these lawsuits could have a material adverse effect on our financial condition, results of operations, and cash flow.

Legal fees associated with claims and lawsuits are generally expensed as incurred. Upon recognition of an estimated loss resulting from a settlement, an estimate of legal fees to complete the settlement is also included in the amount of the loss recognized.

We are also involved in other possible claims, including product and general liability, workers compensation, auto liability, and

employment related matters. Claims other than employment and related matters have deductibles and self-insured retentions ranging from \$0.5 to \$1.0 per occurrence or per claim, depending upon the type of coverage and policy period. Outside insurance companies and third-party claims administrators establish individual claim reserves, and an independent outside actuary provides estimates of ultimate projected losses, including incurred but not reported claims, which are used to establish reserves for losses. Claim reserves for employment related matters are established based upon advice from internal and external counsel and historical settlement information for claims and related fees, when such amounts are considered probable of payment.

The recorded amounts represent our best estimate of the costs we will incur in relation to such exposures, but it is virtually certain that actual costs will differ from those estimates.

13. INVESTMENT INCOME AND OTHER

	Fiscal Year Ended September 30,		
	2010	2009	2008
Interest income on note receivable from Forethought	\$12.0	\$12.4	\$ 5.8
Interest income on ARS	0.2	0.9	1.0
Equity in net income (loss) of affiliates	3.1	(5.4)	—
Realized gain on sale or (impairment) of investments	0.7	—	(0.8)
Net realized losses on sale or impairment of ARS	(3.1)	—	—
Foreign currency exchange gain (loss)	—	0.2	(1.2)
Other, net	(0.2)	(0.2)	1.1
Investment income and other	\$12.7	\$ 7.9	\$ 5.9

14. FAIR VALUE MEASUREMENTS

Our fair value measurements are classified into one of three categories as follows based on the measurement inputs:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals or current market) and contractual prices for the underlying financial instrument, as well as other relevant economic measures.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Unobservable inputs shall reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The following table summarizes the Company's financial assets and liabilities:

Description	Fair Value Measurements at September 30, 2010 Using:				
	Carrying Value at September 30, 2010	Fair Value at September 30, 2010	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Assets:					
Cash & cash equivalents	\$ 98.4	\$ 98.4	\$ 98.4	\$ —	\$ —
ARS	11.9	11.9	—	11.9	—
Forethought Note	144.8	127.0	—	—	127.0
Equity investments	3.0	3.0	—	—	3.0
Investments in rabbi trust	5.7	5.7	5.7	—	—
Liabilities:					
Revolving credit facility	255.0	241.8	—	241.8	—
\$150 senior unsecured notes	148.4	158.0	158.0	—	—
Derivative instruments	0.1	0.1	—	0.1	—

Description	Fair Value Measurements at September 30, 2009 Using:				
	Carrying Value at September 30, 2009	Fair Value at September 30, 2009	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Assets:					
Cash & cash equivalents	\$ 35.2	\$ 35.2	\$ 35.2	\$ —	\$ —
ARS and Put right	48.9	48.9	—	—	48.9
Forethought Note	142.8	109.0	—	—	109.0
Equity investments	4.5	4.5	1.5	—	3.0
Liabilities:					
Revolving credit facility	60.0	55.7	—	55.7	—
Derivative instruments	1.1	1.1	—	1.1	—

The following table reconciles the change in the Company's Level 3 financial assets:

	Fair Value Measurements Using Significant Unobservable Inputs			
	ARS	Put Right	Forethought Note	Equity Investments
Balance at September 30, 2008	\$ 51.1	\$ —	\$105.2	\$3.0
Total gains or (losses) (realized and unrealized):				
Included in earnings, net	2.1	(2.0)	—	—
Included in other comprehensive income	(3.7)	—	—	—
Change in fair value, disclosure only	—	—	3.8	—
Purchases, issuances and settlements	(2.3)	3.7	—	—
Balance at September 30, 2009	\$ 47.2	\$1.7	\$109.0	\$3.0
Total gains or (losses) (realized and unrealized):				
Included in earnings, net	(1.4)	(1.7)	—	—
Included in other comprehensive income	1.5	—	—	—
Change in fair value, disclosure only	—	—	28.0	—
Purchases, issuances and settlements	(35.4)	—	(10.0)	—
Transfers in and/or (out) of Level 3	(11.9)	—	—	—
Balance at September 30, 2010	\$ —	\$ —	\$127.0	\$3.0

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value:

- We estimate the fair value of derivative financial instruments based on the amount that we would receive or pay to terminate the agreements at the reporting date.
- Prior to July 1, 2010, we utilized a valuation model based on Level 3 inputs for the ARS. We utilized a discounted cash flow approach (an "Income" approach) to arrive at this valuation. The assumptions used in preparing the discounted cash flow model included estimates of, based on available data, interest rates, timing and amount of cash flows, credit spread related yield and illiquidity premiums, and expected holding periods of the ARS. In the fourth quarter of fiscal 2010, we began to value the ARS based upon secondary market prices on observed transactions. We moved to this

approach as we believe the pricing now occurring in the secondary market represents the "highest and best use" valuation of the ARS.

- We estimate the fair value of the Forethought Note based upon comparison to debt securities currently trading in an active market with similar characteristics of yield, duration, and credit risk adjusted for liquidity considerations. Based upon market data available to us, we estimate that the fair value of the note and accrued interest is approximately \$127.0 based upon an estimated yield to maturity of approximately 14% as of September 30, 2010. This is approximately \$17.8 below its carrying value at September 30, 2010. An increase or decrease of 1% in the discount rate utilized to estimate the fair value of the note (including interest receivable) would indicate a change in fair value of approximately \$4.0.

During the past twelve months ended September 30, 2010, Forethought successfully raised net proceeds of approximately \$101.0 through the issuance of common stock, retaining the A- claims-paying rating of its subsidiary insurance operations from A.M. Best, and made its first \$10.0 interest payment on the note. Both of these factors increased the likelihood that Forethought will be able to continue to meet its obligation to us under the terms of the note. Additionally, the natural accrual of interest under the note increases its fair value over time. These were the primary factors which increased the estimated fair value of the Forethought Note (and also increase our overall probability of collection) for the fiscal year ended September 30, 2010.

- The carrying amount of equity investments, included as a component of “Investments” within our consolidated balance sheet, was \$3.0 and \$4.5 at September 30, 2010 and 2009, respectively, and approximates fair value. The fair value was determined using either quoted prices in an active market or using present value or other techniques appropriate for a particular financial instrument. These techniques involve some degree of management judgment and as a result are not necessarily indicative of the amounts we would realize in a current market exchange.
- The fair value of the investments in the rabbi trust were based on quoted prices in active markets. The trust assets consist of participant directed investments in publicly traded mutual funds.
- The fair value of our revolving credit facility is estimated based on internally developed models, using current market interest rate data for similar issues as there is no active market for our debt.
- The fair value of the 10 year, 5.5% fixed rate senior unsecured notes was based on quoted prices in an active market.

The following assets were excluded from the tables above:

- The carrying amounts of current assets and liabilities approximate fair value because of the short maturity of those instruments.
- The carrying amount of the private equity limited partnerships, included as a component of “Investments” within our consolidated balance sheet, was \$15.2 and \$14.3 at September 30, 2010 and 2009, respectively. The fair value of these equity method investments is not readily available.
- Disclosures regarding the fair value measurements related to our pension plan assets are included in Note 7.

The following tables provide summary financial information regarding these segments and our corporate operations:

	September 30,		
	2010	2009	2008
Net revenues:			
Batesville	\$640.3	\$649.1	\$678.1
K-Tron	108.9	—	—
Total consolidated net revenues	\$749.2	\$649.1	\$678.1
Gross profit:			
Batesville	\$277.7	\$274.4	\$280.5
K-Tron (1)	35.6	—	—
Total consolidated gross profit	\$313.3	\$274.4	\$280.5
Operating profit (loss):			
Batesville	\$175.1	\$178.5	\$183.8
K-Tron (1)	2.2	—	—
Corporate (2)	(39.4)	(23.5)	(34.2)
Total consolidated operating profit	\$137.9	\$155.0	\$149.6
Net revenues (3)			
United States	\$662.6	\$606.3	\$629.5
Canada	42.2	35.5	39.7
Switzerland	35.9	—	—
All others foreign business units	8.5	7.3	8.9
Total consolidated net revenues	\$749.2	\$649.1	\$678.1

- (1) Gross profit and operating profit have been reduced by \$11.6 and \$13.3, respectively, for the effects of acquisition accounting on K-Tron's inventories and backlog during the fiscal year ended September 30, 2010.
- (2) Operating profit has been reduced by \$10.5 respectively, for the effects of business acquisition costs associated with the acquisition of K-Tron during the fiscal year ended September 30, 2010. Costs related to our separation from Hill-Rom reduced operating profit by \$0.1 and \$15.6 for the fiscal years ended September 30, 2009 and 2008, respectively.
- (3) We attribute revenue to a geography based upon the location of the business unit that consummates the external sale.

SCHEDULE II

HILLENBRAND, INC.

VALUATION AND QUALIFYING ACCOUNTS

For the Fiscal Years Ended September 30, 2010, 2009 and 2008

Description (Dollars in millions)	Balance at Beginning of Period	Additions		Deductions Net of Recoveries	Balance at End of Period
		Charged to Costs and Expense	Charged to Other Accounts		
Reserves deducted from assets to which they apply:					
Allowance for possible losses, early pay discounts, and sales returns — accounts receivable:					
Period Ended:					
September 30, 2010	\$17.3	\$ 1.6	\$1.3 (c)	\$(0.1)(a)	\$20.1
September 30, 2009	\$16.1	\$ 1.3	\$ —	\$(0.1)(a)	\$17.3
September 30, 2008	\$18.0	\$(0.6)	\$ —	\$(1.3)(a)	\$16.1
Allowance for excess or obsolescence — inventories:					
Period Ended:					
September 30, 2010	\$ 1.1	\$ 1.2	\$1.9 (c)	\$(1.0)(b)	\$ 3.2
September 30, 2009	\$ 0.5	\$ 0.7	\$ —	\$(0.1)(b)	\$ 1.1
September 30, 2008	\$ 1.2	\$ 0.1	\$ —	\$(0.8)(b)	\$ 0.5

(a) Generally reflects the write-off of specific receivables against recorded reserves.

(b) Generally reflects the write-off of specific inventory against recorded reserves.

(c) Reflects opening reserve balances resulting from the acquisition of K-Tron.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There were no changes in or disagreements with the independent registered public accounting firm.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our President and Chief Executive Officer and the Senior Vice President and Chief Financial Officer (the “Certifying Officers”), has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. Based upon that evaluation, the Certifying Officers concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report for the information required to be disclosed in the reports we file or submit under the Exchange Act to be recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

On April 1, 2010, we completed our acquisition of K-Tron which includes its existing information systems and internal controls over financial reporting that previously existed when K-Tron was a separate publicly traded company. In conducting our evaluation of the effectiveness of our internal control over financial reporting, we have elected to exclude K-Tron from our evaluation as permitted under existing SEC rules. We are currently in the process of evaluating and integrating K-Tron’s historical internal controls over financial reporting with ours. We expect to complete this integration in fiscal 2011.

Additionally, during the fourth quarter of fiscal 2010, we implemented a new financial reporting consolidation system to accommodate our recent acquisition of K-Tron and support our acquisition strategy. In connection with the implementation of this system, we also implemented a series of internal controls to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of consolidated financial statements. These new controls were included in management’s evaluation process for the year ended September 30, 2010.

Other than the changes noted above, there have been no other changes to our internal controls over financial reporting. Management’s report on our internal control over financial reporting is included under Item 8 above.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

Information related to executive officers is included in this report under Part I, Item 1 within the caption “Executive Officers of the Registrant.” Information relating to the directors will appear in the section entitled “Election of Directors” in our Proxy Statement to be filed with the Securities and Exchange Commission relating to our 2011 Annual Meeting of Shareholders (the “2011 Proxy Statement”), which section is incorporated herein by reference. The required information on compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated by reference to the 2011 Proxy Statement, where such information is included under the caption “Section 16(a) Beneficial Ownership Reporting Compliance.” Information regarding our Code of Ethical Business Conduct and the corporate governance matters covered by this Item is incorporated by reference to the 2011 Proxy Statement, where such information is included under the heading “About the Board of Directors.”

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item is incorporated herein by reference to the 2011 Proxy Statement, where such information is included under the headings “The Board of Directors and Committees,” “Executive Compensation” and “Compensation Committee Interlocks and Insider Participation.”

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT, AND RELATED STOCKHOLDER MATTERS

The information required by this Item is incorporated herein by reference to the 2011 Proxy Statement, where such information is included under the headings “Election of Directors” and “Equity Compensation Plan Information.”

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is incorporated herein by reference to the 2011 Proxy Statement, where such information is included under the headings “The Board of Directors and Committees.”

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this Item is incorporated herein by reference to the 2011 Proxy Statement, where such information is included under the heading “Proposal No. 3 — Ratification of Appointment of the Independent Registered Public Accounting Firm.”

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents have been filed as a part of this report or, where noted, incorporated by reference:

(1) Financial Statements

The financial statements of the Company and its consolidated subsidiaries listed on the Index to Consolidated Financial Statements on page 34.

(2) Financial Statement Schedule

The financial statement schedule on page 68 is filed in response to Item 8 and Item 15(d) of Form 10-K and is listed on the Index to Consolidated Financial Statements.

(3) Exhibits (See changes to Exhibit Index below)

The Exhibit Index, which index follows the signature page to this report and is hereby incorporated herein by reference, sets forth a list of those exhibits filed herewith, and includes and identifies management contracts or compensatory plans or arrangements required to be filed as exhibits to this Form 10-K by Item 601 (b) (10)(iii) of Regulation S-K.

In reviewing any agreements included as exhibits to this report, please remember that they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about us or the other parties to the agreements. The agreements may contain representations and warranties by the parties to the agreements, including us. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

- should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;
- may have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and
- were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002

I, Kenneth A. Camp, certify that:

1. I have reviewed this Annual Report on Form 10-K of Hillenbrand, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the periods covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
