

Renewed Vision

Our history is the key to writing the story of our future.

We strive to be the market leader, committed to setting industry leading standards in all measures of business performance and customer service. We encourage all of our employees to exhibit the highest levels of personal integrity, teamwork, and appreciation for our diverse individual and company cultures. We believe in always treating people fairly, whether employee, supplier, or customer, while always looking for ways to improve our service and contribution to the communities in which we live and work.

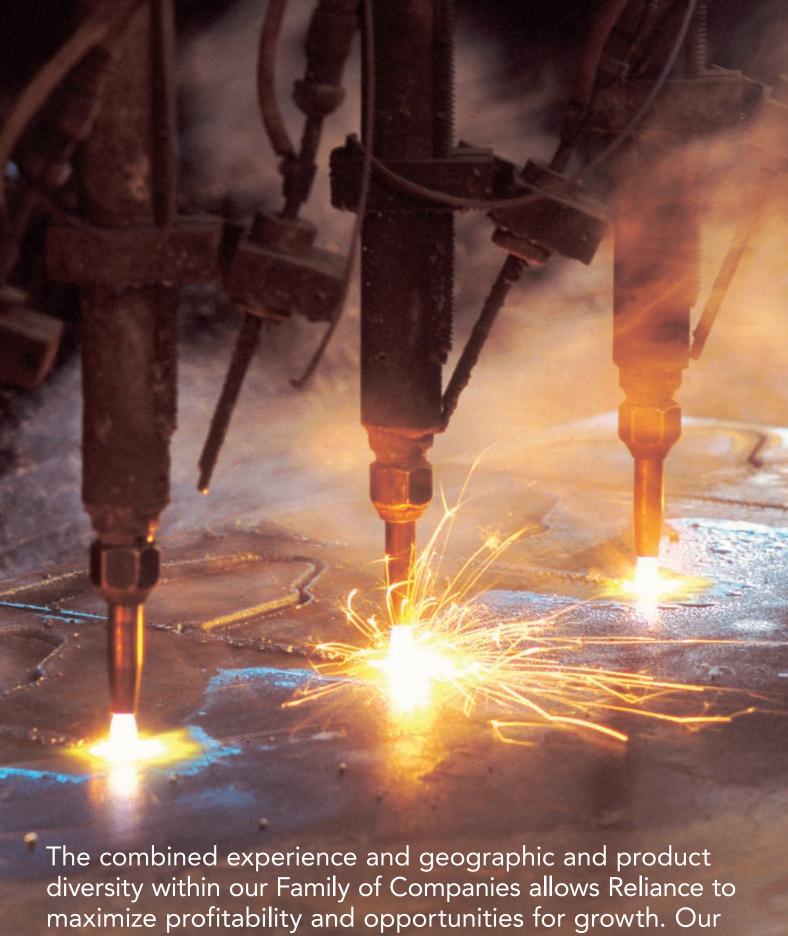

Founded in 1939 and headquartered in Los Angeles, California, Reliance Steel & Aluminum Co. (NYSE:RS) is the largest metals service center company in North America. Through a network of more than 240 locations in 38 states and 10 countries outside the United States, the Company provides value-added metals processing services and distributes a full line of over 100,000 metal products to more than 125,000 customers in a broad range of industries.

Long-term debt ⁽³⁾	1,124.0	1,320.5	857.8	852.6	1,675.
Reliance shareholders' equity	3,558.4	3,143.9	2,823.7	2,606.4	2,431.

- (1) Gross profit, calculated as net sales less cost of sales, and gross profit margin, calculated as gross profit divided by net sales, are non-GAAP financial measures as they exclude depreciation and amortization expense associated with the corresponding sales. The majority of our orders are basic distribution with no processing services performed. For the remainder of our sales orders, we perform "first-stage" processing which is generally not labor intensive as we are simply cutting the metal to size. Because of this, the amount of related labor and overhead, including depreciation and amortization, is not significant and is excluded from our cost of sales. Therefore, our cost of sales is primarily comprised of the cost of the material we sell. We use gross profit and gross profit margin as measures of operating performance. Gross profit margin is an important operating and financial measure, as fluctuations in our gross profit margin can have a significant impact on our earnings. Gross profit margin, as presented, is not necessarily comparable with similarly titled measures for other companies.
- (2) Operating expenses include warehouse, delivery, selling, general and administrative expenses, depreciation and amortization expense.
- (3) Includes the long-term portion of capital lease obligations.

The combined experience and geographic and product diversity within our Family of Companies allows Reliance to maximize profitability and opportunities for growth. Our ability to service a broad array of industries, along with our flexibility to innovate solutions and provide quality service to customers, has resulted in our strong reputation within our local communities.

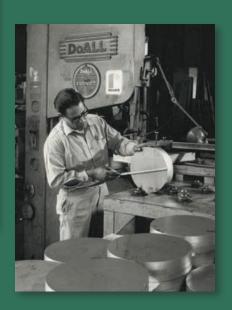

To Our Shareholders:

We were satisfied with our overall performance in 2012, both financially and operationally. The year began with a robust market for metals; however, due to continued economic and political uncertainty along with pressure on pricing, demand waned as the year progressed. Still, our full year results reflected solid growth over 2011: net income increased 17.4% to \$403.5 million, and earnings per diluted share increased 16.4% to \$5.33. Although we didn't break any records, we did post the second highest revenue and the third highest earnings per share in Reliance's history.

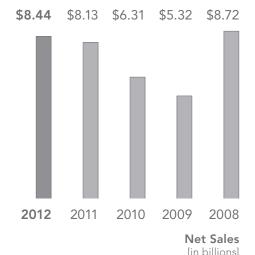

Based on MSCI data, Reliance continued to surpass the broader metals service center industry, which reported total steel tons shipped in the U.S. increased 1.3% for the full year of 2012. Our tons sold increased 5.4% for the year, reflecting a slow but continuing recovery in end demand, as well as the incremental sales from our acquisitions and strategic asset purchases. On a same-store sales basis, total tons sold in 2012 were up 3.4%. Reliance's outperformance of the metals service center industry reflects our consistent strategy of growth by acquisition, investment in existing capabilities, continuous operational improvement, and commitment to safety, employee excellence, and customer service.

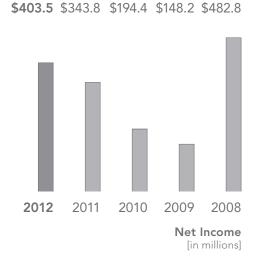

Despite the downward trend in metals pricing in 2012 over 2011, our increased exposure to higher-growth industries helped to somewhat offset the pressure on our average selling prices, because the specialty products and processes required in these industries command higher selling prices. Commercial aerospace build rates continue to rise, and oil and natural gas continue to be among our strongest market segments.

In 2012, we continued our growth in specialty products and in higher-growth end markets. In February, through our wholly-owned subsidiary Diamond Manufacturing Company, we acquired McKey Perforating Co., Inc. with locations in Berlin, Wisconsin and Manchester, Tennessee. McKey provides a full range of metal perforating and fabrication services.

In April we acquired National Specialty Alloys, LLC, a global specialty alloy processor and distributor of premium stainless steel and nickel alloy bars and shapes, headquartered in Houston, Texas, with additional locations in Anaheim, California, Buford, Georgia and Tulsa, Oklahoma.

In October we completed the acquisitions of Sunbelt Steel Texas, LLC and GH Metal Solutions, Inc. Sunbelt is a value-added distributor of special alloy steel bar and heavy-wall tubing products to the oil and gas industry. Sunbelt is headquartered in Houston, Texas with an additional location in Lafayette, Louisiana. GH Metal Solutions was acquired through our wholly-owned subsidiary, Feralloy Corporation, and is a value-added processor and fabricator of carbon steel products located in Fort Payne, Alabama.

Also in 2012 we completed two strategic asset purchases. Worthington Steel's Vonore, Tennessee plant now operates as a Precision Strip, Inc. location, and through our newlyformed subsidiary Bralco Metals (Australia) Pty Ltd, we acquired substantially all of the assets of Airport Metals (Australia) Pty Ltd, a subsidiary of Samuel Son & Co., Limited based in Melbourne. In total, these six acquisitions added \$115 million to Reliance's 2012 sales.

On February 6, 2013, we were very pleased to announce a definitive agreement to acquire Metals USA Holdings Corp., in an approximately \$1.2 billion all-cash transaction. This will be our largest acquisition to date, adding 48 service center locations across the U.S. Upon completion of this immediately accretive transaction, Reliance's annual sales will be upwards of \$10 billion. We expect to close in the second quarter of 2013. Even with this acquisition, Reliance will only hold 7–8% of the metals service center market (in the U.S.). It's still a highly fragmented industry, meaning there is a lot of room for growth. We're going to continue to keep our eyes open for acquisitions that increase our diversification in products, end markets and geography.

In addition to our growth strategy, we're continuing to invest in areas in which we have had a longstanding presence. Heavy industries, such as mining equipment, barge and tank manufacturers, transmission towers, and rail cars, remain strong. While agricultural equipment slowed somewhat in the latter part of 2012—primarily due to the summer drought—forecasts predict solid improvement in 2013. The automotive market, supported by our toll processing businesses in the U.S. and Mexico, is performing extremely well and the future looks bright, while non-residential construction is improving but remains well below peak 2006 levels.

Whatever the market condition, one of Reliance's primary goals is to continue to maintain a strong balance sheet. This gives us the strength and flexibility not only to adapt to any changes, but to leverage any and all opportunities that may arise, whether they be internal investments or growth through acquisitions. Our 2012 cash flow from operations was over \$600 million, which helped to fund our capital expenditures of \$214 million, our highest to date. This amount includes the expansion of our processing capabilities and geographic coverage as well as the purchase of six facilities that we previously leased, which will reduce our expenses.

Concurrent with our growth strategies, we have consistently returned capital to shareholders. On February 19, 2013, the Board of Directors declared a regular quarterly cash dividend of \$0.30 per share of common stock—an increase of 20% over the previous quarterly dividend that was increased 67% in July 2012. We have paid regular quarterly dividends for 53 consecutive years. Reliance has increased our dividend 19 times, and has also achieved a compound growth rate of over 18% in stock value, since our 1994 IPO through December 2012.

In July, we welcomed Sarah J. ("Sally") Anderson as our newest independent director. Sally brings over 25 years of experience as a partner in Ernst & Young LLP's Assurance and Advisory Services. She sits on the Audit Committee and Nominating and Governance Committee.

In 2014 we will commemorate Reliance's 75th anniversary as well as 20 years as a public company. It's going to be a milestone year. In anticipation of this momentous occasion, we unveiled an updated Reliance logo and vision statement in early 2013. The new vision statement opens by saying, "Our history is the key to writing the story of our future." Not only are we reflecting and remembering from where and how far we've come, we're pursuing our future with renewed passion and energy and with the honesty, integrity, humility and compassion that has, and will continue, to define us. We are excited about what lies ahead in 2013 and we thank you, our shareholders, employees, customers and suppliers, for your continued support.

- (1) The portion of American Steel's earnings attributable to our 49.5% partner is included in non-controlling interests through December 31, 2005. On January 3, 2006 we acquired our partner's interest, increasing our ownership to 100%.
- (2) Operating income represents net sales less cost of sales, warehouse, delivery, selling, general and administrative expenses, depreciation and amortization expense. Certain reclassifications were made to 2007 and prior years to include amortization expense in the calculation of Operating income.
- (3) The adoption of accounting rule changes in 2009 affected the presentation of non-controlling interests. Prior year pretax income and margin amounts have been retrospectively adjusted to conform to the current presentation.
- (4) Amounts have been retrospectively adjusted to reflect the July 2006 2-for-1 stock split. Per share amounts based upon weighted average shares are on a diluted basis.
- (5) 2006 includes the issuance of approximately 9 million shares related to an acquisition.
- (6) Long-term debt includes the long-term portion of capital lease obligations.
- (7) Book value per share is calculated as Reliance shareholders' equity divided by number of common shares outstanding as of December
