THE GEO GROUP, INC. 2004 ANNUAL REPORT

2004 ANNUAL REPORT

The GEO Group, Inc.

The GEO Group has restated its financial statements for the fiscal years 2002, 2003 and 2004. As a result, the financial information contained in this Annual Report for those years may not be relied upon.

The restated financial statements as filed with the Securities and Exchange Commission on August 17, 2005 on Form 10-K/A can be found under the SEC Filings Section of The GEO Group's Investor Relations webpage at www.thegeogroupinc.com, or at the Securities and Exchange Commission's website at www.sec.gov.

"The strides we have made internally in 2004 to fortify our organizational and capital structures have placed our company in an enviable position to fully achieve its growth potential. We are poised to take full advantage of future business opportunities by leveraging our current organizational overhead structure."

George C. Zoley
Chairman and Chief Executive Officer
The GEO Group, Inc.

COMPANY PROFILE

The GEO Group, Inc. is a world leader in the delivery of correctional and detention management services, health and mental health services, and other diversified services to government agencies around the globe. Through its team of approximately 9,000 professionals, The GEO Group develops and implements tailored business solutions that meet the needs of government clients throughout the world.

The GEO Group provides innovative, turnkey programs for the design, construction, financing and management of state-of-the-art correctional and detention centers, including those focused on education, substance abuse treatment, counseling, work programs and community corrections services. In addition, The GEO Group designs, constructs, finances and manages medical and mental health rehabilitation facilities that provide comprehensive services to patients in partnership with state and local government agencies.

The GEO Group currently provides services in the United States, Canada, Australia, New Zealand, South Africa, and the United Kingdom, managing 41 facilities with a total design capacity of approximately 36,000 beds. The GEO Group holds a 21 percent share of the U.S. private correctional market and a 24 percent share of the international private correctional market, for a global market share of 22 percent.

The GEO Group, Inc. is listed on the New York Stock Exchange under the symbol "GGI." For more information on The GEO Group, Inc., please visit the Company's web site at www.thegeogroupinc.com

Chief Executive Officer*

To Our Shareholders

One of the true measures of success in business is a company's ability to not only meet, but to find advantage in, unforeseen challenges. Throughout our corporate history, we have demonstrated the ability to adapt to changing circumstances and to be innovative in our pursuit of growth. The year 2004 marked the completion of our company's evolution from a corporate subsidiary into a truly independent company. This remarkable transformation has been accompanied by several organizational challenges.

Since our founding in 1984, we had always relied on an outside structure to perform our essential corporate support functions. As a result of our new independence, our Information Systems, as well as our Legal, Tax, Payroll, Human Resources and Risk Management Departments had to be created from the ground up. During the year, we dedicated significant amounts of time, energy and resources to solidify our newly created in-house infrastructure. At the same time, we have taken steps to strengthen our capital structure, which had always been constrained by our inability to adequately access the capital markets due to the presence of a majority shareholder.

The strides we have made internally during the year to fortify our organizational and capital structures have placed our company in an enviable position to fully achieve its growth potential.

BUILDING A SOLID FOUNDATION

Understanding that a strong organizational structure is an indispensable key to our future growth success, we endeavored during the year to intensify our efforts to strengthen our internal corporate support functions. Our Information Systems Department made important strides in 2004 with the implementation of a new and improved intranet and a 24-hour help desk which provide critical and timely assistance to our personnel at our corporate and regional offices as well as in the field. Our Human Resources

*Wayne H. Calabrese
Vice Chairman of the Board
President and Chief Operating Officer*

Department launched the GEO Service Awards Program, designed to recognize the valuable contributions made by our professional staff throughout the world, in addition to several other key initiatives which have enhanced our employee benefits package. Our Legal, Tax, Payroll and Risk Management departments have all taken steps to enhance and maximize their contributions to our company's key support functions. We have expanded and enhanced our corporate and regional resources to serve our current client base more efficiently, as well as to better meet the needs of future clients. We are poised to take full advantage of future business opportunities by leveraging our current organizational overhead structure.

In addition to ensuring that our company has a strong organizational structure, we have taken steps to make certain that we have a sound capital structure. To this end, in 2004 we used \$43 million of the \$80 million in pre-tax proceeds from the 2003 sale of our 50 percent interest in our former joint venture in the United Kingdom, Premier Custodial Group Limited, to reduce the \$100 million term loan under our senior secured credit facility. This transaction has enhanced our ability to access the senior debt and equity markets in the future which, along with our \$92.8 million of cash-on-hand, will enable us to achieve our strategic growth and expansion goals.

STRONG FINANCIAL PERFORMANCE INCREASING SHAREHOLDER VALUE

Our day-to-day operations, both in the U.S. and overseas, performed remarkably well in 2004, setting higher standards in our industry and achieving exceptional financial results. Revenues from continuing operations in 2004 increased to \$614.5 million, compared with \$567.4 million in 2003. Pro-forma net income in 2004 was \$14.4 million, compared with \$15.2 million in 2003. Pro-forma earnings per share in 2004 increased to \$1.48 compared with \$0.97 in 2003.

Our outstanding 2004 financial achievements were driven by our continuing ability to meet the needs of our clients around the globe and by

"Our company's core growth must continue to be driven by a vigorous pursuit of organic growth opportunities and projects in the areas of correctional and detention management and mental health services, both on our domestic front as well as internationally."

strong industry fundamentals. An increased demand from government agencies for detention bed space has continued to push our company-wide occupancy rates to very high levels. These factors combined with a rise in industry awareness within the investment community drove our stock price to a 16.6 percent increase year over year, from \$22.80 on December 31, 2003 to \$26.58 on December 31, 2004.

THE GROWTH AHEAD

Since our inception, we have relied entirely on organic opportunities and projects to grow our company. Because of our past constraints to adequately access the capital markets due to the majority control of our corporate parent company, our remarkable growth was driven exclusively by our ability to win competitive procurements. Our historic success rate in this respect has been notable. We have achieved significant growth milestones over the past 20 years by developing the essential expertise required to deliver unique and innovative services, while providing our clients with superior value.

As we go forward, our company's core growth must continue to be driven by a vigorous pursuit of organic growth opportunities and projects in the areas of correctional and detention management and mental health services, both on our domestic front as well as internationally. The organic growth pipeline for the private corrections industry currently is as robust as it has been in many years. We have presently submitted proposals in response to government procurements or on an unsolicited basis for approximately 18,000 beds, both domestically and internationally. Furthermore, we are in the process of submitting additional proposals in response to government procurements or on an unsolicited basis for approximately 2,300 beds. In addition, we expect to be competing within the next 12 to 18 months for future procurements totaling approximately 22,000 beds.

"We now have, for the first time in our corporate history, the ability to explore other avenues for growth through the acquisition of selective companies that will complement our overall strategic goals and will contribute accretively to our financial performance."

Our efforts to capitalize on current industry trends and growth opportunities started to pay dividends at the end of 2004 when, after a very competitive procurement process, we were selected to negotiate a contract with Montgomery County, Texas for the management and operation of the 1,150-bed Montgomery County Jail. This momentum continued into early 2005 with the signing of a management contract with the California Department of Corrections to reopen our 224-bed McFarland Community Correctional Facility. We believe that these two important awards represent a prelude to several other awards scheduled to be made during 2005. We are committed to putting forth our best effort to make the most of these growth prospects.

To this end, and to take full advantage of the many international opportunities that we intend to pursue, we have re-established our once dominant business presence in the United Kingdom with the opening of a Head Office near London, England, and we have recruited very experienced local professionals to lead our venture in this expanding marketplace.

The Mental Health Services area also presents significant upside potential. Our corporate subsidiary, Atlantic Shores Healthcare, has developed a model for success in the delivery of mental health services through its partnership with the State of Florida since 1998 for the management of the South Florida State Hospital. During 2004, we re-invigorated our mental health business development efforts with the hiring of a new Senior Vice President of Mental Health Services who is leading a team of talented professionals to promote and market our mental health services to other government agencies around the country.

While domestic and international organic project opportunities will continue to drive our growth and will allow us to create significant critical mass in our core business areas of corrections and mental health, we now have, for the first time in our corporate history, the ability to explore other avenues for growth through the acquisition of selective companies that will

"Whether through organic competitive procurement processes in our core correctional and mental health services, through the smooth execution of accretive acquisitions of companies that complement our strategic goals, or through the expansion of select existing facilities, our company is well prepared to take full advantage of the opportunities that lie ahead."

complement our overall strategic goals and will contribute accretively to our financial performance. Our approach in this respect will always be disciplined and diligent, and we will make every effort to ensure that any prospects to grow our company through acquisitions limit risks as well as enhance value for our shareholders.

Additionally, given our high occupancy rates which approached 100 percent for the entire year, we are presented with the possibility of expanding a select number of our existing facilities. These expansion opportunities represent incremental growth for our company and are indicative of the confidence that our government clients place in us when faced with increasing correctional needs. These prospects are best exemplified by the current 543-bed expansion to our 1,318-bed South Bay Correctional Facility in Florida, scheduled to be completed in the second quarter of 2005, and by the recently announced 600-bed expansion to our 1,918-bed Lawton Correctional Facility in Oklahoma, scheduled to become operational during the second quarter of 2006.

In essence, we will continue to pursue growth opportunities in many ways. Whether through organic competitive procurement processes in our core correctional and mental health services, through the smooth execution of accretive acquisitions of companies that complement our strategic goals, or through the expansion of select existing facilities, our company is well prepared, with solid organizational and capital structures, to take full advantage of the opportunities that lie ahead.

George C. Zoley
Chairman and Chief Executive Officer

Wayne H. Calabrese
Vice Chairman, President and Chief Operating Officer

THE BOARD OF DIRECTORS

George C. Zoley
Chairman and Chief Executive Officer
The GEO Group, Inc.
George C. Zoley serves as Chairman of the Board and Chief Executive Officer of The GEO Group, Inc. Mr. Zoley founded the Company in 1984 and continues to play a major role in the Company's worldwide operations and development of new business opportunities. Prior to founding the Company, Mr. Zoley served as Manager, Director, and then Vice President of Government Services at Wackenhut Services, Inc. Mr. Zoley received his Bachelor's and Master's Degrees in Public Administration from Florida Atlantic University and his Doctorate Degree in Public Administration from Nova Southeastern University.

Wayne H. Calabrese
Vice Chairman, President and Chief Operating Officer
The GEO Group, Inc.
Wayne H. Calabrese serves as Vice Chairman of the Board, President and Chief Operating Officer of The GEO Group, Inc. Mr. Calabrese joined the Company as Vice President of Business Development in 1989 and has served in a range of increasingly senior operating positions since then. Prior to joining the Company, Mr. Calabrese was a partner in the Akron, Ohio law firm of Calabrese, Dobbins and Kepple. Mr. Calabrese received his Bachelor's Degree in Secondary Education from the University of Akron and his Juris Doctor from the University of Akron School of Law.

Norman A. Carlson
Former Director
Federal Bureau of Prisons
Norman A. Carlson has served as a Director of The GEO Group, Inc. since April 1994. Mr. Carlson retired from the Department of Justice in 1987 after serving as the Director of the Federal Bureau of Prisons for 17 years. During his 30-year career, Mr. Carlson worked at the United States Penitentiary, Leavenworth, Kansas, and at the Federal Correctional Institution, Ashland, Kentucky. Mr. Carlson was President of the American Correctional Association from 1978 to 1980. Mr. Carlson is a Fellow in the National Academy of Public Administration.

The GEO Group's Board of Directors (L-R): John M. Perzel, William M. Murphy, Wayne H. Calabrese, George C. Zoley, Richard H. Glanton, Anne N. Foreman, Norman A. Carlson.

Anne N. Foreman
Former Under Secretary
United States Air Force
Anne N. Foreman served as Under Secretary of the United States Air Force from September 1989 until January 1993. Ms. Foreman also served as General Counsel of the Department of the Air Force and as Associate Director of Presidential Personnel for National Security in the White House. Ms. Foreman earned a Bachelor's Degree, Magna Cum Laude, in History and French, and a Master's Degree in History from the University of Southern California. She received her Juris Doctor from American University and was awarded an Honorary Doctorate of Law from Troy State University.

Richard H. Glanton
Senior Vice President
Exelon Corporation
Richard H. Glanton serves as Senior Vice President of Exelon Corporation. Mr. Glanton had been a member of the Exelon Corporation Board of Directors since its inception in October 2002. Prior to joining Exelon Corporation, Mr. Glanton was a Partner in the General Corporate Group of the law firm of Reed, Smith, Shaw and McClay, LLP in Philadelphia, Pennsylvania. He received his Bachelor's Degree in English from West Georgia College (renamed State University of West Georgia) and his Juris Doctor from the University of Virginia School of Law.

John M. Perzel
Speaker
Pennsylvania House of Representatives
The Honorable John M. Perzel was sworn in as Pennsylvania's Speaker of the House of Representatives on April 15, 2003. Prior to being elected Speaker, Mr. Perzel served four consecutive terms as House Majority Leader. Before being elected Majority Leader in 1994, he held the offices of Republican Whip, Policy Committee Chairman, and head of the House Republican Campaign Committee. Mr. Perzel was first elected to the Pennsylvania House of Representatives in 1978. Mr. Perzel earned a Bachelor's Degree from Troy State University in 1975.

William M. Murphy
President
Douglas Management & Realty
William M. Murphy serves as President of Douglas Management & Realty. Mr. Murphy previously served as Vice President of Chase Manhattan Bank, responsible for real estate lending for the Southeastern United States, and was also previously employed by Travers Associates performing real estate feasibility studies. Mr. Murphy has been a real estate developer and investor in Florida since 1984. Mr. Murphy earned a Bachelor's Degree in Civil Engineering from the National University of Ireland and a Master's Degree in Urban Planning from New York University.

NORTH AMERICAN SERVICES

With over 20 years of experience and a strong regional operational structure, The GEO Group is well positioned to partner with federal, state and local government agencies across the country in addressing their correctional and detention needs.

The 1,200-bed Rivers Correctional Institution, located in Winton, North Carolina, provides correctional services for the Federal Bureau of Prisons. The facility, designed and constructed by The GEO Group, was completed in 365 days.

**LEVERAGING STRONG
INDUSTRY FUNDAMENTALS**

Federal directives related to the continuous efforts by the Department of Homeland Security and the Bureau of Immigration and Customs Enforcement to secure the nation's borders and to detain illegal aliens as well as efforts by the Federal Bureau of Prisons and the Office of Federal Detention Trustee to support a growing federal inmate population have resulted in increased funding for programs and initiatives designed to address the increasing detention needs of the U.S. Federal Government.

The Intelligence Reform and Terrorism Prevention Act of 2004 directs the Department of Homeland Security to increase immigration detention bed space by no less than 8,000 beds each fiscal year from 2006 through 2010. President George W. Bush's proposed budget for 2006 calls for \$16 billion in discretionary funding for border and transportation security, including \$176 million for the detention and removal of illegal aliens and \$90 million for increased detention beds and immigration officers, in addition to \$1.2 billion in discretionary spending for the Office of Federal

In July 1997, the Federal Bureau of Prisons selected The GEO Group to manage the Taft Correctional Institution, a 2,048-bed low security prison in Taft, California. This historic milestone marked the first time the Federal Bureau of Prisons contracted out the management of one of its major institutions.

The 3,064-bed Reeves County Detention Complex ("RCDC"), located in Pecos, Texas, is divided into three building units: RCDC I & II house inmates for the Federal Bureau of Prisons, while RCDC III houses inmates for the State of Arizona Department of Corrections.

Detention Trustee and \$20 million in initial funding for the Federal Bureau of Prisons to contract for 1,600 new private sector beds.

This increased focus on federal detention policies along with the need to satisfy future federal detention bed requirements will give rise to new partnership opportunities between federal detention agencies and private service providers. The private corrections industry has played an increasingly important role in addressing our nation's federal detention and correctional needs over the past four years. Since year-end 2000, the number of federal inmates held at private correctional and detention facilities has increased over 40 percent. At the end of 2003, over 12 percent of all federal detainees were held at facilities under private management.

In addition to these factors, overcrowding conditions continue to affect state correctional systems across the country. Approximately 59 percent of the 2.2 million individuals incarcerated in the U.S. at year-end 2003 were held in state prisons, with the private sector housing approximately six percent of them. With 22 states operating at or above their highest detention capacity and many others operating close to that capacity, jurisdictions throughout the U.S. are exploring partnerships with private service providers to address these challenges.

The 1,918-bed Lawton Correctional Facility, located in Lawton, Oklahoma is under contract with the State of Oklahoma Department of Corrections. A 600-bed facility expansion is scheduled to be completed during the second quarter of 2006.

The 300-bed Broward Transition Center, located in Deerfield Beach, Florida, provides a range of detention services, including food, laundry and health care, as well as educational and vocational programs, for the Bureau of Immigration and Customs Enforcement and for the Broward County Sheriff's Office.

The GEO Group, Inc. currently provides correctional and detention management services for nine state clients as well as the Federal Bureau of Prisons, the Bureau of Immigration and Customs Enforcement, and the U.S. Marshals Service. With over 20 years of experience and with 32 domestic facility operations spread across 13 states and a strong operational structure that includes three regional offices located respectively in Palm Beach Gardens, Florida; New Braunfels, Texas; and Carlsbad, California, The GEO Group is well positioned to partner with federal, state and local government agencies across the country in addressing their correctional and detention needs.

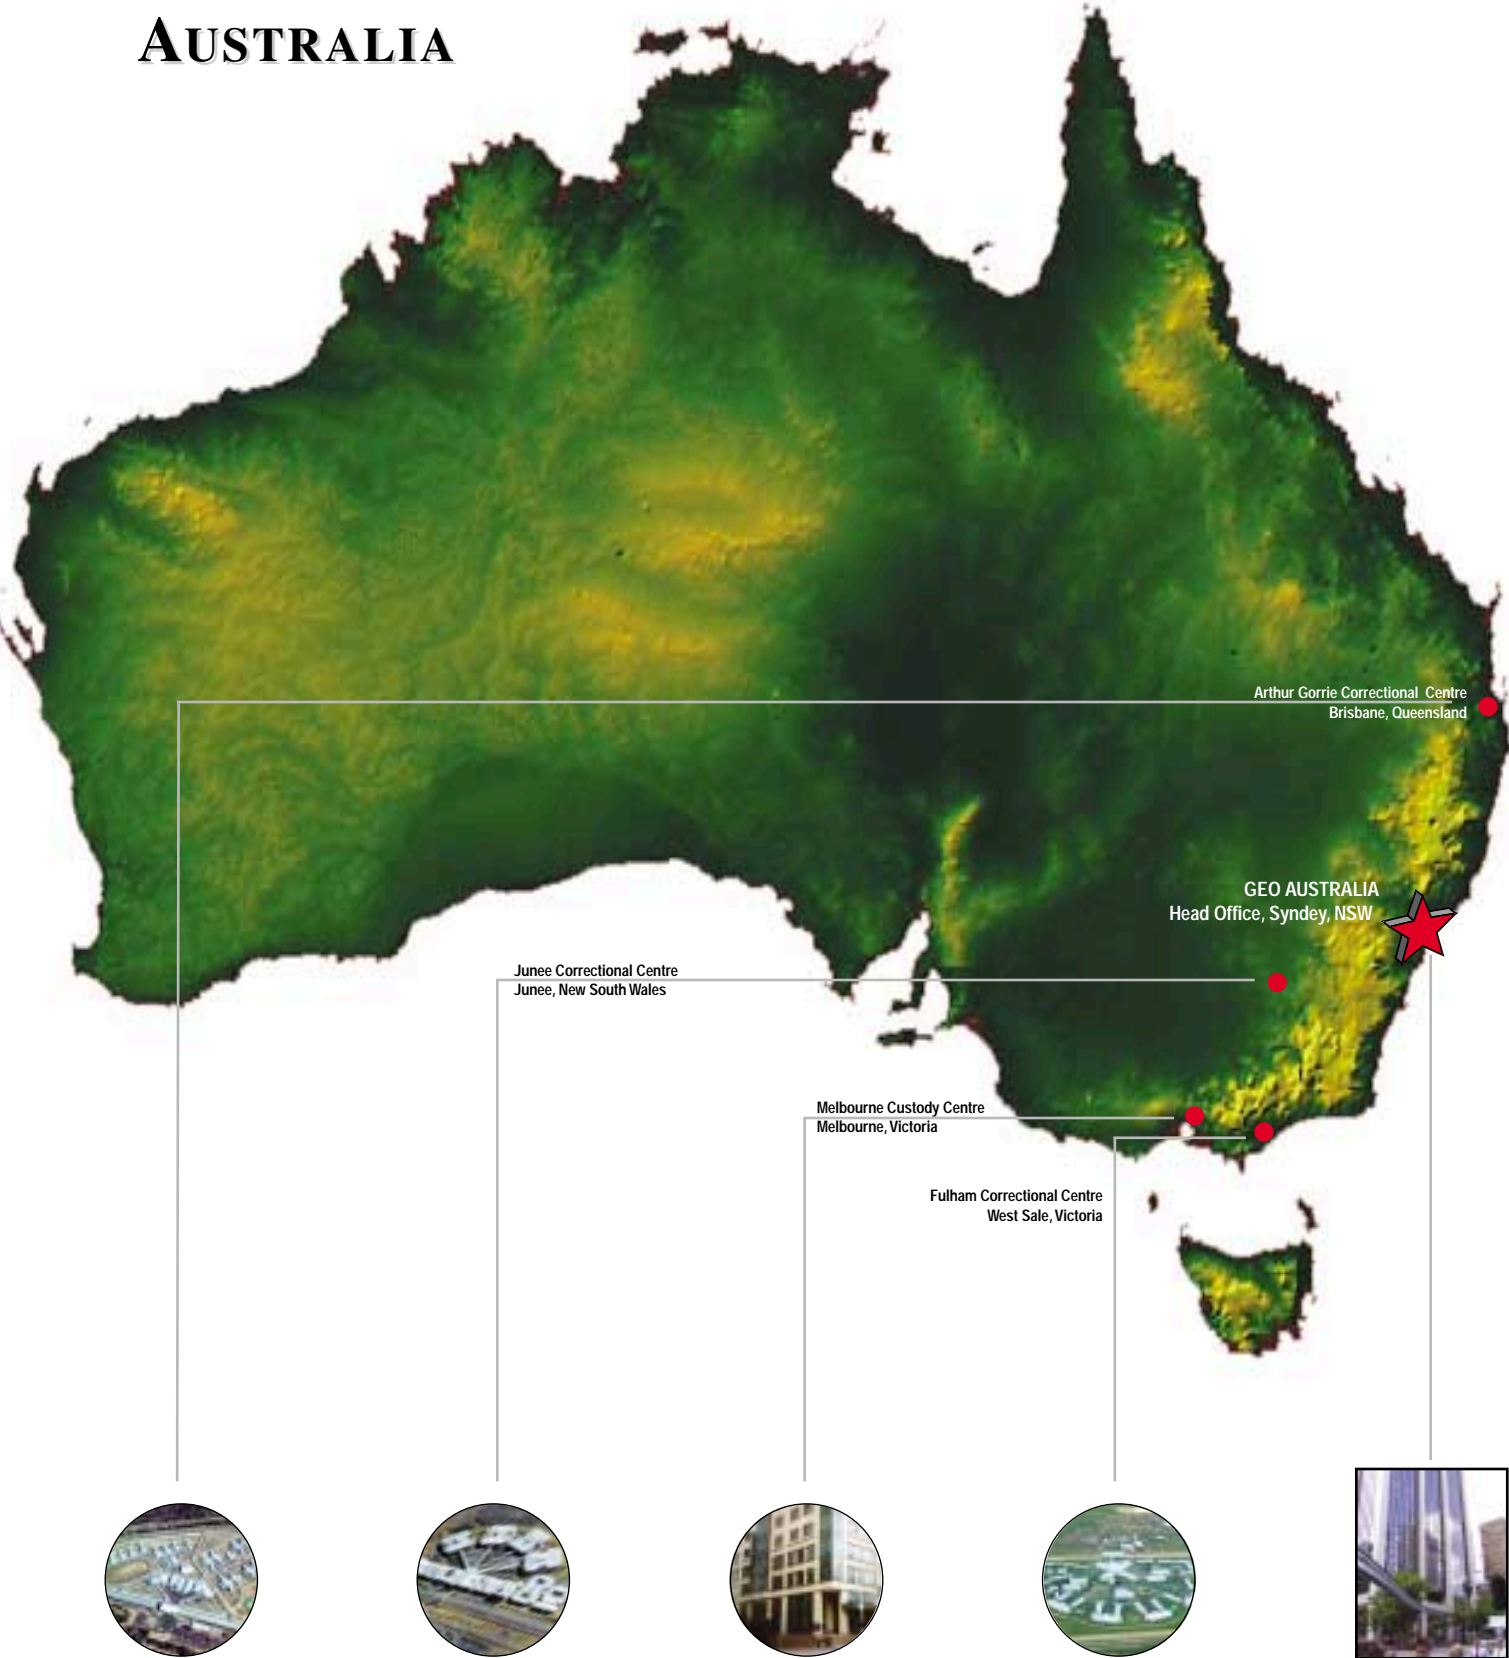

The 1,318-bed South Bay Correctional Facility, located in South Bay, Florida, houses adult male offenders for the State of Florida. A 543-bed expansion to the facility is scheduled to become operational in the second quarter of 2005.

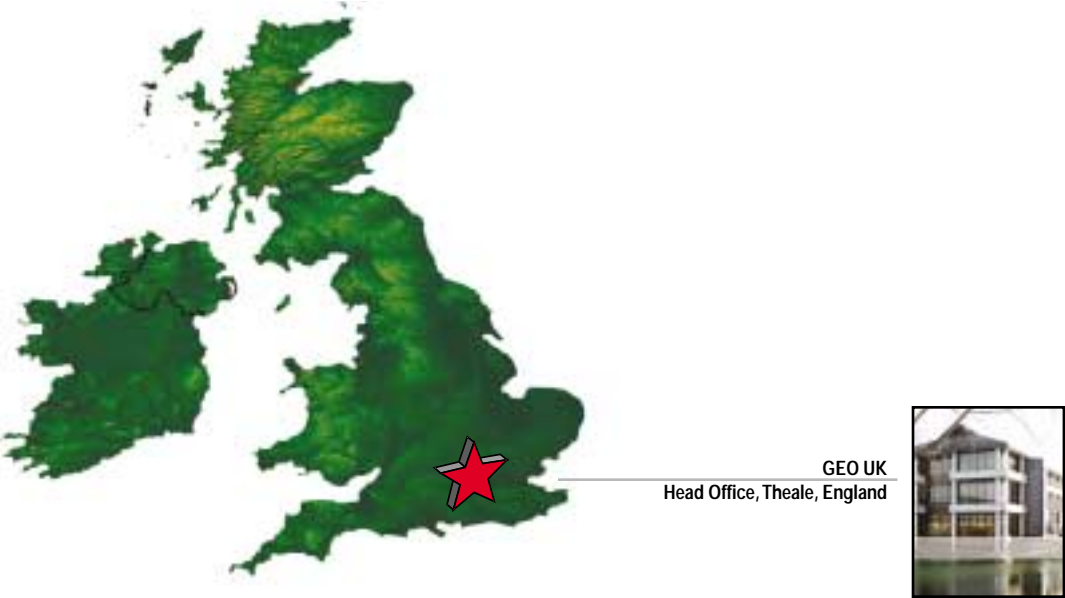

The GEO Group assumed operational management of the 1,536-bed Lawrenceville Correctional Center, Lawrenceville, Virginia through a competitive procurement process. On March 23, 2003, GEO successfully transitioned the facility from its previous operator in 56 hours.

INTERNATIONAL SERVICES

AUSTRALIA

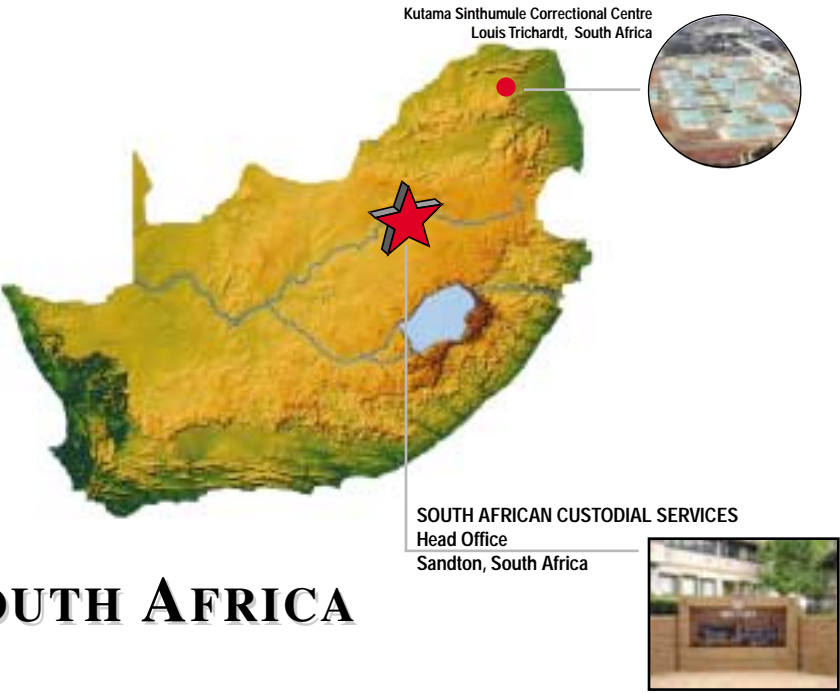

UNITED KINGDOM

NEW ZEALAND

SOUTH AFRICA

The GEO Group will continue to rely on the experience of its proven international services team and the past successes achieved by its many subsidiaries and joint ventures around the globe as it pursues new business opportunities in existing and emerging international private correctional markets.

PURSuing NEW GROWTH OPPORTUNITIES INTERNATIONALLY

During 2004, The GEO Group, Inc. remained a dominant international player as the only publicly traded U.S. correctional company with overseas operations in the countries of Australia, New Zealand, South Africa, and Canada.

Important growth opportunities for the private corrections industry are emerging in new and established international markets. In England and Wales, where the government has decided that all new prisons will be built and managed by the private sector, policy makers have recently expressed the desire to procure the management of groups of prisons for the first time. England, Scotland and Wales, which represent the second largest private correctional market in the world, present significant new business opportunities for the private sector. Germany and other countries in continental Europe are also exploring the potential privatization of prisons and correctional centers. In order to vigorously pursue these opportunities and to re-instate a dominant business presence in the United Kingdom and throughout Europe, The GEO Group established a Head Office near London, England in 2004.

The 750-Bed Junee Correctional Centre, located in Junee, New South Wales, Australia, provides offenders with opportunities to acquire enhanced educational, vocational, and social skills through a variety of rehabilitation programs. The facility became the first correctional centre in Australia to achieve the coveted 5 Star Grading Award from the National Safety Council of Australia, Ltd.

The 845-bed Fulham Correctional Centre in West Sale, Victoria, Australia provides comprehensive correctional services for adult male offenders for the State of Victoria. The Centre's adjacent Nalu Challenge Community offers transition services to approximately 68 sentenced offenders.

The 3,024-bed Kutama Sinthumule Correctional Centre in Louis Trichardt, Northern Province, South Africa became the first prison on the African continent to earn ISO 9001:2000 certification in 2003.

In the Republic of South Africa, the Department of Correctional Services has recently announced plans for the development and operation of four new 3,000-bed prisons in partnership with private operators to alleviate the country's growing demand for correctional bed space. The GEO Group's management of the 3,024-bed Kutama Sinthumule Correctional Centre, located in Louis Trichardt, has dramatically raised the standards of South Africa's correctional services, achieving ISO 9001:2000 certification in 2003 for the first time for a prison on the African continent and instituting best practices in the delivery of secure facilities, quality services and innovative rehabilitation programs. This successful partnership has placed The GEO Group in a remarkable position to strengthen its partnership with South Africa's Department of Correctional Services as solicitations for new prisons materialize.

During 2004, The GEO Group remained a dominant force in the Australasian private correctional market with the management of three correctional centres and one police custody centre in Australia and one central remand prison in New Zealand. The company's partnerships with government entities in this important continent have continued to strengthen as correctional and detention government agencies in the region search for solutions to their ongoing needs.

The GEO Group will continue to rely on the experience of its proven international services team and the past successes achieved by its many subsidiaries and joint ventures around the globe as it pursues new business opportunities in existing and emerging international private correctional markets.

MENTAL HEALTH SERVICES

With a re-invigorated marketing effort and with the remarkable success of its public-private partnership at South Florida State Hospital, Atlantic Shores Healthcare is well positioned to expand its innovative service offerings in the coming year.

Atlantic Shores Healthcare's 325-bed South Florida State Hospital, located in Pembroke Pines, Florida is under contract with the State of Florida Department of Children and Families. South Florida State Hospital leads the nation in innovative programming and active patient treatment approaches.

SETTING NEW STANDARDS IN MENTAL HEALTH SERVICES

Through a groundbreaking public-private partnership with the State of Florida's Department of Children and Families, The GEO Group's corporate subsidiary, Atlantic Shores Healthcare, Inc., has been setting new standards and raising the bar in the delivery of mental health services and treatments. Since 1998, Atlantic Shores Healthcare has managed the South Florida State Hospital located in Pembroke Pines, Florida. Once a deteriorating facility, South Florida State Hospital has become a model for success, substantially improving the quality of care and leading the nation in innovative programming and active patient treatment approaches.

One of the key measures used by mental health hospitals across the country to determine the efficiency of treatment programs and outcomes in patient care is the number of restraint and seclusion events that occur as a result of violent situations involving patients. Since 1998, the number of restraint and seclusion events taking place at South Florida State Hospital has dramatically decreased from an average of 40 instances in a given month to approximately one or two instances per year, which is well below the national average. This remarkable improvement has garnered nationwide attention with The Joint Commission on Accreditation of Healthcare Organizations recognizing it as one of the industry's best practices.

Two other treatment approaches being successfully implemented at South Florida State Hospital have also been recognized as industry best practices by The Joint Commission on Accreditation of Healthcare Organizations. These treatment approaches relate to Dialectical Behavior Therapy and Role Recovery Treatments. As a result of instituting industry best practices, Atlantic Shores Healthcare has dramatically improved the quality of patient care. This quality of care manifests itself in better utilization of available governmental resources. Thus, more needy Floridians are being served than ever before at this facility and at a lower cost to the taxpayer.

During 2004, The GEO Group intensified its efforts to promote and market its mental health service offerings to other states around the U.S. with the appointment of Jorge A. Dominicus as Senior Vice President of Mental Health Services and President of Atlantic Shores Healthcare, Inc. The Company is currently exploring business development opportunities in several state and local jurisdictions across the country. With a re-invigorated marketing effort and with the remarkable success of its public-private partnership at South Florida State Hospital, Atlantic Shores Healthcare is well positioned to expand its innovative service offerings in the coming year.

The GEO Group, Inc.
MARKET FOR REGISTRANT’S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common stock trades on the New York Stock Exchange under the symbol “GGI.” The following table shows the high and low prices for our common stock, as reported by the New York Stock Exchange, for each of the four quarters of fiscal years 2004 and 2003. The prices shown have been rounded to the nearest \$1/100. The approximate number of shareholders of record as of March 11, 2005, was 143.

Quarter	2004		2003	
	High	Low	High	Low
First	\$ 24.23	\$ 19.80	\$ 11.32	\$ 8.48
Second	24.62	18.70	14.74	8.96
Third	21.00	17.33	19.92	13.71
Fourth	26.58	19.56	22.40	17.05

We did not pay any cash dividends on our common stock for fiscal years 2004 and 2003. We intend to retain our earnings to finance the growth and development of our business and do not anticipate paying cash dividends on our capital stock in the foreseeable future. Future dividends, if any, will depend, on our future earnings, our capital requirements, our financial condition and on such other factors as our board of directors may consider relevant. In addition, the indenture governing our \$150.0 million 81/4% senior notes due in 2013, and our \$150.0 million senior credit facility also place material restrictions on our ability to pay dividends. See “Item 7. Management’s Discussion and Analysis, Cash Flow and Liquidity” and “Item 8. Financial Statements — Note 8 Debt” for further description of these restrictions.

We did not buy back any of our common stock during 2004. On July 9, 2003 we purchased all 12 million shares of our common stock beneficially owned by Group 4 Falck, our former 57% majority shareholder, for \$132.0 million in cash.

Equity Compensation Plan Information

The following table sets forth information about our common stock that may be issued upon the exercise of options, warrants and rights under all of our equity compensation plans as of January 2, 2005, including our 1994 Stock Option Plan, our 1994 Second Stock Option Plan, our 1999 Stock Option Plan, and our Non-Employee Director Stock Option Plan. Our shareholders have approved all of these plans.

Plan category	(a)	(b)	(c)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	1,591,509	\$ 15.49	19,900
Equity compensation plans not approved by security holders	—	—	—
Total	1,591,509	\$ 15.49	19,900

Sales of Unregistered Securities

To facilitate the completion of the share purchase from Group 4 Falck, on July 9, 2003, we issued \$150.0 million aggregate principal amount ten-year 8 1/4% senior notes, referred to as the Notes, in a private offering to qualified institutional buyers under Rule 144A of the Securities Act.

Subsequent to the private offering of the Notes, we filed an S-4 registration statement to register under the Securities Act of 1933 exchange notes, having substantially identical terms as the Notes, which we refer to as the Exchange Notes. The registration statement was declared effective by the SEC on November 10, 2003. We then completed an exchange offer pursuant to the registration statement, in which holders of the Notes exchanged the Notes for the Exchange Notes which are generally freely tradable, subject to certain exceptions. We did not sell any securities that were unregistered under the Securities Act of 1933 in 2004.

SELECTED FINANCIAL DATA

The selected consolidated financial data should be read in conjunction with our consolidated financial statements and the notes to the consolidated financial statements.

(1) Our fiscal year ends on the Sunday closest to the calendar year end. Fiscal year ended January 2, 2005 contained 53 weeks. Discontinued Operations have not been included with Selected Financial Data. Information related to Discontinued Operations is listed in "Item 8. Financial Statements — Note 3 Discontinued Operations."

(2) Compensated resident days are calculated as follows: (a) for per diem rate facilities — the number of beds occupied by residents on a daily basis during the fiscal year; and (b) for fixed rate facilities — the design capacity of the facility multiplied by the number of days the facility was in operation during the fiscal year. Amounts exclude compensated resident days for United Kingdom for all of the above periods.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

We have restated our Consolidated Financial Statements for the fiscal years ended December 28, 2003 and December 29, 2002 to reflect the application of the appropriate accounting principles to the recognition of compensated absences according to generally accepted accounting principles. Under generally accepted accounting principles compensated absences must be accrued for hourly and salaried employees. The accrual must consist of the vested liability as well as the amount of the unvested liability that is deemed to be earned under the rules that govern FAS No. 43 “Accounting for Compensated Absences.” Prior to the restatement, the Company’s vacation expense and related accruals were understated for 2003, 2002 and prior periods. The impact of this restatement on such prior periods was reflected as a \$3.2 million adjustment to retained earnings as of December 30, 2001.

Additionally, we determined that under FAS 94, “Consolidation of All Majority-Owned Subsidiaries” we are required to consolidate one of our joint ventures in South Africa (South African Custodial Management Pty. Limited, or SACM). We determined that we had not properly applied FAS 94 for 2003 or 2002 for SACM. As a result we have restated our consolidated financial statements for fiscal year 2003 and 2002 included in this report to reflect the operations of SACM as a consolidated subsidiary. SACM was previously included in our consolidated balance sheets as investment and advances to affiliates, and in our consolidated statement of income as equity in earnings of affiliates.

Also, we reviewed our practice for depreciating leasehold improvements in part due to the recent attention and focus on this area. We determined we inappropriately included option periods when determining the amortization period for certain leasehold improvements. As a result our depreciation expense was understated for 2003, 2002 and prior periods. We have restated our consolidated financial statements for 2003 and 2002 to reflect the amortization of these items, and its retained earnings as of December 30, 2001 by \$0.5 million, to reflect the impact on prior periods.

Adjustments as a result of the restatements described above, collectively referred to as the Restatements, for years ended December 28, 2003 and December 29, 2002 resulted in a reduction in previously reported net income of \$0.5 million and \$0.4 million, respectively. Basic and diluted income per share for the year ended December 28, 2003 was reduced by \$0.04 and \$0.03, respectively. Basic and diluted income per share for the year ended December 29, 2002 was reduced by \$0.02 per share. In addition, as a result of the Restatements, retained earnings was reduced by \$2.5 million and \$2.0 million as of December 28, 2003 and December 29, 2002, respectively. Also, as a result of the cumulative effect of the Restatements of periods prior to 2002, the cumulative effect was to reduce opening retained earnings as of December 30, 2001 by \$1.7 million. For a discussion of the individual adjustments made as a result of the Restatements, see “Item 8. Financial Statements — Note 2. Restatements” (Years ended December 28, 2003 and December 29, 2002.)

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of our consolidated results of operations and financial condition. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of numerous factors including, but not limited to, those described below under “Risks Related to Our High Level of Indebtedness, Risks Related to Our Business and Industry and Forward-Looking Statements.” The discussion should be read in conjunction with the consolidated financial statements and notes thereto.

Discontinued Operations

Through our Australian subsidiary, we previously had a contract with the Department of Immigration, Multicultural and Indigenous Affairs, or DIMIA, for the management and operation of Australia’s immigration centers. In 2003, the contract was not renewed, and effective February 29, 2004, we completed the transition of the contract and exited the management and operation of the DIMIA centers. The accompanying consolidated financial statements and notes reflect the operations of DIMIA as a discontinued operation in all periods presented.

Variable Interest Entities

In January 2003, the FASB issued FIN No. 46, “Consolidation of Variable Interest Entities,” which addressed consolidation by a business of variable interest entities in which it is the primary beneficiary. In December 2003, the FASB issued FIN No. 46R which replaced FIN No. 46. We have reviewed our 50% owned South African joint venture in South African

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Custodial Services Pty. Limited, which we refer to as SACS, and determined it is a variable interest entity. We determined that we are not the primary beneficiary of SACS and as a result are not required to consolidate SACS under FIN 46R. We continue to account for SACS as an equity affiliate. SACS was established in 2001, to design, finance and build the Kutama Sinthumule Correctional Center and SACM was established to operate correctional centers. Subsequently, SACS was awarded a 25 year contract to design, construct, manage and finance a facility in Louis Trichardt, South Africa. SACS, based on the terms of the contract with government, was able to obtain long term financing to build the prison. The financing is fully guaranteed by the government, except in the event of default, for which it provides an 80% guarantee. “See Item 7. Financial Condition — Guarantees” for a discussion of our guarantees related to SACS. Separately, SACS entered into a long term operating contract with SACM to provide security and other management services and with SACS’s joint venture partner to provide purchasing, programs and maintenance services upon completion of the construction phase, which concluded in February 2002. Our maximum exposure for loss under this contract is \$15.6 million, which represents our initial investment and the guarantees discussed in Item 7.

Shelf Registration Statement

On January 28, 2004, our universal shelf registration statement on Form S-3 was declared effective by the Securities and Exchange Commission, which we refer to as the SEC. The universal shelf registration statement provides for the offer and sale by us, from time to time, on a delayed basis, of up to \$200.0 million aggregate amount of our common stock, preferred stock, debt securities, warrants, and/or depositary shares. These securities, which may be offered in one or more offerings and in any combination, will in each case be offered pursuant to a separate prospectus supplement issued at the time of the particular offering that will describe the specific types, amounts, prices and terms of the offered securities. Unless otherwise described in the applicable prospectus supplement relating to the offered securities, we anticipate using the net proceeds of each offering for general corporate purposes, including debt repayment, capital expenditures, acquisitions, business expansion, investments in subsidiaries or affiliates, and/or working capital.

Share Purchase

On July 9, 2003 we purchased all 12 million shares of our common stock beneficially owned by Group 4 Falck, our former 57% majority shareholder, for \$132.0 million in cash pursuant to the terms of a share purchase agreement, dated April 30, 2003, by and among us, Group 4 Falck, our former parent company, The Wackenhut Corporation, or TWC, and Tuhnekaw, Inc., an indirect wholly-owned subsidiary of Group 4 Falck.

In connection with the share purchase, the Services Agreement, dated October 28, 2002, between us and TWC, which we refer to as the Services Agreement, terminated effective December 31, 2003, and no further payments for periods thereafter are due from us to TWC under the Services Agreement. Following the share purchase and the termination of the Services Agreement we internalized several functions previously outsourced to TWC, including payroll processing, human resources management, tax and information systems.

Sale of Our Joint Venture Interest in Premier Custodial Group Limited

On July 2, 2003, we sold our one-half interest in Premier Custodial Group Limited, our former United Kingdom joint venture which we refer to as PCG, to Serco for approximately \$80.7 million, on a pretax basis.

Recent Financings and Debt Repayment

In connection with the share purchase, we completed two financing transactions on July 9, 2003. First, we amended our former senior credit facility. The amended \$150.0 million senior credit facility, which we refer to as the Senior Credit Facility, consists of a \$50.0 million, five-year revolving credit facility, with a \$40.0 million sub limit for letters of credit, and a \$100.0 million, six-year term loan. Second, we offered and sold \$150.0 million aggregate principal amount of 81/4% senior notes due 2013, which we refer to as the Notes.

On June 25, 2004, as required by the terms of the indenture governing the Notes, we used \$43.0 million of the net proceeds from the sale of PCG to repay debt then outstanding under the Senior Credit Facility, and we wrote off approximately \$0.3 million in deferred financing costs related to this payment. As a result of the payment, our borrowings under the term loan portion of the Senior Credit Facility were permanently reduced by \$43.0 million.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Name Change

On November 25, 2003, our corporate name was changed from “Wackenhut Corrections Corporation” to “The GEO Group, Inc.” The name change was required under the terms of the share purchase agreement between us and Group 4 Falck described above. Under the terms of the share purchase agreement, we were also required to cease using the name, trademark and service mark “Wackenhut” by July 9, 2004. In addition to achieving compliance with the terms of the share purchase agreement, we believe that the change in our name to “The GEO Group, Inc.” helps to reinforce the fact that we are no longer affiliated with TWC or Group 4 Falck or their related entities. Following the name change, our New York Stock Exchange ticker symbol was changed to “GGI” and our common stock now trades under that symbol.

Rights Agreement

On October 9, 2003, we entered into a rights agreement with EquiServe Trust Company, N.A., as rights agent. Under the terms of the rights agreement, each share of our common stock carries with it one preferred share purchase right. If the rights become exercisable pursuant to the rights agreement, each right entitles the registered holder to purchase from us one one-thousandth of a share of Series A Junior Participating Preferred Stock at a fixed price, subject to adjustment. Until a right is exercised, the holder of the right has no right to vote or receive dividends or any other rights as a shareholder as a result of holding the right. The rights trade automatically with shares of our common stock, and may only be exercised in connection with certain attempts to acquire our company. The rights are designed to protect the interests of our company and our shareholders against coercive acquisition tactics and encourage potential acquirers to negotiate with our board of directors before attempting an acquisition. The rights may, but are not intended to, deter acquisition proposals that may be in the interests of our shareholders.

Critical Accounting Policies

We believe that the accounting policies described below are critical to understanding our business, results of operations and financial condition because they involve the more significant judgments and estimates used in the preparation of our consolidated financial statements. We have discussed the development, selection and application of our critical accounting policies with the audit committee of our board of directors, and our audit committee has reviewed our disclosure relating to our critical accounting policies in this “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Our consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States. As such, we are required to make certain estimates, judgments and assumptions that we believe are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We routinely evaluate our estimates based on historical experience and on various other assumptions that our management believes are reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. If actual results significantly differ from our estimates, our financial condition and results of operations could be materially impacted.

Other significant accounting policies, primarily those with lower levels of uncertainty than those discussed below, are also critical to understanding our consolidated financial statements. The notes to our consolidated financial statements contain additional information related to our accounting policies and should be read in conjunction with this discussion.

Revenue Recognition

We recognize revenue in accordance with Staff Accounting Bulletin, or SAB, No. 101, “Revenue Recognition in Financial Statements”, as amended by SAB No. 104, “Revenue Recognition”, and related interpretations. Facility management revenues are recognized as services are provided under facility management contracts with approved government appropriations based on a net rate per day per inmate or on a fixed monthly rate.

Project development and design revenues are recognized as earned on a percentage of completion basis measured by the percentage of costs incurred to date as compared to estimated total cost for each contract. This method is used because management considers costs incurred to date to be the best available measure of progress on these contracts. Provisions for estimated losses on uncompleted contracts and changes to cost estimates are made in the period in which we determine that such losses and changes are probable. Contract costs include all direct material and labor costs and those indirect costs related

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

to contract performance. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements, may result in revisions to estimated costs and income, and are recognized in the period in which the revisions are determined.

We extend credit to the governmental agencies we contract with and other parties in the normal course of business as a result of billing and receiving payment for services thirty to sixty days in arrears. Further, we regularly review outstanding receivables, and provide estimated losses through an allowance for doubtful accounts. In evaluating the level of established loss reserves, we make judgments regarding our customers’ ability to make required payments, economic events and other factors. As the financial condition of these parties change, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required. We also perform ongoing credit evaluations of our customers’ financial condition and generally do not require collateral. We maintain reserves for potential credit losses, and such losses traditionally have been within our expectations.

Reserves for Insurance Losses

Claims for which we are insured arising from our U.S. operations that have an occurrence date of October 1, 2002 or earlier are handled by TWC and are fully insured up to an aggregate limit of between \$25.0 million and \$50.0 million, depending on the nature of the claim. With respect to claims for which we are insured arising after October 1, 2002, we maintain a general liability policy for all U.S. operations with \$52.0 million per occurrence and in the aggregate. On October 1, 2004, we increased our deductible on this general liability policy from \$1.0 million to \$3.0 million for each claim which occurs after October 1, 2004. We also maintain insurance in amounts management deems adequate to cover property and casualty risks, workers’ compensation, medical malpractice and automobile liability. Our Australian subsidiary is required to carry tail insurance through 2011 related to a discontinued contract. We also carry various types of insurance with respect to our operations in South Africa, Australia and New Zealand.

Since our insurance policies generally have high deductible amounts (including a \$3.0 million per claim deductible under our general liability policy), losses are recorded as reported and a provision is made to cover losses incurred but not reported. Loss reserves are undiscounted and are computed based on independent actuarial studies. Our management uses judgments in assessing loss estimates based on actuarial studies, which include actual claim amounts and loss development considering historical and industry experience. If actual losses related to insurance claims significantly differ from our estimates, our financial condition and results of operations could be materially impacted.

Income Taxes

We account for income taxes in accordance with Financial Accounting Standards, or FAS, No. 109, “Accounting for Income Taxes.” Under this method, deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax bases of assets and liabilities given the provisions of enacted tax laws. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. Valuation allowances are recorded related to deferred tax assets based on the “more likely than not” criteria of FAS No. 109.

In providing for deferred taxes, we consider tax regulations of the jurisdictions in which we operate, and estimates of future taxable income and available tax planning strategies. If tax regulations, operating results or the ability to implement tax-planning strategies vary, adjustments to the carrying value of deferred tax assets and liabilities may be required.

On October 22, 2004, the President of the United States signed into law the American Jobs Creation Act of 2004, which we refer to as AJCA. A key provision of the AJCA creates a temporary incentive for U.S. corporations to repatriate undistributed income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign corporations. In December 2004, we repatriated approximately \$17.3 million in incentive dividends, as defined in the AJCA, and recognized an income tax benefit of \$0.2 million.

On November 19, 2004, a technical correction bill, the Tax Technical Corrections Act of 2004, was introduced in the House of Representatives to clarify key elements in the AJCA. In January 2005, the Treasury Department began to issue the first of a series of clarifying guidance documents related to the AJCA. If a technical correction bill similar to the Tax Technical Corrections Act of 2004 is enacted, we would recognize an additional tax benefit of \$1.7 million. While it is expected that new legislation will be introduced into Congress to provide additional clarifying language on key elements of the provision, there can be no assurance that such legislation will be enacted.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Property and Equipment

As of January 2, 2005, we had approximately \$197.0 million in long-lived property and equipment. Property and equipment are stated at cost, less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 2 to 40 years. Equipment and Furniture and fixtures are depreciated over 3 to 7 years. Accelerated methods of depreciation are generally used for income tax purposes. Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease. We perform ongoing evaluations of the estimated useful lives of our property and equipment for depreciation purposes. The estimated useful lives are determined and continually evaluated based on the period over which services are expected to be rendered by the asset. Maintenance and repairs are expensed as incurred.

We review long-lived assets to be held and used for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. Management has reviewed our long-lived assets and determined that there are no events requiring impairment loss recognition for the period ended January 2, 2005. Events that would trigger an impairment assessment include deterioration of profits for a business segment that has long-lived assets, or when other changes occur which might impair recovery of long-lived assets.

Idle Facilities

We have entered into ten year non cancelable operating leases with Correctional Properties Trust, or CPV, for eleven facilities with initial terms that expire at various times beginning in April 2008 and extending through January 2010. In the event that our facility management contract for one of these leased facilities is terminated, we would remain responsible for payments to CPV on the underlying lease. We will account for idle periods under any such lease in accordance with FAS No. 146 “Accounting for Costs Associated with Exit or Disposal Activities.” Specifically, we will review our estimate for sublease income and record a charge for the difference between the net present value of the sublease income and the lease expense over the remaining term of the lease.

Results of Operations

The following discussion should be read in conjunction with our consolidated financial statements and the notes to the consolidated financial statements accompanying this report. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those described under “Risk Factors” and those included in other portions of this report.

The discussion of our results of operations below excludes the results of our discontinued operations resulting from the termination of our management contract with DIMIA for all periods presented. Through our Australian subsidiary, we had a contract with DIMIA for the management and operation of Australia’s immigration centers. In 2003, the contract was not renewed, and effective February 29, 2004, we completed the transition of the contract and exited the management and operation of the DIMIA centers.

For the purposes of the discussion below, “2004” means the 53 week fiscal year ended January 2, 2005, “2003” means the 52 week fiscal year ended December 28, 2003, and “2002” means the 52 week fiscal year ended December 29, 2002.

Overview

GEO reported diluted earnings per share of \$1.73, \$2.83 and \$0.99 in 2004, 2003, and 2002 respectively. For fiscal year 2004, the \$1.73 amount included (\$0.03) per diluted share for certain items, as detailed below, compared to the fiscal year 2003 \$2.83 amount, which included \$1.89 per diluted share for certain items. The fiscal year 2002 \$0.99 amount included (\$0.03) per diluted share for certain items. Charges from certain items are detailed below. Weighted average common shares outstanding for fiscal year 2004 reflects a full year of the effect of our purchase of 12 million shares of our common stock in the third quarter 2003.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table sets forth certain items before tax which we consider relevant to the discussion below of our operating results for 2004, 2003 and 2002:

	Fiscal Year		
	2004	2003	2002
<i>(Dollars in thousands except per share data)</i>			
Certain Items (before income taxes)			
Insurance reduction	\$ 4,150	\$ —	\$ —
Jena, Louisiana write-off	(3,000)	(5,000)	(1,100)
DIMIA insurance reserves	—	(3,600)	—
Write-off of acquisition costs	(1,306)	—	—
Gain on sale of UK joint venture	—	61,034	—
Write-off of deferred financing fees	(317)	(1,989)	—
Certain Items	\$ (473)	\$ 50,445	\$ (1,100)
Amounts per diluted common share after-tax	\$ (0.03)	\$ 1.87	\$ (0.03)

The following table delineates where the total of certain items above are classified in our Consolidated Statements of Income.

	Fiscal Year		
	2004	2003	2002
<i>(Dollars in thousands)</i>			
Certain Items represented in the various lines of the Consolidated Statements of Income			
Operating Expenses	\$ 1,150	\$ (8,000)	\$ (1,100)
General and Administrative Expenses	(1,306)	—	—
Write-off of deferred financing fees	(317)	(1,989)	—
Gain on Sale of UK joint venture	—	61,034	—
Certain Items	\$ (473)	\$ 50,445	\$ (1,100)

2004 versus 2003

Facility Operations

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
<i>(Dollars in thousands)</i>						
Revenue	\$ 614,548	100.0%	\$ 567,441	100.0%	\$ 47,107	8.3%

The increase in revenues in 2004 compared to 2003 is primarily attributable to five items. (i) Australian and South African revenues increased approximately \$17.7 million, \$9.7 million and \$2.2 million of which was due to the strengthening of the Australian dollar and South African Rand, respectively, and \$5.8 million of which was due to higher occupancy rates and contractual adjustments for inflation. (ii) Revenues derived from construction increased by \$13.1 million in 2004 as compared to 2003 when construction revenue was insignificant. The construction revenue is related to our expansion of South Bay, one of the facilities that we manage, and the expansion is expected to be completed by the end of the second quarter of 2005. (iii) The opening of new facilities, including Reeves and Sanders Estes, resulted in a \$13.1 million increase in revenue. The increase in revenues also reflects \$4.9 million of additional revenue in 2004 as a result of the fact that the Lawrenceville Correctional Facility, which opened in March 2003, was operational for the entire period. (iv) Revenues increased in 2004 because it contained 53 weeks compared to 2003, which contained 52 weeks. (v) Domestic revenues also increased due to contractual adjustments for inflation, slightly higher occupancy rates and improved terms negotiated into a number of contracts. These increases were offset by

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

\$24.6 million of lost revenue due to the non renewal in January 2004 of the management contracts for the Willacy State Jail and John R. Lindsey State Jail, and the closure of the McFarland CCF State Correctional Facility on December 31, 2003. The McFarland facility was reactivated on January 1, 2005.

The number of compensated resident days in domestic facilities increased to 10.5 million in 2004 from 9.8 million in 2003. Compensated resident days in Australian and South African facilities during 2004 increased to 2.1 million from 1.8 million for the comparable periods in 2003 primarily due to higher population levels. We look at the average occupancy in our facilities to determine how we are managing our available beds. The average occupancy is calculated by taking capacity as a percentage of compensated mandays. The average occupancy in our domestic, Australian and South African facilities combined was 99.1% of capacity in 2004 compared to 100% in 2003. The decrease in the average occupancy is due to an increase in the number of beds made available to us under our contracts.

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Operating Expenses	\$ 514,908	83.8%	\$ 484,018	85.3%	\$ 30,890	6.4%

Operating expenses consist of those expenses incurred in the operation and management of our correctional, detention and mental health facilities. Fiscal 2004 operating expenses include a \$4.2 million reduction in our general liability, auto liability and worker’s compensation insurance reserves that was made in the third quarter 2004. This reduction was the result of revised actuarial projections related to loss estimates for the initial two years of our insurance program which was established on October 2, 2002. Prior to October 2, 2002, our insurance coverage was provided through an insurance program established by TWC, our former parent company. We experienced significant adverse claims development in general liability and workers’ compensation in the late 1990’s. Beginning in approximately 1999, we made significant operational changes and began to aggressively manage our risk in a proactive manner. However, these changes were not immediately realized in our loss estimates. These changes have resulted in improved claims experience and loss development, which we have recently begun realizing in our actuarial projections. As a result of our adverse experience as an insured under TWC’s insurance program, we previously established our reserves for the new insurance program above the actuary’s estimate in order to provide for potential adverse loss development. As a result of improving loss trends, under our new program, our independent actuary reduced its expected losses for claims arising since October 2, 2002. We have adjusted our reserve at January 2, 2005 at the actuary’s expected loss. There can be no assurance that our improved claims experience and loss developments will continue.

Operating expenses in 2004 reflect an additional provision for operating losses of approximately \$3.0 million related to our inactive facility in Jena, Louisiana.

Operating expenses in 2003 reflect a provision for operating losses of approximately \$5.0 million related to the Jena facility, and approximately \$3.0 million primarily attributable to liability insurance expenses, related to the transitioning of the DIMIA contract.

The remaining increase in operating expenses is consistent with the increase in revenues discussed above.

General and Administrative Expenses

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
General and Administrative Expenses	\$ 45,879	7.5%	\$ 39,379	6.9%	\$ 6,500	16.5%

General and administrative expenses consist primarily of corporate management salaries and benefits, professional fees and other administrative expenses. Compliance with Sarbanes-Oxley requirements for management’s assessment over internal controls resulted in an increase in professional fees in 2004 of \$1.0 million. Salary expense increased \$5.0 million in 2004 as a result of increased incentive targets under our senior officer incentive plan and the internalization of functions and services previously outsourced to TWC. In May 2004, we completed payments under employment agreements with certain key executives triggered by the change in control from the sale of TWC in May 2002, resulting in a \$2.4 million reduction in salary expense in 2004. In addition, we were pursuing acquisition opportunities in 2004, and had capitalized direct and incremental costs related to poten-

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

tial acquisitions. During the fourth quarter of 2004, we determined that the related acquisitions were no longer probable, and wrote off the capitalized deferred acquisition costs of \$1.3 million. Finally, the remaining increase in general and administrative costs relates to other increases in professional fees, travel and rent expense for our corporate offices.

Interest Income and Interest Expense

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Interest Income	\$ 9,598	1.6%	\$ 6,874	1.2%	\$ 2,724	39.6%
Interest Expense	\$ 22,138	3.6%	\$ 17,896	3.2%	\$ 4,242	23.7%

The increase in interest income is primarily due to higher average invested cash balances. The increase also reflects income from interest rate swap agreements entered into September 2003 for our domestic operations, which increased interest income. The interest rate swap agreements in the aggregate notional amounts of \$50.0 million are hedges against the change in the fair value of a designated portion of the Notes due to changes in the underlying interest rates. The interest rate swap agreements have payment and expiration dates and call provisions that coincide with the terms of the Notes.

The increase in interest expense is primarily attributable to the Notes, which began accruing interest on July 9, 2003. This resulted in a full year of interest expense in 2004 as compared to approximately six months in 2003. On June 25, 2004, we made a payment of approximately \$43.0 million on the term loan portion of our Senior Credit Facility. Further, interest expense reflects higher average interest rates during 2004.

Costs Associated with Debt Refinancing: Deferred financing fees of \$0.3 million were written off in 2004 in connection with the \$43.0 million payment related to the term loan portion of the Senior Credit Facility. In 2003, the extinguishment of debt resulted in write-offs of deferred financing fees of \$2.0 million.

Sale of Joint Venture: Fiscal year 2003’s results of operations includes the sale of the UK joint venture for \$80.7 million which resulted in a gain of \$61.0 million.

Income Taxes

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Income Taxes	\$ 8,313	1.4%	\$ 37,205	6.6%	\$ 28,892	(77.7)%

The decrease in provision for income taxes is due to significantly higher taxes in 2003 as a result of the gain from the sale of our 50% interest in PCG. Additionally, 2004 income tax expense includes a benefit from the realization in 2004 of approximately \$3.4 million of foreign tax credits related to the gain on sale of PCG.

During 2004, we adjusted our tax provision to reflect an adjustment to our treatment of certain executive compensation. During the fiscal years ended 2003 and 2002, along with the period ending June 27, 2004, we calculated our tax provision as if our executive bonus plan met the Internal Revenue Service code section 162(m) requirements for deductibility. During 2004, we discovered that the plan did not meet certain specific requirements of section 162(m). We recognized \$1.4 million of additional tax provision under section 162(m) for 2004, including \$0.6 million to correct our tax provision for the fiscal years ended 2003 and 2002.

Equity in Earnings of Affiliates

	2004	% of Revenue	2003	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Equity in Earnings of Affiliates	\$—	0.0%	\$1,250	0.2%	\$(1,250)	(100.0)%

Equity in earnings of affiliates for 2004 represents the results of SACS only. In 2004 SACS reported no net income or loss. Our 2003 equity in earnings of affiliates reflects the results of SACS and a half year of PCG, our United Kingdom joint venture, which we sold in July 2003.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Income/Loss from Discontinued Operations

Through our Australian subsidiary, we previously had a contract with the Department of Immigration, Multicultural and Indigenous Affairs, or DIMIA, for the management and operation of Australia’s immigration centers. In 2003, the contract was not renewed, and effective February 29, 2004, we completed the transition of the contract and exited the management and operation of the DIMIA centers. These facilities generated total revenue of \$6.0 million and \$62.7 during 2004 and 2003, respectively. The loss in 2004 primarily relates to transition and exit costs.

Fiscal 2003 Compared with 2002

Facility Operations

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Revenue	\$567,441	100.0%	\$517,162	100.0%	\$50,279	9.7%

The increase in revenues in 2003 compared to 2002 primarily relates to three activities. The strengthening of the Australian dollar and South African Rand increased revenues by approximately \$15.6 million and \$5.0 million, respectively. Revenues also increased \$4.7 million in 2003 as compared to 2002 because our facility in South Africa was open for the entire year in 2003 as compared to approximately 6 months in 2002. Revenues increased \$14.8 million as a result of the opening of the Lawrenceville Correctional Facility at the end of the first quarter 2003. The remainder of the increase was due to contractual adjustments for inflation, slightly higher occupancy rates and improved terms negotiated into a number of contracts. These increases were partially reduced by \$6.3 million in 2003 compared to 2002 due to the closure of the Bayamon Correctional Facility and South Bay Sexually Violent Predator Program.

The number of compensated resident days in domestic facilities increased to 9.8 million in 2003 from 9.2 million in 2002. Compensated resident days in Australian and South African facilities increased to 1.7 million in 2003 from 1.5 million in 2002. We look at the average occupancy in our facilities to determine how we are managing our available beds. The average occupancy is calculated by taking capacity as a percentage of compensated mandays. The average facility occupancy in domestic, Australian and South African facilities was 100% of capacity in 2003 compared to 98.5% in 2002.

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Operating Expenses	\$ 484,018	85.3%	\$449,442	86.9%	\$34,576	7.7%

Operating expenses in 2003 increased due to the opening of the Lawrenceville Correctional Facility in Virginia, a full year of operations at our facility in South Africa, the impact of the stronger Australian dollar and South African Rand offset by lower workers’ compensation and general liability insurance expense and lower lease expense as a result of purchasing previously leased properties. The increase in operating expenses in 2003 is also attributable to an additional provision for operating loss of approximately \$5.0 million during 2003, compared to a \$1.1 million provision in 2002 related to our inactive facility in Jena, Louisiana. In 2003, there were costs of \$3.0 million related to the transitioning of the DIMIA contract, primarily related to liability insurance expenses.

General and Administrative Expenses

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
General and Administrative Expenses	\$ 39,379	6.9%	\$ 32,146	6.2%	\$ 7,233	22.5%

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The increase in general and administrative expenses primarily relates to (i) increased deferred compensation costs for senior executive compensation agreements (ii) payments under employment agreements with certain key executives triggered by the change in control from the sale of TWC in May 2002 and (iii) increased professional fees, directors’ and officers’ insurance and travel costs.

Interest Income and Interest Expense

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Interest Income	\$ 6,874	1.2%	\$ 4,848	0.9%	\$ 2,026	41.8%
Interest Expense	\$ 17,896	3.2%	\$ 3,738	0.7%	\$ 14,158	378.8%

The increase in interest income is primarily due to higher average invested cash balances. The increase also reflects income from an interest rate swap agreements entered into September 2003 for our domestic operations, which increased interest income. The interest rate swap agreements in the aggregate notional amounts of \$50.0 million are hedges against the change in the fair value of a designated portion of the Notes due to changes in the underlying interest rates. The interest rate swap agreements have payment and expiration dates and call provisions that coincide with the terms of the Notes.

The increase in interest expense is attributable to the debt incurred to finance the purchase of previously leased facilities for approximately \$155.0 million in December 2002. During 2003, we entered into the Senior Credit Facility and issued the Notes for \$150.0 million. The Senior Credit Facility was in effect for a full year in 2003 and only one month in 2002. The Notes were issued on July 9, 2003.

Costs Associated with Debt Refinancing: We incurred a charge of \$2.0 million for the write-off of deferred financing fees related to the amendment of our previous credit agreement in July 2003.

Sale of Joint Venture: On July 2, 2003, we sold our 50% interest in PCG, our United Kingdom joint venture, for approximately \$80.7 million. We recognized a gain of \$61.0 million from the sale

Income Taxes

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Income Taxes	\$ 37,205	6.6%	\$ 11,312	2.2%	\$ 25,893	228.9%

Provision for income taxes increased primarily due to the tax effect on the gain on sale of PCG in July 2003.

Equity in Earnings of Affiliates

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Equity in Earnings of Affiliates	\$ 1,250	0.2%	\$ 4,958	1.0%	\$ (3,708)	(74.8)%

Equity in earnings of affiliates for 2003 represents a full year of operating results for SACS and a half year of operating results for PCG due to its sale in July of 2003. Equity in earnings of affiliates for 2002 reflects full year of operating results for SACS and PCG, net of income tax provision.

Income/Loss from Discontinued Operations

	2003	% of Revenue	2002	% of Revenue	\$ Change	% Change
(Dollars in thousands)						
Discontinued Operations	\$ 3,198	0.6%	\$ 2,932	0.6%	\$ 266	9.1%

Income from discontinued operations increased due to the strengthening of the Australian Dollar by approximately 20% during 2003 despite a decrease in revenue.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Financial Condition

Liquidity and Capital Reserves

Current cash requirements consist of amounts needed for working capital, debt service, capital expenditures, supply purchases and investments in joint ventures. Our primary source of liquidity to meet these requirements is cash flow from operations and borrowings under the \$50.0 million revolving portion of our Senior Credit Facility. As of January 2, 2005, we had \$17.2 million available for borrowing under the revolving portion of the Senior Credit Facility.

We incurred substantial indebtedness in connection with the share purchase in 2003. As of January 2, 2005, we had \$198.2 million of consolidated debt outstanding, excluding \$44.7 million of non-recourse debt. As of January 2, 2005, we also had outstanding nine letters of guarantee totaling approximately \$6.7 million under separate international credit facilities. Our significant debt service obligations could, under certain circumstances, have material consequences. See “Risk Factors — Risks Related to Our High Level of Indebtedness.” However, our management believes that cash on hand, cash flows from operations and our Senior Credit Facility will be adequate to support currently planned business expansion and various obligations incurred in the operation of our business, both on a near and long-term basis.

In the future, our access to capital and ability to compete for future capital-intensive projects will be dependent upon, among other things, our ability to meet certain financial covenants in the indenture governing the Notes and in our Senior Credit Facility. A substantial decline in our financial performance could limit our access to capital and have a material adverse affect on our liquidity and capital resources and, as a result, on our financial condition and results of operations.

Our business requires us to make various capital expenditures from time to time, including expenditures related to the development of new correctional, detention and/or mental health facilities. In addition, some of our management contracts require us to make substantial initial expenditures of cash in connection with opening or renovating a facility. Generally, these initial expenditures are subsequently fully or partially recoverable as pass-through costs or are billable as a component of the per diem rates or monthly fixed fees to the contracting agency over the original term of the contract. However, we cannot assure you that any of these expenditures will, if made, be recovered. Based on current estimates of our capital needs, we anticipate that our capital expenditures will not exceed \$12.0 million during the next 12 months. We plan to fund these capital expenditures from cash from operations or borrowings under the Senior Credit Facility.

The Senior Credit Facility

On July 9, 2003, we amended our Senior Credit Facility to consist of a \$50.0 million, five-year revolving loan, referred to as the Revolving Credit Facility, and a \$100.0 million, six-year term loan, referred to as the Term Loan Facility. The Revolving Credit Facility contains a \$40.0 million sub limit for the issuance of standby letters of credit. On February 20, 2004, we amended the Senior Credit Facility to, among other things, reduce the interest rates applicable to borrowings under the Senior Credit Facility, obtain flexibility to make certain information technology related capital expenditures and provide additional time to reinvest the net proceeds from the sale of PCG. On June 25, 2004, we used \$43.0 million of net proceeds from the sale of PCG to permanently reduce the term loan portion of the Senior Credit Facility, and we also wrote off approximately \$0.3 million in deferred financing costs related to this payment. At January 2, 2005, we had borrowings of \$51.5 million outstanding under the term loan portion of the Senior Credit Facility, no amounts outstanding under the revolving portion of the Senior Credit Facility, and \$32.8 million outstanding in letters of credit under the revolving portion of the Senior Credit Facility.

All of the obligations under the Senior Credit Facility are unconditionally guaranteed by each of our existing material domestic subsidiaries. The Senior Credit Facility and the related guarantees are secured by substantially all of our present and future tangible and intangible assets and all present and future tangible and intangible assets of each guarantor, including but not limited to (i) a first-priority pledge of all of the outstanding capital stock owned by us and each guarantor, and (ii) perfected first-priority security interests in all of our present and future tangible and intangible assets and the present and future tangible and intangible assets of each guarantor.

Indebtedness under the Revolving Credit Facility bears interest at our option at the base rate plus a spread varying from 0.75% to 1.50% (depending upon a leverage-based pricing grid set forth in the Senior Credit Facility, or at the London interbank offered rate, or LIBOR plus a spread, varying from 2.00% to 2.75% (depending upon a leverage-based pricing grid, as defined in the Senior Credit Facility). As of January 2, 2005, there were no borrowings currently outstanding under the Revolving Credit Facility. However, new borrowings would bear interest at LIBOR plus 2.25%. The Term Loan Facility bears

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

interest at our option at the base rate plus a spread of 1.25%, or at LIBOR plus a spread of 2.5%. Borrowings under the Term Loan Facility currently bear interest at LIBOR plus 2.5%. If an event of default occurs under the Senior Credit Facility, (i) all LIBOR rate loans bear interest at the rate which is 2.0% in excess of the rate then applicable to LIBOR rate loans until the end of the applicable interest period and thereafter at a rate which is 2.0% in excess of the rate then applicable to base rate loans, and (ii) all base rate loans bear interest at a rate which is 2.0% in excess of the rate then applicable to base rate loans.

The Senior Credit Facility contains financial covenants which require us to maintain the following ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period: a total leverage ratio equal to or less than 3.00 to 1.00 through July 2, 2005, which reduces thereafter in 0.25 increments to 2.50 to 1.00 on July 2, 2006 and thereafter; a senior secured leverage ratio equal to or less than 1.50 to 1.00; and a fixed charge coverage ratio equal to or greater than 1.10 to 1.00. In addition, the Senior Credit Facility prohibits us from making capital expenditures greater than \$10.0 million in the aggregate during any fiscal year, provided that to the extent that our capital expenditures during any fiscal year are less than the \$10.0 million limit, such amount will be added to the maximum amount of capital expenditures that we can make in the following year and further provided that certain information technology related upgrades made prior to the end of 2005 will not count against the annual limit on capital expenditures.

The Senior Credit Facility also requires us to maintain a minimum net worth, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period, equal to \$140.0 million, plus the amount of the net gain from the sale of our interest in PCG, which is approximately \$32.7 million, minus the \$132.0 million we used to complete the share purchase from Group 4 Falck, plus 50% of our consolidated net income earned during each full fiscal quarter ending after the date of the Senior Credit Facility, plus 50% of the aggregate increases in our consolidated shareholders’ equity that are attributable to the issuance and sale of equity interests by us or any of our restricted subsidiaries (excluding intercompany issuances).

The Senior Credit Facility contains certain customary representations and warranties, and certain customary covenants that restrict our ability to, among other things (i) create, incur or assume any indebtedness, (ii) incur liens, (iii) make loans and investments, (iv) engage in mergers, acquisitions and asset sales, (v) sell our assets, (vi) make certain restricted payments, including declaring any cash dividends or redeem or repurchase capital stock, except as otherwise permitted, (vii) issue, sell or otherwise dispose of our capital stock, (viii) transact with affiliates, (ix) make changes to our accounting treatment, (x) amend or modify the terms of any subordinated indebtedness (including the Notes), (xi) enter into debt agreements that contain negative pledges on our assets or covenants more restrictive than contained in the Senior Credit Facility, (xii) alter the business we conduct, and (xiii) materially impair our lenders’ security interests in the collateral for our loans. The covenants in the Senior Credit Facility can substantially restrict our business operations. See “Risk Factors — Risks Related to Our High Level of Indebtedness — The covenants in the indenture governing the Notes and our Senior Credit Facility impose significant operating and financial restrictions which may adversely affect our ability to operate our business.”

Events of default under the Senior Credit Facility include, but are not limited to, (i) our failure to pay principal or interest when due, (ii) our material breach of any representations or warranty, (iii) covenant defaults, (iv) bankruptcy, (v) cross default to certain other indebtedness, (vi) unsatisfied final judgments over a threshold to be determined, (vii) material environmental claims which are asserted against us, and (viii) a change of control.

Senior 81/4% Notes

To facilitate the completion of the purchase of the 12 million shares from Group 4 Falck, we amended the Senior Credit Facility and issued \$150.0 million aggregate principal amount, ten-year, 81/4% senior unsecured notes, which we refer to as the Notes, in a private placement pursuant to Rule 144A of the Securities Act of 1933, as amended. The Notes are general, unsecured, senior obligations. Interest is payable semi-annually on January 15 and July 15 at 81/4%. The Notes are governed by the terms of an Indenture, dated July 9, 2003, between us and the Bank of New York, as trustee, referred to as the Indenture. Under the terms of the Indenture, at any time on or prior to July 15, 2006, we may redeem up to 35% of the Notes with the proceeds from equity offerings at 108.25% of the principal amount to be redeemed plus the payment of accrued and unpaid interest, and any applicable liquidated damages. Additionally, after July 15, 2008, we may redeem, at our option, all or a portion of the Notes plus accrued and unpaid interest at various redemption prices ranging from 104.125% to 100.000% of the principal amount to be redeemed, depending on when the redemption occurs. The Indenture contains covenants that limit our ability to incur additional indebtedness, pay dividends or distributions on our common stock, repurchase our common stock, and prepay subordinated indebtedness. The Indenture also limits our ability to issue preferred stock, make certain types of investments, merge or consolidate with

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

another company, guarantee other indebtedness, create liens and transfer and sell assets. On June 25, 2004, as required by the terms of the Indenture governing the Notes, we used \$43.0 million of the net proceeds from the sale of PCG to permanently reduce the Senior Credit Facility, and wrote off approximately \$0.3 million in deferred financing costs related to this payment.

The covenants in the Indenture can substantially restrict our business operations. See “Risk Factors — Risks Related to Our High Level of Indebtedness — The covenants in the indenture governing the Notes and our Senior Credit Facility impose significant operating and financial restrictions which may adversely affect our ability to operate our business.” We believe that we were in compliance with all of the covenants of the Indenture governing the Notes as of January 2, 2005.

Subsequent to the private offering of the Notes, we filed an S-4 registration statement to register under the Securities Act of 1933 exchange notes, referred to as the Exchange Notes, having substantially identical terms as the Notes. The registration statement was declared effective by the SEC on November 10, 2003. We then completed an exchange offer pursuant to the registration statement, in which holders of the Notes exchanged the Notes for exchange notes, which we refer to as the Notes, which are generally freely tradable, subject to certain exceptions.

Guarantees

In connection with the creation of SACS, we entered into certain guarantees related to the financing, construction and operation of the prison. We guaranteed certain obligations of SACS under its debt agreements up to a maximum amount of 60.0 million South African Rand, or approximately \$10.6 million to SACS’ senior lenders through the issuance of letters of credit. Additionally, SACS is required to fund a restricted account for the payment of certain costs in the event of contract termination. We have guaranteed the payment of 50% of amounts which may be payable by SACS into the restricted account and provided a standby letter of credit of 6.5 million South African Rand, or approximately \$1.1 million as security for our guarantee. Our obligations under this guarantee expire upon SACS’ release from its obligations in respect of the restricted account under its debt agreements. No amounts have been drawn against these letters of credit, which are included in our outstanding letters of credit under our Revolving Credit Facility.

We have agreed to provide a loan of up to 20.0 million South African Rand, or approximately \$3.5 million (the “Standby Facility”) to SACS for the purpose of financing SACS’ obligations under its contract with the South African government. No amounts have been funded under the Standby Facility, and we do not anticipate that such funding will ever be required by SACS. Our obligations under the Standby Facility expire upon the earlier of full funding or SACS’ release from its obligations under its debt agreements. The lenders’ ability to draw on the Standby Facility is limited to certain circumstance, including termination of the contract.

We have also guaranteed certain obligations of SACS to the security trustee for SACS lenders. We have secured our guarantee to the security trustee by ceding our rights to claims against SACS in respect of any loans or other finance agreements, and by pledging our shares in SACS. Our liability under the guarantee is limited to the cession and pledge of shares. The guarantee expires upon expiration of the cession and pledge agreements.

In connection with a design, build, finance and maintenance contract, we guaranteed certain potential tax obligations of a special purpose entity. The potential estimated exposure of these obligations is CAN\$2.5 million or approximately \$2.1 million commencing in 2017. To secure this guarantee, we purchased Canadian dollar denominated securities with maturities matched to the estimated tax obligations in 2017 to 2021. We have recorded an asset and a liability equal to the current fair market value of those securities on our balance sheet.

Interest Rate Swaps

Effective September 18, 2003, we entered into interest rate swap agreements in the aggregate notional amount of \$50.0 million. We have designated the swaps as hedges against changes in the fair value of a designated portion of the Notes due to changes in underlying interest rates. Changes in the fair value of the interest rate swaps are recorded in earnings along with related designated changes in the value of the Notes. The agreements, which have payment and expiration dates and call provisions that coincide with the terms of the Notes, effectively convert \$50.0 million of the Notes into variable rate obligations. Under the agreements, we receive a fixed interest rate payment from the financial counterparties to the agreements equal to 8.25% per year calculated on the notional \$50.0 million amount, while we make a variable interest rate payment

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

to the same counterparties equal to the six-month LIBOR plus a fixed margin of 3.45%, also calculated on the notional \$50.0 million amount.

Our Australian subsidiary is a party to an interest rate swap agreement to fix the interest rate on the variable rate non-recourse debt to 9.7%. We have determined the swap to be an effective cash flow hedge. Accordingly, we record the value of the interest rate swap in accumulated other comprehensive income, net of applicable income taxes. The total value of the swap liability as of January 2, 2005 and December 28, 2003 was approximately \$2.5 million and \$5.2 million, respectively, and is recorded as a component of other liabilities in the accompanying consolidated financial statements. There was no material ineffectiveness of the interest rate swaps for the fiscal years presented.

In connection with the financing and management of one Australian facility, our wholly owned Australian subsidiary financed the facility’s development and subsequent expansion in 2003 with long-term debt obligations, which are non-recourse to us. We have consolidated the subsidiary’s direct finance lease receivable from the state government and related non-recourse debt each totaling approximately \$44.7 million and \$43.9 million as of January 2, 2005 and December 28, 2003, respectively. As a condition of the loan, we are required to maintain a restricted cash balance of AUD 5.0 million, which, at January 2, 2005, was approximately \$3.9 million. The term of the non-recourse debt is through 2017 and it bears interest at a variable rate quoted by certain Australian banks plus 140 basis points. Any obligations or liabilities of the subsidiary are matched by a similar or corresponding commitment from the government of the State of Victoria.

Cash Flow

Cash and cash equivalents as of January 2, 2005 were \$92.8 million, an increase of \$40.6 million from December 28, 2003.

Cash provided by operating activities of continuing operations in 2004, 2003 and 2002 was \$33.3 million, \$17.3 million, and \$33.1 million, respectively. Cash provided by operating activities of continuing operations in 2003 was positively impacted by an increase in accounts payable and accrued expenses and other liabilities. The increase in accounts payable and other accrued expenses is attributable to the increase in value of our Australian subsidiary’s accounts payable and accrued expenses due to an increase in foreign exchange rates and an increase in reserves for self insurance. The increase in other liabilities reflects an increase in the liability for the fair market value of our Australian subsidiary’s interest rate swap and an increase in certain pension obligations.

Cash provided by operating activities of continuing operations in 2003 was negatively impacted by an increase in accounts receivable. The increase in accounts receivable is attributable to the increase in value of our Australian subsidiary’s accounts receivable due to an increase in foreign exchange rates, the addition of the Lawrenceville Correctional Facility and slightly higher monthly billings reflecting a general increase in facility occupancy levels.

Cash provided by investing activities in 2004 and 2003, was \$42.1 million and \$8.3 million, respectively. Cash used in investing activities in 2002 was \$159.5 million. In 2004, there was a decrease in the restricted cash balance of \$52.0 million due to the payment of \$43.0 million of the term loan portion of the Senior Credit Facility with the net proceeds of the sale of PCG. This payment satisfied the restriction on cash imposed by the terms of the Senior Credit Facility and the remainder was reclassified to cash. Cash provided by investing activities in 2003 reflects the gross proceeds from the sale of PCG offset by restricted cash and capital expenditures in the normal course of business. During 2003, our wholly owned Australian subsidiary financed the expansion of a facility with non-recourse debt. During 2002, we purchased four correctional facilities in operation under our prior operating lease facility.

Cash used in financing activities in 2004 and 2003 was \$47.1 million and \$17.2 million, respectively. Cash provided by financing activities in 2002 was \$126.1 million. Cash used in financing activities in 2004 reflect payments of \$10.0 million on borrowings under the Revolving Credit Facility, \$4.0 million in scheduled payments on the Term Loan Facility, and a one-time \$43.0 million payment on the Term Loan Facility from the net proceeds from the sale of our interest in PCG. The \$10.0 million proceeds from debt reflect borrowings under the Revolving Credit Facility in 2004. Cash used in financing activities in 2003 reflects the sale of the Notes, and the purchase of 12 million shares of our common stock from Group 4 Falck for \$132.0 million.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Contractual Obligations and Off Balance Sheet Arrangements

The following is a table of certain of our contractual obligations, as of January 2, 2005, which requires us to make payments over the periods presented.

Contractual Obligations	Payments Due By Period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-Term Debt Obligations	\$ 201,521	\$ 12,006	\$ 6,922	\$ 32,593	\$ 150,000
Operating Lease Obligations	140,343	32,929	65,531	27,406	14,477
Non-Recourse Debt	44,683	1,730	4,066	5,086	33,801
Other Long-Term Liabilities	12,318	11,052	105	186	975
Total	\$ 398,865	\$ 57,717	\$ 76,624	\$ 65,271	\$ 199,253

We do not have any off balance sheet arrangements which would subject us to additional liabilities.

Commitments and Contingencies

During 2000, our management contract at the 276-bed Jena Juvenile Justice Center in Jena, Louisiana was discontinued by the mutual agreement of the parties. Despite the discontinuation of the management contract, we remain responsible for payments on the underlying lease of the inactive facility with CPV through 2009. In the fourth quarter of 2004, we incurred an operating charge of \$3.0 million to cover our anticipated losses under the lease until an alternative correctional use for the facility may be identified or a sublease for the facility may be in place. We have incurred additional operating charges in prior periods related to lease payments for the facility including an operating charge of \$5.0 million in third quarter 2003. We are continuing our efforts to find an alternative correctional use or sublease for the facility. If we are unable to sublease or find an alternative correctional use for the facility, an additional operating charge will be required. The current reserve for loss of \$5.8 million is sufficient to cover lease payments through January 2008. The remaining obligation on the Jena lease through the contractual term of 2009, exclusive of the reserve for losses through early 2008, is approximately \$4.3 million.

Our contract with the Department of Homeland Security Bureau of Immigration and Customs Enforcement (“ICE”) for the management of the 200-bed Queens Private Correctional Facility is set to expire March 31, 2005. ICE has the option to renew the contract on an annual basis and must submit its notice to renew within sixty days of the start of a renewal period. We have received notice of an extension through June 30, 2005 on the current terms and conditions of the existing contract. However, ICE has not exercised its right to renew the option for the contract period April 1, 2005 through March 31, 2006. During the year ended January 2, 2005, the contract for the Queens facility represented approximately 2% of the Company’s consolidated revenues. We have a non cancelable operating lease for the Queens facility with CPV through April 28, 2008, when the lease is scheduled to expire. We are currently in discussions with ICE regarding revised contract terms and conditions and hope to obtain a full one-year extension of the facility contract. If we fail to obtain a full one-year contract extension with ICE or are unable to find an appropriate alternative correctional use for the facility or sublease the facility, we may be required to record an operating charge related to a portion of the future lease costs with CPV in accordance with SFAS No. 146, “Accounting for Costs Associated with Exit or Disposal Activities.” The remaining lease obligation is approximately \$4.7 million through April 28, 2008.

In June 2004, we received notice of a third-party claim for property damage incurred during 2002 and 2001 at several detention facilities that our Australian subsidiary formerly operated pursuant to our discontinued contract with DIMIA. The claim did not specify the amount of damages the third-party may be seeking. Although the claim is in the initial stages and we are still in the process of fully evaluating its merits, we believe that we have defenses to the allegations underlying the claim and intend to vigorously defend our rights. While the claimant in this case has not quantified its damage claim and the outcome of the matters discussed above cannot be predicted with certainty, based on information known to date, and management’s preliminary review of the claim, we believe that, if settled unfavorably, this matter could have a material adverse effect on our financial condition and results of operations. We are uninsured for any damages or costs we may incur as a result of this claim, including the expenses of defending the claim.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We own and operate the 480-bed Michigan Youth Correctional Facility in Baldwin, Michigan. We operate this facility pursuant to a management contract with the Michigan Department of Corrections, which we refer to as the DOC. Separately, we lease the facility to the State with an initial term of 20 years followed by two 5-year options. The DOC can terminate the management contract for this facility unilaterally without cause upon 60 days’ notice to us. However, the State can only terminate its lease of the facility prior to the expiration of the term of the lease if the State Legislature of Michigan, in its appropriation to the state department of corrections, expressly prohibits the department from spending any appropriated moneys for lease payments. In February 2005, the Governor of Michigan proposed an executive order to the State Legislature to, among other things; de-appropriate funds for the payment of operations and lease payments for the facility. The State Legislature did not approve this order. However, we believe that the Governor of Michigan may submit an additional order or include a request in the State’s 2006 fiscal year budget that no appropriations be made for the payment of operations and lease payments for the facility.

If, at any time in a future appropriation to the state department of corrections, the State Legislature of Michigan expressly prohibits the department from spending any appropriated money for lease payments related to the facility, the State will have the right to terminate the lease. Additionally, in the event of such termination, the DOC would not have an interest in our operation of the facility and would likely terminate the management contract. We are undertaking efforts to seek continued appropriations by the State Legislature for the lease and the management contract for this facility, and as a contingency, we are undertaking efforts to find an alternative use for the facility with another state or federal agency. However, there can be no assurances that these efforts will be successful. In the event that the lease is terminated and our operations cease at the facility, our financial condition and results of operations would be materially adversely affected. In the event of such termination, we would assess the facility for impairment in accordance with FAS 146 “Accounting for Costs Associated with Exit or Disposal Activities.”

Inflation

We believe that inflation, in general, did not have a material effect on our results of operations during 2004, 2003 and 2002. While some of our contracts include provisions for inflationary indexing, inflation could have a substantial adverse effect on our results of operations in the future to the extent that wages and salaries, which represent our largest expense, increase at a faster rate than the per diem or fixed rates received by us for our management services.

FORWARD-LOOKING STATEMENTS—SAFE HARBOR

This report and the documents incorporated by reference herein contain “forward-looking” statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. “Forward-looking” statements are any statements that are not based on historical information. Statements other than statements of historical facts included in this report, including, without limitation, statements regarding our future financial position, business strategy, budgets, projected costs and plans and objectives of management for future operations, are “forward-looking” statements. Forward-looking statements generally can be identified by the use of forward-looking terminology such as “may,” “will,” “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate” or “continue” or the negative of such words or variations of such words and similar expressions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements and we can give no assurance that such forward-looking statements will prove to be correct. Important factors that could cause actual results to differ materially from those expressed or implied by the forward-looking statements, or “cautionary statements,” include, but are not limited to:

- our ability to timely build and/or open facilities as planned, profitably manage such facilities and successfully integrate such facilities into our operations without substantial additional costs;
- the instability of foreign exchange rates, exposing us to currency risks in Australia, New Zealand and South Africa, or other countries in which we may choose to conduct our business;
- our exposure to appropriations risk on the Michigan Youth Correctional Facility;
- our ability to renew the operating contract for the Queens Correctional Facility beyond June 30, 2005;
- an increase in unreimbursed labor rates;
- our ability to expand and diversify our correctional and mental health services;
- our ability to win management contracts for which we have submitted proposals and to retain existing management contracts;
- our ability to raise new project development capital given the often short-term nature of the customers’ commitment to use newly developed facilities;
- our ability to reactivate our Jena, Louisiana facility, or to sublease or coordinate the sale of the facility with the owner of the property, Correctional Properties Trust, or CPV;
- our ability to accurately project the size and growth of the domestic and international privatized corrections industry;
- our ability to estimate the government’s level of dependency on privatized correctional services;
- our ability to develop long-term earnings visibility;
- our ability to obtain future financing at competitive rates;
- our exposure to rising general insurance costs;
- our exposure to claims for which we are uninsured;
- our exposure to rising inmate medical costs;
- our ability to maintain occupancy rates at our facilities;
- our ability to manage costs and expenses relating to ongoing litigation arising from our operations;
- our ability to accurately estimate on an annual basis, loss reserves related to general liability, workers compensation and automobile liability claims;
- the ability of our government customers to secure budgetary appropriations to fund their payment obligations to us; and
- other factors contained in our filings with the Securities and Exchange Commission, or the SEC, including, but not limited to, those detailed in our annual report on Form 10-K, our Form 10-Qs and our Form 8-Ks filed with the SEC.

We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements included in this report.

RISK FACTORS

The following are certain of the risks to which our business operations are subject. Any of these risks could materially adversely affect our business, financial condition, or results of operations. These risks could also cause our actual results to differ materially from those indicated in the forward-looking statements contained herein and elsewhere. The risks described below are not the only risks facing us. Additional risks not currently known to us or those we currently deem to be immaterial may also materially and adversely affect our business operations.

Risks Related to Our High Level of Indebtedness

Our significant level of indebtedness could adversely affect our financial condition and prevent us from fulfilling our debt service obligations.

We have a significant amount of indebtedness. Our total consolidated long-term indebtedness as of January 2, 2005 was \$198.2 million, excluding non recourse debt of \$44.7 million. In addition, as of January 2, 2005, we had \$32.8 million outstanding in letters of credit under the revolving loan portion of our Senior Credit Facility. As a result, as of that date, we would have had the ability to borrow an additional approximately \$17.2 million under the revolving loan portion of our Senior Credit Facility, subject to our satisfying the relevant borrowing conditions under the Senior Credit Facility with respect to the incurrence of additional indebtedness.

Our substantial indebtedness could have important consequences. For example, it could:

- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- increase our vulnerability to adverse economic and industry conditions;
- place us at a competitive disadvantage compared to competitors that may be less leveraged; and
- limit our ability to borrow additional funds or refinance existing indebtedness on favorable terms.

If we are unable to meet our debt service obligations, we may need to reduce capital expenditures, restructure or refinance our indebtedness, obtain additional equity financing or sell assets. We may be unable to restructure or refinance our indebtedness, obtain additional equity financing or sell assets on satisfactory terms or at all. In addition, our ability to incur additional indebtedness will be restricted by the terms of our Senior Credit Facility and the indenture governing our outstanding Notes.

Despite current indebtedness levels, we may still incur more indebtedness, which could further exacerbate the risks described above. Future indebtedness issued pursuant to our universal shelf registration statement could have rights superior to those of our existing or future indebtedness.

The terms of the indenture governing the Notes and our Senior Credit Facility restrict our ability to incur but do not prohibit us from incurring significant additional indebtedness in the future. In addition, we may refinance all or a portion of our indebtedness, including borrowings under our Senior Credit Facility, and incur more indebtedness as a result. If new indebtedness is added to our and our subsidiaries’ current debt levels, the related risks that we and they now face could intensify. As of January 2, 2005, we would have had the ability to borrow an additional \$17.2 million under the revolving loan portion of our Senior Credit Facility. Additionally, on January 28, 2004, our universal shelf registration statement on Form S-3 was declared effective by the SEC. The universal shelf registration statement provides for the offer and sale by us, from time to time, on a delayed basis of up to \$200.0 million aggregate amount of certain of our securities, including our debt securities. Any indebtedness incurred pursuant to the universal shelf registration statement will be created through the issuance of these debt securities. Such debt securities may be issued in more than one series and some of those series may have characteristics that provide them with rights that are superior to those of other series of our debt securities that have already been created or that will be created in the future.

The covenants in the indenture governing the Notes and our Senior Credit Facility impose significant operating and financial restrictions which may adversely affect our ability to operate our business.

The indenture governing the Notes and our Senior Credit Facility impose significant operating and financial restrictions on us and certain of our subsidiaries, which we refer to as restricted subsidiaries. These restrictions limit our ability to, among other things, incur additional indebtedness, pay dividends and or distributions on our capital stock, repurchase, redeem or retire our capital stock, prepay subordinated indebtedness, make investments, issue preferred stock of subsidiaries, make certain types of investments, guarantee other indebtedness, create liens on our assets, transfer and sell assets, create or permit restrictions on the ability of our restricted subsidiaries to make dividends or make other distributions to us, enter into sale/lease-back transactions, enter into transactions with affiliates, and merge or consolidate with another company or sell all or substantially all of our assets.

These restrictions could limit our ability to finance our future operations or capital needs, make acquisitions or pursue available business opportunities. In addition, our Senior Credit Facility requires us to maintain specified financial ratios and satisfy certain financial covenants, including maintaining maximum senior and total leverage ratios, a minimum fixed charge coverage ratio, a minimum net worth and a limit on the amount of our annual capital expenditures. Some of these financial ratios become more restrictive over the life of the Senior Credit Facility. We may be required to take action to reduce our indebtedness or to act in a manner contrary to our business objectives to meet these ratios and satisfy these covenants. Our failure to comply with any of the covenants under our Senior Credit Facility and the indenture governing the Notes could cause an event of default under such documents and result in an acceleration of all of our outstanding indebtedness. If all of our outstanding indebtedness were to be accelerated, we likely would not be able to simultaneously satisfy all of our obligations under such indebtedness, which would materially adversely affect our financial condition and results of operations.

Servicing our indebtedness will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

Our business may not be able to generate sufficient cash flow from operations or future borrowings may not be available to us under our Senior Credit Facility or otherwise in an amount sufficient to enable us to pay our indebtedness or new debt securities, or to fund our other liquidity needs. We may need to refinance all or a portion of our indebtedness on or before maturity. However, we may not be able to complete such refinancing on commercially reasonable terms or at all.

Because portions of our indebtedness have floating interest rates, a general increase in interest rates will adversely affect cash flows.

Our Senior Credit Facility bears interest at a variable rate. To the extent our exposure to increases in interest rates is not eliminated through interest rate protection agreements, such increases will adversely affect our cash flows. We do not currently have any interest rate protection agreements in place to protect against interest rate fluctuations related to the Senior Credit Facility. Our estimated total annual interest expense based on borrowings outstanding as of January 2, 2005 is approximately \$19.3 million, \$2.6 million of which is interest expense attributable to estimated borrowings of \$51.5 million currently outstanding under the Senior Credit Facility inclusive of expected mandatory payments under the Senior Credit Facility. Based on estimated borrowings under the Senior Credit Facility, inclusive of expected mandatory payments, a one percent increase in the interest rate applicable to the Senior Credit Facility, will increase interest expense by \$0.4 million.

In addition, effective September 18, 2003, we entered into interest rate swap agreements in the aggregate notional amount of \$50.0 million. The agreements, which have payment and expiration dates that coincide with the payment and expiration terms of the Notes, effectively convert \$50.0 million of the Notes into variable rate obligations. Under the agreements, we receive a fixed interest rate payment from the financial counterparties to the agreements equal to 8.25% per year calculated on the notional \$50.0 million amount, while we make a variable interest rate payment to the same counterparties equal

to the six-month London Interbank Offered Rate plus a fixed margin of 3.45%, also calculated on the notional \$50.0 million amount. As a result, for every one percent increase in the interest rate applicable to the swap agreements, our total annual interest expense will increase by \$0.5 million.

We depend on distributions from our subsidiaries to make payments on our indebtedness. These distributions may not be made.

We generate a substantial portion of our revenues from distributions on the equity interests we hold in our subsidiaries. Therefore, our ability to meet our payment obligations on our indebtedness is substantially dependent on the earnings of our subsidiaries and the payment of funds to us by our subsidiaries as dividends, loans, advances or other payments. Our subsidiaries are separate and distinct legal entities and are not obligated to make funds available for payment of our other indebtedness in the form of loans, distributions or otherwise. Our subsidiaries' ability to make any such loans, distributions or other payments to us will depend on their earnings, business results, the terms of their existing and any future indebtedness, tax considerations and legal or contractual restrictions to which they may be subject. If our subsidiaries do not make such payments to us, our ability to repay our indebtedness will be materially adversely affected. For the fiscal year ended January 2, 2005, our subsidiaries accounted for 16.9% of our consolidated revenues, and, as of January 2, 2005 our subsidiaries accounted for 25.9% of our consolidated total assets.

The Notes are effectively subordinated to our senior secured indebtedness, which could impair our ability to pay amounts due under the Notes.

The Notes are unsecured and therefore are effectively subordinated to our secured indebtedness, including the Senior Credit Facility, to the extent of the value of the assets securing such indebtedness. In addition, the Indenture governing the Notes allows us to incur an unlimited amount of additional indebtedness and to secure indebtedness, including any indebtedness incurred under credit facilities, provided that we meet the fixed charge coverage ratio test set forth in the Indenture. In the event we are the subject of a bankruptcy, liquidation, dissolution, reorganization or similar proceeding, our assets securing our indebtedness could not be used to pay the holder of the Notes until after all secured claims against us have been fully paid.

Our subsidiaries have not guaranteed the Notes and therefore the Notes will be effectively subordinated in right of payment to any and all indebtedness and other liabilities, including trade payables, of our subsidiaries.

None of our subsidiaries are obligors or guarantors of the Notes. Therefore, the claims of creditors of such subsidiaries, including the claims of trade creditors of such subsidiaries, the claims of preferred shareholders of such subsidiaries (if any) and, with respect to certain of our domestic subsidiaries that have guaranteed our obligations under the Senior Credit Facility, the claims of lenders under the Senior Credit Facility, generally will have priority with respect to the assets and earnings of such subsidiaries over the claims of our creditors. As a result, the Notes are effectively subordinated to all existing and future liabilities of our subsidiaries and the right to receive payment under the Notes will be structurally junior to all of such liabilities. In the event of a bankruptcy, liquidation, winding up, reorganization or similar proceeding involving a subsidiary, our right to receive assets of that subsidiary and the consequent right of holders of the Notes to participate in a distribution of those assets to satisfy our obligations under the Notes may be materially adversely affected. As of January 2, 2005, our subsidiaries had total indebtedness of \$44.7 million, and approximately \$16.8 million of other liabilities, including trade payables but excluding intercompany obligations, liabilities under guarantees of our obligations, and other obligations not reflected in our consolidated financial statements.

Risks Related to Our Business and Industry

We are subject to the termination or non-renewal of our government contracts, which could adversely affect our results of operations and liquidity, including our ability to secure new facility management contracts from other government customers.

Governmental agencies may terminate a facility contract at any time without cause or use the possibility of termination to negotiate a lower fee for per diem rates. They also generally have the right to renew facility contracts at their option.

Notwithstanding any contractual renewal option, as of January 2, 2005, 14 of our facility management contracts are scheduled to expire on or before January 1, 2006. These contracts represented 27.2% of our consolidated revenues for the year ended January 2, 2005. Some of these contracts may not be renewed by the corresponding governmental agency. See “Business — Facilities and Facility Management Contracts.” In addition, governmental agencies may determine not to exercise renewal options with respect to any of our contracts in the future. In the event any of our management contracts are terminated or are not renewed on favorable terms or otherwise, we may not be able to obtain additional replacement contracts. The non-renewal or termination of any of our contracts with governmental agencies could materially adversely affect our financial condition, results of operations and liquidity, including our ability to secure new facility management contracts from other government customers.

We will continue to be responsible for certain real property payments even if our underlying facility management contracts terminate, which could adversely affect our profitability.

Eleven of our facilities are leased from Correctional Properties Trust, an independent, publicly-traded REIT which we refer to as CPV. These leases have an initial ten-year term with varying renewal periods at our option, and a total average remaining initial term of 3.6 years. The facility management contracts underlying these leases generally have a term ranging from one to five years, however, they are terminable by the governmental entity at will. In the event that a facility management contract is terminated or expires and is not renewed prior to the expiration of the corresponding lease term for the facility, we will continue to be liable to CPV for the related lease payments. Our average annual obligations and aggregate total remaining obligations for lease payments under the eleven CPV leases are approximately \$18.9 million and \$94.5 million, respectively. Because these lease payments would not be offset by revenues from an active facility management contract, they could represent a material ongoing loss. If we are unable to find a replacement management contract or an alternative use for the facility, the loss could continue until the expiration of the lease term then in effect, which could adversely affect our profitability. See “MD&A — Commitments and Contingencies” above for information on leases for which we had no corresponding management contract to operate as of January 2, 2005.

For example, during 2000, our management contract at the 276-bed Jena Juvenile Justice Center in Jena, Louisiana was discontinued by the mutual agreement of the parties. Despite the discontinuation of the management contract, we remain responsible for payments on the underlying lease of the inactive facility with CPV through 2009. In the fourth quarter of 2004, we incurred an operating charge of \$3.0 million to cover our anticipated losses under the lease until an alternative correctional use for the facility may be identified or a sublease for the facility may be in place. We have incurred additional operating charges in prior periods related to lease payments for the facility including an operating charge of \$5.0 million in third quarter 2003. We are continuing our efforts to find an alternative correctional use or sublease for the facility. If we are unable to sublease or find an alternative correctional use for the facility, an additional operating charge will be required. The current reserve for loss of \$5.8 million is sufficient to cover lease payments through January 2008. The remaining obligation on the Jena lease through the contractual term of 2009, exclusive of the reserve for losses through early 2008, is approximately \$4.3 million.

In addition, we own four properties on which we operate correctional and detention facilities. Our purchase of these properties during 2002 was financed through borrowings under our former senior credit facility which have now been incorporated into our Senior Credit Facility. In the event that an underlying facility management contract for one or more of these properties terminates, we would still be responsible for servicing the indebtedness incurred to purchase those properties.

Our growth depends on our ability to secure contracts to develop and manage new correctional and detention facilities, the demand for which is outside our control.

Our growth is generally dependent upon our ability to obtain new contracts to develop and manage new correctional and detention facilities, because contracts to manage existing public facilities have not to date typically been offered to private operators. Public sector demand for new facilities may decrease and our potential for growth will depend on a number of factors we cannot control, including overall economic conditions, crime rates and sentencing patterns in jurisdictions in which

we operate, governmental and public acceptance of the concept of privatization, and the number of facilities available for privatization.

The demand for our facilities and services could be adversely affected by the relaxation of criminal enforcement efforts, leniency in conviction and sentencing practices, or through the decriminalization of certain activities that are currently proscribed by criminal laws. For instance, any changes with respect to the decriminalization of drugs and controlled substances or a loosening of immigration laws could affect the number of persons arrested, convicted, sentenced and incarcerated, thereby potentially reducing demand for correctional facilities to house them. Similarly, reductions in crime rates could lead to reductions in arrests, convictions and sentences requiring incarceration at correctional facilities.

We may not be able to secure financing for new facilities, which could adversely affect our results of operations and future growth.

In certain cases, the development and construction of facilities by us is subject to obtaining construction financing. Such financing may be obtained through a variety of means, including without limitation, the sale of tax-exempt or taxable bonds or other obligations or direct governmental appropriations. The sale of tax-exempt or taxable bonds or other obligations may be adversely affected by changes in applicable tax laws or adverse changes in the market for tax-exempt or taxable bonds or other obligations.

Moreover, certain jurisdictions, including California, where we have a significant amount of operations, have in the past required successful bidders to make a significant capital investment in connection with the financing of a particular project. If this trend were to continue in the future, we may not be able to obtain sufficient capital resources when needed to compete effectively for facility management contracts. Additionally, our success in obtaining new awards and contracts may depend, in part, upon our ability to locate land that can be leased or acquired under favorable terms. Otherwise desirable locations may be in or near populated areas and, therefore, may generate legal action or other forms of opposition from residents in areas surrounding a proposed site. Our inability to secure financing and desirable locations for new facilities could adversely affect our results of operations and future growth.

We depend on a limited number of governmental customers for a significant portion of our revenues. The loss of, or a significant decrease in business from, these customers could seriously harm our financial condition and results of operations.

We currently derive, and expect to continue to derive, a significant portion of our revenues from a limited number of governmental agencies. The loss of, or a significant decrease in, business could seriously harm our financial condition and results of operations. The loss of, or a significant decrease in, business from the Bureau of Prisons, the Bureau of Immigration and Customs Enforcement, which we refer to as ICE, or the U.S. Marshals Service or various state agencies could seriously harm our financial condition and results of operations. The three federal governmental agencies with correctional and detention responsibilities, the Bureau of Prisons, ICE and the Marshals Service, accounted for approximately 26.9% of our total consolidated revenues for the fiscal year ended January 2, 2005, with the Bureau of Prisons accounting for approximately 11.4% of our total consolidated revenues for such period, the Marshals Service accounting for approximately 10.3% of our total consolidated revenues for such period and the ICE accounting for approximately 5.2% of our total consolidated revenues for such period. We expect to continue to depend upon these federal agencies and a relatively small group of other governmental customers for a significant percentage of our revenues.

A decrease in occupancy levels could cause a decrease in revenues and profitability.

While a substantial portion of our cost structure is generally fixed, a significant portion of our revenues are generated under facility management contracts which provide for per diem payments based upon daily occupancy. We are dependent upon the governmental agencies with which we have contracts to provide inmates for our managed facilities. We cannot control occupancy levels at our managed facilities. Under a per diem rate structure, a decrease in our occupancy rates could cause a decrease in

revenues and profitability. When combined with relatively fixed costs for operating each facility, regardless of the occupancy level, a decrease in occupancy levels could have a material adverse effect on our profitability.

Competition for inmates may adversely affect the profitability of our business.

We compete with government entities and other private operators on the basis of cost, quality and range of services offered, experience in managing facilities, and reputation of management and personnel. Barriers to entering the market for the management of correctional and detention facilities may not be sufficient to limit additional competition in our industry. In addition, our government customers may assume the management of a facility currently managed by us upon the termination of the corresponding management contract or, if such customers have capacity at the facilities which they operate, they may take inmates currently housed in our facilities and transfer them to government operated facilities. Since we are paid on a per diem basis with no minimum guaranteed occupancy under most of our contracts, the loss of such inmates and resulting decrease in occupancy would cause a decrease in both our revenues and our profitability.

We are dependent on government appropriations, which may not be made on a timely basis or at all.

Our cash flow is subject to the receipt of sufficient funding of and timely payment by contracting governmental entities. If the contracting governmental agency does not receive sufficient appropriations to cover its contractual obligations, it may terminate our contract or delay or reduce payment to us. Any delays in payment, or the termination of a contract, could have a material adverse effect on our cash flow and financial condition, which may make it difficult to satisfy our payment obligations on our indebtedness, including the Notes and the Senior Credit Facility, in a timely manner. In addition, as a result of, among other things, recent economic developments, federal, state and local governments have encountered, and may continue to encounter, unusual budgetary constraints. As a result, a number of state and local governments are under pressure to control additional spending or reduce current levels of spending. Accordingly, we may be requested in the future to reduce our existing per diem contract rates or forego prospective increases to those rates. In addition, it may become more difficult to renew our existing contracts on favorable terms or at all.

Public resistance to privatization of correctional and detention facilities could result in our inability to obtain new contracts or the loss of existing contracts, which could have a material adverse effect on our business, financial condition and results of operations.

The management and operation of correctional and detention facilities by private entities has not achieved complete acceptance by either governments or the public. Some governmental agencies have limitations on their ability to delegate their traditional management responsibilities for correctional and detention facilities to private companies and additional legislative changes or prohibitions could occur that further increase these limitations. In addition, the movement toward privatization of correctional and detention facilities has encountered resistance from groups, such as labor unions, that believe that correctional and detention facilities should only be operated by governmental agencies. Changes in dominant political parties could also result in significant changes to previously established views of privatization. Increased public resistance to the privatization of correctional and detention facilities in any of the markets in which we operate, as a result of these or other factors, could have a material adverse effect on our business, financial condition and results of operations.

Adverse publicity may negatively impact our ability to retain existing contracts and obtain new contracts. Our business is subject to public scrutiny.

Any negative publicity about an escape, riot or other disturbance or perceived poor conditions at a privately managed facility may result in publicity adverse to us and the private corrections industry in general. Any of these occurrences or continued trends may make it more difficult for us to renew existing contracts or to obtain new contracts or could result in the termination of an existing contract or the closure of one of our facilities, which could have a material adverse effect on our business.

We may incur significant start-up and operating costs on new contracts before receiving related revenues, which may impact our cash flows and not be recouped.

When we are awarded a contract to manage a facility, we may incur significant start-up and operating expenses, including the cost of constructing the facility, purchasing equipment and staffing the facility, before we receive any payments under the contract. These expenditures could result in a significant reduction in our cash reserves and may make it more difficult for us to meet other cash obligations, including our payment obligations on the Notes and the Senior Credit Facility. In addition, a contract may be terminated prior to its scheduled expiration and as a result we may not recover these expenditures or realize any return on our investment.

Failure to comply with extensive government regulation and unique contractual requirements could have a material adverse effect on our business, financial condition or results of operations.

The industry in which we operate is subject to extensive federal, state and local regulations, including educational, environmental, health care and safety regulations, which are administered by many regulatory authorities. Some of the regulations are unique to the corrections industry, and the combination of regulations affects all areas of our operations. Facility management contracts typically include reporting requirements, supervision and on-site monitoring by representatives of the contracting governmental agencies. Corrections officers and juvenile care workers are customarily required to meet certain training standards and, in some instances, facility personnel are required to be licensed and are subject to background investigations. Certain jurisdictions also require us to award subcontracts on a competitive basis or to subcontract with businesses owned by members of minority groups. We may not always successfully comply with these and other regulations to which we are subject and failure to comply can result in material penalties or the non-renewal or termination of facility management contracts. In addition, changes in existing regulations could require us to substantially modify the manner in which we conduct our business and, therefore, could have a material adverse effect on us.

In addition, private prison managers are increasingly subject to government legislation and regulation attempting to restrict the ability of private prison managers to house certain types of inmates, such as inmates from other jurisdictions or inmates at medium or higher security levels. Legislation has been enacted in several states, and has previously been proposed in the United States House of Representatives, containing such restrictions. Although we do not believe that existing legislation will have a material adverse effect on us, future legislation may have such an effect on us.

Governmental agencies may investigate and audit our contracts and, if any improprieties are found, we may be required to refund amounts we have received, to forego anticipated revenues and we may be subject to penalties and sanctions, including prohibitions on our bidding in response to Requests for Proposals, or RFPs, from governmental agencies to manage correctional facilities. Governmental agencies we contract with have the authority to audit and investigate our contracts with them. As part of that process, governmental agencies may review our performance of the contract, our pricing practices, our cost structure and our compliance with applicable laws, regulations and standards. For contracts that actually or effectively provide for certain reimbursement of expenses, if an agency determines that we have improperly allocated costs to a specific contract, we may not be reimbursed for those costs, and we could be required to refund the amount of any such costs that have been reimbursed. If a government audit asserts improper or illegal activities by us, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeitures of profits, suspension of payments, fines and suspension or disqualification from doing business with certain governmental entities. Any adverse determination could adversely impact our ability to bid in response to RFPs in one or more jurisdictions.

We may face community opposition to facility location, which may adversely affect our ability to obtain new contracts.

Our success in obtaining new awards and contracts sometimes depends, in part, upon our ability to locate land that can be leased or acquired, on economically favorable terms, by us or other entities working with us in conjunction with our proposal to construct and/or manage a facility. Some locations may be in or near populous areas and, therefore, may generate legal action or other forms of opposition from residents in areas surrounding a proposed site. When we select the intended project site, we attempt to conduct business in communities where local leaders and residents generally support the establishment of a privatized correctional or detention facility. Future efforts to find suitable host communities may not be successful. In many cases,

the site selection is made by the contracting governmental entity. In such cases, site selection may be made for reasons related to political and/or economic development interests and may lead to the selection of sites that have less favorable environments.

Our business operations expose us to various liabilities for which we may not have adequate insurance.

The nature of our business exposes us to various types of third-party legal claims, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, contractual claims and claims for personal injury or other damages resulting from contact with our facilities, programs, personnel or prisoners, including damages arising from a prisoner’s escape or from a disturbance or riot at a facility. In addition, our management contracts generally require us to indemnify the governmental agency against any damages to which the governmental agency may be subject in connection with such claims or litigation. We maintain insurance coverage for these types of claims, except for claims relating to employment matters. However, the insurance we maintain to cover the various liabilities to which we are exposed may not be adequate. Any losses relating to matters for which we are either uninsured or for which we do not have adequate insurance could have a material adverse effect on our business, financial condition or results of operations. In addition, any losses relating to employment matters could have a material adverse effect on our business, financial condition or results of operations.

Claims for which we are insured arising from our U.S. operations that have an occurrence date of October 1, 2002 or earlier are handled by TWC and are fully insured up to an aggregate limit of between \$25.0 million and \$50.0 million, depending on the nature of the claim. With respect to claims for which we are insured arising after October 1, 2002, we maintain a general liability policy for all U.S. operations with \$52.0 million per occurrence and in the aggregate. On October 1, 2004, we increased our deductible on this general liability policy from \$1.0 million to \$3.0 million for each claim which occurs after October 1, 2004. We also maintain insurance in amounts management deems adequate to cover property and casualty risks, workers’ compensation, medical malpractice and automobile liability. Our Australian subsidiary is required to carry tail insurance through 2011 related to a discontinued contract. We also carry various types of insurance with respect to our operations in South Africa, Australia and New Zealand.

Since our insurance policies generally have high deductible amounts (including a \$3.0 million per claim deductible under our general liability policy), losses are recorded as reported and a provision is made to cover losses incurred but not reported. Loss reserves are undiscounted and are computed based on independent actuarial studies. Our management uses judgments in assessing loss estimates that are based on actual claim amounts and loss development experience considering historical and industry experience. If actual losses related to insurance claims significantly differ from our estimates, our financial condition and results of operations could be materially impacted.

We may not be able to obtain or maintain the insurance levels required by our government contracts.

Our government contracts require us to obtain and maintain specified insurance levels. The occurrence of any events specific to our company or to our industry, or a general rise in insurance rates, could substantially increase our costs of obtaining or maintaining the levels of insurance required under our government contracts. If we are unable to obtain or maintain the required insurance levels, our ability to win new government contracts, renew government contracts that have expired and retain existing government contracts could be significantly impaired, which could have a material adverse affect on our business, financial condition and results of operations.

Our international operations expose us to risks which could materially adversely affect our financial condition and results of operations.

We face risks associated with our operations outside the U.S. These risks include, among others, political and economic instability, exchange rate fluctuations, taxes, duties and the laws or regulations in those foreign jurisdictions in which we

operate. In the event that we experience any difficulties arising from our operations in foreign markets, our business, financial condition and results of operations may be materially adversely affected. For the fiscal year ended January 2, 2005, our international operations accounted for approximately 16.9% of our consolidated revenues.

We conduct certain of our operations through joint ventures, which may lead to disagreements with our joint venture partners and adversely affect our interest in the joint ventures.

We conduct substantially all of our operations in South Africa through joint ventures with third parties and may enter into additional joint ventures in the future. Our joint venture agreements generally provide that the joint venture partners will equally share voting control on all significant matters to come before the joint venture. Our joint venture partners may have interests that are different from ours which may result in conflicting views as to the conduct of the business of the joint venture. In the event that we have a disagreement with a joint venture partner as to the resolution of a particular issue to come before the joint venture, or as to the management or conduct of the business of the joint venture in general, we may not be able to resolve such disagreement in our favor and such disagreement could have a material adverse effect on our interest in the joint venture or the business of the joint venture in general.

We are dependent upon our senior management and our ability to attract and retain sufficient qualified personnel

We are dependent upon the continued service of each member of our senior management team, including George C. Zoley, our Chairman and Chief Executive Officer, Wayne H. Calabrese, our Vice Chairman and President, and John G. O’Rourke, our Chief Financial Officer. Under the terms of their retirement agreements, each of these executives are currently eligible to retire at any time from GEO and receive significant lump sum retirement payments. The unexpected loss of any of these individuals could materially adversely affect our business, financial condition or results of operations. We do not maintain key-man life insurance to protect against the loss of any of these individuals.

In addition, the services we provide are labor-intensive. When we are awarded a facility management contract or open a new facility, we must hire operating management, correctional officers and other personnel. The success of our business requires that we attract, develop and retain these personnel. Our inability to hire sufficient qualified personnel on a timely basis or the loss of significant numbers of personnel at existing facilities could have a material effect on our business, financial condition or results of operations.

Our profitability may be materially adversely affected by inflation.

Many of our facility management contracts provide for fixed management fees or fees that increase by only small amounts during their terms. While a substantial portion of our cost structure is generally fixed, if, due to inflation or other causes, our operating expenses, such as costs relating to personnel, utilities, insurance, medical and food, increase at rates faster than increases, if any, in our facility management fees, then our profitability could be materially adversely affected.

Various risks associated with the ownership of real estate may increase costs, expose us to uninsured losses and adversely affect our financial condition and results of operations.

Our ownership of correctional and detention facilities subjects us to risks typically associated with investments in real estate. Investments in real estate, and in particular, correctional and detention facilities, are relatively illiquid and, therefore, our ability to divest ourselves of one or more of our facilities promptly in response to changed conditions is limited. Investments in correctional and detention facilities, in particular, subject us to risks involving potential exposure to environmental liability and uninsured loss. Our operating costs may be affected by the obligation to pay for the cost of complying with existing environmental laws, ordinances and regulations, as well as the cost of complying with future legislation. In addition, although we maintain insurance for many types of losses, there are certain types of losses, such as losses from earthquakes, riots and acts of terrorism, which may be either uninsurable or for which it may not be economically feasible to obtain insurance coverage, in light of the substantial costs associated with such insurance. As a result, we could lose both our capital invested in, and anticipated profits from,

one or more of the facilities we own. Further, even if we have insurance for a particular loss, we may experience losses that may exceed the limits of our coverage.

Risks related to facility construction and development activities may increase our costs related to such activities

When we are engaged to perform construction and design services for a facility, we typically act as the primary contractor and subcontract with other companies who act as the general contractors. As primary contractor, we are subject to the various risks associated with construction (including, without limitation, shortages of labor and materials, work stoppages, labor disputes and weather interference) which could cause construction delays. In addition, we are subject to the risk that the general contractor will be unable to complete construction at the budgeted costs or be unable to fund any excess construction costs, even though we require general contractors to post construction bonds and insurance. Under such contracts, we are ultimately liable for all late delivery penalties and cost overruns.

The rising cost and increasing difficulty of obtaining adequate levels of surety credit on favorable terms could adversely affect our operating results

We are often required to post performance bonds issued by a surety company as a condition to bidding on or being awarded a facility development contract. Availability and pricing of these surety commitments is subject to general market and industry conditions, among other factors. Recent events in the economy have caused the surety market to become unsettled, causing many reinsurers and sureties to reevaluate their commitment levels and required returns. As a result, surety bond premiums generally are increasing. If we are unable to effectively pass along the higher surety costs to our customers, any increase in surety costs could adversely affect our operating results. In addition, we may not continue to have access to surety credit or be able to secure bonds economically, without additional collateral, or at the levels required for any potential facility development or contract bids. If we are unable to obtain adequate levels of surety credit on favorable terms, we would have to rely upon letters of credit under our Senior Credit Facility, which would entail higher costs even if such borrowing capacity was available when desired, and our ability to bid for or obtain new contracts could be impaired.

Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to market risks related to changes in interest rates with respect to our Senior Credit Facility. Monthly payments under the Senior Credit Facility are indexed to a variable interest rate. Based on borrowings outstanding under the Senior Credit Facility of \$51.5 million as of January 2, 2005, for every one percent increase in the interest rate applicable to the Senior Credit Facility, our total annual interest expense would increase by \$0.5 million.

Effective September 18, 2003, we entered into interest rate swap agreements in the aggregate notional amount of \$50.0 million. We have designated the swaps as hedges against changes in the fair value of a designated portion of the Notes due to changes in underlying interest rates. Changes in the fair value of the interest rate swaps are recorded in earnings along with related designated changes in the value of the Notes. The agreements, which have payment and expiration dates and call provisions that coincide with the terms of the Notes, effectively convert \$50.0 million of the Notes into variable rate obligations. Under the agreements, we receive a fixed interest rate payment from the financial counterparties to the agreements equal to 8.25% per year calculated on the notional \$50.0 million amount, while we make a variable interest rate payment to the same counterparties equal to the six-month LIBOR plus a fixed margin of 3.45%, also calculated on the notional \$50.0 million amount. Additionally, for every one percent increase in the interest rate applicable to the \$50.0 million swap agreements on the Notes described above, our total annual interest expense will increase by \$0.5 million.

We have entered into certain interest rate swap arrangements for hedging purposes, fixing the interest rate on our Australian non-recourse debt to 9.7%. The difference between the floating rate and the swap rate on these instruments is recognized in interest expense within the respective entity. Because the interest rates with respect to these instruments are fixed, a hypothetical 100 basis point change in the current interest rate would not have a material impact on our financial condition or results of operations.

Foreign Currency Exchange Rate Risk

We are also exposed to market risks, related to fluctuations in foreign currency exchange rates between the U.S. dollar and the Australian dollar and the South African rand currency exchange rates. Based upon our foreign currency exchange rate exposure at January 2, 2005, every 10 percent change in historical currency rates would have approximately a \$2.0 million effect on our financial position and approximately a \$0.9 million impact on our results of operations over the next fiscal year.

Additionally, we invest our cash in a variety of short-term financial instruments to provide a return. These instruments generally consist of highly liquid investments with original maturities at the date of purchase of three months or less. While these instruments are subject to interest rate risk, a hypothetical 100 basis point increase or decrease in market interest rates would not have a material impact on our financial condition or results of operations.

To the Shareholders of The GEO Group, Inc.:

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. They include amounts based on judgments and estimates.

Representation in the consolidated financial statements and the fairness and integrity of such statements are the responsibility of management. In order to meet management's responsibility with accounting principles generally accepted and a program of internal audits designed to provide reasonable assurance that our assets are controlled and safeguarded, that transactions are executed in accordance with management's authorization and properly recorded, and that accounting records may be relied upon in the preparation of financial statements.

The consolidated financial statements have been audited by Ernst & Young LLP, independent registered certified public accountants, whose appointment was ratified by our shareholders. Their report expresses a professional opinion as to whether management's consolidated financial statements considered in their entirety present fairly, in conformity with accounting principles generally accepted in the United States, our financial position and results of operations. Their audit was conducted in accordance with auditing standards generally accepted in the United States. As part of this audit, Ernst & Young LLP considered our system of internal controls to the degree they deemed necessary to determine the nature, timing, and extent of their audit tests which support their opinion on the consolidated financial statements.

The Audit Committee of the Board of Directors meets periodically with representatives of management, the independent registered certified public accountants and our internal auditors to review matters relating to financial reporting, internal accounting controls and auditing. Both the internal auditors and the independent registered certified public accountants have unrestricted access to the Audit Committee to discuss the results of their reviews.

deficiencies that the Company's management has determined constitute material weaknesses are:

- The Company had insufficient controls over the determination and application of generally accepted accounting principles ("GAAP") with respect to employee vacation expense. As a result, the Company underaccrued its liability for vacation expense under GAAP in fiscal years 2002 and 2003. Due to the materiality of this error, the Company has restated previously filed financial statements for 2002 and 2003 in order to reflect the proper accruals for employee vacation expense during those years;
- The Company had insufficient controls to properly evaluate voting control over its joint venture in South Africa (South Africa Custodial Management Pty. Limited, or "SACM"), which resulted in the Company's failure to consolidate SACM in its financial statements for fiscal years 2002 and 2003. Due to the materiality of this error, the Company has restated previously filed financial statements for 2002 and 2003 in order to consolidate SACM onto its financial statements for those years.
- The Company had insufficient controls in place to determine the appropriate amortization period for leasehold improvements related to certain leased facilities, which resulted in the Company understating depreciation expense in previously filed financial statements for fiscal years 2002 and 2003. Due to the materiality of this error, the Company has restated previously filed financial statements for 2002 and 2003 in order to reflect the proper depreciation expense related to leasehold improvements during those years.

George C. Zoley

Chairman and Chief Executive Officer

Wayne H. Calabrese

Vice Chairman, President and Chief Operating Officer

John G. O'Rourke

Senior Vice President and Chief Financial Officer

- The Company had insufficient controls to adequately monitor and update the estimated reserve needed in connection with its inactive correctional facility in Jena, Louisiana (the "Jena Facility") for fiscal year 2004. This material weakness resulted in an adjustment to increase operating expenses and the reserve for the facility because, subsequent to the financial close process, management revised its estimate of the potential income which could be derived by the Company from a sublease of the Jena Facility; and
- The Company had insufficient controls to adequately prepare and review the reconciliation of differences between the income tax basis and book basis of each component of the deferred tax asset and liability accounts within the Company's balance sheet. Although no material misstatements were discovered related to this material weakness, until this deficiency is remediated, there is a more than remote likelihood that a material misstatement to the annual or interim consolidated financial statements could occur and not be prevented or detected by the Company's controls in a timely manner.

MANAGEMENT’S ANNUAL REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING

As a result of these material weaknesses in the Company’s internal control over financial reporting, management has concluded that, as of January 2, 2005, the Company’s internal control over financial reporting was not effective based on the criteria set forth by the COSO of the Treadway Commission in Internal Control— Integrated Framework.

The Company’s independent registered public accounting firm, Ernst & Young LLP, has issued an attestation report on management’s assessment of the Company’s internal control over financial reporting. This report appears below.

Remediation Steps to Address Material Weaknesses

The following are actions that the Company’s management has taken and plans to continue to take to remediate the material weaknesses described above:

- Accruals for Employee Vacation Expense- The Company has restated previously filed financial statements for fiscal years 2002 and 2003 in order to reflect the proper accruals for employee vacation expense during those years. The adjustments made as a result of this restatement are reflected in the financial statements filed with this Form 10-K. The Company believes that the restatement, together with the continued application of proper accounting principles to the Company’s employee vacation accruals, will fully remediate this material weakness. Furthermore, the Company has developed payroll reports to help ensure the accurate recording of its employee vacation accrual on a quarterly basis.
- Evaluation of Voting Control Over SACM- The Company has restated previously filed financial statements for fiscal year 2002 and 2003 in order to consolidate SACM into its financial statements for those years. The adjustments made as a result of this restatement are reflected in the financial statements filed with this Form 10-K. The Company believes that the restatement, together with the continued application of proper accounting principles to SACM, will fully remediate this material weakness.
- Amortization of Leasehold Improvements- The Company has restated previously filed financial statements for fiscal years 2002 and 2003 in order to reflect the proper depreciation expense for those years. The Company believes that the restatement, together with the continued application of proper accounting principles to future leasehold improvements made by the Company will fully remediate this material weakness.
- Estimate of Reserve for Jena Facility- The Company has made an adjustment for fiscal year 2004 reflected in the financial statements filed with this Form 10-K to update the estimated reserve needed in connection with its inactive Jena Facility. In the future, the Company plans to strengthen its process with regard to monitoring reserves for loss by ensuring that the Company’s disclosure committee more closely reviews all significant judgments on inactive facilities and reports any recommendations regarding changes to related reserves to the CEO and CFO prior to the completion of the financial statement close process.
- Review of Income Tax Related Balance Sheet Items- The Company has made an adjustment for fiscal year 2004 reflected in the financial statements filed with this Form 10-K to properly reconcile the differences between the tax basis and book basis for its fixed assets. Beginning in fiscal year 2005, the Company intends to expand its review of its reconciliations of the tax basis to book basis for all fixed asset accounts. Management plans to implement any recommendations resulting from such review.

Changes in Internal Control Over Financial Reporting

There was no change in the Company’s internal control over financial reporting that occurred during the Company’s most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED CERTIFIED PUBLIC ACCOUNTANTS

The Board of Directors and Shareholders
of The GEO Group, Inc.

We have audited the accompanying consolidated balance sheets of The GEO Group, Inc. (formerly Wackenhut Corrections Corporation) as of January 2, 2005 and December 28, 2003, and the related consolidated statements of income, shareholders’ equity and comprehensive income, and cash flows for each of the three years in the period ended January 2, 2005. Our audits also included the financial statement schedule listed in the index at item 15(a). These financial statements and schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of The GEO Group, Inc. at January 2, 2005 and December 28, 2003, and the consolidated results of its operations and its cash flows for each of the three years in the period ended January 2, 2005, in conformity with U.S. generally accepted accounting principles.

As described in Note 2 to the consolidated financial statements, the accompanying consolidated balance sheet as of December 28, 2003, and the consolidated statements of income, shareholders’ equity and comprehensive income, and cash flows for the years ended December 28, 2003 and December 29, 2002 have been restated to correct the accounting for compensated absences and the amortization of leasehold improvements, and the consolidation of an affiliate under voting control.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of The GEO Group, Inc.’s internal control over financial reporting as of January 2, 2005, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 22, 2005 expressed an unqualified opinion on management’s assessment of the effectiveness and an adverse opinion on the effectiveness of internal control over financial reporting.

/s/ ERNST &YOUNG LLP

Fort Lauderdale, Florida
March 22, 2005

**The Board of Directors and Shareholders
of The GEO Group, Inc.**

We have audited management’s assessment, included in the accompanying Management’s Annual Report on Internal Control over Financial Reporting, that The GEO Group, Inc. did not maintain effective internal control over financial reporting as of January 2, 2005, because of the effect of the Company’s insufficient controls over: the calculation and recording of its vacation expense in accordance with generally accepted accounting principles (GAAP); the evaluation of voting control over certain investments in affiliates; the identification of the proper amortization period for leasehold improvements; the monitoring and updating of its estimated liability for future rent expense related to an idle facility; and the preparation and review of reconciliations for the differences between the income tax basis and book basis of all components of the Company’s deferred tax asset and liability accounts, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The GEO Group, Inc.’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management’s assessment and an opinion on the effectiveness of the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management’s assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weaknesses have been identified and included in management’s assessment. In its assessment as of January 2, 2005, management identified as a material weakness the Company’s insufficient controls over the calculating and recording of its vacation expense in accordance with GAAP, which resulted in the understatement of the vacation expense and the related liability accounts. Management identified as a material weakness the Company’s insufficient controls over the evaluation of the voting control of one of its affiliates, which resulted in the Company failing to properly consolidate the affiliate; thereby, understating and overstating several balance sheet and income statement accounts. Management identified as a material weakness the Company’s insufficient controls to identify the correct amortization period for leasehold improvements related to certain leased facilities, which resulted in the understatement of the amortization expense and overstatement of property and equipment. As a result of the aforementioned material weaknesses in internal control, management concluded that the Company’s previously issued interim and annual financial statements should be restated for the correction of the related errors. Management identified as a material weakness the Company’s insufficient controls over monitoring and updat-

ing its estimated liability for future rent expense related to an idle facility, which resulted in an adjustment to increase operating expenses and accrued expenses. Management identified as a material weakness the Company’s insufficient controls over the preparation and review of reconciliations of the differences between the income tax basis and book basis of all components of the Company’s deferred tax asset and liability accounts. Although no material misstatements were discovered related to this material weakness, until this deficiency is remediated, there is a more than remote likelihood that a material misstatement to the annual or interim consolidated financial statements could occur and not be prevented or detected by the Company’s controls in a timely manner. These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the January 2, 2005 financial statements, and this report does not affect our report dated March 22, 2005 on those financial statements.

In our opinion, management’s assessment that The GEO Group, Inc. did not maintain effective internal control over financial reporting as of January 2, 2005, is fairly stated, in all material respects, based on the COSO control criteria. Also, in our opinion, because of the effect of the material weaknesses described above on the achievement of the objectives of the control criteria, The GEO Group, Inc. has not maintained effective internal control over financial reporting as of January 2, 2005, based on the COSO control criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of The GEO Group, Inc. as of January 2, 2005 and December 28, 2003, and the related consolidated statements of income, shareholders’ equity and comprehensive income, and cash flows for each of the three years in the period ended January 2, 2005, and our report dated March 22, 2005 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

1. Summary of Business Operations and Significant Accounting Policies

The GEO Group, Inc., a Florida corporation, and subsidiaries (the “Company”) is a leading developer and manager of privatized correctional, detention and mental health services facilities located in the United States, Australia, South Africa, and New Zealand. Until July 9, 2003, the Company was a majority owned subsidiary of The Wackenhut Corporation, (“TWC”). TWC previously owned 12 million shares of the Company’s common stock.

On May 8, 2002, TWC consummated a merger with a wholly owned subsidiary of Group 4 Falck A/S (“Group 4 Falck”) a Danish multinational security and correctional services company. As a result of the merger, Group 4 Falck acquired TWC and became the indirect beneficial owner of 12 million shares of the Company. On July 2, 2003, the Company sold its 50% interest in its United Kingdom joint venture, Premier Custodial Group Limited (“PCG”) for approximately \$80.7 million and recognized a pre-tax gain of approximately \$61.0 million. On July 9, 2003, the Company purchased all 12 million shares of its common stock, par value \$0.01, beneficially owned by Group 4 Falck for \$132 million in cash pursuant to the terms of a share purchase agreement.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. The significant accounting policies of the Company are described below.

Fiscal Year

The Company’s fiscal year ends on the Sunday closest to the calendar year end. Fiscal year 2004 included 53 weeks. Fiscal years 2003 and 2002 each included 52 weeks. The Company reports the results of its South African equity affiliate, South African Custodial Services Pty. Limited, (“SACS”), and its consolidated South African entity, South African Custodial Management Pty. Limited (“SACM”) on a calendar year end, due to the availability of information.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and all controlled subsidiaries. Investments in 50% owned affiliates, which we do not control, are accounted for under the equity method of accounting. Intercompany transactions have been eliminated. Certain reclassifications of the prior year’s financial statements have been made to conform to the current year’s presentation. Auction rate securities in the amount of \$10.0 million have been reclassified from cash and cash equivalents to short-term investments in the December 28, 2003 consolidated balance sheet to conform to the fiscal 2004 financial statement presentation. Accordingly, the statements of cash flows for the years ended December 28, 2003 and January 2, 2005 reflect this presentation.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. While the Company believes that such estimates are fair when considered in conjunction with the consolidated financial statements taken as a whole, the actual amounts of such estimates, when known, will vary from these estimates. If actual results significantly differ from the Company’s estimates, the Company’s financial condition and results of operations could be materially impacted.

Fair Value of Financial Instruments

The carrying value of cash and cash equivalents, short-term investments, accounts receivable, accounts payable and accrued expenses approximate their fair value due to the short maturity of these items. The carrying value of the Company’s long-term debt related to its Senior Credit Facility (See Note 8) and non-recourse debt approximates fair value based on the variable interest rates on the debt. For the Company’s 81/4% Senior Unsecured Notes, the stated value and fair value based on quoted market rates was \$150.0 million and \$162.4 million, respectively, at January 2, 2005.

Cash and Cash Equivalents

Cash and cash equivalents include all interest-bearing deposits or investments with original maturities of three months or less.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

Short Term Investments

Short-term investments consist of auction rate securities classified as available-for-sale, which are stated at estimated fair value. These investments are on deposit with a major financial institution. Unrealized gains and losses, net of tax, are computed on the first-in first-out basis and are reported as a separate component of accumulated other comprehensive income (loss) in shareholders’ equity until realized. There were no unrealized gains or losses at December 28, 2003 and January 2, 2005.

The Company reviewed the classification of its investments in certain auction rate securities and concluded they should be classified as short-term investments as compared to their prior classification as cash equivalents. As of December 28, 2003, similar securities totaling \$10 million have been reclassified from cash equivalents to short-term investments in the accompanying Fiscal 2003 consolidated balance sheet and the related effect has been reflected in the fiscal 2003 and 2002 consolidated statements of cash flows from investing activities which decreased by \$10 million in 2003 from that previously reported. As of January 2, 2005, these securities totaled \$10 million and are classified as “short-term investments” on the consolidated balance sheet for fiscal year 2004.

Accounts Receivable

The Company extends credit to the governmental agencies it contracts with and other parties in the normal course of business as a result of billing and receiving payment for services thirty to sixty days in arrears. Further, management of the Company regularly reviews outstanding receivables, and provide estimated losses through an allowance for doubtful accounts. In evaluating the level of established reserves the Company makes judgments regarding its customers’ ability to make required payments, economic events and other factors. The Company does not require collateral for the credit it extends to its customers. As the financial condition of these parties change, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required.

Inventories

Food and supplies inventories are carried at the lower of cost or market, on a first-in first-out basis and are included in “other current assets” in the accompanying consolidated balance sheets. Uniform inventories are carried at amortized cost and are amortized over a period of eighteen months. The current portion of unamortized uniforms is included in “other current assets.” The long-term portion is included in “other assets” in the accompanying consolidated balance sheets.

Restricted Cash

The Company’s wholly owned Australian subsidiary financed a facility’s development and subsequent expansion in 2003 with long-term debt obligations, which are non-recourse to the Company. As a condition of the loan, the Company is required to maintain a restricted cash balance of AUD 5.0 million. The term of the non-recourse debt is through 2017.

Costs of Acquisition Opportunities

Internal costs associated with a business combination are expensed as incurred. Direct and incremental costs related to successful negotiations where we are the acquiring company are capitalized as part of the cost of the acquisition. As of January 2, 2005 the Company had no capitalized costs. During the fourth quarter of 2004, the Company wrote off approximately \$1.3 million of costs. Costs associated with unsuccessful negotiations are expensed when it is probable that the acquisition will not occur.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 2 to 40 years. Equipment and furniture and fixtures are depreciated over 3 to 7 years. Accelerated methods of depreciation are generally used for income tax purposes. Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease. The Company performs ongoing evaluations of the estimated useful lives of the property and equipment for depreciation purposes. The estimated useful lives are determined and continually evaluated based on the period over which services are expected to be rendered by the asset. Maintenance and repairs are expensed as incurred. Interest is capitalized in connection with the construction of correctional and detention facilities. Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset’s estimated useful life. No interest cost was capitalized in 2004 or 2003.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

Long-Lived Assets

The Company reviews long-lived assets to be held and used for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. Management has reviewed the Company’s long-lived assets and determined that there are no events requiring impairment loss recognition. Events that would trigger an impairment assessment include deterioration of profits for a business segment that has long-lived assets, or when other changes occur which might impair recovery of long-lived assets.

With the adoption of FAS No. 142, the Company’s goodwill is no longer amortized, but is subject to an annual impairment test. There was no impairment of goodwill as a result of adopting FAS No. 142, “Goodwill and Other Intangible Assets” or the annual impairment test completed during the fourth quarter of 2004 and 2003. The Company’s goodwill at January 2, 2005 and December 28, 2003 was associated with its Australian subsidiary in the amount of \$0.6 million and \$0.4 million, respectively.

Idle Facilities

The Company has entered into ten year non cancelable operating leases with Correctional Properties Trust, or CPV, for eleven facilities with initial terms that expire at various times beginning in April 2008 and extending through January 2010. In the event that the Company’s facility management contract for one of these leased facilities is terminated, the Company would remain responsible for payments to CPV on the underlying lease. The Company will account for idle periods under any such lease in accordance with FAS No. 146 “Accounting for Costs Associated with Exit or Disposal Activities.” Specifically, the Company will review its estimate for sublease income and records a charge for the difference between the net present value of the sublease income and the lease expense over the remaining term of the lease.

Variable Interest Entities

In January 2003, the FASB issued FIN No. 46, “Consolidation of Variable Interest Entities,” which addressed consolidation by a business of variable interest entities in which it is the primary beneficiary. In December 2003 the FASB issued FIN No. 46R which replaced FIN No. 46. The Company has reviewed its 50% owned South African joint venture SACS, and determined it is a variable interest entity. The Company determined that it is not the primary beneficiary of SACS and as a result the Company is not required to consolidate SACS under FIN 46R. The Company continues to account for SACS, as an equity affiliate. SACS was established in 2001, to design, finance and build the Kutama Sinthumule Correctional Center and SACM was established to operate correctional centers. Subsequently, SACS was awarded a 25 year contract to design, construct, manage and finance a facility in Louis Trichardt, South Africa. SACS, based on the terms of the contract with government, was able to obtain long term financing to build the prison. The financing is fully guaranteed by the government, except in the event of default, for which it provides an 80% guarantee. See Note 8 for a summary of the Company’s guarantees related to SACS. Separately, SACS entered into a long term operating contract with South African Custodial Management Pty. Limited (SACM) to provide security and other management services and with SACS’s joint venture partner to provide purchasing, programs and maintenance services upon completion of the construction phase, which concluded in February 2002. The Company’s maximum exposure for loss under this contract is \$15.6 million, which represents the Company’s initial investment and the guarantees discussed in Note 8.

Deferred Revenue

Deferred revenue primarily represents the unamortized net gain on the development of properties and on the sale and lease-back of properties by the Company to Correctional Properties Trust (“CPV”), a Maryland real estate investment trust. The Company leases these properties back from CPV under operating leases. Deferred revenue is being amortized over the lives of the leases and is recognized in income as a reduction of rental expenses.

Revenue Recognition

In accordance with Staff Accounting Bulletin (“SAB”) No. 101, “Revenue Recognition in Financial Statements”, as amended by SAB No. 104, “Revenue Recognition”, and related interpretations, facility management revenues are recognized as services are provided under facility management contracts with approved government appropriations based on a net rate per day per

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

inmate or on a fixed monthly rate.

Project development and design revenues are recognized as earned on a percentage of completion basis measured by the percentage of costs incurred to date as compared to estimated total cost for each contract. This method is used because the Company considers costs incurred to date to be the best available measure of progress on these contracts. Provisions for estimated losses on uncompleted contracts and changes to cost estimates are made in the period in which the Company determines that such losses and changes are probable. Contract costs include all direct material and labor costs and those indirect costs related to contract performance. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements, may result in revisions to estimated costs and income, and are recognized in the period in which the revisions are determined. At January 2, 2005 the Company had recognized approximately \$15.3 million in construction revenue and \$0.5 million of unbilled costs related to project development and design included in the consolidated balance sheet in other current assets. Additionally there was approximately \$0.1 million retainage due at January 2, 2005.

The Company extends credit to the governmental agencies it contracts with and other parties in the normal course of business as a result of billing and receiving payment for services thirty to sixty days in arrears. Further, the Company regularly reviews outstanding receivables, and provides estimated losses through an allowance for doubtful accounts. In evaluating the level of established loss reserves, the Company makes judgments regarding its customers’ ability to make required payments, economic events and other factors. As the financial condition of these parties change, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required. The Company also performs ongoing credit evaluations of customers’ financial condition and generally does not require collateral. The Company maintains reserves for potential credit losses, and such losses traditionally have been within its expectations.

Income Taxes

The Company accounts for income taxes in accordance with FAS No. 109, “Accounting for Income Taxes.” Under this method, deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax bases of assets and liabilities given the provisions of enacted tax laws. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. Valuation allowances are recorded related to deferred tax assets based on the “more likely than not” criteria of FAS No. 109.

In providing for deferred taxes, the Company considers tax regulations of the jurisdiction in which the Company operates, and estimates of future taxable income and available tax planning strategies. If tax regulations, operating results or the ability to implement tax-planning strategies vary, adjustments to the carrying value of the deferred tax assets and liabilities may be required. In December 2004, the Company entered into a dividend re-investment plan under the requirements established by the American Jobs Creation Act of 2004 (“the Act”). The Company recognized a benefit of \$0.2 million in 2004 and expects to realize an additional benefit of \$1.7 million in 2005 when Congress is expected to pass a technical correction clarifying certain aspects of the Act.

Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted-average number of common shares outstanding. In the computation of diluted earnings per share, the weighted-average number of common shares outstanding is adjusted for the dilutive effect of shares issuable upon exercise of stock options calculated using the treasury stock method.

Direct Finance Leases

The Company accounts for the portion of its contracts with certain governmental agencies that represent capitalized lease payments on buildings and equipment as investments in direct finance leases. Accordingly, the minimum lease payments to be received over the term of the leases less unearned income are capitalized as the Company’s investments in the leases. Unearned income is recognized as income over the term of the leases using the interest method.

Reserves for Insurance Losses

Claims for which the Company is insured arising from its U.S. operations that have an occurrence date of October 1, 2002 or earlier are handled by TWC and are fully insured up to an aggregate limit of between \$25.0 million and \$50.0 million, depending on the nature of the claim. With respect to claims for which the Company is insured arising after October 1, 2002, we main-

tain a general liability policy for all U.S. operations with \$52.0 million per occurrence and in the aggregate. On October 1, 2004 the Company increased its deductible on this general liability policy from \$1.0 million to \$3.0 million for each claim which occurs after October 1, 2004. The Company also maintains insurance in amounts the Company’s management deems adequate to cover property and casualty risks, workers’ compensation, medical malpractice and automobile liability. The Company’s Australian subsidiary is required to carry tail insurance through 2011 related to a discontinued contract. In addition, the Company carries various types of insurance with respect to its operations in South Africa, Australia and New Zealand.

Since the Company’s insurance policies generally have high deductible amounts (including a \$3.0 million per claim deductible under our general liability policy), losses are recorded as reported and a provision is made to cover losses incurred but not reported. Loss reserves are undiscounted and are computed based on independent actuarial studies. The Company’s management uses judgments in assessing loss estimates based on actuarial studies, which include actual claim amounts and loss development considering historical and industry experience. If actual losses related to insurance claims significantly differ from our estimates, the Company’s financial condition and results of operations could be materially impacted.

Debt Issuance Costs

Debt issuance costs totaling \$5.9 million and \$6.9 million at January 2, 2005, and December 28, 2003, respectively, are included in other non current assets in the consolidated balance sheets and are amortized into interest expense using the effective interest method, over the term of the related debt.

Comprehensive Income

The Company’s comprehensive income is comprised of net income, foreign currency translation adjustments, unrealized loss on derivative instruments, minimum pension liability adjustment, and a reclassification adjustment for losses on UK interest rate swaps related to the sale of the UK joint venture in the Consolidated Statements of Shareholders’ Equity and Comprehensive Income.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, trade accounts receivable, short-term investments, direct finance lease receivable, long-term debt and financial instruments used in hedging activities. The Company’s cash management and investment policies restrict investments to low-risk, highly liquid securities, and the Company performs periodic evaluations of the credit standing of the financial institutions with which it deals. As of January 2, 2005, and December 28, 2003, the Company had no significant concentrations of credit risk except as disclosed in Note 15.

Foreign Currency Translation

The Company’s foreign operations use their local currencies as their functional currencies. Assets and liabilities of the operations are translated at the exchange rates in effect on the balance sheet date and shareholders’ equity is translated at historical rates. Income statement items are translated at the average exchange rates for the year. The impact of foreign currency fluctuation is included in shareholders’ equity as a component of accumulated other comprehensive (loss) income and totaled \$2.5 million at January 2, 2005 and \$1.6 million as of December 28, 2003.

Financial Instruments

In accordance with FAS No. 133, “Accounting for Derivative Instruments and Hedging Activities,” and its related interpretations and amendments, the Company records derivatives as either assets or liabilities on the balance sheet and measures those instruments at fair value. For derivatives that are designed as and qualify as effective cash flow hedges, the portion of gain or loss on the derivative instrument effective at offsetting changes in the hedged item is reported as a component of accumulated other comprehensive income and reclassified into earnings when the hedged transaction affects earnings.

Total accumulated other comprehensive loss related to these cash flow hedges was \$1.7 million and \$3.8 million as of January 2, 2005 and December 28, 2003, respectively. For derivative instruments that are designated as and qualify as effective fair value hedges, the gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item attributable to the hedged risk is recognized in current earnings as interest income (expense) during the period of the change in fair values.

The Company formally documents all relationships between hedging instruments and hedge items, as well as its risk-man-

agement objective and strategy for undertaking various hedge transactions. This process includes attributing all derivatives that are designated as cash flow hedges to floating rate liabilities and attributing all derivatives that are designated as fair value hedges to fixed rate liabilities. The Company also assesses whether each derivative is highly effective in offsetting changes in the cash flows of the hedged item. Fluctuations in the value of the derivative instruments are generally offset by changes in the hedged item; however, if it is determined that a derivative is not highly effective as a hedge or if a derivative ceases to be a highly effective hedge, the Company will discontinue hedge accounting prospectively for the affected derivative.

Accounting for Stock-Based Compensation

As permitted by FAS No. 123, “Accounting for Stock-Based Compensation” as amended by FAS No. 148, “Accounting for Stock-Based Compensation — Transition and Disclosure”, the Company currently accounts for share-based payments to employees using Accounting Principles Board (“APB”) Opinion No. 25, “Accounting for Stock Issued to Employees,” intrinsic method and, as such, generally recognizes no compensation cost for employee stock options.

In December 2004, the Financial Accounting Standards Board (“FASB”) issued FAS No. 123 (revised 2004), “Share-Based Payment”, which is a revision of FAS No. 123. The impact of adoption of FAS 123(R) cannot be predicted at this time because it will depend on levels of share-based payments granted in the future. The Company has not determined the impact of FAS 123(R), however, had we adopted FAS 123(R) in prior periods the Company would have recognized additional expense and expects to recognize expense in the future, when it does adopt FAS 123(R). FAS 123(R) also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after adoption. While the Company cannot estimate what those amounts will be in the future (because they depend on, among other things, when employees exercise stock options), the amount of operating cash flows recognized in prior periods for such excess tax deductions were \$0.8 million, \$0.3 million and \$1.1 million at January 2, 2005, December 28, 2003, and December 29, 2002, respectively.

Had compensation cost for these plans been determined based on the fair value at date of grant in accordance with FAS No. 123, the Company’s net income and earnings per share would have been reduced to the pro forma amounts as follows (in thousands, except per share data):¹

Pro Forma Disclosures	2004	Restated 2003	Restated 2002
<i>(In thousands, except per share data)</i>			
Net income	\$ 16,815	\$ 44,761	\$ 21,120
Less: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	\$ (765)	\$ (935)	\$ (1,060)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

Recent Accounting Pronouncements

On December 16, 2004, the FASB issued FAS No. 123 (revised 2004). FAS No. 123(R) supercedes APB 25 and amends FASB Statement No. 95, “Statement of Cash Flows”. Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. The accounting provisions of FAS 123(R) are effective for the third quarter of fiscal 2005. The Company has not yet assessed the impact of adoption of FAS 123(R).

In June 2004, the FASB issued Emerging Issues Task Force (“EITF”) Issue No. 02-14, “Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock.” EITF Issue No. 02-14 addresses whether the equity method of accounting applies when an investor does not have an investment in voting common stock of an investee but exercises significant influence through other means. EITF Issue No. 02-14 states that an investor should only apply the equity method of accounting when it has investments in either common stock or in-substance common stock of a corporation, provided that the investor has the ability to exercise significant influence over the operating and financial policies of the investee. The accounting provisions of EITF Issue No. 02-14 are effective for the first quarter of fiscal 2005. The Company does not expect the adoption of EITF Issue No. 02-14 to impact its financial statements.

In March 2004, the FASB issued EITF No. 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments” which provides new guidance for assessing impairment losses on debt and equity investments. Additionally, EITF Issue No. 03-1 includes new disclosure requirements for investments that are deemed to be temporarily impaired. In September 2004, the FASB delayed the accounting provisions of EITF Issue No. 03-1; however, the disclosure requirements remain effective and have been adopted for the Company’s year ended January 2, 2005. The Company will evaluate the effect, if any, of EITF Issue No. 03-1 when final guidance is released.

¹ See Note 13 for more information regarding the Company’s stock option plans.

2. Restatements

The Company has restated its Consolidated Financial Statements for the fiscal years ended December 28, 2003 and December 29, 2002 to reflect the application of the appropriate accounting principles to the recognition of compensated absences according to generally accepted accounting principles. Under generally accepted accounting principles compensated absences must be accrued for hourly and salaried employees. The accrual must consist of the vested liability as well as the amount of the unvested liability that is deemed to be earned under the rules that govern FAS No. 43 “Accounting for Compensated Absences.” Prior to the restatement, the Company’s vacation expense and related accruals were understated for 2003, 2002 and prior periods. The impact of this restatement on such prior periods was reflected as a \$2.2 million adjustment to retained earnings as of December 30, 2001.

Additionally, the Company determined that under Financial Accounting Standard (“FAS”), No. 94, “Consolidation of All Majority-Owned Subsidiaries”, the Company is required to consolidate SACM, one of its joint ventures in South Africa. The Company also determined that it had not properly applied FAS 94 for 2003 or 2002 for SACM. As a result the Company has restated its consolidated financial statements for years ended December 28, 2003 and December 29, 2002 and reflected the operations of SACM as a consolidated subsidiary. SACM was previously included in our consolidated balance sheets as investment and advances to affiliates, and in our consolidated statement of income as equity in earnings of affiliates.

Also, the Company reviewed its practice for depreciating leasehold improvements in part due to the recent attention and focus on this area. The Company determined it had inappropriately included option periods when determining the amortization period for certain leasehold improvements. As result, the Company’s depreciation expense was understated for 2003, 2002 and prior periods. The Company has restated its consolidated financial statements for 2003 and 2002 to reflect the appropriate amortization of these items, and its retained earnings as of December 30, 2001 by \$0.5 million to reflect the impact on prior periods.

Summarized below is a more detailed discussion of the restatements (collectively, the “Restatements”), described above, along with a comparison of the amounts previously reported in the Statements of Income in the Company’s Annual Report on Form 10-K for the fiscal years ended December 28, 2003 and December 29, 2002 and the Consolidated Balance Sheet as of December 28, 2003. There are also resulting changes to the captions within the net Cash Provided by Operating Activities on the Statement of Cash Flows. All financial information reported for those fiscal years in these consolidated financial statements reflects the restatements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

3. Discontinued Operations

The Company formerly had, through its Australian subsidiary, a contract with the Department of Immigration, Multicultural and Indigenous Affairs (“DIMIA”) for the management and operation of Australia’s immigration centers. In 2003, the contract was not renewed, and effective February 29, 2004, the Company completed the transition of the contract and exited the management and operation of the DIMIA centers. In accordance with the provisions related to discontinued operations specified within FAS No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets”, the accompanying consolidated financial statements and notes reflect the operations of DIMIA as a discontinued operation in all periods presented. The following are the revenues related to DIMIA for the periods presented (in thousands):

(In thousands)	2004	2003	2002
Revenues	\$ 6,040	\$ 62,673	\$ 59,384

4. Property and Equipment

Property and equipment consist of the following at fiscal year end:

(In thousands)	Useful Life (Years)	2004	Restated 2003
Land	—	\$ 4,399	\$ 3,707
Buildings and improvements	2 to 40	213,878	209,282
Equipment	3 to 7	24,547	21,909
Furniture and fixtures	3 to 7	4,205	3,369
		\$ 247,029	\$ 238,267
Less accumulated depreciation and amortization		(50,285)	(37,713)
		\$ 196,744	\$ 200,554

Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset’s estimated useful life. No interest was capitalized in 2004 and 2003.

5. Investment in Direct Finance Leases

The Company’s investment in direct finance leases relates to the financing and management of one Australian facility. The Company’s wholly-owned Australian subsidiary financed the facility’s development with long-term debt obligations, which are non-recourse to the Company. The Company’s financial statements reflect the consolidated Australian’s subsidiary’s direct finance lease receivable from the state government and related non-recourse debt each totaling approximately \$44.7 million and \$43.9 as of January 2, 2005 and December 28, 2003, respectively.

The future minimum rentals to be received are as follows (in thousands):

Fiscal Year	Annual Repayment (In thousands)
2005	\$ 5,981
2006	6,002
2007	6,034
2008	6,082
2009	6,123
Thereafter	48,210
Total minimum obligation	78,432
Less unearned interest income	(33,749)
Less current portion of direct finance lease	(1,730)
Investment in Direct Finance Lease	\$ 42,953

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

6. Derivative Financial Instruments

Effective September 18, 2003, the Company entered into interest rate swap agreements in the aggregate notional amount of \$50.0 million. The Company has designated the swaps as hedges against changes in the fair value of a designated portion of the Notes due to changes in underlying interest rates. Changes in the fair value of the interest rate swaps are recorded in earnings along with related designated changes in the value of the Notes. The agreements, which have payment and expiration dates and call provisions that coincide with the terms of the Notes, effectively convert \$50.0 million of the Notes into variable rate obligations. Under the agreements, the Company receives a fixed interest rate payment from the financial counterparties to the agreements equal to 8.25% per year calculated on the notional \$50.0 million amount, while the Company makes a variable interest rate payment to the same counterparties equal to the six-month London Interbank Offered Rate, (“LIBOR”) plus a fixed margin of 3.45%, also calculated on the notional \$50.0 million amount. As of January 2, 2005 and December 28, 2003 the fair value of the swaps totaled approximately \$0.7 million and is included in other non-current assets and as an adjustment to the carrying value of the Notes in the accompanying balance sheets. There was no material ineffectiveness of the Company’s interest rate swaps for the fiscal year ended January 2, 2005.

The Company’s Australian subsidiary is a party to an interest rate swap agreement to fix the interest rate on the variable rate non-recourse debt to 9.7%. The Company has determined the swap to be an effective cash flow hedge. Accordingly, the Company records the value of the interest rate swap in accumulated other comprehensive income, net of applicable income taxes. The total value of the swap liability as of January 2, 2005 and December 28, 2003 was approximately \$2.5 million and \$5.2 million, respectively, and is recorded as a component of other liabilities in the accompanying consolidated financial statements. There was no material ineffectiveness of the Company’s interest rate swaps for the fiscal years presented.

The Company’s former 50% owned joint venture operating in the United Kingdom was a party to several interest rate swaps to fix the interest rate on its variable rate credit facility. The Company previously determined the swaps to be effective cash flow hedges and upon the initial adoption of FAS No. 133 on January 1, 2001, the Company recognized a \$12.1 million reduction of shareholders’ equity. In fiscal 2003, in connection with the sale of the 50% owned joint venture in the UK, the Company reclassified the remaining balance of approximately \$13.3 million from accumulated other comprehensive loss into earnings as a reduction of the gain on sale of the UK joint venture.

7. Accrued Expenses

Accrued expenses consisted of the following (dollars in thousands):

Long Term Debt	\$ 186,198	\$ 239,465

The Senior Credit Facility

On July 9, 2003, the Company amended its Senior Credit Facility to consist of a \$50.0 million, five-year revolving loan, referred to as the Revolving Credit Facility, and a \$100.0 million, six-year term loan, referred to as the Term Loan Facility. The Revolving Credit Facility contains a \$40.0 million sub limit for the issuance of standby letters of credit. On February 20, 2004, the Company amended the Senior Credit Facility to, among other things, reduce the interest rates applicable to borrowings under the Senior Credit Facility, obtain flexibility to make certain information technology related capital expenditures and provide additional time to reinvest the net proceeds from the sale of PCG. On June 25, 2004, the Company used \$43.0 million of net proceeds from the sale of PCG to permanently reduce the term loan portion of the Senior Credit Facility, and the Company also wrote off approximately \$0.3 million in deferred financing costs related to this payment. At January 2, 2005, the Company had borrowings of \$51.5 million outstanding under the term loan portion of the Senior Credit Facility, no amounts outstanding under the revolving portion of the Senior Credit Facility, and \$32.8 million outstanding in letters of credit under the revolving portion of the Senior Credit Facility.

All of the obligations under the Senior Credit Facility are unconditionally guaranteed by each of the Company’s existing material domestic subsidiaries. The Senior Credit Facility and the related guarantees are secured by substantially all of the Company’s present and future tangible and intangible assets and all present and future tangible and intangible assets of each guarantor, including but not limited to (i) a first-priority pledge of all of the outstanding capital stock owned by the Company and each guarantor, and (ii) perfected first-priority security interests in all of the Company’s present and future tangible and intangible assets and the present and future tangible and intangible assets of each guarantor.

Indebtedness under the Revolving Credit Facility bears interest at the Company’s option at the base rate plus a spread varying from 0.75% to 1.50% (depending upon a leverage-based pricing grid set forth in the Senior Credit Facility), or at LIBOR plus a spread, varying from 2.00% to 2.75% (depending upon a leverage-based pricing grid, as defined in the Senior Credit Facility). As of January 2, 2005, there were no borrowings currently outstanding under the Revolving Credit Facility. However, new borrowings would bear interest at LIBOR plus 2.25%. The Term Loan Facility bears interest at the Company’s option at the base rate plus a spread of 1.25%, or at LIBOR plus 2.5%. Borrowings under the Term Loan Facility currently bear interest at LIBOR plus a spread of 2.5%. If an event of default occurs under the Senior Credit Facility, (i) all LIBOR rate loans bear interest at the rate which is 2.0% in excess of the rate then applicable to LIBOR rate loans until the end of the applicable interest period and thereafter at a rate which is 2.0% in excess of the rate then applicable to base rate loans, and (ii) all base rate loans bear interest at a rate which is 2.0% in excess of the rate then applicable to base rate loans.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

The Senior Credit Facility contains financial covenants which require the Company to maintain the following ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period: a total leverage ratio equal to or less than 3.00 to 1.00 through July 2, 2005, which reduces thereafter in 0.25 increments to 2.50 to 1.00 on July 2, 2006 and thereafter; a senior secured leverage ratio equal to or less than 1.50 to 1.00; and a fixed charge coverage ratio equal to or greater than 1.10 to 1.00. In addition, the Senior Credit Facility prohibits the Company from making capital expenditures greater than \$10.0 million in the aggregate during any fiscal year, provided that to the extent that the Company’s capital expenditures during any fiscal year are less than the \$10.0 million limit, such amount will be added to the maximum amount of capital expenditures that the Company can make in the following year and further provided that certain information technology related upgrades made prior to the end of 2005 will not count against the annual limit on capital expenditures.

The Senior Credit Facility also requires the Company to maintain a minimum net worth, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period, equal to \$140.0 million, plus the amount of the net gain from the sale of the Company’s interest in PCG, which is approximately \$32.7 million, minus the \$132.0 million the Company used to complete the share purchase from Group 4 Falck, plus 50% of the Company’s consolidated net income earned during each full fiscal quarter ending after the date of the Senior Credit Facility, plus 50% of the aggregate increases in the Company’s consolidated shareholders’ equity that are attributable to the issuance and sale of equity interests by the Company or any of its restricted subsidiaries (excluding intercompany issuances).

The Senior Credit Facility contains certain customary representations and warranties, and certain customary covenants that restrict the Company’s ability to, among other things (i) create, incur or assume any indebtedness, (ii) incur liens, (iii) make loans and investments, (iv) engage in mergers, acquisitions and asset sales, (v) sell its assets, (vi) make certain restricted payments, including declaring any cash dividends or redeem or repurchase capital stock, except as otherwise permitted, (vii) issue, sell or otherwise dispose of its capital stock, (viii) transact with affiliates, (ix) make changes to its accounting treatment, (x) amend or modify the terms of any subordinated indebtedness (including the Notes), (xi) enter into debt agreements that contain negative pledges on its assets or covenants more restrictive than contained in the Senior Credit Facility, (xii) alter the business it conducts, and (xiii) materially impair its lenders’ security interests in the collateral for its loans.

The Senior Credit Facility contains certain customary representations and warranties, and certain customary covenants that restrict our ability to, among other things (i) create, incur or assume any indebtedness, (ii) incur liens, (iii) make loans and investments, (iv) engage in mergers, acquisitions and asset sales, (v) sell our assets, (vi) make certain restricted payments, including declaring any cash dividends or redeem or repurchase capital stock, except as otherwise permitted, (vii) issue, sell or otherwise dispose of our capital stock, (viii) transact with affiliates, (ix) make changes to our accounting treatment, (x) amend or modify the terms of any subordinated indebtedness (including the Notes), (xi) enter into debt agreements that contain negative pledges on our assets or covenants more restrictive than contained in the Senior Credit Facility, (xii) alter the business we conduct, and (xiii) materially impair our lenders’ security interests in the collateral for our loans. The covenants in the Senior Credit Facility can substantially restrict our business operations. See “Risk Factors — Risks Related to Our High Level of Indebtedness — The covenants in the indenture governing the Notes and our Senior Credit Facility impose significant operating and financial restrictions which may adversely affect our ability to operate our business.”

Events of default under the Senior Credit Facility include, but are not limited to, (i) the Company’s failure to pay principal or interest when due, (ii) the Company’s material breach of any representations or warranty, (iii) covenant defaults, (iv) bankruptcy, (v) cross default to certain other indebtedness, (vi) unsatisfied final judgments over a threshold to be determined, (vii) material environmental claims which are asserted against the Company, and (viii) a change of control.

Senior 81/4% Notes

To facilitate the completion of the purchase of the 12 million shares from Group 4 Falck, the Company amended the Senior Credit Facility and issued \$150.0 million aggregate principal amount, ten-year, 81/4% senior unsecured notes, (“the Notes”), in a private placement pursuant to Rule 144A of the Securities Act of 1933, as amended. The Notes are general, unsecured, senior obligations. Interest is payable semi-annually on January 15 and July 15 at 81/4%. The Notes are governed by the terms of an Indenture, dated July 9, 2003, between the Company and the Bank of New York, as trustee, referred to as the Indenture. Under the terms of the Indenture, at any time on or prior to July 15, 2006, the Company may redeem up to 35% of the Notes with the proceeds from equity offerings at 108.25% of the principal amount to be redeemed plus the payment of accrued and unpaid inter-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

est, and any applicable liquidated damages. Additionally, after July 15, 2008, the Company may redeem, at the Company’s option, all or a portion of the Notes plus accrued and unpaid interest at various redemption prices ranging from 104.125% to 100.000% of the principal amount to be redeemed, depending on when the redemption occurs. The Indenture contains covenants that limit the Company’s ability to incur additional indebtedness, pay dividends or distributions on its common stock, repurchase its common stock, and prepay subordinated indebtedness. The Indenture also limits the Company’s ability to issue preferred stock, make certain types of investments, merge or consolidate with another company, guarantee other indebtedness, create liens and transfer and sell assets. On June 25, 2004, as required by the terms of the Indenture governing the Notes, the Company used \$43.0 million of the net proceeds from the sale of PCG to permanently reduce the Senior Credit Facility, and wrote off approximately \$0.3 million in deferred financing costs related to this payment.

The Company is in compliance with all of the covenants of the Indenture governing the notes as of January 2, 2005.

As of January 2, 2005, the Notes are reflected net of the original issuer’s discount of approximately \$4.1 million which is being amortized over the ten year term of the Notes using the effective interest method.

Debt repayment schedules under the Term Loan Facility and the Notes are as follows:

Fiscal Year	Annual Repayment <i>(In thousands)</i>
2005	\$ 12,006
2006	3,461
2007	3,461
2008	10,095
2009	22,498
Thereafter	150,000
	\$ 201,521
Original issuer’s discount	(4,063)
Current portion of Term Loan	(12,006)
Swap on the Notes	746
Non current portion of Term Loan and Notes	\$ 186,198

At January 2, 2005 the Company also had outstanding nine letters of guarantee totaling approximately \$6.7 million under separate international facilities.

Guarantees

In connection with the creation of SACS, the Company entered into certain guarantees related to the financing, construction and operation of the prison. The Company guaranteed certain obligations of SACS under its debt agreements up to a maximum amount of 60.0 million South African Rand, or approximately \$10.6 million to SACS’ senior lenders through the issuance of letters of credit. Additionally, SACS is required to fund a restricted account for the payment of certain costs in the event of contract termination. The Company has guaranteed the payment of 50% of amounts which may be payable by SACS into the restricted account and provided a standby letter of credit of 6.5 million South African Rand, or approximately \$1.1 million as security for the Company’s guarantee. The Company’s obligations under this guarantee expire upon SACS’ release from its obligations in respect of the restricted account under its debt agreements. No amounts have been drawn against these letters of credit, which are included in the Company’s outstanding letters of credit under its Revolving Credit Facility.

The Company has agreed to provide a loan of up to 20.0 million South African Rand, or approximately \$3.5 million (the “Standby Facility”) to SACS for the purpose of financing SACS’ obligations under its contract with the South African government. No amounts have been funded under the Standby Facility, and the Company does not anticipate that such funding will ever be required by SACS. The Company’s obligations under the Standby Facility expire upon the earlier of full funding or SACS’

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

release from its obligations under its debt agreements. The lenders’ ability to draw on the Standby Facility is limited to certain circumstance, including termination of the contract.

The Company has also guaranteed certain obligations of SACS to the security trustee for SACS lenders. The Company secured its guarantee to the security trustee by ceding its rights to claims against SACS in respect of any loans or other finance agreements, and by pledging the Company’s shares in SACS. The Company’s liability under the guarantee is limited to the cession and pledge of shares. The guarantee expires upon expiration of the cession and pledge agreements.

In connection with a design, build, finance and maintenance contract, the Company guaranteed certain potential tax obligations of a special purpose entity. The potential estimated exposure of these obligations is CAN\$2.5 million, or approximately \$2.1 million commencing in 2017. To secure this guarantee, the Company purchased Canadian dollar denominated securities with maturities matched to the estimated tax obligations in 2017 to 2021. The Company has recorded an asset and a liability equal to the current fair market value of those securities on its balance sheet.

The Company’s wholly-owned Australian subsidiary financed the development of a facility and subsequent expansion in 2003, with long-term debt obligations, which are non-recourse to the Company and total \$44.7 million and \$43.9 million at January 2, 2005 and December 28, 2003, respectively. The term of the non-recourse debt is through 2017 and it bears interest at a variable rate quoted by certain Australian banks plus 140 basis points. Any obligations or liabilities of the subsidiary are matched by a similar or corresponding commitment from the government of the State of Victoria. As a condition of the loan, the Company is required to maintain a restricted cash balance of AUD 5.0 million, which, at January 2, 2005, was approximately \$3.9 million. This amount is included in restricted cash and the annual maturities of the future debt obligation is included in non recourse debt. The debt amortization schedule requires annual repayments of \$1.7 million in 2005, \$1.9 million in 2006, \$2.1 million in 2007, \$2.4 million in 2008, \$2.7 million in 2009 and \$33.9 million thereafter.

9. Transactions with Correctional Properties Trust (“CPV”)

During fiscal 1998, 1999 and 2000, CPV acquired 11 correctional and detention facilities operated by the Company. There have been no purchase and sale transactions between the Company and CPV since 2000.

Simultaneous with the purchases, the Company entered into ten-year operating leases of these facilities from CPV. As the lease agreements are subject to contractual lease increases, the Company records operating lease expense for these leases on a straight-line basis over the term of the leases. Additionally, the lease contains three five-year renewal options based on fair market rental rates. The deferred unamortized net gain related to sales of the facilities to CPV at January 2, 2005, which is included in “Deferred Revenue” in the accompanying consolidated balance sheets is \$6.2 million with \$1.9 million short-term and \$4.3 million long-term. The gain is being amortized over the ten-year lease terms. The Company recorded net rental expense related to the CPV leases of \$21.0 million, \$20.0 million and \$19.6 million in 2004, 2003 and 2002, respectively, excluding the Jena rental expense (See Note 10).

The future minimum lease commitments under the leases for these eleven facilities are as follows:

Fiscal Year	Annual Rental (In thousands)
2005	\$ 25,000
2006	25,082
2007	25,168
2008	16,866
2009	2,432
	<u>\$ 94,548</u>

In February 2005, the Company appointed a new board member who previously served on CPV’s board of directors.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

10. Commitments and Contingencies

During 2000, the Company’s management contract at the 276-bed Jena Juvenile Justice Center in Jena, Louisiana was discontinued by the mutual agreement of the parties. Despite the discontinuation of the management contract, the Company remains responsible for payments on the Company’s underlying lease of the inactive facility with CPV through 2009. In the fourth quarter of 2004, the Company incurred an operating charge of \$3.0 million to cover its anticipated losses under the lease until an alternative correctional use for the facility may be identified or a sublease for the facility may be in place. The Company has incurred additional operating charges in prior periods related to lease payments for the facility including an operating charge of \$5.0 million in third quarter 2003. The Company is actively pursuing various alternatives for the facility, including finding an alternative correctional use for the facility or subleasing the facility to other agencies of the federal and/or state government or another private operator. If the Company is unable to sublease or find an alternative correctional use for the facility an additional operating charge will be required. In accordance with FAS No. 146, all terminations initiated before December 31, 2002, must be accounted for under EITF No. 94-3 “Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity.” The current reserve for loss of \$5.8 million is sufficient to cover lease payments through January 2008. The remaining obligation on the Jena lease through the contractual term of 2009, exclusive of the reserve for losses through early 2008, is approximately \$4.3 million.

The Company owns and operates the 480-bed Michigan Youth Correctional Facility in Baldwin, Michigan. The Company operates this facility pursuant to a management contract with the Michigan Department of Corrections (“DOC”). Separately, the Company leases the facility to the State under a lease with an initial term of 20 years followed by two 5-year options. The DOC can terminate the management contract for this facility unilaterally without cause upon 60 days’ notice to the Company. However, the State can only terminate its lease of the facility prior to the expiration of the term of the lease if the State Legislature of Michigan, in its appropriation to the state department of corrections, expressly prohibits the department from spending any appropriated moneys for lease payments. In February 2005, the Governor of Michigan proposed an executive order to the State Legislature to, among other things, de-appropriate funds for the payment of operation and lease payments for the facility. The State Legislature did not approve this order. However, the Company believes that the Governor of Michigan may submit an additional order or include a request in the State’s 2006 fiscal year budget that no appropriations be made for the payment of operation and lease payments for the facility.

If, at any time in a future appropriation to the state department of corrections, the State Legislature of Michigan expressly prohibits the department from spending any appropriated moneys for lease payments related to the facility, the State will have the right to terminate the lease. Additionally, in the event of such termination, the DOC would not have an interest in the Company’s operation of the facility and would likely terminate the management contract. The Company is undertaking efforts to seek continued appropriations by the State Legislature for the lease and the management contract for this facility, and, as a contingency, is undertaking efforts to find an alternative use for the facility with another state or federal agency. However, there can be no assurances that these efforts will be successful. In the event that the lease is terminated and operations cease at the facility, the Company’s financial condition and results of operations would be materially adversely affected. In the event of such termination, the Company would assess the facility for impairment in accordance with FAS 146 “Accounting for Costs Associated with Exit or Disposal Activities.”

The Company’s contract with the Department of Homeland Security Bureau of Immigration and Customs Enforcement (“ICE”) for the management of the 200-bed Queens Private Correctional Facility is set to expire March 31, 2005. ICE has the option to renew the contract on an annual basis and must submit its notice to renew within sixty days of the start of a renewal period. The Company has received notice of an extension through June 30, 2005 on the current terms and conditions of the existing contract. However, ICE has not exercised its right to renew the option for the contract period April 1, 2005 through March 31, 2006. During the year ended January 2, 2005, the contract for the Queens facility represented approximately 2% of the Company’s consolidated revenues. The Company has a non cancelable operating lease for the Queens facility with CPV through April 28, 2008, when the lease is scheduled to expire. The Company is currently in discussions with ICE regarding revised contract terms and conditions and hopes to obtain a full one-year extension of the facility contract. If the Company fails to obtain a full one-year contract extension with ICE or is unable to find an appropriate alternative correctional use for the facility or sublease the facil-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

ity, the Company may be required to record an operating charge related to a portion of the future lease costs with CPV in accordance with SFAS No. 146, “Accounting for Costs Associated with Exit or Disposal Activities.” The remaining lease obligation is approximately \$4.7 million through April 28, 2008.

Leases

The Company leases correctional facilities, office space, computers and vehicles under non-cancelable operating leases expiring between 2005 and 2013. The future minimum commitments under these leases exclusive of lease commitments related to CPV, are as follows:

Fiscal Year	Annual Rental <i>(In thousands)</i>
2005	\$ 7,929
2006	7,641
2007	7,640
2008	4,040
2009	4,068
Thereafter	14,477
	<u>\$ 45,795</u>

Rent expense was approximately \$14.4 million, \$12.5 million, and \$15.7 million for fiscal 2004, 2003, and 2002 respectively.

Litigation, Claims and Assessments

The Company was defending a wage and hour class action lawsuit (Salas et al v. WCC) filed on December 26, 2001 in California state court by ten current and former employees. In January 2005, this lawsuit was settled by a satisfaction of judgment and a release of all claims executed by the plaintiffs which was filed with the Superior Court of California in Kern County. As part of the settlement, the Company made a cash payment of approximately \$3.1 million and is required to provide certain non-cash considerations to current California employees who were included in the lawsuit. The non-cash considerations include a designated number of paid days off according to longevity of employment, modifications to the Company’s human resources department, and changes in certain operational procedures at the Company’s correctional facilities in California. The settlement encompasses all current and former employees in California through the approval date of the settlement and constitutes a full and final settlement of all actual and potential wage and hour claims against the Company in California for the period preceding July 29, 2004.

In June 2004, the Company received notice of a third-party claim for property damage incurred during 2002 and 2001 at several detention facilities that the Company’s Australian subsidiary formerly operated pursuant to its discontinued contract with DIMIA. The claim did not specify the amount of damages the third-party may be seeking. Although the claim is in the initial stages and the Company is still in the process of fully evaluating its merits, the Company believes that it has defenses to the allegations underlying the claim and intends to vigorously defend the Company’s rights. While the plaintiff in this case has not quantified its damage claim and the outcome of the matters discussed above cannot be predicted with certainty, based on information known to date, and management’s preliminary review of the claim, the Company believes that, if settled unfavorably, this matter could have a material adverse effect on the Company’s financial condition and results of operations. The Company is uninsured for any damages or costs that it may incur as a result of this claim, including the expenses of defending the claim.

The nature of the Company’s business exposes it to various types of claims or litigation against the Company, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, indemnification claims by our customers and other third parties, contractual claims and claims for personal injury or other damages resulting from contact with the Company’s facilities, programs, personnel or prisoners, including damages arising from a prisoner’s escape or from a disturbance or riot at a facility. Except as otherwise disclosed above, the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

Company does not expect the outcome of any pending claims or legal proceedings to have a material adverse effect on its financial condition, results of operations or cash flows.

Collective Bargaining Agreements

The Company had approximately twenty percent of its workforce covered by collective bargaining agreements at January 2, 2005. Collective bargaining agreements with nine percent of employees are set to expire in less than one year.

11. Share Purchase

On July 9, 2003, the Company purchased all 12 million shares of the Company’s common stock beneficially owned by Group 4 Falck, the Company’s former 57% majority shareholder, for \$132.0 million in cash pursuant to the terms of a share purchase agreement, dated April 30, 2003, by and among the Company, Group 4 Falck, TWC, and Tuhnekaw, Inc., an indirect wholly-owned subsidiary of Group 4 Falck (the “Transaction”).

Upon the closing of the Transaction, an agreement dated March 7, 2002 between the Company, Group 4 Falck and TWC, which governed certain aspects of the parties’ relationship, was terminated and the two Group 4 Falck representatives serving on the Company’s board of directors resigned. Also terminated upon the closing of the Transaction was a March 7, 2002 agreement between the Company and Group 4 Falck wherein Group 4 Falck agreed to reimburse the Company for up to 10% of the fair market value of the Company’s interest in its UK joint venture in the event that litigation related to the sale of TWC to Group 4 Falck were to result in a court order requiring the Company to sell its interest in the joint venture to its partner, Serco Investments Limited (“Serco”).

In addition, in connection with the Transaction, the services agreement, dated October 28, 2002, between the Company and TWC, terminated effective December 31, 2003, and no further payments for periods thereafter will be due from the Company to TWC under the services agreement.

A sublease for the Company’s former headquarters between TWC, as sub lessor, and the Company, as sub lessee, also terminated ten days after closing of the Transaction. The Company relocated its corporate headquarters to Boca Raton, Florida on April 14, 2003.

In April 1994, the Company’s Board of Directors authorized 10,000,000 shares of “blank check” preferred stock. The Board of Directors is authorized to determine the rights and privileges of any future issuance of preferred stock such as voting and dividend rights, liquidation privileges, redemption rights and conversion privileges.

12. Earnings Per Share

The table below shows the amounts used in computing earnings per share (“EPS”) in accordance with FAS No. 128 and the effects on income and the weighted average number of shares of potential dilutive common stock.

Fiscal Year	2004	Restated 2003	Restated 2002
	<i>(In thousands, except per share data)</i>		
Net income	\$ 16,815	\$ 44,761	\$ 21,120
Basic earnings per share:			
Weighted average shares outstanding	9,384	15,618	21,148
Per share amount	\$ 1.79	\$ 2.87	\$ 1.00
Diluted earnings per share:			
Weighted average shares outstanding	9,384	15,618	21,148
Effect of dilutive securities:			
Employee and director stock options	354	211	216
Weighted average shares assuming dilution	9,738	15,829	21,364
Per share amount	\$ 1.73	\$ 2.83	\$ 0.99

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

For fiscal 2004, options to purchase 362,447 shares of the Company’s common stock with exercise prices ranging from \$21.50 to \$26.88 per share and expiration dates between 2006 and 2014 were outstanding at January 2, 2005, but were not included in the computation of diluted EPS because their effect would be anti-dilutive.

For fiscal 2003, options to purchase 735,600 shares of the Company’s common stock with exercise prices ranging from \$15.40 to \$29.56 per share and expiration dates between 2006 and 2012 were outstanding at December 28, 2003, but were not included in the computation of diluted EPS because their effect would be anti-dilutive.

For fiscal 2002, options to purchase 784,600 shares of the Company’s common stock with exercise prices ranging from \$14.69 to \$26.88 per share and expiration dates between 2006 and 2012 were outstanding at December 29, 2002, but were not included in the computation of diluted EPS because their effect would be anti-dilutive.

13. Stock Options

The Company has four stock option plans: The Wackenhut Corrections Corporation 1994 Stock Option Plan (First Plan), the Wackenhut Corrections Corporation 1994 Stock Option Plan (Second Plan), the 1995 Non-Employee Director Stock Option Plan (Third Plan) and the Wackenhut Corrections Corporation 1999 Stock Option Plan (Fourth Plan). The Wackenhut Corrections Corporation 1994 Stock Option Plan (First Plan) has expired and has no outstanding stock options.

Under the Second Plan and Fourth Plan, the Company may grant options to key employees for up to 1,500,000 and 1,150,000 shares of common stock, respectively. Under the terms of these plans, the exercise price per share and vesting period is determined at the sole discretion of the Board of Directors. All options that have been granted under these plans are exercisable at the fair market value of the common stock at the date of the grant. Generally, the options vest and become exercisable ratably over a four-year period, beginning immediately on the date of the grant. However, the Board of Directors has exercised its discretion and has granted options that vest 100% immediately. All options under the Second Plan and Fourth Plan expire no later than ten years after the date of the grant.

Under the Third Plan, the Company may grant up to 110,000 shares of common stock to non-employee directors of the Company. Under the terms of this plan, options are granted at the fair market value of the common stock at the date of the grant, become exercisable immediately, and expire ten years after the date of the grant.

A summary of the status of the Company’s stock option plans is presented below.

Fiscal Year	2004		2003		2002	
	Shares	Wtd. Avg. Exercise Price	Shares	Wtd. Avg. Exercise Price	Shares	Wtd. Avg. Exercise Price

	1,591,509	6.1	15.49	1,381,692	15.26

The Company had 19,900 options available to be granted at January 2, 2005 under the aforementioned stock plans.

14. Retirement and Deferred Compensation Plans

The Company has two noncontributory defined benefit pension plans covering certain of the Company’s executives. Retirement benefits are based on years of service, employees’ average compensation for the last five years prior to retirement and social security benefits. Currently, the plans are not funded. The Company purchased and is the beneficiary of life insurance policies for certain participants enrolled in the plans.

In 2001, the Company established non-qualified deferred compensation agreements with three key executives. These agreements were modified in 2002, and again in 2003. The current agreements provide for a lump sum payment when the executives retire, no sooner than age 55.

The following table summarizes key information related to these pension plans and retirement agreements which includes information as required by FAS 132, “Employers’ Disclosures about Pensions and Other Postretirement Benefits”. The table illustrates the reconciliation of the beginning and ending balances of the benefit obligation showing the effects during the period attributable to each of the following: service cost, interest cost, plan amendments, termination benefits, actuarial gains and losses. The assumptions used in the Company’s calculation of accrued pension costs are based on market information and the Company’s historical rates for employment compensation and discount rates, respectively.

In accordance with FAS 132, the Company has also disclosed contributions and payment of benefits related to the plans. There were no assets in the plan at January 2, 2005 or December 28, 2003. All changes as a result of the adjustments to the accumulated benefit obligation are included below and shown net of tax in the Consolidated Statement of Shareholders’ Equity and Comprehensive Income. There were no significant transactions between the employer or related parties and the plan during the period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

	2004	2003

Total Recognized	\$ (10,563)	\$ (7,962)

	Fiscal 2004	Fiscal 2003
Components of Net Periodic Benefit Cost		
Service Cost	\$ 314	\$ 253
Interest Cost	836	768
Amortization of:		
Unrecognized Prior Service Cost	1,078	1,079
Unrecognized Net Loss	404	178
Net Periodic Pension Cost	\$ 2,632	\$ 2,278
Weighted Average Assumptions for Expense		
Discount Rate	5.75%	6.25%
Expected Return on Plan Assets	N/A	N/A
Rate of Compensation Increase	5.50%	5.50%

The accumulated benefit obligation for all defined benefit plans was \$11.7 million and \$11.4 million at January 2, 2005 and December 28, 2003, respectively. The accrued benefit liability for the three plans at January 2, 2005 are as follows, \$1.1 million for the executive retirement plan, \$0.6 million for the officer retirement plan and \$8.9 million for the three key executives’ plans.

The Company has established a deferred compensation agreement for non-employee directors, which allow eligible directors to defer their compensation in either the form of cash or stock. Participants may elect lump sum or monthly payments to be made at least one year after the deferral is made or at the time the participant ceases to be a director. The Company recognized total compensation expense under this plan of \$0.1 million, \$0.1 and \$0 million for 2004, 2003, and 2002, respectively. Payouts under the plan were \$0.1 and \$0 million in 2004 and 2003 respectively. The liability for the deferred compensation was \$0.5 million and \$0.5 million at year-end 2004 and 2003, respectively, and is included in “Accrued expenses” in the accompanying consolidated balance sheets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

The Company also has a non-qualified deferred compensation plan for employees who are ineligible to participate in its qualified 401(k) plan. Eligible employees may defer a fixed percentage of their salary, which earns interest at a rate equal to the prime rate less 0.75%. The Company matches employee contributions up to \$400 each year based on the employee’s years of service. Payments will be made at retirement age of 65 or at termination of employment. The Company recognized expense of \$0.1 million, \$0.1 million and \$0.2 million in 2004, 2003, and 2002, respectively. The liability for this plan at year-end 2004 and 2003 was \$2.1 million and \$1.6 million, respectively, and is included in accrued expense in the accompanying consolidated balance sheets.

The Company expects to make the following benefit payments based on eligible retirement dates:

Fiscal Year	Pension Benefits
	(In thousands)
2005	\$ 11,052
2006	45
2007	60
2008	65
2009	121
2010-2014	975
	\$ 12,318

15. Business Segment and Geographic Information

The Company operates in one industry segment encompassing the development and management of privatized government institutions located in the United States, Australia, which includes New Zealand, South Africa and the United Kingdom.

The Company operates and tracks its results in geographic operating segments. Information about the Company’s operations in different geographical regions is shown below. Revenues are attributed to geographical areas based on location of operations and long-lived assets consist of property, plant and equipment.

In 2004, the allocation of certain general and administrative expenses was changed. Prior year amounts have been reclassified to be consistent with the current year presentation.

Fiscal Year	2004	Restated 2003	Restated 2002
		(In thousands)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

The Company’s international operation represents its wholly owned Australian subsidiaries, and one of the Company’s joint ventures in South Africa, SACM. Through the Company’s wholly owned subsidiary, GEO Group Australia Pty. Limited, the Company currently manages six correctional facilities, including a facility in New Zealand. Through the Company’s joint venture SACM, the Company currently manages one facility.

Equity in Earnings of Affiliates

Equity in earnings of affiliates for 2004 includes one of our joint ventures in South Africa, SACS. Equity in earnings of affiliates for 2003 and 2002 represent the operations of the Company’s 50% owned joint ventures in the United Kingdom (Premier Custodial Group Limited) and SACS. These entities and their subsidiaries are accounted for under the equity method.

The Company sold its interest in Premier Custodial Group Limited on July 2, 2003 for approximately \$80.7 million and recognized a gain of approximately \$61.0 million. Total equity in the undistributed earnings for Premier Custodial Group Limited, before income taxes, for fiscal 2003, and 2002 was \$3.0 million, and \$10.2 million, respectively.

The following table summarizes certain financial information pertaining to this joint venture for the period from December 30, 2002 through the date of sale of the UK joint venture on July 2, 2003 and for the fiscal year ended December 29, 2002 (in thousands):

	2003	2002
Statement of Operations Data		
Revenues	\$ 104,080	\$ 153,533
Operating (loss) income	(2,981)	7,992
Net income	\$ 3,486	\$ 11,264

A summary of financial data for SACS is as follows:

Fiscal Year	2004	2003	2002
		(In thousands)	
Statement of Operations Data			
Revenues	\$ 31,175	\$ 24,801	\$ 8,073
Operating income	11,118	7,528	226
Net (loss) income	—	(817)	226
Balance Sheet Data			
Current assets	14,250	8,154	
Noncurrent assets	74,648	61,342	
Current liabilities	5,094	2,896	
Non current liabilities	83,474	69,749	
Shareholders’ equity (deficit)	330	(3,150)	

SACS commenced operation in fiscal 2002. Total equity in undistributed loss for SACS before income taxes, for fiscal 2004, 2003 and 2002 was \$(0.1) million, \$(0.4) million, and \$(1.5) million, respectively.

Business Concentration

Except for the major customers noted in the following table, no single customer provided more than 10% of the Company’s consolidated revenues during fiscal 2004, 2003 and 2002:

Customer	2004	2003	2002
Various agencies of the U.S. Federal Government	27 %	27 %	27 %
Various agencies of the State of Texas	9 %	12 %	13 %
Various agencies of the State of Florida	12 %	12 %	14 %

Concentration of credit risk related to accounts receivable is reflective of the related revenues.

Other, net	113	(47)
Total (liability) asset	\$ (1,489)	\$ 5,372

The exercise of non-qualified stock options which have been granted under the Company’s stock option plans give rise to compensation which is includable in the taxable income of the applicable employees and deducted by the Company for federal and state income tax purposes. Such compensation results from increases in the fair market value of the Company’s common stock subsequent to the date of grant. In accordance with APB No. 25, such compensation is not recognized as an expense for financial accounting purposes and related tax benefits are credited directly to additional paid-in-capital.

The 2004 income tax expense includes a benefit from the realization of approximately \$3.4 million of foreign tax credits related to the gain on sale of PCG in July 2003. This benefit was realized in 2004 as a result of the Company completing its analysis of its earnings and profits in PCG and determining the amount of available foreign tax credits which could be applied against the gain from the sale.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Fiscal Years Ended January 2, 2005, December 28, 2003, and December 29, 2002

During 2004, the Company adjusted its tax provision to reflect an adjustment to its treatment of certain executive compensation. During the fiscal years ended 2003 and 2002, along with the period ending June 27, 2004, the Company calculated its tax provision as if its executive bonus plan met the Internal Revenue Service code section 162(m) requirements for deductibility. During 2004, the Company discovered that the plan did not meet certain specific requirements of section 162(m). The Company recognized \$1.4 million of additional tax provision under section 162(m) for 2004, including \$0.6 million to correct its tax provision for the fiscal years ended 2003 and 2002.

On October 22, 2004, the President of the United States signed into law the American Jobs Creation Act of 2004 (“AJCA”). A key provision of the AJCA creates a temporary incentive for U.S. corporations to repatriate undistributed income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign corporations. In December 2004, the Company repatriated approximately \$17.0 million in incentive dividends, as defined in the AJCA, and recognized an income tax benefit of \$0.2 million. On November 19, 2004, a technical correction bill, the Tax Technical Corrections Act of 2004, was introduced in the House of Representatives to clarify key elements in the AJCA. In January 2005, the Treasury Department began to issue the first of a series of clarifying guidance documents related to the AJCA. If a technical correction bill similar to the Tax Technical Corrections Act of 2004 is enacted, the Company would recognize an additional tax benefit of \$1.7 million. While it is expected that new legislation will be introduced into Congress to provide additional clarifying language on key elements of the provision, there can be no assurance that such legislation will be enacted.

17. Related Party Transactions with The Wackenhut Corporation

Related party transactions occurred in the past in the normal course of business between the Company and TWC. Such transactions included the purchase of goods and services and corporate costs for management support, office space, insurance and interest expense. No related party transactions occurred during fiscal year 2004.

The Company incurred the following expenses related to transactions with TWC in the following years (in thousands):

Fiscal Year	2003	2002
General and administrative expenses	\$ 1,750	\$ 2,591
Casualty insurance premiums	—	17,973
Rent	501	514
Net interest expense	—	32
	\$ 2,251	\$ 21,110

General and administrative expenses represented charges for management and support services. TWC previously provided various general and administrative services to the Company under a services agreement, including payroll services, human resources support, tax services and information technology support services through December 31, 2002. Beginning January 1, 2003, the only service provided was for information technology support through year-end 2003. The Company began handling information technology support services internally effective January 1, 2004, and no longer relies on TWC for any services. All of the services formerly provided by TWC to the Company were pursuant to negotiated annual rates with TWC based upon the level of service to be provided under the services agreement. The Company believes that such rates were on terms no less favorable than the Company could obtain from unaffiliated third parties.

The Company also leased office space from TWC for its corporate headquarters under a non-cancelable operating lease that expired February 11, 2011. This lease was terminated effective July 19, 2003 as a result of the share purchase agreement.

18. Selected Quarterly Financial Data (Unaudited)

The Company’s selected quarterly financial data has been restated, see Note 2. A summary of the restated data for the fiscal years ended January 2, 2005 and December 28, 2003, is as follows:

	First Quarter			Second Quarter		
	Unadjusted	Restated	Change	Unadjusted	Restated	Change

- a)

Includes a \$4.2 million pre-tax reduction in our general liability, auto liability and worker’s compensation insurance reserves.
- b)

Includes 14 weeks of operations.
- c)

Includes a \$3.0 million write-off for our Jena, Louisiana facility.
- d)

Includes a gain of approximately \$61.0 million for the sale of the UK joint venture (See Note 15), a pre-tax charge of approximately \$5.0 million related to the Jena, Louisiana lease and a charge of approximately \$2.0 million related to the write-off of deferred financing fees from the extinguishment of debt.
- e)

Earnings per share for the third and fourth quarter of 2003 reflect lower weighted average shares outstanding due to the purchase of the 12,000,000 shares from Group 4 Falck in July 2003 (See Note 11).

Forward-Looking Statements - Safe Harbor

This Annual Report contains "forward-looking" statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. "Forward-looking" statements are any statements that are not based on historical information. Statements other than statements of historical facts included in this report, including, without limitation, statements regarding our future financial position, business strategy, budgets, projected costs and plans and objectives of management for future operations, are "forward-looking" statements. Forward-looking statements generally can be identified by the use of forward-looking terminology such as "may," "will," "expect," "anticipate," "intend," "plan," "believe," "seek," "estimate" or "continue" or the negative of such words or variations of such words and similar expressions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements and we can give no assurance that such forward-looking statements will prove to be correct. Important factors that could cause actual results to differ materially from those expressed or implied by the forward-looking statements, or "cautionary statements," include, but are not limited to: (1) our ability to timely build and/or open facilities as planned, profitably manage such facilities and successfully integrate such facilities into our operations without substantial additional costs; (2) the instability of foreign exchange rates, exposing us to currency risks in Australia, New Zealand and South Africa, or other countries in which we may choose to conduct our business; (3) an increase in unreimbursed labor rates; (4) our ability to expand and diversify our correctional and mental health services; (5) our ability to win management contracts for which we have submitted proposals and to retain existing management contracts; (6) our ability to raise new project development capital given the often short-term nature of the customers' commitment to use newly developed facilities; (7) our ability to reactivate our Jena, Louisiana facility, or to sublease or coordinate the sale of the facility with the owner of the property, Correctional Properties Trust, or CPV; (8) our ability to accurately project the size and growth of the domestic and international privatized corrections industry; (9) our ability to estimate the government's level of dependency on privatized correctional services; (10) our ability to develop long-term earnings visibility; (11) our ability to obtain future financing at competitive rates; (12) our exposure to rising general insurance costs; (13) our exposure to claims for which we are uninsured; (14) our exposure to rising inmate medical costs; (15) our ability to maintain occupancy rates at our facilities; (16) our ability to manage costs and expenses relating to ongoing litigation arising from our operations; (17) our ability to accurately estimate on an annual basis, loss reserves related to general liability, workers compensation and automobile liability claims; (18) the ability of our government customers to secure budgetary appropriations to fund their payment obligations to us; and (19) other factors contained in our filings with the Securities and Exchange Commission, or the SEC, including, but not limited to, those detailed in our annual report on Form 10-K, our Form 10-Qs and our Form 8-Ks filed with the SEC. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements referred to above.
